Through an arrangement with National Selective Service, steps are being taken to facilitate the transfer of individuals employed in non-essential industries to jobs in war industry through the medium of part-time evening classes.

Minimum Age of Student Trainees for Farms

A recent Order in Council (P.C. 3868, May 10, 1943) amends the War Emergency Training agreements entered into between the Dominion and the provinces by lowering the minimum age of students who may be provided training in farm work during the summer vacation period. The relevant paragraph reads as follows:

The Province will select for training for work in War Industries persons, male or female, who shall have reached their sixteenth birthdays, and who shall be British Subjects or Nationals of other countries approved by the parties hereto, without discrimination or favour in relation to the racial origin, religious views or political affiliations of such persons.

In view of the shortage of farm workers in certain provinces the following sentence has been added by the new Order:

In training secondary school pupils for farm work during the vacation period, the minimum age shall be 14 years.

Farm Training

To meet an anticipated shortage of farm help in the Prairie Provinces, particularly at harvest time, a co-operative arrangement has been concluded with the Province of Alberta by which older students from the secondary schools who are willing to work on the farms during their vacation period will be given one month's preliminary training during which time they will receive subsistence allowances. This training may be given either on a farm or in certain selected centres throughout the province. At these centres the training will be designed to develop physical fitness of the boys and to give them certain basic instruction in various types of farm work.

Training is also being given to selected individuals in the construction of hay and grain sweeps which are designed to reduce very considerably the amount of man power needed for haying and harvesting operations. Similar plans will likely be put into effect in the Province of Saskatchewan.

Costs of War Emergency Training

During the fiscal year ending March 31, 1943, the approximate cost of War Emergency Training Classes throughout the country was \$6,500,000 for approximately 3,655,000 man-days' training, or a gross cost of \$1.78 per trainee day. This cost was made up as follows:

Subsistence allowances	77c.
Salaries of instructors and supervisors	66c.
Materials, supplies and hand tools....	13c.
Capital expenditures for machinery and equipment; alterations to buildings	5c.
Other general operating costs.....	17c.

These figures include the operation of classes for tradesmen for the Army, Navy and Air Force, full-time pre-employment classes for industry, part-time industrial classes and the operation of plant schools. The gross cost was approximately the same as for the previous fiscal year. There was an increase in the cost of instruction and supervision but a decrease in expenditures for supplies and hand tools.

Activities of Unemployment Insurance Commission

Staff Training Organization set up—Insurance Registration— Claims for Benefit

THE need for a well defined staff training policy and program at all levels of the Unemployment Insurance Commission organization has been felt for some time. May, 1943, saw the realization of this long-felt need and as the result of a conference of Staff Training Advisors held at Head Office, Ottawa, May 24-29, plans were formulated to immediately put into effect a progressive Local Office training program comprised of "Induction" and "On-the-job" training.

Staff Training Advisors have been appointed for each of the five regions, as well as for the Toronto Local Office. It is expected that the appointment of a Staff Training Advisor for the Montreal Local Office will follow in the very near future. The following appointees attended the Ottawa conference: J. A. Trudelle, Quebec Region; C. S. Raper, Ontario Region; Leo. J. Curry, Maritime Region; J. B. Larway, Prairie Region; E. R. Bradbury, Pacific Region; Robt. Stevenson, Toronto Local Office.

The conference was under the guidance and direction of Mr. T. Parkinson, recently appointed as Senior Staff Training Advisor with Headquarters in Ottawa, assisted by a number of the Head Office Departmental Officials. Staff Training is a section of the Operations Division, headed by Dr. E. P. Laberge.

The function of these Advisors who will specialize on training standards, techniques and methods is of a consultative rather than a supervisory nature. They will work through and with the line officers in endeavouring to secure increased efficiency of operation in the local offices by the promotion of scientific methods of instruction.

Local offices grade 2 and above will be encouraged to set up Staff Training Faculties or Committees, drawn from their own personnel.

Some of the benefits of this program will be immediately apparent, while others will be reflected in the operation over a period of time.

Insurance Registration

Reports from Local Offices of the Unemployment Insurance Commission showed that at June 1, 1943, 167,475 employers establishments and 3,074,015 insured persons were registered.

With the exception of one relatively small group, uninsured persons are no longer being registered by the Unemployment Insurance Commission. Statistics with regard to such registrations are, therefore, no longer available.

PROGRESS OF REGISTRATION AT JUNE 1, 1943

Region	Employers Establishments Registered	Insured Persons Registered
Maritimes	12,535	239,007
Quebec	49,173	945,263
Ontario	60,487	1,203,612

TOTAL.....	5,133	5,126	3,431	777	918

¹ Cumulative figures of claims received for adjudication for the period February 1, 1942, to March 31, 1943, were published on page 653 of the May issue of the Labour Gazette. In this and succeeding issues the figures will be cumulative for the current fiscal year only.

4,095 claims were received at the nine offices of the Commission, which together with the 1,031 claims pending at March 31, made a total of 5,126 claims for adjudication. Of these, 3,431 claims were allowed, 777 claims were not allowed, and 918 were pending at the end of the month.

An analysis of the 777 claims not allowed by insurance officers reveals the following reasons for non-allowance: 209 claims under Section 28 (i) in which the applicants had made insufficient contributions; 40 claims under Section 28 (ii) in which 32 applications were not made in the prescribed manner, and 8 of the claimants were not unemployed; 14 claims under Section 28 (iii) in which 9 claimants were not capable of work and 5 were not available for work; 2 claims under Section 43 (b) (i) for refusal of offer of work; 3 claims under Section 43 (b) (ii) for neglect of opportunity to work; 501 claims under Section 43 (c) in which 50 were discharged due to their own misconduct, and 451 were disqualified for

voluntarily leaving without just cause; 1 under Section 43 (d) for being under 16 years of age; 7 under Section 43 (f), 6 of which were in class "O" contributions, and 1 for other reasons.

Appeals and References

During the month of April there were 118 references and 11 appeals made by claimants to Courts of Referees. In addition there were 4 references by insurance officers to Courts of Referees; and 110 references and appeals which had not been heard at March 31. Of the 243 cases, 126 were heard, 112 had not yet been heard at the end of the month, and 5 were withdrawn. The Courts of Referees allowed 42 claims and disallowed 84.

Appeals to Umpire

There were no appeals to the Umpire during the month. Two appeals remained pending as from March 31, 1943.

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of April, as reported by employers.

—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

This month's article shows a slight decrease in employment. Reports were submitted by 13,555 establishments. These firms employed a total of 1,809,081 persons at the beginning of April, 9,570 fewer than at the beginning of March. This decline was in conformity with the trend in 18 of the previous 22 years of the record but was below average in extent. It took place largely in logging and construction, mining also being quieter.

The index number of employment (based on the average for the calendar year 1926 as 100) stood at 180.5, as compared with 181.5 in the preceding month. A year previously, at April 1, 1942, the index registered 165.2. At the outbreak of war it stood at 119.6.

The same employers also submit each month information regarding payrolls, which is incorporated in this article. The per capita average wage in the Canadian industries submitting returns rose from \$30.72 a week in the last report to a new high of \$31.09 at April 1, 1943. The figure for April 1, 1942 had been \$28.41.

Employment conditions at the end of May as reported by Employment and Selective Service Offices.—Reports from the Employment and Selective Service Offices of the Unemployment Insurance Commission give a brief survey of the employment situa-

tion in various industries at the end of May. These reports describe employment conditions in the Maritimes, Quebec, Ontario, the Prairie Provinces, and British Columbia.

Applications for employment; vacancies, and placements; April.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

During the four week period ending April 29, Employment and Selective Service Offices reported an increase in the daily average of placements in employment, both when compared with the preceding five weeks and with the month of April, 1942. With the exception of a decline in logging, all industrial groups showed gains in placements under the first comparison and there were marked advances over April, 1942, the most pronounced being in manufacturing, transportation and trade. During the four weeks under review there were 240,025 vacancies reported, 206,022 applications for employment and 144,373 placements effected in regular and casual employment. The marked increase over last year was due to National Selective Service Regulations under which employers seeking workers, and persons desiring employment, must notify Employment and Selective Service Offices.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of May, 1943, the percentage of unemployment among trade union members was 1.0, as compared with percentages of 1.3 in April, and 3.3 in May a year ago. The May percentage was based on returns compiled from 2,258 labour organizations with a total membership of 423,590 persons.

The Employment Situation at the Beginning of April, 1943, as Reported by Employers

INDUSTRIAL employment at the beginning of April showed general curtailment, in conformity with the trend in 18 of the previous 22 years of the record. The decline, which was below-average in extent, took place very largely in logging and construction, from which some 12,700 and 4,900 persons, respectively, were released by the co-operating firms. Mining also was quieter. Heightened activity was indicated in the remaining industrial groups the greatest expansion was in manufacturing, transportation and trade, with smaller gains in services. The general increases, however, were moderate in all cases, that of 3,874 workers in manufacturing being the smallest seasonal advance indicated since the outbreak of war. The durable goods industries reported the addition of some 4,000 workers, but there was a slight falling-off in other classes.

Data were tabulated by the Dominion Bureau of Statistics from 13,555 firms, whose employees numbered 1,809,081 at April 1, compared with 1,818,652 at the beginning of March; this was a reduction of 9,570, or 0.5 per cent. The weekly payrolls distributed by these establishments amounted to \$56,240,800, exceeding by \$367,115, or 0.7 per cent, the disbursements reported at March 1. The general per capita weekly average rose from \$30.72 at that date, to a new high of \$31.09 at April 1. This increase is partly seasonal in character, resulting to some extent from the release of persons in the lower brackets of earnings; on the other hand, the latest figures of aggregate and average weekly earnings were adversely affected to some extent by strikes in various parts of the country. The April 1, 1942, average had been \$28.41.

The contraction in employment at the date under review slightly lowered the crude index; based on the 1926 average as 100, this stood at 180.5, as compared with 181.5 in the preceding month, and 165.2 at April 1, 1942. Since then, there has been a gain of 9.3 per cent in employment with an accompanying rise of 18.7 per cent in the aggregate weekly payrolls. As already stated, the decrease in employment at April 1, 1943, was rather less than average according to the experience of past years, so that the seasonally-adjusted index showed an upward movement, advancing from 189.1 at March 1, to 191.2 at the date under review.

Payrolls

As already stated, the weekly payrolls reported at April 1 by the firms furnishing statistics aggregated \$56,240,800, as compared with \$55,873,685 distributed on or about March

1. The gain amounted to 0.7 per cent. The weekly average earnings of the typical individual in recorded employment rose from their previous maximum of \$30.72 at March 1 to \$31.09 at the date under review. The April 1, 1942, figure had been \$28.41.

Including the figures for financial institutions, the most recent survey shows that the total number of persons in recorded employment in the nine leading industrial groups was 1,872,310, as compared with 1,882,018 at the beginning of March. The weekly payrolls of these workers totalled \$58,201,627 at April 1, as compared with \$57,852,799 in the preceding report. The per capita average for the nine main industries, including finance, was \$31.09, as compared with \$30.74 at the beginning of March, and \$28.47 at April 1, 1942. The latter two averages were slightly higher than those given in the preceding paragraph for the eight leading industries, for which records of employment are available for a lengthy period, so that they are used in the general comparisons of this bulletin.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the eight leading industrial cities, and gives comparisons as at March 1, 1943, and April 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The report indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 18.1 per cent, while the aggregate weekly earnings of these workers are higher by 44.1 per cent. (Table I). Including finance, the gain in employment from June 1, 1941, to April 1, 1943, amounted to 17.5 per cent, and that in payrolls to 42.8 per cent.

From April 1, 1942, to April 1, 1943, there was an increase of 9.3 per cent in employment in the eight industries, accompanied by that of 18.7 per cent in the weekly payrolls. The explanation previously given for the much greater rise in the latter than in employment may again be stated:—(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the

extension of the system of paying a cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been increased on more than one occasion since its institution, and (3) the progressive up-grading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been granted. In spite of these main factors reacting favourably upon the earnings of the typical wage-earner, the average weekly pay envelope, as a result of the continued dilution of labour and other factors, has not shown advances commensurate with those in the index of aggregate payrolls. Thus, the latter has risen by 18.7 per cent from April 1, 1942, while the index of per

capita earnings has increased by 9.4 per cent in the 12 months.

The effect of wartime demand for manufactured commodities is seen in the growth in employment and payrolls in factories, which in the period of observation has greatly exceeded that in the non-manufacturing industries; where the index of employment in the former has risen by almost 33.4 per cent from June 1, 1941, that of payrolls has advanced by 64.5 per cent. The weekly earnings of the typical individual engaged in factory work have increased by practically 24.2 per cent, while the all-industries' average has risen by 22.3 per cent. The factors given above as influencing the general trends have had an

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

even greater influence in the case of manufacturing.

The expansion in employment and payrolls in the production of durable goods has been particularly noteworthy in the months for which data are available; in this class, the index of employment shows a gain of 52.7 per cent, accompanied by an increase of 91.6 per cent in the salaries and wages distributed in the interval from June 1, 1941, to April 1, 1943. Although there has recently been some contraction in certain non-durable goods, the index number of employment in this group at April 1 was higher by 16.4 per cent than that indicated at June 1, 1941, since when there has been an increase of 36.6 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Employment and Payrolls by Industries

Manufacturing.—The upward trend in manufacturing continued in evidence at the beginning of April, but the number of persons added to the working forces was smaller than usual for the season. Statistics were tabulated from 7,610 plants employing 1,168,377 workers, as compared with 1,164,502 at March 1. With rare exceptions, this gain is the smallest between any two months in the period since the outbreak of war; it was also decidedly less than at April 1 in any other year since 1939. The increase raised the index, (1926=100), from 223.4 at March 1 to 224.1 at the date under review, when it was 12.4 per cent higher than that of 199.4 at the first of April in 1942. Since the gain was below-average in extent, the seasonally-adjusted index declined, falling from 228.2 at March 1 to 226.0 at the date under review; this is the third month in succession in which the seasonally-corrected curve has been lowered.

The weekly salaries and wages paid on or about April 1 by the co-operating firms totalled \$37,119,355, a sum which was larger by 1.2 per cent than that of \$36,667,809 reported by the same employers at March 1. The per capita weekly average at \$31.77 was higher by 28 cents than that of \$31.49 at the preceding period of observation. The April 1, 1942, figure had been \$28.94. In the 12 months since then, the index of payrolls has risen by 22.9 per cent, a proportion which considerably exceeds that of 12.4 per cent in the index of

¹ Revised.

employment in manufacturing in the same period. The greater growth in the wages distributed by the co-operating establishments in the twelve months has been dealt with briefly in an earlier paragraph, under the heading "Payrolls".

Iron and steel works continued to add to their personnel, but the gain was, with only one exception, much smaller than in any other month since the war commenced. Shipyards, aircraft and other vehicle plants again showed heightened activity. Lumber, pulp and paper, chemical, electrical apparatus, non-ferrous metal

and miscellaneous manufacturing factories also reported moderate increases. On the other hand, animal food, tobacco, beverage and textile works were slacker. The falling-off in the last-named and in the animal foods division was contra-seasonal; that in tobacco factories was seasonal in character.

Recent monthly bulletins on employment and payrolls have pointed out that, largely as a result of wartime shortages of labour, the employment afforded by an increasingly large number of factories turning out consumers' goods has declined from the extraordinarily

¹ This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, as listed in Tables 4 and 7, with the exception of electric light and power.

high levels reached before the labour stringency became so marked; where only two of the industrial groups shown in Table IV had reported less activity at April 1, 1942, than at the same date in 1941, 17 divisions at the beginning of April, 1943, showed a reduction in the 12 months' comparison. Notable among these were the furniture, boot and shoe, pulp and paper and tobacco and beverage divisions, as well as several branches of textiles; in these groups, however, employment was still in greater volume than in the period prior to the outbreak of hostilities. The recent falling-off in many of these classes is more noteworthy for the reason that, in a great many cases, they are engaged in manufacturing commodities or parts directly required in the war effort. On the other hand, employment in an important number of industries has reached new all-time highs in recent months; especially important among those in this category are the chemical, beverage and the various metal-using industries.

Based on the weekly salaries and wages disbursed by the reporting employers at June 1, 1941, as 100, the index number of payrolls at April 1, 1943, was 164.5, as compared with 162.5 at the beginning of March, and 133.9 at April 1, 1942. There was accordingly an increase of 22.9 per cent in the reported payrolls during the 12 months, accompanied by that of 12.4 per cent in the index number of employ-

ment. An explanation has been given elsewhere in this report regarding the disparity in the rates of increase in employment and payrolls; the up-grading of employees as they acquire experience is a factor of particular and increasing importance in the manufacturing industries, tending to counteract the effect of the large scale dilution of labour resulting from the existing shortage. Another factor exercising unusual influence in the case of manufacturing is the changing industrial distribution of the wage-earners in recorded employment. The effect of this is clearly shown by a comparison of the figures for the durable and the non-durable goods groups. Thus, the payroll index in the former at the date under review was 34.1 per cent higher than at April 1, 1942, while that in the non-durable goods division was 8.8 per cent higher; in the 12 months, the index of employment in durable goods has risen by 23.5 per cent, while that in the non-durable classes has gained by only 1.2 per cent.

Since the institution of the payroll statistics early in 1941, there have been especially pronounced increases in the salaries and wages paid in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured products, electrical apparatus and tobacco industries. The advances in these industries have been accompanied by important though relatively smaller gains in employment. In

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns at the date under review.

practically every case, and notably in the industries just mentioned, the per capita averages in the various branches of manufacturing were considerably higher at the date under review than at April 1, 1942.

Logging.—Seasonal curtailment on a scale rather below the average at April 1 in the

experience of the years since 1920 was indicated in logging at the date under review, according to returns furnished by 501 employers whose working forces aggregated 56,458, as compared with 69,151 persons at March 1. Although this decline was smaller than the loss noted at April 1, 1942, the latest

TABLE IV—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Apr. 1 1943	Mar. 1 1943	Apr. 1 1942
Manufacturing	64.6	224.1	223.4	199.4

Retail.....	6.4	155.7	154.0	159.8
Wholesale.....	2.1	130.6	129.0	134.7
All Industries	100.0	180.5	181.5	165.2

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

index of employment, at 188.6, was below that of 208.7 at the same date of last year, there being a falling-off of 9.6 per cent in this comparison. The payrolls reported aggregated \$1,338,043, a decrease of 14.3 per cent from the total indicated at March 1, 1943; however, the latest figure exceeded the weekly aggregate indicated at the beginning of April last year, the latest payroll index being higher by 4.8 per cent.

The per capita average earnings rose from \$22.59 at March 1, 1943, to \$23.70 at the date under review, as compared with \$20.26 at April 1, 1942. It must be noted that the figures of aggregate and per capita earnings in logging do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings.

Mining.—Seasonal curtailment was indicated in mining; the extraction of coal and of metallic ores afforded rather less employment, while quarrying and the mining of other non-metallic minerals showed moderate improvement. Data were received from 442 operators, employing 75,112 workers, as compared with 75,850 at the beginning of March. The index in the mining group, at 160.6, was slightly lower than that of 162.2 in the preceding report, being also below that of 175.0 at the beginning of April, 1942; the falling-off in the latter comparison amounted to 8.2 per cent. In the year, the index of pay-rolls has shown a loss of 5.6 per cent. The weekly payrolls reported at the date under review amounted to \$2,741,124, as compared with \$2,795,007 in the preceding period of observation. The per capita figure declined from \$36.84 at March 1 to \$36.49 at April 1, as compared with \$35.11 at April 1, 1942.

Communications.—Employment in communications at the beginning of April showed no change on the whole, according to returns from 59 employers with a combined staff of 27,471 persons, two less than at March 1. A moderately upward movement is usual at April 1. The salaries and wages paid at the date under review aggregated \$782,555, as compared with \$792,737 in the preceding report. The per capita average declined from \$28.86 at March 1 to \$28.49 at the first of April, as compared with \$28.02 at the same date of last year. The latest index of employment, at 102.8, was slightly above that of 101.8 at April 1, 1942; in the 12 months' interval, the payroll index has risen by 2.7 per cent.

Transportation.—Further considerable gains were indicated in employment in transportation at April 1; statistics were tabulated from

588 employers whose working forces included 138,100 men and women, 2,853 more than at the beginning of March. All three branches—local, steam railway and shipping and stevedoring—showed heightened activity, the gain in the last-named being greatest. The index, at 109.4, was 10.5 per cent higher than that of 99.0 at April 1, 1942. The accompanying increase in the index of payrolls was 16.1 per cent. The weekly salaries and wages earned by the persons in recorded employment in transportation at April 1, 1943, amounted to \$5,033,630, as compared with \$4,920,308 in the preceding report. The latest per capita average was \$36.45, as against \$36.38 at March 1, and \$34.64 at April 1, 1942.

Construction and Maintenance.—Employment in building and railway construction and maintenance was curtailed at the beginning of April, when highway work showed heightened activity. The 1,522 contractors and branches furnishing returns reported 149,823 workers, as compared with 154,709 at March 1. The salaries and wages disbursed, however, rose from \$4,589, 578 at that date to \$4,606,364 at April 1. The gain, which was partly due to overtime work, raised the per capita average from \$29.67 in the preceding report, to \$30.75 at the beginning of April. The April 1, 1942, figure had been \$26.54. The index of employment, at 118.8 at the date under review, exceeded that of 98.0 at April 1, 1942, by 21.2 per cent, while the latest payroll index was higher by 36.4 per cent.

Services.—Seasonal advances were indicated in the services division at April 1; the gain, which was below-average for the time of year, took place in laundries and dry-cleaning establishments, there being a further falling-off in employment in hotels and restaurants. Information was received from 611 employers with a staff of 40,447 men and women, whose weekly payrolls at April 1 amounted to \$747,655; the 40,173 workers reported at March 1 had received \$736,014 for services rendered in the preceding week. The index of employment, at 181.2, was higher by 4.9 per cent than that of 172.8 at the beginning of April in 1942; the accompanying gain in the index of payrolls in the 12 months was 13.9 per cent. The latest per capita average was \$18.48, showing a small increase over the figure of \$18.32 at March 1, and also exceeding that of \$16.98 at April 1, 1942. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 61 per cent of the total reported in the service division as a whole at the beginning of April.

Trade.—Employment in merchandising establishments showed seasonal improvement of about normal proportions at April 1, when the 2,222 employers furnishing statistics reported a personnel of 153,293 men and women. This was greater by 1,747, or 1·2 per cent, than the number they had employed at March 1. The salaries and wages disbursed at the latest date amounted to \$3,872,074, as compared with \$3,810,024 in their last report. The per capita average rose from \$25·14 at March 1, to \$25·26 at the first of April, as compared with \$24·06 at April 1, 1942. Over the year, the index of employment has decreased by

2·7 per cent, while that of payrolls has risen by 1·8 per cent.

Financial Institutions.—The 753 financial institutions co-operating in the latest survey of employment and payrolls reduced their working forces by 138, to 63,229 at April 1; the earnings of these persons aggregated \$1,960,827, as compared with \$1,979,114 paid on or about March 1. The latest per capita weekly average was \$31·01, as compared with \$31·23 at March 1, 1943, and \$29·89 at April 1, 1942. The index of employment in financial institutions, at 122·5, was fractionally lower than that of 122·9 at April 1, 1942, but the index number of payrolls was higher by 3·5 per cent.

Employment Conditions at the End of May as Reported by Employment and Selective Service Offices

THE following abstract of regional summaries of reports from Local Employment and Selective Service Offices of the Unemployment Insurance Commission indicates that employment conditions across Canada at the end of May were as follows:

Maritime Region

Although farming operations were being held up because of the unusually late spring, seeding was well underway in most areas throughout the Maritimes. An acute shortage of fertilizers was delaying the planting of the potato crop and seemed likely to result in a reduction of the acreage. Fertilizer plants, especially in the St. John area, were badly in need of men. Groups of farmers had been organized to assist at the plants for one-day periods in efforts to obtain the fertilizer they required for their several farms. The demand for farm workers was increasing and the supply was inadequate to meet it.

The fishing season had been a successful one. In most cases, catches had been good and prices had been maintained at a satisfactory level. No shortages of fishermen were reported.

River driving was proceeding in most of the important logging and lumbering areas and was practically finished on the smaller streams. With the completion of this work it was expected that a substantial pool of labour would be available for other industries.

Skilled miners were needed for the coal mines, as well as labourers for the hard rock mines and lime quarries. Production declined in some instances because of labour shortages, absenteeism, mine accidents and small labour disputes.

Nearly all manufacturing industries were very active. There was a serious shortage of workers for fish processing plants, but most sawmills appeared to have sufficient labour for the summer season. One firm of foundries and machinists had been awarded an important contract for the repair of naval vessels, but sufficient additional labour had been found for this work for the time being. Tradesmen were urgently required at the Halifax shipyards.

There was a serious shortage of carpenters and labourers in the building construction industry. In addition to local labourers, efforts were being made to obtain approximately 1,500 through clearance, as well as several hundred from other industries of lower priority. One important area reported a shortage of bricklayers. New contracts for construction work were being entered into daily and the labour situation was becoming correspondingly serious.

Workers for the wholesale and retail trade were in demand at Halifax and were not available locally. Inadequate housing facilities were making it hard to secure help from outside points. Hotels, restaurants, hospitals and other institutions, as well as private homes in several communities were in need of domestic help. Great difficulty was being met with in obtaining these, due, it was alleged, to the scales of wages being offered for this type of work.

Quebec Region

There was an active demand for farm workers throughout the Region, but it was claimed that wage scales were not sufficiently attractive to interest men in farm work. Arrangements had been completed in one of

the larger centres to send several hundred students to work on farms after the schools had closed in June.

Although handicapped by a lack of adequate manpower, river driving was being rushed as much as possible. Wood cutters were badly needed also. It was expected that farmers could be persuaded to assist in this work after their spring seeding had been completed.

Both base-metal and gold mine operators were facing an acute shortage of miners and mine helpers.

It was hoped that the production of sawmills would be increased in some areas, in spite of the fact that additional millmen were needed in two or three centres. Textile mills were hampered by a shortage of experienced power sewing machine operators. There was a high labour turnover in one important flax mill, said to be due to inferior working conditions there. In Montreal, there were shortages of skilled tradesmen in many lines and great difficulty was being met with in securing labourers for wartime industries, foundries and steel plants. Labour troubles at a few centres appeared to be interfering with production in several lines. In one such instance, a number of coremakers and moulders were out of work temporarily at an important centre in the Eastern Townships. These men were unwilling to accept positions through clearance in the hope that conditions would be righted and they could return to their former jobs. Labour unrest was appearing also among employees in some shipbuilding yards. Women workers were in demand "almost everywhere" and the supply was quite inadequate. At Quebec city 100 girls quit work in the arsenals rather than accept transference to jobs in an out-of-town wartime plant.

While building construction was not as extensive as during the corresponding period in 1942, the industry was very active in some districts. In the Montreal and Lake St. John areas there were critical shortages of ordinary labourers. Highway construction was being resumed, but no shortages of workers had been reported.

Truckers and maintenance men were needed by the railways, but the supply of workers for steamship navigation appeared to be adequate. Truck drivers and repairmen were in demand throughout the Region.

Qualified stenographers, draughtsmen and help for hotels, restaurants, hospitals and private homes were required at many points, but were not available in sufficient numbers.

Ontario Region

Farmers in many portions of Ontario were almost a month behind with their spring work, due to the excessive rainfall during May. In

other areas, better weather prevailed and good progress was being made with seeding. Men from "Alternative Service Camps" were relieving the farm labour shortage somewhat, though in southwestern Ontario the situation remained rather acute. With the return of better weather conditions, farmers in that section of the province were using tractors for ploughing at nights. Because of the better wages being paid on tobacco farms, many men were leaving wartime industries to take work in the tobacco fields. However, a shortage of fertilizers seemed likely to reduce tobacco planting by about twenty per cent.

River drivers were in considerable demand in northern Ontario, but in the older portions of the province river driving was practically completed and the men who had been engaged in this work were being transferred, chiefly to employment in sawmills. A few men were needed in one or two centres for logging and for cutting cordwood.

There was an acute shortage of mine workers at Timmins and, as a result, the mines there were operating at only sixty per cent of their capacity. Quarry workers were needed for the gypsum mines in the vicinity of Ingersoll.

Butchers and meat packers, bakers and bakers' helpers were in demand at a number of important points in central Ontario. Both male and female workers were required by the textile industry, notably at Stratford, where power sewing machine operators were wanted also, to make gloves and mufflers for wartime contracts. Aircraft plants at Brantford needed skilled and semi-skilled male woodworkers, as well as labourers for their shipping department and women for fitting and sanding work. At other centres in western Ontario, aircraft manufacturers required additional skilled cabinet makers, carpenters and labourers for veneer work. Skilled foundry workers, machinists, lathe operators and welders were in demand. It was proving difficult to supply these. Motor mechanics were needed in Ottawa and very few were available. A beginning was being made in the employment of women for work in the shipyards at Kingston. Women were wanted for machine tool work at Ingersoll, where one plant was planning to operate three eight-hour shifts. Workers were needed urgently by the rubber industry at Kitchener, Toronto and Welland; some of these firms were taking on unskilled workers for training.

Carpenters were wanted for wartime housing construction at Kitchener, plumbers for National Defence projects at Barrie, labourers for sewerage and power development work at Simcoe and St. Catharines and bricklayers

and plasterers for wartime and general construction work at Ottawa.

Freight handlers, brakemen, switchmen and firemen were needed by the railways and truck and transport drivers were required for highway transportation work.

Prairie Region

Although spring seeding was well advanced, wet weather was beginning to retard farming operations on the Prairies. Experienced dairy stockmen and men capable of handling tractors were urgently needed, but with these exceptions the demand for farm workers was becoming less acute.

The labour shortage in the logging and timber industries was showing little improvement, particularly in northwestern Ontario, where both cutters and river drivers were in considerable demand.

The gold mines were badly handicapped by a lack of sufficient labour and some of the mine operators were contemplating the possibility of being forced to close their mines. Base-metal miners and labourers were also needed. Labour shortages in the coal mines were being relieved somewhat by the recent Government regulations with respect to experienced coal miners employed in other industries.

More men and women workers were needed by the meat packing houses, because of increases in the production of hogs. This situation was being relieved to some extent by the employment of farmers who had been granted temporary permits after they had completed their spring seeding. The baking and textile industries required more men, but few were available for this class of work. A number of workers were being transferred to work in the shipyards on the west coast.

In spite of considerable unfavourable weather in some areas, the demand for building construction workers was increasing. Good progress was being made, however, on wartime housing and other national defence projects.

The railways needed firemen, switchmen, maintenance men and men for extra gang labour. Women were being employed as car cleaners at a few points. Truck drivers for handling coal were in much demand.

All types of domestic help were scarce; hospitals and other institutions especially, being seriously handicapped as a result.

Pacific Region

Progress was being made with the Emergency Farm Labour program in British Columbia by the establishment of uniform

rates of pay in some districts. Experienced help was needed for dairy farms. In some portions of the Okanagan area efforts were being made to obtain Japanese for farm work.

There was no appreciable reduction in the demand for manpower in the logging industry. The chief requirements were fallers, buckers and chokermen. Men in the armed forces were not asking for temporary leave in the numbers that were anticipated and loggers were very reluctant to accept employment in the more remote camps, because of deductions from their pay to meet transportation costs. An increasing number of men were needed in the Queen Charlotte Islands to get out spruce logs to be used in the manufacture of airplanes. However, the most serious handicap throughout the region appeared to be the shortage of common labourers.

The need for miners and mine workers for both coal and base-metal mines was increasing, despite some assistance derived from the Regulations requiring experienced coal miners who were otherwise employed to return to the mines.

Special efforts were being made to supply the heavy demand for packing house workers. Although a few sawmills on the lower mainland had increased their production, the overall output in the region was far below normal, due both to log and labour shortages. Many mills were remaining closed and the demand for workers was general in all areas. Grinder room labourers were badly needed for work in the pulp and paper mills. Shipyards were reported to be suffering from severe shortages of men and were losing workers to the armed forces, to other industries such as logging and mining, as well as on the ground of physical disabilities. Although welders, machinists, engine fitters, electricians, painters, shipwrights and other skilled tradesmen were urgently needed, there was an even greater demand for helpers and trainees. Arrangements were being made under the War Emergency Training plan to increase the number of trainees. Efforts were also being made to obtain helpers through clearance. It was feared that the situation might grow more acute as special new undertakings were being put under way in some of the shipyards.

Skilled and semi-skilled tradesmen were required in large numbers in machine and engineering plants engaged in the production of war materials and equipment needed in the production of merchant and naval vessels. These were being sought through clearance and from training schools so that mass production methods could be used in some of the larger plants.

Hotels, restaurants, laundries and dry cleaning establishments were greatly handicapped by the lack of sufficient qualified workers.

The average number of vacancies reported daily by employers to Employment and Selective Service Offices throughout Canada during

[illegible]

the four weeks April 2, to April 29, 1943, was 10,435 in comparison with 9,155 in the preceding five weeks and with 1,742 during the month of April, 1942. The average number of applications for employment received daily during the period under review was 8,957 compared with 8,402 in the previous period and with 2,172 during April a year ago. The average number of placements made daily by the offices during the four weeks ending April 29, was 6,277, of which 6,083 were in regular employment and 194 in work of one week's duration or less, in comparison with a daily average of 5,904 during the previous five weeks. Placements during the month of April, 1942 averaged 1,262 daily, consisting of 883 in regular employment and 379 in casual work.

During the period April 2, to April 29, 1943, the offices referred 205,046 persons to employment and effected a total of 144,373 placements. Of these, the placements in regular employment numbered 139,916, of which 90,985 were of males and 48,931 of females, while placements in casual work totalled 4,457. The number of vacancies reported by employers was 160,489 for males and 79,536 for females, a total of 240,025, while applications for work numbered 206,022, of which 134,941 were from males and 71,081 from females. Reports for the five weeks ending April 1, 1943, showed 274,651 positions offered, 252,039 applications for employment and 177,114 placements effected, while in April, 1942, there were reported 43,534 vacancies, 54,297 applications and 31,529 placements in regular and casual employment. The following table gives the placements effected by the offices each year from January, 1933 to date:—

Year	Placements		
	Regular	Casual	Totals
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882

Nova Scotia and Prince Edward Island

Employment opportunities, as indicated by orders received at Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the four weeks ending April 29, 1943, showed a daily average of 442, compared with 359 in the preceding period and 127 during April of last year. The aver-

age number of placements effected daily was 256 during the period under review, in comparison with 245 in the previous five weeks and 114 in April, 1942. When comparing placements by industrial groups with April of last year, the most important gain was in manufacturing with somewhat smaller increases in trade, transportation and services. The only declines occurred in logging and agriculture and were unimportant. Industrial divisions in which the majority of placements were effected during the four weeks were: manufacturing 1,889; construction 1,425; services 1,148; trade 642; transportation 444 and mining 157. There were 4,164 men and 1,623 women placed in regular employment.

New Brunswick

Positions offered through Employment Offices in New Brunswick during the period under review averaged 283 daily, compared with 265 in the preceding five weeks and 49 during April, 1942. There was a daily average of 175 placements in comparison with 171 during the preceding period and 39 in April of last year. Except for a nominal decrease in fishing and hunting, all industrial divisions indicated improvements in placements over April, 1942, the largest increase being in manufacturing with moderate gains in construction, trade, services and transportation. Placements by industrial groups included: manufacturing 1,249; services 811; construction 782; trade 449; transportation 347; logging 159 and mining 148. Regular placements numbered 2,860 of men and 1,024 of women.

Quebec

The demand for workers on a daily average, as indicated by orders listed at Employment Offices in the Province of Quebec during the period ending April 29, showed a decrease when compared with the five weeks ending April 1, but an increase over April of last year, the daily average being 2,929 during the four weeks under review, 2,956 in the preceding period and 302 in April, 1942. There was a daily average of 1,547 placements compared with 1,484 during the preceding five weeks and 173 in April of last year. The outstanding gain in placements from April, 1942, was due to a marked increase in manufacturing, although services, construction, trade, transportation and logging were considerably higher. In addition, more moderate advances were reported in mining and finance. Placements by industrial divisions included: manufacturing 20,016; services 4,575; construction 4,440; trade 2,603; transportation 1,619 and logging 1,248. Placements in regular employment numbered 23,695 of men and 11,612 of women.

Ontario

There was an increase in the average number of positions available daily at Employment Offices in Ontario during the four weeks ending April 29, there being 4,147 compared with 3,411 in the preceding five weeks and 703 in April, 1942. During the period under review, the average number of placements registered daily was 2,531, in comparison with 2,439 during the period ending April 1, and 556 in April of last year. The substantial gain in manufacturing was mainly responsible for the increase in placements over April, 1942, although services, trade, transportation and construction recorded noteworthy ad-

vances, with improvement of smaller proportions in finance, mining, logging and agriculture. Industrial divisions in which most of the placements were effected included: manufacturing 28,513; services 9,884; trade 5,862; transportation 5,122; construction 4,744; logging 1,512; mining 866; finance 772 and agriculture 697. During the four weeks ending April 29th, there were 35,728 men and 21,203 women placed in regular employment.

Manitoba

Orders received at Employment Offices in Manitoba during the period ending April 29, called for an average of 531 workers daily

compared with 384 in the preceding period and 133 during April, 1942. Placements showed a higher average during the four weeks under review, there being 414 daily in comparison with 307 in the preceding five weeks and with 102 in April of last year. Placements in logging and agriculture reported moderate declines when compared with April, 1942, but these losses were more than offset by gains in all other groups; the most important of which were in manufacturing services and trade, with smaller increases in construction and transportation. Placements by industrial divisions included: manufacturing 2,920; services 2,572; trade 1,610; construction 1,109; transportation 816 and logging 133. Placements in regular employment numbered 5,197 of men and 3,552 of women.

Saskatchewan

During the four weeks ending April 29, 1943, the daily average of positions offered through Employment Offices in Saskatchewan was 315, compared with 196 in the preceding five weeks and 75 in April of last year. The average number of placements effected daily was 196 during the period under review, in comparison with 150 in the preceding period and 57 during April 1942. With the exception of a small loss in agriculture, all industrial groups indicated improvement in placements over April of last year, the largest increases being in services, trade and manufacturing, with smaller gains in transportation and construction. Industries in which employment was found for more than 100 workers included: services 1,660; trade 944; manufacturing 682; transportation 432; agriculture 314 and construction 311. There were 2,400 men and 1,750 women placed in regular employment.

Alberta

Orders listed at Employment Offices in Alberta during the period under review, called for a daily average of 528 workers compared with 431 during the period ending April 1, and 115 in April of last year. An increase was reported in placements during the four weeks under review, the daily average being 358 compared with 321 in the previous period and 93 in April 1942. Fairly large increases in services and trade with smaller advances in transportation, manufacturing and construction accounted for the improvement in placement over April of last year, while small losses only were recorded in logging, fishing and hunting. Placements by industrial divisions were: services 2,282; trade 1,307; manufacturing 1,222; construction, 1,150; transportation 1,057; agriculture 756 and mining 259. Regular placements numbered 4,825 of men and 2,686 of women.

British Columbia

Opportunities for employment, through Offices in British Columbia during the period ending April 29, numbered 1,262 daily compared with 1,153 in the preceding period and 237 in April, 1942. During the period under review, the average number of placements registered daily was 801, in comparison with 788 in the preceding five weeks and 128 in April of last year. All industrial divisions recorded improvement in placements over April, 1942, the most pronounced being in manufacturing, although services, construction, trade, logging and transportation were much higher. Industrial groups in which most of the placements were effected during the four weeks under review, were: manufacturing 6,850; services 3,377; construction 2,584; trade 1,786; logging 1,589; transportation 1,300 and mining 387. There were 12,116 men and 5,481 women placed in regular employment.

Unemployment in Trade Unions at the Close of April, 1943

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work outside their own trades are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Returns were tabulated at the close of April from 2,258 labour organizations having a combined membership of 423,590 persons. Of

these 4,268, or a percentage of 1.0 were without work, in comparison with percentages of 1.3 in March and 3.3 in April a year ago. The slightly higher employment level prevailing in April was due principally to the noteworthy employment expansion for union members in the building and construction trades. As will be seen in table II, the unemployment percentage for these members declined from 9.0 to 5.1; this increase in available work at this time was due largely to seasonal influences. Among transportation workers, also the unemployment percentage of .9 was slightly lower, thus indicating a minor betterment.

On the other hand, these employment advances were offset to some extent by the slight decline in work afforded union members in the manufacturing industries; in these the unemployment percentage was .5, as compared with .3 in March. Among those organizations, in which the memberships were comparatively small, non-metallic mineral workers also indicated a rather appreciable contraction in available work, as the unemployment percentage among these members was up from .4 to 3.7. The Dominion unemployment percentage for April of 1.0, was the lowest for any corresponding month in the trade union records, and the lowest for any month since November, 1942.

In table I the unemployment percentage is shown for each province. At the close of

degree in Nova Scotia, Quebec, Saskatchewan and British Columbia; in New Brunswick a minor improvement only was indicated.

A separate compilation is made each month of unemployment among trade unions in the largest city in each province, with the exception of Prince Edward Island. The percentages of union members shown as without work at the close of April ranged from .3 in Edmonton to 1.6 in Winnipeg. Every city under survey with the exceptions of Montreal, Winnipeg, and Regina, in which the percentages of unemployed members were 1.4, 1.6 and 1.3, respectively, indicated that less than one per cent was unemployed. In comparison with the situation at the end of March, conditions in Montreal reflected a fair expansion in available work, as the unemployment percentage

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

April these percentages ranged from .3 in Nova Scotia to 1.6 in Quebec. New Brunswick, Quebec and Manitoba were the only provinces to show more than one per cent of unemployment. As compared with March, slightly higher employment levels were reflected in reports received from Nova Scotia, Quebec, Ontario, Saskatchewan, and Alberta unions; in British Columbia the percentage of those without work remained unchanged at .4. Slight employment recessions, only, were observed in New Brunswick and Manitoba, although, as will be seen in the table, employment levels in each case, remained high. In comparison with conditions at the end of April, 1942, impressive expansions in available work were apparent in Alberta, Manitoba and Ontario, and to a somewhat lesser

declined from 2.3 to 1.4. The percentages of union members reported as without work in Halifax, Saint John, Toronto, Edmonton and Vancouver, were respectively, .7, .9, .8, .3 and .4. Each of these was slightly lower than the corresponding percentage for March, thus manifesting minor employment increases. Winnipeg and Regina recorded percentages of 1.6 and 1.3 respectively; these were slightly higher, thus reflecting a somewhat lower employment level. In comparison with April, 1942, Toronto, Winnipeg, Regina and Edmonton recorded the greatest employment expansions; the percentages of those without work in these cities at that date, were, respectively 4.1, 4.4, 4.7 and 6.4. Vancouver union members had an unemployment percentage of 1.7 in April a year ago, and of .4 in the period

under review, thus reflecting also considerably improved conditions. Halifax and Montreal indicated moderate employment increases, while in Saint John, the percentage of those without work was .9, as compared with 1.0 per cent in April, 1942.

The accompanying chart shows the trend of unemployment from January 1933, to date. The level of the curve in April continued in a downward direction as conditions improved slightly over March. The point of the curve was at a considerably lower level than in April, a year ago, thus indicating a substantial employment expansion.

For the manufacturing industries 793 reports were tabulated. The total membership reported was 238,275 persons of whom 1,247, or a percentage of .5 were unemployed, as compared with .3 in March and 2.4 in April, a year ago. In comparison with the preceding month, employment for union members in the printing and publishing trades was slightly higher, as the percentage of these without work declined from 1.0 to .8. Minor improvements were observed, likewise, among unions with smaller memberships, such as leather and unclassified manufacturing members, as the unemployment percentages for these workers declined to 5.6 and 3.8, respectively. There were slight employment increases, likewise, for bakers and confectioners, electric current employees, etc., fur workers and metal polishers, etc.; little or no unemployment was apparent among these latter groups. Among hat, cap and glove workers the percentage of those without work remained unchanged at .1. Among those unions in which the memberships were reported to be fully employed at both dates were soft drink workers, cigar and tobacco workers, textile and carpet workers, butchers, meat and fish packers, rubber workers, jewellery, aluminum, clay, glass and stone, mineral products and chemical workers. An appreciable reduction in available work was reflected among woodworkers, as the percentage of unemployed members was up from full employment to 2.8. Some retarded activity was evident among papermakers, although the unemployment percentage remained low at .6. A slight increase in unemployment was observed for union members in the iron and steel trades, as the percentage of unemployed members was .2 as compared with .1. A moderate decline in work afforded was in evidence in the garment trades. Reports received from these unions showed that 1.1 per cent of the members were unemployed, in comparison with .3 in March. Reports tabulated for the garment trades include unions of both men's and women's clothing workers. As compared with April, 1942, union members in the iron and steel trades were much better

employed as the percentage of those out of work at that date was 3.0. Among unclassified manufacturing workers and fur workers noteworthy employment expansions were apparent, as the percentages of those without work declined from 21.0 to 3.8 and from 10.6 to .2, respectively. These groups have much smaller memberships, however, and consequently the number of workers involved in these changes was not especially large. Among the organizations in which full employment was indicated at both dates, were soft drink workers, cigar and tobacco workers, electric current employees, etc., textile and carpet workers, butchers, meat and fish packers, rubber, jewellery and mineral product workers.

Returns were tabulated from 58 unions of coal miners, whose total membership was 20,292 persons. Of these, 21, or a percentage of .1 were without work; this percentage remained unchanged from March, while the unemployment percentage for April, a year ago, was 5.0. In comparison with the situation in the previous month, very slight betterment was observed in Alberta, as the percentage of those out of work declined from .4

TABLE 1.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1932.....	9.6	14.4	26.4	23.7	20.0	15.8	22.6	21.6	22.0

to .3. In Nova Scotia no unemployment was reported as compared with a very small percentage in March, while full employment was recorded in New Brunswick and British Columbia at both dates. In comparison with April, a year ago, Alberta unions manifested an impressive employment expansion, as the percentage of those without work at that time was 13.3. Better conditions prevailed also, in Nova Scotia, where the unemployment percentage in April, 1942, was 2.3. In British Columbia there was a very slight improvement, only while in New Brunswick no unemployment was reported at either date.

Returns were received from 7 unions of non-metallic mineral workers having a combined membership of 3,578 persons, of whom 131, or a percentage of 3.7 were unemployed, in comparison with percentages of .4 in March and 5.9 in April, a year ago.

Unions in the building and construction trades returned 198 reports with an aggregate membership of 33,517 persons, of whom, 1,721 or a percentage of 5.1 were without work as compared with percentages of 9.0 in March and 12.5 in April, 1942. In comparison with the previous month, bricklayers, masons and plasterers and carpenters and joiners, in which trades the unemployment percentages declined to 12.8 and 5.7 respectively, reflected noteworthy employment advances. Among bridge and structural iron workers and painters, decorators and paperhangers, there were appreciable increases in available work; very little unemployment was observed in these trades. Among hod carriers and unclassified building workers the unemployment percentage was 4.5; this was moderately lower, thus reflecting a fair employment expansion. The percentages of members without work among steam shovel men, granite and stone cutters, electrical workers and plumbers and steamfitters were respectively, 9.0, 6.4, .1 and 2.5; these were slightly higher, which was indicative of minor employment contractions. Among wood, wire and metal lathers the membership is very small; and, as in March no unemployment was apparent. As compared with conditions in April, 1942, bricklayers, masons and plasterers, and carpenters and joiners registered impressive gains in available work as the unemployment percentages in these trades at that date, were 30.7 and 13.7 respectively. Among organizations with smaller memberships, granite and stone-cutters were much better employed; the unemployment percentage declined from 20.8 to 6.4. Among plumbers, steamfitters, hod carriers and unclassified building workers, likewise, employment levels were considerably higher.

In the transportation industries 881 reports were tabulated. The total reporting membership was 83,686, persons. Of these, 763, or a percentage of .9 were unemployed, in comparison with percentages of 1.1 in the preceding month and 1.5 in April, 1942. In comparison with March, the employment level in the steam railway division, which includes over 79 per cent of the entire group membership, was slightly higher, as the percentage of those out of work declined from 1.2 to 1.0. Among navigation workers the unemployment percentage of 4.9 was slightly lower, thus reflecting a minor betterment. The unemployment percentages among street and electric railway employees and teamsters and chauffeurs remained unchanged. As compared with the situation in April, a year ago, the employment trend for steam railway employees, as in the previous comparison was slightly upward. For navigation workers there was a moderate increase in work, as the unemployment percentage declined from 7.4 to 4.9. For street and electric railway employees conditions were very slightly improved, while on the other hand, among teamsters and chauffeurs there was a slight increase in the unemployment percentage from full employment to .6.

For the retail and wholesale trades reports were received from 10 unions, of which the combined membership was 2,280 persons. As in the preceding month and in April, a year ago, no unemployment was noted.

From unions of civic employees there were 107 reports tabulated. These embraced a membership of 11,128 persons. Of these 13, or a percentage of .1 were unemployed. This percentage remained unchanged from the previous month, and was identical also, with that of April, 1942.

In the miscellaneous group of occupations returns were received from 140 unions having a total membership of 12,331 persons. Of these 208, or a percentage of 1.7 were without work. In March 1.6 per cent were unemployed and in April, a year ago, 1.1 per cent. A comparison of the previous month, showed conditions among theatre and stage employees, barbers and unclassified workers to be slightly improved; the unemployment percentages for these members were 2.7, .5 and .3 respectively. The percentages of those without work among hotel and restaurant employees and stationary engineers and firemen were 4.1 and 1.2, respectively, these were slightly higher, thus denoting fair employment recessions. As compared with conditions in April, a year ago, employment for stationary engineers and firemen was very slightly improved. Among theatre and stage employees, the percentage of unemployed members remained unchanged at

2·7 while on the other hand, fractional increases in the unemployment percentages were observed for barbers and unclassified workers.

Reports were tabulated from 2 unions of fishermen. These combined 2,775 persons, all of whom were working. The unemployment percentage for March was ·7 and for April, a year ago, it was 12·5.

Returns were received from 4 unions of lumber workers and loggers, whose total membership was 4,445 persons. As in the previous

month, these workers did not report any unemployment; in April, 1942, the unemployment percentage was 3·7.

Table I shows by provinces the average percentage of union members who were unemployed each year from 1932 to 1942, inclusive, and also, the percentage of unemployment for April of each year from 1932 to 1941, inclusive and from April, 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in table I.

Employment Trends in the United States

ACCORDING to an official report issued by the United States Department of Labour, the total number of employees in non-agricultural establishments in March 1943 was 38,146,000—2,735,000 more than in March 1942. the gain over the preceding month, 188,000, is the smallest February to March increase since 1938, reflecting the high level which employment has reached. More than 100,000 workers were added to manufacturing during the the month, which brought the total of wage and salary workers in this industry division to its highest point—15,957,000 workers.

The largest employment increase over the year was in manufacturing, 2,098,000. In spite of an increase of 41,000 in trade between February and March 1943, employment in this industry division was 379,000 below that of March 1942.

Industrial and Business Employment

The number of wage earners in all manufacturing was 13,700,000, which represents a gain of 16 per cent since March 1942. The gain over the month of 91,000 wage earners was the result of an increase of 101,000 wage earners in the durable-goods industries and a decline of 10,000 wage earners in the non-durable.

The transportation equipment group, which covers aircraft, shipbuilding, railroad equipment, and some ordnance items, again led the other groups in monthly and yearly increases—51,000 and 1,038,000 wage earners, respectively. Iron and steel, electrical machinery,

machinery, and automobiles each employed about 14,000 more wage earners than in February.

Employment in bituminous-coal mining continued to decline, reaching a level more than 1 per cent below February 1943 and almost 10 per cent below March 1942. The anthracite mining industry employed 7 per cent fewer wage earners in March 1943 than in March 1942. However, the working time per week was sufficiently large to cause an increase of 11 per cent in total working hours over March of last year.

Public Employment

Federal employment rose 58,000 in March 1943 to a total of 3,035,000. War agencies increased employment by 53,100 while other agencies added 4,900. The gain was entirely outside the Washington, D.C., metropolitan area; employment inside the area showed a slight decline.

During the year March 1942 to March 1943, war-agency employment showed a rise of 1,148,000, as compared with a rise in total Federal employment of 1,105,000.

Unemployment statistics for Great Britain are now being compiled and published only at quarterly intervals, according to a statement in the British House of Commons made by the Minister of Labour and National Service (L.G., May, 1943, p. 680). The figures most recently received were published in the LABOUR GAZETTE for April, page 523.

Legislative Proposals of Labour Organizations

PROPOSALS for legislation were submitted recently to the Governments of Alberta, Manitoba and New Brunswick by various labour organizations. In all three provinces, legislation was requested which would provide for compulsory recognition of trade unions and collective bargaining. In both Manitoba and New Brunswick the Government was urged to introduce an Apprenticeship Bill. Suggestions for reconstruction in the post-war period were also included in the briefs. Both the Alberta

and Manitoba delegations urged the enactment of provincial health-insurance legislation and all three recommended the development of a low-cost housing scheme. Legislative proposals of labour organizations to the Governments of British Columbia, Nova Scotia, Ontario and Quebec were summarized in the *LABOUR GAZETTE* for February and May, pp. 262, 683; and proposals to the Dominion Government in the March issue, p. 376.

Alberta

In addition to recommendations concerning collective bargaining and health insurance, the Alberta Federation of Labour asked that the principle of labour representation on Government boards should be further applied to include such bodies as the Board of Industrial Relations and the Civil Service Commission. It suggested that a retirement scheme should be incorporated in the Old Age Pensions Act to benefit all persons withdrawing from industry at 60 or over, and urged more generous treatment of the aged in the province.

As regards the Minimum Wage Act the delegation recommended that minimum rates should be increased at least 20 per cent because both the cost of living and the productivity of women workers had increased in the last few years. It also urged that the Act should be amended to bring within its scope many workers not at present protected. The principle of equal pay for equal work should be incorporated in the Act. The Board

of Industrial Relations was requested to make a survey of minimum wages in the province.

Attention was called to the need for maintaining the health of workers by providing more facilities for recreation and ensuring freedom for relaxation on their day off whether or not it fell on Sunday. The Government was urged to provide cod liver oil at cost to offset the effects of rationing essential foods such as butter. A survey of mental hospital facilities in the province was suggested to determine the need for expansion.

The delegation commended the appointment of the provincial Post-War Research Advisory Council and offered to co-operate in any way desired.

Protest was voiced at the new definition of "contractor" proposed for the Canadian Electrical Code on the ground that it would not make electrical installations safer, and more rigid inspection of electrical work was urged.

Manitoba

In Manitoba proposals were presented jointly to the Government by the provincial Executive Council of the Trades and Labour Congress of Canada and representatives of the Railway Transportation Brotherhoods. Besides recommending legislation providing for compulsory collective bargaining and health insurance, considerable attention was given to the subjects of post-war reconstruction and the competition between railways and motor transport.

Representation of labour on all Government boards and commissions was requested and in particular on the Advisory Board on Technical Training connected with the recently established Provincial Technical Training School. It was suggested that employers should be required to file an annual return with the Department of Labour showing the number of persons employed for more than 48 hours a week and for less than 48 hours,

so that a picture of employment could be obtained. The long hours being worked in many industries were protested, particularly in view of the unemployment still existing in Manitoba. Transfer of accident-prevention work from the Department of Labour to the Workmen's Compensation Board was urged. The delegation also asked that wages and conditions in hospitals should be improved and that night work in bakeries be abolished.

Payment was advocated of a cost-of-living bonus to persons being paid the minimum rates of wages fixed under provincial legislation and it was recommended that the Regional War Labour Board should permit increases in provincial minimum rates. The delegation requested that the present provincial minimum rate of 25 cents an hour should be raised to 40 cents or at least to the 35 cents for men and 25 cents for women over 18 established by the Dominion for

persons on federal Government contracts. Strict enforcement of minimum wage orders was recommended. Although the wage tax had not been deducted since July, 1941, under the Taxation Suspension Act, the delegation requested repeal of the provisions in the provincial Income Taxation Act authorizing it. The Department of Labour was asked to call a conference of representatives of the building industry to work out a system for registering contractors to facilitate enforcement of the Fair Wage Act.

Amendments recommended in the Old Age Pensions Act would raise the annual pension from \$240 to \$360, lower the pensionable age from 70 to 60, reduce the residence qualification in Canada from 20 to 15 years and prohibit deductions on account of incomes under \$500 instead of \$125 as at present. The Child Welfare Act should be amended to provide allowances for widows without children and for widows with one child and to allow widows to augment their allowances by homework or by renting rooms.

The delegation considered that mass unemployment and depression could be avoided after the war by a program of Government-sponsored projects. It suggested that members of the Armed Forces should be kept on Government pay-rolls until they secured permanent employment. Among post-war projects proposed by the delegation were slum clearance, farm modernization, hydro-electric development, reforestation, highway building, water conservation, etc. Workers engaged on construction work connected with such projects should be paid the rates fixed under the

Fair Wage Act and only bona fide skilled tradesmen should be employed. The introduction of a six-hour day, five-day week and two weeks' holiday with pay was proposed as a post-war measure. The school-leaving age, now 14, should be raised by a year or two, free school books provided and the Provincial Government should co-operate with the Dominion in developing a uniform national system of education.

While recognizing the value of vocational education, the delegation emphasized its belief in apprenticeship and asked for an Apprenticeship Act modelled on the Ontario one and for a preliminary conference to study the question.

Protest was voiced at the Public Officers Disqualification Act which prevents persons convicted or detained under the Defence of Canada Regulations from holding public office.

The representatives of the Railway Transportation Brotherhoods asked for closer regulation of highway traffic to eliminate unfair competition with the railways. Attention was drawn to the fact that the higher-rated freight was being carried by trucks while the railways handled the lower-rated basic commodities on which there was much less profit. They recommended higher licence fees for trucks and buses and more rigid safety laws. The use of trailers should be banned or carefully regulated and trucks should not be allowed to operate on Sundays when highways are crowded. Unnecessary duplication of bus and truck service in areas adequately served by railways should be prevented.

New Brunswick

On February 24, the New Brunswick Federation of Labour and the Joint Provincial Legislative Committee of the Railway Transportation Brotherhoods submitted a joint brief of recommended legislation to the Government of New Brunswick. Major requests were for the establishment of a Provincial Department of Labour and for labour representation on all public boards and commissions, particularly on any bodies connected with post-war activities.

Amendments in the Labour and Industrial Relations Act were requested to make collective bargaining compulsory, and to bring Crown employees under the Act. The delegation asked that the Industrial Standards Act should be extended to work done by or for the Government or a municipality and that an inspector should be appointed to enforce the Act.

Immediate proclamation of the Factories Act, 1937, was urged and it was suggested that

provisions should be added requiring the payment of time-and-one-half for all hours worked in excess of eight a day and the payment of equal rates to women doing the same work as men. The establishment of three grades of licences for stationary engineers was recommended as well as the licensing of hoisting and traction engineers and firemen.

The Factories Act and School Attendance Act should be amended to prohibit the employment of children under 16. The provision of free school books and of physical culture in all schools was urged. The Government was also requested to pass an Apprenticeship Act.

The delegation asked that the wages and working conditions of employees of the Provincial Hospital should be reviewed further and that consideration should be given to introducing an eight-hour day and a six-day week. Provincial employees should receive a cost-of-living bonus computed in accordance

with the Wartime Wages Control Order and representing the full rise in the cost-of-living index. The provision of additional isolation hospitals to cope with a situation such as the recent infantile paralysis outbreak was urged, and it was suggested that employees of hotels, restaurants and other public eating places should be required to take pre-employment and periodic medical examinations to check the spread of contagious diseases. Painters and paper-hangers should be licensed in order to prevent the development of unsanitary conditions from the renovation and repair of houses, and a strict code should be drawn up governing repairs to hotels and restaurants.

The delegation condemned poll taxes as a qualification for voting in local elections, and suggested the adoption of a uniform ballot in Dominion, Provincial and Municipal elections. It protested, as had the Alberta delegation, at the new definition of "contractor" proposed for the Canadian Electrical Code, on the ground that it might place responsibility on

the worker instead of on the contractor who gives the instructions.

Detailed recommendations on Workmen's compensation were omitted because the New Brunswick Federation of Labour is urging the appointment of a special committee to consider amendments in this Act. Amendments being sought include raising the rate of compensation from 60 to 66½ per cent of earnings and increasing the maximum earnings on which compensation may be reckoned from \$1,500 to \$2,000 a year, increasing a widow's pension from \$30 to \$40 a month, and eliminating appeals on matters of law to the courts.

On the subject of post-war reconstruction, the delegation planned to submit a separate brief. It urged a comprehensive scheme for the development of the province's natural resources and the reconstruction of basic industries such as lumbering, agriculture, mining, electrical power, fishing, etc. It commended the appointment of the Provincial Post-war Reconstruction Committee.

Vacation Provisions in Union Agreements in United States

AN article in the May issue of the *Monthly Labour Review*, U.S., Department of Labour presents an analysis of vacation and holiday provisions in union agreements in the United States. "During the last few years", the article states, "there has been a great increase in the number of union agreements providing vacations with pay. At present almost eight million workers, representing about 60 per cent of all workers under agreement, are covered by agreements which provide vacation allowances. In 1940 two million workers, or about 25 per cent of all workers under union agreement at that time, were entitled to paid vacations if they met certain eligibility requirements."

Vacations with pay were found to be least common in seasonal industries, such as the building trades and clothing manufacture, and in those in which work is intermittent, such as the entertainment industries.

In a majority of industries, according to the survey, the most recurrent type of vacation clause is that which grants 1 week's vacation with pay after 1 year of service. Two weeks' vacation after 1 year of service is provided in varying numbers of agreements in many industries and is frequently provided in agreements covering maritime workers, telegraph and radio operators, office, technical, professional, and utility employees. Both the anthracite and bituminous-coal agreements

provide a vacation of 10 days (including the Fourth of July).

Longer than 1 year's service for a week's vacation is required in some agreements. Several of the large rubber companies require 2 years' service before a week's vacation with pay is granted. Three years' service for 1 week's vacation and 15 years' service for 2 weeks' vacation is specified in practically all of the agreements in the basic iron and steel industry.

It is estimated that well over two million workers are entitled, under the terms of their union agreements, to vacations longer than a week (usually 2 weeks) after having attained a specified length of service beyond the minimum required for a 1-week vacation. The service requirements for 2 weeks' vacation vary, the most common range being from 2 to 5 years.

In agreements covering time workers, the vacation pay provided is usually based on the "regular rate of pay," "base rate," or "current rate." Since workers paid by the hour sometimes work at different rates during the same week because of job transfers, some agreements specify that vacation pay shall be based on the "highest" or "predominating" rate; others specify the average wages over a given period, exclusive of overtime.

The article discusses various other aspects of vacation provisions in union contracts.

Labour Law

Labour Legislation in Alberta and Saskatchewan in 1943

Alberta

THE Alberta Legislature, in session from February 18 to March 30, enacted a law which requires proper working conditions in industry and is to be administered by the Board of Industrial Relations. The Workmen's Compensation Act was revised, and amendments made in statutes relating to collective bargaining, security for wages, mothers' allowances, old age pensions and post-war reconstruction.

Labour Welfare Act

The Labour Welfare Act, which applies to all employers and employees except farm labourers and domestic servants, repeals a number of sections of the Factories Act and re-enacts them with certain changes, adding new provisions to require prompt payment of wages and to enable the Board of Industrial Relations to conduct investigations and make orders relating to working conditions.

Provisions of the Factories Act which are repealed and incorporated in the new statute without material change are those forbidding employment of a child under 15 years of age in a factory, shop or office building; requiring an employer to give a statement of length of service to an apprentice leaving his service, keep his premises in a sanitary condition, provide sanitary conveniences, washrooms and wholesome drinking water and cups, avoid overcrowding, and ensure proper heat and ventilation, with special provision for printing offices and places where dust, gases or vapours are generated; forbidding employment in food trades of persons with communicable diseases; setting forth the powers of the inspector and enabling him to take a qualified physician, medical officer or sanitary inspector with him when examining premises. Another section transferred without change from the Factories Act provides that in a factory or shop, if the inspector so directs in writing, the employer must not allow meals to be taken in a room in which a manufacturing process is going on and must at his own expense provide a suitable dining-room and that no person may take food into a room where paint, varnish, white lead, arsenic, dye or other poisonous substance is exposed or where deleterious fumes, dust or gases are present. Drinking water in such a room must be taken directly from taps or suitably closed receptacles.

A section of the Factories Act required the employer in a shop to provide seats for female employees and permit them to use such seats. It also provided that where the inspector considered that the whole or a substantial portion of the work of female employees in any department of a factory or office building could be efficiently performed while such employees were seated, the employer must provide such chairs or seats as were directed in writing by the Chief Inspector. This section has been repealed and a section included in the Labour Welfare Act authorizing an inspector, by written direction, to require the employer in any employment to provide seats for women employees and to permit them to use such seats. The fine for contravention of this section is the same as was provided under the Factories Act, \$10 to \$30 and costs, but a prison term not exceeding 30 days may now be imposed in default of payment of the fine. There is also a change in the penalty for obstructing an inspector which is now from \$10 to \$200 and costs, with a prison term not exceeding three months in default of payment. Under the Factories Act the penalty for this offence was from \$10 to \$30 and costs unless the offence was committed at night when a fine of from \$25 to \$100 might be imposed. The provision of the Factories Act requiring women working about machinery to wear their hair rolled or confined in a cap or net is transferred to the new Act with the added requirement that no jewellery may be worn which might be caught in the machinery or interfere with safety. As formerly the employer must see that employees are notified of such rules. Two further sections of the Factories Act, transferred to the new statute, forbid the doing of laundry work in a room used for sleeping, living, or preparing meals, and prohibit the use of any part of a factory as a sleeping place without a permit from the chairman or chief inspector of the Board of Industrial Relations.

There are a number of new provisions. An employer must pay all wages within ten days of the expiration of each period of employment, which may not be longer than one month. When the employer terminates the employment he must pay the wages earned by the employee at the time of the termina-

tion. No prosecution for an infraction of these provisions may be commenced without written authority of the Minister of Trade and Industry.

The Board of Industrial Relations is authorized to hold inquiries into conditions of labour in any employment or industry and to make orders prescribing action to be taken and conditions to be observed for the welfare of employees. These orders may, among other things, prescribe the type of safety garments or safety appliances to be worn by employees and the terms and conditions upon which the employer shall provide them; prohibit female employees in any employment from lifting or carrying burdens of a greater weight than that fixed by the Board; prohibit employment of women on day shifts for a period of six weeks before, and two months after, childbirth and on night shifts during the period of pregnancy; require that where the shift system is used the shifts shall be rotated at least once in 3 months or in such other manner as the Board may consider necessary and that the workers be employed on different shifts on the expiration of the period; require an employer of over fifty workers to employ an attendant qualified to render first aid; require employers in any employment or class of employment to provide lockers or compartments for employees' clothing and personal belongings; require employers to give employees one week's holidays with pay after one year's service and up to two weeks' holiday after such period of service as may be fixed by the order; exempt any industry, trade, business or occupation in whole or in part from any order; and make such other orders as the Board may deem necessary. Orders of the Board are to be operative on the date of publication in the Alberta Gazette, or at such later date as may be named in the Order, and copies must be kept posted on premises to which they relate.

Any person violating any provision of the Act, order of the Board or written instruction of the Chairman or Chief Inspector of the Board, where no other penalty is provided, is liable to a fine not exceeding \$500 and costs and in default of payment to imprisonment for not more than three months. In a prosecution for an offence against the Act alleged to have been committed by an employer, the onus of proof that he is not an employer is upon the person charged with the offence.

Workmen's Compensation

The Workmen's Compensation Act was revised with a number of amendments, most of which carry out recommendations made by the Special Committee of the Legislature

appointed during the 1942 session. The definition of "accident" was extended to include disablement arising out of and in the course of the employment. A clause added to the definition of "dependant" provides that a person shall not be deemed to be a partial dependant of another person unless he was partially dependent on contributions from that person for the ordinary necessities of life suitable for persons of his class and position. "Foster-mother" is defined to include a natural mother.

The Workmen's Compensation Board is to consist of three members, instead of "not more than three", as formerly. For some years there has been a one-man Board. A provision in force from 1928 until 1938 and now re-inserted forbids a member of the Board to engage in any other business or employment for remuneration. Under the Act as revised in 1938 only the Chairman was required to give full time service. Another provision which was dropped in 1941, and is now re-enacted enables a member of the Board to be dismissed by the Lieutenant-Governor in Council, on address of the Legislative Assembly.

All awards made by the Board previous to the revision of the Act are validated and declared not open to question in any court. The Board has the same powers as formerly in determining questions and classifying industries and also has authority to determine the existence of relationship of any member of the family of an employer, as well as of a workman, and to withdraw, as well as to add to and rearrange, industries in the schedules to the Act. A provision retrospective to June 1, 1942, empowers the Board to exclude from the Act workmen employed on projects of the United States Government for whom compensation has been otherwise provided.

The section enabling the Board to levy an additional assessment on an employer who fails to take proper precautions for safety and health of employees, was extended to permit similar action where the employer has not complied with the first-aid requirements of the Act or regulations. The Board may now cancel an accident prevention certificate if it considers that the holder no longer has the necessary qualifications.

Provisions relating to compensation for hernia and for frostbite, formerly included, are omitted from the revised Act. A new section provides that, where the injury consists of disease due partly to the employment and partly to other causes, a proportional compensation is to be paid.

A section which formerly applied only to a coal mine but is now extended to any place of employment, provides that where a workman

is found dead at a place where he had a right in the course of his employment to be, it is to be presumed that death resulted from accident arising out of his employment unless there is evidence sufficient to rebut this presumption.

Compensation is now payable from the date of disablement if the disability lasts for more than fourteen days, instead of thirty days, as formerly. In other cases the waiting period remains unchanged at three days.

A new section provides that the time limit of twelve months for claiming compensation shall not run against dependants residing in enemy territory or enemy-occupied territory, for the duration of the war. The capital value of such pensions is to be computed from the date of the workman's death but the pensions will not become payable until the end of the war or such other time as may be permitted by the War Measures Act or the Regulations respecting Trading with the Enemy. Moneys that would have been payable to such dependants are to be applied to increase payments to widow dependants who are in needy circumstances because of their own illness or that of their dependent children.

A similar disposition is to be made of the difference between a lump sum paid a workman in settlement of his claim, in order to permit him to live outside Canada, and the ordinary commuted value at the date of commutation. Where a workman accepts a lump sum in full of his claim, it is now provided that the claim may be re-opened if there is a change in the degree of disability. Formerly the acceptance of such a sum was final.

The provision denying compensation to members of the employer's family unless their application to come under the Act has been approved by the Board, now applies only to members who live in the employer's house.

The word "wife" was replaced by the word "spouse" in the section enabling the Board to divert compensation from a workman to his wife or children where the workman has deserted, or fails to provide for, them.

A section similar to that in force in a number of other provinces provides that where an accident happening outside the Province entitles the workman to compensation under the law of another province or country as well as under the Act, the workman must elect under which law he will claim compensation. Notice of election must be given the Board within thirty days of the accident or death or within such longer period as the Board may allow.

Projects undertaken by the United States Government in the Northwest Territories and the Yukon and workmen employed on them are excluded from the provisions of the Act

which would entitle a workman to compensation under the Act on certain conditions in the case of an accident happening outside the Province in a place where there is no State system of compensation.

As formerly, actions for the recovery of compensation are barred by the Act. A new section gives any party to an action the right, upon notice to the other party or parties, to apply to the Board for adjudication and determination of the plaintiff's rights to compensation under the Act and as to whether the action is one the right to which is taken away by the Act. The subrogation in favour of the Board of the workman's rights to action against a third party is now limited to his rights in respect of personal injury. It is made clear that he is free to sue in respect of property damage.

Notice of an accident must now be given by the workman or dependant, to the employer, as soon as practicable and failure to give it is a bar to compensation, unless the failure is excused by the Board. Formerly, notice had to be given before the workman left work on the date of the accident, or in any case before he had voluntarily left the employment in which he was injured. A new clause requires the workman to notify the Board also. As formerly, the employer must notify the Board of an accident and it is now stipulated that if he fails to do so, unless excused by the Board, he is liable on summary conviction to a penalty of \$50 and costs and in default of payment to a prison term not exceeding three months. The attending physician must report to the Board within two days of his first attendance, instead of five days, and on the first and fifteenth of each month during the workman's disability. As before, he must make other reports when required by the Board and in any case within three days after he considers the workman able to resume work. A new provision requires the physician to give all reasonable and necessary advice to the workman and dependants, without cost to them, in making application for compensation and furnishing certificates and proofs.

The provision authorizing a panel of medical practitioners from which medical boards of three members were to be chosen to handle appeal cases, was struck out. Appeals from awards of the Board are now to be taken to a specialist in the class of injury or ailment for which the workman has claimed compensation. Two specialists are to be nominated by the Board, in consultation with the physician attending the workman, and the workman may select one of them to examine him and report to the Board. If the workman does not make his choice within ten days of receiving notice from the Board, the latter

may make the selection. The Board may also, of its own motion, refer a claim to a medical practitioner.

Provisions for retraining disabled workmen are unchanged but the limit of \$20,000 a year formerly placed on expenditure for this purpose has been removed.

A new section authorizes the Board to order an autopsy where it considers it necessary and to pay the expenses from the Accident Fund. If the dependants refuse to permit the autopsy the Board may reject their claim for compensation. A further new provision requires hospital authorities to report to the Board immediately if a workman dies in hospital.

There are a number of increases in the scale of compensation. The pension to a widow or invalid widower is raised from \$35 to \$40 a month and provision is made for payment of a sum not exceeding \$100 to a widow or foster-mother for "pre-burial expenses." Payments in respect of children under 18 are now \$12 a month for each child. Formerly \$12 was paid for the first child, \$10 for the second, \$9 for the third and \$8 for all others. Orphan children are to receive \$20 a month each instead of \$15, as formerly. The maximum payment in the case of dependent parents is raised from \$30 to \$35 a month and the maximum total compensation to dependants other than consort or children is increased from \$65 to \$70 a month. Where reduced pensions are payable to alien dependants, the Board is to create the same reserve as for payment of full compensation and the undistributed surplus accruing is to be placed in a reserve and applied every six months to increase the payments to widows who are in needy circumstances because of their own illness or illness of their children under 18 years of age. Such extra payments may not exceed \$15 a month for the duration of the illness. Where pensions to alien dependants are suspended under the War Measures Act or regulations, the surplus resulting is to be distributed in like manner.

Another new section provides that, where a workman leaves no widow there is to be computed an amount equal to the average capitalized cost of pensions awarded during the previous three years to the dependants of workmen leaving widows and also the capitalized cost of pensions awarded to the dependants of the deceased workman. The larger of these amounts is to be charged against the Accident Fund and the excess of the amount so charged over the capitalized cost of the awards made is to be transferred to a special reserve to provide for such part of the cost of claims of workmen suffering enhanced disability, because of injury previously suffered, as, in the

opinion of the Board, is due to such previous injury. "Average capitalized cost of pension" includes the additional charges occasioned by the provisions requiring the same reserve for alien dependants residing outside Canada as for other dependants.

A new clause provides that, when deemed just, the impairment of earning capacity in partial disability cases may be estimated from the nature of the injury, having in view the workman's fitness to continue the employment in which he was injured or to adapt himself to a new employment. In computing compensation in any case, the Board, where it seems more equitable, may have regard to the earnings of the workman at the time of the accident. Minimum compensation for total disability is increased from \$10 a week or average earnings to \$12.50 a week or average earnings. A workman or dependant entitled to compensation of \$20 a month or more may be paid semi-monthly if he makes written request to that effect to the Board.

The only amendment relating to silicosis extends the time for making claims from two to five years from the date of leaving employment.

Sections of the Act which authorized deductions from wages of employees, to be applied to the cost of medical aid, were repealed, the repeal to be effective from October 31, 1943, in the case of bush work, lumber manufacturing and work incidental to such industries, and from December 31, 1943, in the case of all other industries. The entire cost of medical aid is now to be met by assessments against employers. The Board is authorized to establish hospitals at one or more points in the Province and to establish, equip and maintain clinics for the treatment and rehabilitation of injured workmen. The services of such a hospital may be extended to persons other than those entitled to medical aid under the Act. Accounts for medical services must be filed with the Board within three months of the discharge of the workman by the physician or of the date on which the workman returned to work, whichever period is shorter. An employer who is required by the Board to provide first-aid appliances and services, must notify the Board when he has complied with the order.

Rates of assessment may be graded or varied, not only according to the hazard of the industry, as formerly, but also according to other circumstances of the operations of the employer. Where an employer fails to pay any assessment when due or fails to submit a wages or production statement or submits an underestimate of his payroll, he is liable to pay in addition, as a penalty, a percentage, fixed by the regulations, upon the unpaid

amount. Work performed for an employer under one or more contracts may, if the principal and contractor agree, be treated as one employment for assessment purposes. As formerly, the minimum assessment is \$5, except for mines, coke ovens and briquetting plants, which have a minimum of \$50. A new provision, however, fixes a \$5 minimum for coal mines where safety committees are employed by trade unions. Provision is made for inspection of employers' premises by the Board and persons authorized by it, who may take affidavits concerning any matter relating to such inquiry.

The Board is given power to require an employer to furnish security for assessments and in case of default in furnishing such security or paying assessments may order the employer to cease employing workmen. An employer convicted of disobeying such order is liable to not less than \$5 a day nor more than an amount equal to his debt to the Board and, in default of payment, to a prison term not exceeding three months.

For purposes of administration and in such cases as the Board considers necessary, contractors and sub-contractors and their workmen are to be deemed to be workmen of the principal. Copies of all contracts and sub-contracts involving the employment of workmen must be filed with the Board within seven days of being made.

Changes were made in the section requiring that, except in the case of sales made by regularly established retailers, each purchaser of lumber, before paying or giving security for any part of the purchase price, must obtain from the vendor a certificate from the board that it has no claim on such lumber. Where the vendor has not furnished such certificate, the purchaser is liable for the amount due the Board by the producer or vendor of the lumber, up to the amount of the assessment for the then current year in respect of the lumber purchased. The Board may also, by written notice to the purchaser, require payment of such further sum per thousand feet, board measure, as it may fix. Formerly, the liability of the purchaser was limited to 75 cents per thousand feet, board measure, of the lumber purchased. Purchasers of lumber to whom the above provisions apply must keep accurate accounts of all lumber purchased, in form required by the Board, and submit them for examination when required. Persons engaged in lumbering, logging, saw-milling, planing or processing of lumber, manufacture of lumber or lumber products, including ties, shingles, laths and other products, must advise the Board within ten days of commencing business and furnish, then and at other times, such particulars of their opera-

tions as the Board may require. Such person is to be deemed to be within the provisions of the Act unless, within ten days of beginning operations, or such further period as the Board may allow, he applies to the Board for a declaration that he is not within its scope.

As formerly, the amount due on any assessment may be recovered by distress and sale of the goods and chattels of the debtor and new provisions outline procedure for seizure of such goods and chattels. The provisions directing the disposal of any unclaimed surplus realized on the sale, were amended to allow six months from date of sale for claiming such surplus.

The section enabling the Board to notify an employer, who is in default of paying an assessment for one year, to cease employing workmen, was amended to reduce the time limit to one month. A maximum penalty of \$100 and costs has now been provided for violation of the Act or any regulation or order made under it, in cases where no other penalty is provided; the minimum penalty is unchanged at \$5 and costs. As formerly a prison term of three months may be imposed in default of payment of the fine and costs. For continuation of such an offence after conviction the minimum penalty is still \$5 per day but a maximum penalty of \$100 a day has been provided and the maximum prison term in default of payment has been raised from three to six months.

The Board has power to define any of the industries contained in the schedules to the Act and to decide whether or not any establishment, trade, or business is, or is not, an industry to which the Act applies.

Except where it is otherwise stated, the benefits provided under the revised Act for workmen and dependants apply only to accidents occurring on and after the date of coming into force of the Act (March 30, 1943). Claims in respect of accidents occurring before that date are to be dealt with under the law in force at the time of the accident.

Collective Bargaining

The Industrial Conciliation and Arbitration Act, 1938, was amended as to the sections relating to collective bargaining. The trade union or negotiating committee representing the employees, appointed in accordance with the provisions of the Act, may serve upon the employer or employers a notice of a meeting to be held for the purpose of bargaining. The notice is to be served at least forty-eight hours before the time of the meeting and the employer or employers, or their accredited representatives, must attend. A fine, not exceeding \$500 for each offence, may

be imposed on an employer convicted of refusing to attend a meeting of which he has received notice or to send an accredited representative. No prosecution may be undertaken or carried on under this section, however, without the written authority of the Minister of Trade and Industry. The clause was omitted which declared liable to a fine of \$500 any employer who refused to bargain with the negotiating committee or a trade union appointed by a majority vote of the employees affected. A maximum fine of \$500 may now be imposed on any person who, by intimidation, threat of loss, or actual loss, of employment or by any other threat, seeks to compel any person to refrain from engaging in any activities in support of an organization of employees or any union or negotiating committee, or from making a complaint to such a union or committee, or from giving evidence at an inquiry.

Wages

An amendment in the Industrial Wages Security Act provides that an Order in Council designating any industry as an industry to which the Act applies may restrict the operation of such Order to a specified area. The Minister may now accept any type of security and may refer applications to furnish security other than cash or guarantee bond to the Board of Public Utility Commissioners for approval.

There were a number of changes in the Mechanics' Lien Act. The lien is now imposed on the land itself instead of on the estate or interest of the owner in it. A lien for materials is expressly stated to arise at the date of first delivery of material. Husband and wife are placed on the same footing in cases where one is presumed to be acting as agent for the other. Formerly only cases where the husband was presumed to be acting for the wife were covered by the Act. New provisions deal with priorities as between liens and mortgages and with the disposition of the proceeds after sale of the land so as to make a fair distribution between a mortgagee and lien-holder where there is not sufficient to satisfy both claims. These provisions apply to liens arising before, as well as after, the passing of the amendment and to all proceedings respecting them, except where they have been concluded by the sale of lands to the mortgagee. Provision is made for the enforcement of the Act in cases where the contract price is not money. Liens on oil and gas well equipment, registered in the office of the Minister of Lands and Mines, may now be cancelled in the same manner as liens registered against lands in the Land Titles Office. Liens in connection with oil and gas wells

now cover oil and gas in place or severed and all persons having an interest in the oil or gas are brought within the definition of "owner." Where the oil or gas is held in fee simple, however, the holder of an interest in the first royalty in the oil or gas is protected up to twenty per cent, but all interests over that amount are subject to the lien. A new section enables a judge to order removal from the land and sale of a structure to satisfy a lien.

Chauffeurs

An amendment in the Vehicles and Highway Traffic Act authorizes the Minister to grant, to any person between the ages of 16 and 18 years who holds a driver's certificate, a temporary permit to operate a motor vehicle as a chauffeur, providing such motor vehicle is not being used to transport passengers for hire.

Mothers' Allowances

The Mothers' Allowances Act was amended to provide for allowances in respect of boys up to the age of 16. Formerly the maximum age was 15 years for boys and 16 for girls. Where a child for whom an allowance is being paid reaches the age of 16 after the opening of the December school term, payments may be continued until the end of the school year, if the child is attending school and making satisfactory progress.

Old Age Pensions

An amendment in the Old Age Pensions (Supplementary Allowances) Act, 1942, provides for the payment of a supplementary allowance to Alberta pensioners resident in other provinces which pay a similar allowance to their pensioners who are resident in Alberta. The allowance is to be the same as that paid by the other province but may not exceed \$5 per month. The Lieutenant-Governor in Council is authorized to make agreements with the other provincial Governments for the carrying out of the Act, and the agreement made with British Columbia in January, 1943, is validated.

Changes in School Holidays during the War

The Operation of Schools (War) Act makes temporary changes in the time of school holidays, which are to begin on July 1 in 1943 and on August 1 in subsequent years and extend into October, to enable teachers and pupils to assist in harvesting and other seasonal operations. The Act may be repealed at any time by Proclamation.

Housing and Public Works

An amendment in the Calgary Charter enables that city to operate a housing scheme

under the National Housing Act and to take advantage of any Act of the Parliament of Canada or of the Province providing for assistance to municipalities in carrying out such a scheme.

The Edmonton Charter was amended to enable the City Council to set up a fund to cover the cost of municipal works or delayed public improvements, including new housing, to be undertaken after the war.

Post-War Reconstruction

The Post-war Reconstruction Act sets up a Post-war Reconstruction Committee of six members named in the Act. The Committee is to obtain information and undertake a survey of the resources of the Province, make plans for economic reconstruction measures to be taken at the end of the war, and for the prevention of unemployment during the transition period and make such other investigations as the Lieutenant-Governor in Council may direct.

The Post-war Reconstruction Fund Act creates a fund to consist of moneys appropriated by the Legislature together with such other appropriations as may be made from time to time. The fund, for which \$1,000,000 was provided by the Special Appropriation Act, is to be applied to the undertaking of public works to give employment to, and assist in the rehabilitation of, persons serving in His Majesty's Forces, to grant subsidies or loans for this purpose to commercial or industrial projects, and to pay the expenses of the Post-war Reconstruction Committee.

Resolutions

On March 4 the Legislature passed a Resolution urging the Government to make an immediate investigation of every case receiv-

ing assistance under the Mothers' Allowance Act to ensure an equitable system of payments and to provide, in co-operation with the municipality concerned, an increase in allowance wherever circumstances require.

On March 29 a Resolution was approved setting up a Special Committee to study and report to the next session, with recommendations, concerning the proposed Dominion health insurance legislation and its effect on the tax structure, the people, and the administration of the Province of Alberta.

A Resolution, adopted on March 30, requested the Dominion Government to cancel the National Selective Service Order prohibiting employment of Canadian workers by United States firms engaged in certain projects in Canada, for the defence of Alaska and the Canadian West. The reasons for the request were:—That it is unnecessary, since National Selective Service has power to refuse permits in individual cases where the worker's services are more urgently required in his present employment, or in some other essential Canadian project; that it is injurious to harmonious relations between Canadian and United States workmen, and detrimental to Canadian unity and to employer-employee relations; that it violates the democratic right of workmen to choose their individual employment, provided the safety of the State is not jeopardized; that it constitutes an unjustifiable discrimination against Canadian workmen; and that it interferes with the securing of necessary workmen for projects of vital importance to the defence of Western Canada. It was further resolved that any arrangements entered into between the Dominion Government and the United States authorities in respect to American projects undertaken in Canada, should provide equal pay for equal work as between Canadian and United States workmen.

Saskatchewan

The Saskatchewan Legislature, during its session from February 23 to April 12, enacted statutes providing for a Reconstruction Council and for compensation to civil defence workers injured on duty and amended the laws governing payment of wages, labour contracts, boiler inspection and the early closing of shops.

Wages

The Masters and Servants Act was amended to enable either party to proceedings under the Act to have the matter tried by the police magistrate of the locality in which the employer or employee resides instead of by the justice of the peace before whom the complaint was made, upon making a request to that effect to the justice of the peace and

paying the fees fixed for summary proceedings by Part XV of the Criminal Code.

The Workmen's Wage Act, which requires employers in the construction industry and in factories and shops to pay wages weekly in cash or by cheque and prohibits payment in goods, was amended to enable the Minister of Municipal Affairs, who is the Minister in charge of the Bureau of Labour and Public Welfare, to make an Order exempting any employer from these provisions.

A section added to the Mechanics' Lien Act, effective May 15, 1943, requires a lienholder to obtain leave of the judge before commencing action to realize under a lien. Where such application is made, the judge is to extend the time within which an action must

be instituted under the Act for such period as may be necessary.

Steam Boilers

An amendment in the Steam Boilers Act forbids any person to do welding in the construction, repair or alteration of a boiler or pressure vessel unless he holds a welder's certificate issued under the regulations which the Lieutenant-Governor in Council is authorized to make. Such regulations may prescribe qualifications, tests and evidence of training and experience to be required of applicants for certificates, provide for the issue, duration, suspension and cancellation of certificates and the fees to be paid, require posting of certificates on premises where welding is carried on, and provide penalties for breach of the regulations.

Early Closing of Shops

Identical amendments in the City Act and the Town Act replace the section dealing with early closing of shops by new provisions, which are effective June 1, 1943. Dry cleaners' and dyers' establishments are included in the list of places covered by the definition of "Shop", the others being, as formerly, any building or portion of a building, booth, stall or place where goods are exposed or offered for sale by retail or public auction, barbers' shops and ladies' hairdressing, manicuring, and beauty parlours.

Instead of merely authorizing city and town councils to pass early closing by-laws, as formerly, the Acts now require that during the whole of the year shops must remain closed on each day of the week during certain hours. From Monday to Friday, garages, filling stations, service stations and gasoline pumps are to be closed from 7 p.m. until 5 a.m. of the following day, except for the storing of cars and emergency services, and all other shops are to be closed from 6 p.m. until 5 a.m. On Saturdays, other than a Saturday which is the 24th of December, and on each of the four week days immediately prior to December 24th all shops must be closed between 10 p.m. and 5 a.m. except, in the case of garages, for the storing of cars and emergency services.

Within two months of receipt of a petition signed by not less than three-quarters of the occupiers of the class or classes of shops to which it relates, the council may pass a by-law fixing an earlier closing hour than those specified above. Such a by-law may not be repealed or amended except on petition of one-third or more of the occupiers of shops affected or by a by-law passed unanimously at a regular or special meeting

of the council at which all the members are present or at a regular meeting after notice in writing has been given of the terms of the by-law.

Councils may also, without petition, pass by-laws to provide for Saturday closing, during all or any part of the year, of all or any class or classes of shops, at 6 p.m., or such later hour as may be fixed in the by-law, but not later than 10 p.m. from November to April and not later than 11 p.m. from May to October, and may fix different hours for different classes of shops. A by-law may provide also for closing on any one day a week, for all or part of the year, at 12 o'clock noon or such later hour as may be fixed, with different closing days for different classes of shops, and for closing on all or any part of any specified holiday or day proclaimed as a civic holiday.

As formerly, certain shops are exempt, including those in which the principal business is that of a tobacconist, news agent, hotel, and refreshment house, and to these are now added confectioners', bakers' and druggists' shops. The goods which may be sold under these exemptions are more clearly set forth in the Act and the shops selling them are required, whenever they are open after the general closing hour, to keep a card at least 30 x 18 inches posted in a conspicuous place, stating that the shop is now closed except for the sale of exempted merchandise and specifying such merchandise. The provisions are continued in force which enable by-laws to be passed for the sale of gasoline, lubricating oil and grease in garages when filling and service stations and gasoline pumps are closed, which exempt from penalty any person selling any article for use in emergency arising from sickness, personal injury, or death, and which restrict to sale of used or second-hand goods the sale by public auction during closing hours of such goods as are sold by the shops required to close. As formerly, no employer may permit his employees to be in his shop after closing time except for one-half hour, but a new provision enables the employer, with the consent of his employees and upon compliance with any relevant provisions of the Minimum Wage Act or any orders made under it respecting overtime, to use the employees' services, after such half-hour period, for taking inventories, dressing windows, arranging stock, balancing account books or other work which cannot reasonably be done when the shop is open to customers.

For contravention of the early closing provisions of the Act or of any by-law passed under their authority the proprietor of a shop

and the person in charge when any contravention occurs are each guilty of an offence and liable to a fine not exceeding \$100 and costs, except in a case of unlawful sale of goods other than exempted goods by a tobacconist, news agent, hotel, refreshment house, confectionery, bakery or druggist, when the minimum fine is \$50 and costs. In default of payment of any fine the offender is liable to imprisonment for not more than six months with or without hard labour. Nothing in the early closing provisions of the Act or in by-laws passed under them is to be deemed to apply to the sale of beer on licensed premises, or construed as authorizing the sale on Sunday of any merchandise forbidden by the Lord's Day Act.

Chauffeurs

Amendments in the Vehicles Act include a new definition of "chauffeur" which excludes a person operating a school bus under arrangement with the board of a school district.

Post-War Reconstruction

The Saskatchewan Reconstruction Council Act, 1943, provides for appointment by the Lieutenant-Governor in Council of a Council of not more than fifteen persons, of whom one is to be appointed chairman, to study and investigate conditions that are likely to arise during or after the war and to consider, develop and recommend policies to meet such conditions. The Council may confer with Dominion, provincial and municipal authorities, industrialists, agriculturists, organizations of employers and employees and others. The Council is to make its reports and recommendations whenever it considers advisable or as the Lieutenant-Governor in Council may require. A member of the Legislative Assembly may serve on the Council and accept remuneration or allowance for such services without forfeiting his seat in the Assembly or incurring a penalty. The Act repeals the Industrial Development Board Act.

Superannuation

A number of changes, effective May 1, 1943, were made in the Workmen's Compensation Board Superannuation Act, 1940. The section which provides that an employee of the Board reaching retirement age with less than ten years' service shall receive a lump sum based on his annual salary but not exceeding \$2,000, was amended to provide that where such employee's contributions plus accrued interest exceed \$2,000 he shall be paid a lump sum equal to his contributions with

accrued interest. No allowance is payable to the widow, child or adopted child of a superannuate or employee if the employee married or adopted the child after the amendment comes into force (May 1, 1943) and was over 55 years of age at the date of marriage or of adopting the child. A new section enables any person who was an employee on March 1, 1940, when the principal Act came into force, and whose service has been continuous since that date, to have his service before that date reckoned for purposes of the Act if his service after February 29, 1940, was continuous with his present service and if he sends a written request to the Board before July 1, 1943, and pays up back contributions with interest at 3 per cent. A member of the Board is to be deemed to have reached retiring age on the date on which he ceases to be a member of the Board if he has been a member continuously for ten years or more.

Compensation for Civil Defence Workers

The Civil Defence Workers' Compensation Act, 1943, provides for medical aid and the payment of compensation to any person sustaining injury by accident during the war, in the course of his training as a fire-fighter under a civil defence scheme established in any city. If a city is declared a "designated area" under the Air Raid Precautions Personnel Compensation Order, 1942, made by the Dominion Government, the Act will cease to apply to that city. The Act, which applies to injuries sustained before as well as after its enactment, is administered by the Workmen's Compensation Board.

Compensation for injury which incapacitates the injured person from engaging in his usual employment or occupation is fixed at \$11.50 per week for the injured person, \$4.60 for his wife and \$2.30 for each dependent child under 18 or dependent parent. In case of serious or prolonged disability compensation ranges from \$120 a year for disability of from 20 to 24 per cent, to \$600 a year for 100 per cent disability. The additional pension for a wife ranges from \$48 to \$240 a year and for each dependent child under 18, or parent, from \$24 to \$120 a year. In case of death the Board may also pay the expenses of burial up to \$100. Medical aid includes medical surgical, hospital and nursing services, and artificial members and apparatus and their renewal. Claim for injury allowance must be made within three months and for pensions within one year after the injury. The widow is entitled to a pension of \$480 a year with an additional \$120 for each child. Where the dependants

are orphan children \$240 a year is paid to the first child and \$180 to each additional child. Where there is no widow or children, such amount, not exceeding a widow's pension, as is considered by the Board to be adequate, may be paid to dependent parents. No pension is payable to a widow unless she was wholly or mainly being maintained by her husband at the time of his death and unless she had been married to him before he sustained the injury. The city in which the injury occurs is jointly liable with the Province for payments made under the Act and for expenses of administration. The Lieutenant-Governor in Council may make regulations for carrying out the provisions of the Act.

Bill not Passed

A Bill respecting the Right of Employees to Organize and providing for Conciliation and Arbitration of Industrial Disputes was introduced and was considered by the Committee on Law Amendments. The Committee recommended that it be not proceeded with but that the Assembly request the Government to provide for an inquiry into the principles of the Bill and a report at the next Session. This recommendation was adopted by a vote of 27 to 11.

The Bill, which would have repealed the Freedom of Trade Union Association Act and the Act enabling the Dominion Industrial Disputes Investigation Act to be applied to provincial disputes, followed closely the Industrial Conciliation and Arbitration Act of British Columbia, as amended this year (L.G., May, 1943, p. 691). The Bill would have recognized the right of employers and employees to organize, made collective bargaining mandatory, provided for conciliation and investigation in industrial disputes, and prohibited strikes and lockouts pending investigation by a tripartite board. One provision which is not included in the British Columbia law would have required every trade union and organization of employees to file, within thirty days, with the Commissioner of Labour and Public Welfare, a copy of any agreement entered into by the union and any employer or representative of an employer.

Resolution

On April 6 a Resolution was adopted requesting the Government of the Province to consider providing for improved high school facilities and a revision of the high school curriculum to provide vocational courses in agriculture, shop work, home care and additional facilities for courses in art and music,

increased equalization grants for districts of low assessment, and greater financial assistance to enable young people in necessitous circumstances to obtain university education. The Resolution further commended the Dominion Government for its assistance to youth, vocational and war emergency training and scholarships for university students, and recommended the continuance and extension of this assistance.

Special Committee on Social Welfare

On March 2 a Select Committee was appointed by the Legislative Assembly to inquire into the social welfare legislation of Saskatchewan, practical measures of further social security and health services, for the Province by itself or in conjunction with the Dominion Government, means of meeting cost of such services, constitutional limitations affecting joint Dominion-Provincial arrangements, and any incidental matters. Later, the Assembly added the subject of three resolutions to the terms of reference. These urged: (1) that the Child Welfare Act and regulations be amended to provide mothers' allowances in respect of all needy children and an increase in the amount of such allowances; (2) that the maximum pension under the Old Age and Blind Persons' Pension Act be increased, and that the Government associate itself with the Governments of other provinces in requesting the Government of Canada to contribute to such increases and that the Special Committee consider the practicability of establishing in Canada a contributory plan of old age pensions; and (3) that the Government should co-operate with the Government of Canada in a national plan of health insurance.

The Special Committee in its first report to the Legislature, presented on April 12, stated that over forty organizations and societies had sent representatives to give evidence or had submitted written briefs. These included medical, hospital, dental, and nursing services, labour organizations, churches, welfare societies, municipalities and the Canadian Legion.

The Committee found a wide variety of views but fairly general agreement on the following points:—The need for extending health and social services and distributing them more equitably and uniformly throughout the Province; the apparent willingness of the people to pay for such extended services; the need for an immediate increase in pensions for the aged and blind; and the desirability of further provision for families eligible for mothers' allowances.

There was a wide difference of opinion, however, on questions of method and of ways and means. The Committee found that it had not enough time to study the various proposals made to it to the point where definite conclusions on the major issues were possible. In view of this, and of the fact that the House of Commons Special Committee on Social Security had not ended its sessions and that its decisions must have a direct bearing on the major matters in the terms of reference of the Saskatchewan Committee, the latter recommended that the inquiry be continued during the recess through a Committee of seven, who would assemble the material, consider the further deliberations of the House of Commons Committee and report to the reconstituted Special Committee early in the next session so that a final report may be made during that session.

The Committee, however, was able to report certain findings with respect to social welfare legislation in Saskatchewan and the constitutional limitations affecting joint Dominion-Provincial arrangements. Saskatchewan's legislation was found to compare favourably with that of other provinces. Expenditure for social services in the fiscal year 1941-42 amounted to \$9,990,693, of which \$2,781,168 was reimbursed by the Dominion Government and other provinces. As to constitutional limitations, a brief had been presented by the law officers of the Crown stating that legislative jurisdiction in the matter of the subject under inquiry rests with the Legislature of the Province but that there was little doubt that a formula could be devised under the Canadian constitution to enable the Province to participate in any national scheme of health insurance or to allow a

provincial programme to be fitted into a national scheme.

The Committee found an urgent need of immediate additional assistance to the aged and blind and to mothers for the care of dependent children. They therefore recommended that an immediate increase in pensions to the aged and blind be granted and that while the strongest pressure should be brought to bear on the Dominion Government to make adequate provision for such persons without delay, the Provincial Government should, regardless of the attitude of the Dominion consider contributing its share of a reasonable increase. The Committee further recommended that the Dominion Government provide for a substantial increase in the income which aged and blind persons are entitled to receive and in the exemption on account of property holdings before pension deductions are made and that the age at which blind persons become eligible for assistance under the Department of Pensions and National Health be reduced to 21 years.

Other recommendations of the Committee were:—An immediate increase in the allowance to mothers with dependent children; an increase in the number of public health nurses; provision for adding to the number of students training for nursing, medical and dental services; consideration to extending dental clinics; a request to the Workmen's Compensation Board to consider raising the compensation rate from 66½ per cent to 75 per cent of wages; amendment of the Workmen's Compensation Act to provide for payment to children of \$12 instead of \$10 per month and to orphan children of \$20 instead of \$15 per month; raising the maximum wages reckoned in computing compensation to \$2,500.

Recent Regulations under Dominion and Provincial Legislation Housing—Workmen's Compensation—Pensions—Public Service— Seamen—Pilots—Safety in British Columbia—Minimum Wages in Nova Scotia and Quebec

THE Minister of Finance has been authorized to take measures to relieve the housing shortage in certain areas. The application of the Government Employees' Compensation Act has been extended to additional groups of persons. Certain recommendations of the Advisory Committee to the Treasury Board on the Public Service have been implemented and a Pension Plan for employees of the National Harbours Board is to be established. Amendments have been made in the regulations under the Dominion Old Age Pensions Act. Orders in Council relating to

the disposition of the wages of deceased seamen and to load-line certificates for ships were passed and a number of Pilotage by-laws have been amended. Orders in Council concerning manpower and other topics, which are summarized elsewhere in the GAZETTE, are listed at the end of the Dominion section.

In the provincial field the British Columbia Workmen's Compensation Board has revised its general accident-prevention regulations. Nova Scotia has passed a minimum wage order for women employed in a miscellaneous

group of industries or wherever women replace men. Quebec has amended the order applying to the silk textile industry, issued a by-law

under the Order governing cotton textiles and renewed the Order relating to theatres on the Island of Montreal.

Dominion

Housing

To relieve the acute shortage of housing in the Ottawa, Vancouver and Victoria districts, two Orders in Council have been passed under the War Measures Act authorizing the Minister of Finance to acquire large houses in these areas for conversion into multiple dwelling units. Order in Council P.C. 2641 of April 1 authorizes the acquisition of 10 suitable buildings in the Ottawa district and Order in Council P.C. 4579, June 4, authorizes the acquisition of 40 additional buildings in Ottawa and 50 in the Vancouver and Victoria districts.

The Minister, on behalf of His Majesty, leases the buildings from their owners for five years, with the privilege of renewing the lease for three years more. He may cancel the lease at any time on 30 days' notice. The buildings are converted at the cost of the Government into apartments which may then be sublet to suitable tenants at reasonable rentals. The buildings themselves will be returned to the owners, on the expiration or cancellation of the leases, in their then existing condition.

Government Employees' Compensation Act

This Act provides that employees of the Government of Canada will be paid compensation for accidents on the terms provided for workers in private industry by the Workmen's Compensation Act of the Province in which the accident occurs. Since the beginning of the war the Act has been extended by Orders in Council passed under the War Measures Act to cover various classes of workers who would not normally be eligible for compensation under either this Act or the Provincial Acts (L.G., Mar., 1943, p. 390). It has recently been extended to cover still further classes of workers.

Order in Council P.C. 3650 of May 4 provides that the Act will apply to Dominion Government employees who are ordinarily resident in a Canadian province and who suffer injury or death in the course of their employment while they are performing war work in the Yukon or Northwest Territories. Compensation will be paid as if the accident had occurred in the Province in which the worker is ordinarily resident, and will not be affected by the length of time the worker is employed in the territory concerned.

Men who are granted postponement of military training on the ground that they are Mennonites, Doukhobors or conscientious objectors are required to perform alternative service under Part IIA of the National Selective Service Civilian Regulations (L.G., April, 1943, p. 526). This part provides that men performing alternative service will be entitled to benefits under the Government Employees' Compensation Act and that the Minister of Labour may, with the concurrence of the Minister of Transport, prescribe the remuneration which any man will be deemed to have received for the purposes of this Act. An Order in Council of June 1 (P.C. 36/4453), which was passed on the recommendation of these two Ministers, provides that compensation in the case of permanent disability or death will be based on a wage of \$12.50 per week, and in the case of temporary disability on a wage of \$7.40 per week. In the latter case, however, the amount of compensation is reduced by \$4.20 per week for board if the person is receiving board without expense to himself in the place where he has been performing alternative service or while he is in a hospital at the expense of the Crown.

Public Service

Three Orders in Council have been passed putting into effect recommendations of the Advisory Committee on the Public Service (L.G., Feb., 1943, p. 267). Order in Council P.C. 1/4456 of May 31 provides for the payment of a cost-of-living bonus to persons receiving between \$2,100 and \$3,000 per year. A bonus was already in effect for persons receiving under \$2,100 by virtue of an Order in Council of August, 1941 (L.G., 1941, p. 1036). The bonus for the lower paid employees is calculated on the basis of the rise in the cost-of-living index from August 1, 1939. That for employees receiving over \$2,100 is smaller, being calculated on the basis of the rise in the index after July 1, 1941.

Persons whose basic remuneration is less than \$3,000 may not have their total remuneration raised above \$3,000 by reason of the payment of the bonus. For those whose remuneration is less than \$2,100, payment of a bonus may not result in their total remuneration exceeding \$2,100 plus the bonus payable to persons receiving \$2,100 to \$3,000. When a husband and wife are both members of the Public Service of Canada

and both are eligible for a bonus, that of the employee with the greater salary will be paid. If either is ineligible, neither will receive a bonus and if both are eligible for the same bonus the husband's will be paid.

In addition to the Order in Council relating to the bonus, Orders in Council have also been passed relaxing in some respects the provisions respecting permanent appointments (P.C. 2/4456, May 31) and restoring the payment of gratuities in respect of civil servants of two years' standing who die while serving in the Armed Forces (P.C. 3/4456, May 31).

Seamen

Load-Line Rules on Great Lakes Ships.—The load-line rules relating to Great Lakes ships were relaxed by an Order in Council of July 24, 1941 (L.G., 1942, p. 1437) under the War Measures Act. This Order provided that the certificates indicating the depth to which ships could be loaded were subject to cancellation at any time by the Minister of Transport. An amendment has now been passed (P.C. 4357, May 27), repealing the above provision and providing that the certificates will remain in force for any period not exceeding five years which may be specified therein and may be renewed for any further period of not more than five years which the Assigning Authority may determine. No certificate, however, will remain in force after the Regulations themselves have ceased to have effect.

Seamen's wages.—The Minister of Transport has been authorized by an Order in Council (P.C. 3296) passed April 22 under the War Measures Act to dispose of any wages of deceased seamen which come into his hands, by paying them to the persons named as next of kin in the seaman's Articles of Agreement. The Canada Shipping Act provides that the property of deceased seamen is to be forwarded, in certain cases, to the Minister who is to dispose of it, after making deductions for any expenses incurred in respect of the seaman or the property, in accordance with the order of any court which has jurisdiction to determine how the seamen's property is to be distributed. However, when the seaman had no property other than the balance of his wages, Letters of Administration were not usually taken out and there was, therefore, no court competent to determine the disposition of the wages. In such cases, the Minister may dispose of the wages, if the amount involved does not exceed \$100, to the next of kin.

Pilots

The by-laws of three Pilotage Districts have been amended recently.

The special wartime pilotage rates authorized last October for vessels entering or leaving Prince Rupert in the British Columbia Pilotage District (L.G., 1942, p. 1302) have been extended to the new United States army base at Porpoise Harbour adjacent to Prince Rupert by an Order in Council (P.C. 3649) gazetted May 22 under the War Measures Act. Rates have also been set for movages between these two harbours. These rates are all subject to the 25 per cent surcharge on all pilotage rates in the District authorized in December, 1941 (L.G., 1941, p. 958).

The by-laws of the Saint John Pilotage District relating to movage charges have been amended by an Order in Council (P.C. 3430) under the Canada Shipping Act gazetted May 15. The amendment fixes a rate of \$20 for movage of all ships irrespective of size from the Main Harbour to any place in the harbour above the Falls or vice versa and authorizes special rates varying with tonnage for movages between the Main Harbour and Courtenay Bay or vice versa. The rates for movages within the Main Harbour or Courtenay Bay are unchanged. The amendment was proposed by the pilots of the District and approved by the Shipping Federation of Canada Inc.

To build up a fund for the maintenance of pilot vessels, a flat rate of \$2.50 for embarking or disembarking a pilot by pilot boat was authorized in the Pilotage District of Richibucto, New Brunswick, by an Order in Council (P.C. 3964) passed under the Canada Shipping Act and gazetted May 29.

National Harbours Board Pension Plan

The National Harbours Board has drawn up a Pension Plan for the Board's employees. A Pension Fund made up of contributions from the Board and from the persons covered by the Plan will be created and the Government will credit interest to the Fund at the same rate as it pays to Superannuation Fund No. 5. By-law 1 of the plan, approved by an Order in Council (P.C. 3/4225) of May 21, was gazetted May 29 and stipulates that the Plan is to come into effect on June 1 and will be administered by the Minister of Finance.

All permanent full-time officers, clerks and other employees of the Board are eligible if they earn at least \$600 per annum and are not contributors under the Civil Service Superannuation Act or the Civil Service Superannuation and Retirement Act. The provisions of the Plan are to be, *mutatis mutandis*, in the terms of the Civil Service Superannuation Act and all regulations and Orders in Council related to it.

Persons employed on June 1, 1943, must indicate by December 1, 1943, if they wish to become contributors. All persons employed after June 1 must become contributors provided the Department of Pensions and National Health certifies that their health and physical condition come up to standards set for the Civil Service.

Contributors may make extra contributions to cover any period of service prior to becoming contributors, and may include service as employees of the Civil Service, Senate, House of Commons, Library of Parliament, or any other portion of the Public Service which the Governor in Council may designate; or as employees of any corporation to which the Board is or shall become a successor. Such period of service will then be counted for the purpose of computing allowances. It is counted in computations of time served whether or not contributions are made in respect of it. Persons who, between September 7, 1939, and June 1, 1943, obtained leave of absence to enter the Armed Forces must indicate by June 1, 1944, whether or not they wish to become contributors and whether or not they desire to contribute for past service.

Contributors must retire at 70 unless the Treasury Board grants annual extensions for a period not exceeding 5 years. Contributors over 74 on June 1, 1943, may have their period of employment extended up to June 1, 1944.

No allowance will be paid until the Treasury Board certifies that a contributor is eligible and, if he is under 65, the Board must also report, on the advice of the Minister of Transport, that it is in the public interest to grant the allowance. Allowances will be granted to widows and children of contributors on certain conditions. The Treasury Board must consider such recipient worthy of an allowance. Allowances will not be granted to dependents of a contributor who married after superannuation, who was over 60 years at the time of a marriage contracted after June 1, 1943, or who dies within one year of his marriage unless the Board is satisfied that he was in good health at the time of marriage and that there are no other objections to granting the allowance. If there are 20 or more years difference between the contributor's age and that of his wife, her allowance is to be reduced.

Old Age Pensions Act

The amendment in the regulations under the Dominion Old Age Pensions Act (L.G., 1938, p. 286; 1939, p. 1230; 1942, p. 583; April, 1943, p. 527) which declared that cost-of-living bonuses and supplemental allowances

paid to old age pensioners by the Governments of Alberta, British Columbia, Manitoba and Ontario are to be disregarded in calculating a pensioner's income, has been further amended by an Order in Council (P.C. 10/4120) gazetted June 5. The latest amendment extends this provision to cover similar payments by the Governments of Nova Scotia and Saskatchewan.

The regulations governing the determination of the income of married applicants for old age and blind pensions whose spouses are or are not in receipt of a pension under the Dominion Old Age Pensions Act have also been amended by an Order in Council gazetted May 8. The amendment stipulates that the income of an applicant for an old age pension whose spouse is not in receipt of any pension under the Act is to be taken as the sum of the incomes of the husband and wife less \$365. The provisions relating to the income of applicants whose spouses are in receipt of either an old age or a blind pension are unchanged. Under the Act a person is not eligible for an old age pension unless his yearly income is below \$365 and a married applicant for a blind pension must have an income of less than \$640 to qualify for a pension.

Alberta, which adopted the Dominion Old Age Pensions Regulations in 1937, gazetted two Orders in Council on April 30 adopting the above amendment and the one relating to cost-of-living bonuses and supplemental allowances passed February 17 (L.G., April, 1943, p. 527).

Other Orders in Council

The following Orders in Council have been passed recently and are summarized elsewhere in the GAZETTE:

Manpower.—Compulsory Employment Order No. 2, May 15, issued under National Selective Service Civilian Regulations, P.C. 246 (L.G., Jan., 1943, p. 19), p. 738; P.C. 4091, May 17, authorizes proclamation declaring a state of emergency in regard to production of coal, p. 739; P.C. 4092, May 17, regarding employment of coal miners, p. 739; P.C. 3628, May 4 and P.C. 4565, June 5, amend P.C. 10674 (L.G., 1942, p. 1404) establishing Emergency Coal Production Board, p. 741; P.C. 2326, May 10, authorizes utilization of services of prisoners of war in agricultural and other work, p. 741; P.C. 4356, May 20, permits Japanese labour to be employed in timber operations, p. 739.

National War Labour Board.—P.C. 4566, June 4, gives the National War Labour Board jurisdiction over wages in shipyards in Ontario,

Quebec and Halifax, p. 747; P.C. 3870, May 17, establishes Western Labour Board, p. 746.

P.C. 3868, May 10, amends agreements with Provinces regarding War Emergency Training Program, p. 814.

An Order authorizing agreements with provinces for more effective use of agricultural labour (P.C. 3620) was dealt with last month (L.G., May, 1943, p. 568).

P.C. 4175, May 20, amends P.C. 4020 (L.G., 1941, p. 1210) relating to Industrial Disputes Inquiry Commissions, p. 761.

Provincial

British Columbia Workmen's Compensation Act

New accident-prevention regulations have been issued by the British Columbia Workmen's Compensation Board to replace regulations of June 22, 1935 and amendments (L.G., 1935, p. 512; 1939, p. 474; 1941, p. 1502). They deal with guards for machines, protective clothing, safe practices and good housekeeping in all workshops, factories and other plants and include special regulations relating to sawmills, shingle mills, logging operations, wood-working, construction and demolition work, mechanical refrigeration, explosives, electrical installations, transport of workers, cranes and derricks, etc. Most provisions of the new regulations were included in the former ones, but sections have been added relating to welders and burners, the transport of explosives, acetylene generators, and air and gas lines, torches and cylinders. The accident-prevention regulations for ship-construction gazetted last month contain similar provisions concerning welders and burners and air and gas lines, torches and cylinders (L.G., May, 1943, p. 689).

Other new clauses in the general regulations stipulate that women working about machinery must wear caps or other approved head covering which completely covers the hair. Toeless, high-heeled or sandal type shoes are forbidden. Workers in foundries who are exposed to the hazard of molten metal must wear suitable protective clothing. Boats used for transporting workers must have fire-extinguishing equipment as well as life-saving equipment which includes life-jackets, life-buoys and life boats or other approved buoyancy equipment. Workers are forbidden to board or leave moving trucks and all trucks on construction work must have horns, bells or whistles which are to be sounded before the truck moves. All buildings in and around which workers are employed must be of substantial construction

Correction

The Order in Council (P.C. 2821) of April 7, 1943, regarding alternative service for conscientious objectors which was summarized in the April GAZETTE, p. 526, as an amendment to the National Selective Service Mobilization Regulations should have appeared as an amendment to the National Selective Service Civilian Regulations, although the Order also made certain minor adjustments in the Mobilization Regulations to bring them into line with the new provisions relating to conscientious objectors in the Civilian Regulations.

with roofs braced in areas where heavy snow-falls occur.

Provisions have also been added relating to cranes and derricks, logging trucks and lumber carriers, guy-lines for gin-poles, circular resaws, starting devices on transmission machinery, treadles, work-rests on abrasive wheels, standard railings on construction work and testing devices for fuses and circuits. The section prescribing a penalty of \$50 for violation of the regulations has been omitted from the new regulations which came into effect June 1.

Nova Scotia Minimum Wage for Women Act

Order 11, gazetted May 19, sets minimum wage rates for women employed in garages, gasoline service stations, theatres and other places of amusement, messenger services and as operators of taxis or delivery cars. It also applies to all women workers replacing men in any type of employment. The order went into effect on June 1 and extends to all cities and incorporated towns in the province.

The weekly minimum rates correspond to those prescribed for other industries but time and a half instead of straight time is required for all hours in excess of eight a day and 48 a week. In Halifax, Sydney and Glace Bay the minimum rate for experienced workers is \$12 a week and for inexperienced, \$10. In all other incorporated towns the rates are \$11 for experienced employees and \$9 for inexperienced. The learning period is one month after which experienced workers' rates must be paid. Part-time employees are to receive not less than 25 cents an hour in Halifax, Sydney and Glace Bay and 23 cents elsewhere and must be paid for a minimum of four hours on any day they work.

Deductions from minimum rates for the use, purchase or laundering of uniforms or other articles of wearing apparel are for-

bidden, and deductions for absence may not exceed the actual value of the time lost computed in proportion to the normal working hours in the establishment. Workers must be paid for waiting time spent on the premises. The Order repeats the provision of the Act which stipulates that if a worker is not paid the minimum rate, she may sue and recover as a debt the difference between the minimum rate and the wages paid to her.

Employers are forbidden to discharge or threaten to discharge any worker because the worker has lodged a complaint with the Minimum Wage Board or testified at any investigation or proceeding under the Act. A penalty of \$25 is prescribed in the Order for failure to post a copy of the Order in a conspicuous place in each establishment covered by it. In addition the Act provides for fines of \$25 to \$100 for non-compliance with any order of the Board.

Quebec Minimum Wage Act

The provisions relating to apprentices in Order 5, Revised, governing the silk textile industry (L.G., 1938, pp. 985, 1350; 1940, p. 691; 1941, pp. 960, 1290) have been amended by an Order in Council gazetted May 15. No changes have been made in rates, but the percentage of apprentices permitted in the various categories has been raised for the duration of the war and a number of sections have been reworded to clarify them. The provisions of the new general Order 4 (L.G., 1942, p. 586; Jan., 1943, p. 154) which are not inconsistent with Order 5, Revised are declared applicable to the silk textile industry.

Under the former provisions, apprentices' rates could be paid to not more than 5 per cent of all the employees in the throwing, warping, weaving, cloth room and maintenance departments, and to a similar percentage of the employees engaged in printing, engraving, dyeing, finishing and miscellaneous converting jobs. This percentage has been raised to 10 per cent for the duration of the war to allow for the rapid turnover of staff in wartime. All inexperienced workers in excess of this quota must be paid experienced workers' rates, but if the number of employees declines, persons who have been classified as apprentices will continue as apprentices for the period of their apprenticeship.

The period during which apprentices' rates may be paid remains at 10 months in any employment covered by the Order, except in the case of apprentices to roller printers and to sketch-makers, plate cutters, bench hands, roller turners and etchers in the engraving department. For these, the period of

apprenticeship is five years in the specified trade. A new clause states that for the purpose of determining periods of apprenticeship, 312 days of employment constitute a year, 156 days make up six months and 26 days a month. The days worked need not be consecutive or complete.

As before, the minimum hourly rate for apprentices is 20 cents in the following departments: throwing, warping, weaving, cloth room, maintenance, printing, engraving, dyeing and finishing and for miscellaneous converting help which includes carriers, washers, truckers, folder men, etc. No average hourly rate is set. For the trades in the printing and engraving departments for which a five-year apprenticeship is required, however, special rates are set and provision made, as formerly, for yearly increases in the minimum hourly rates. There has been no change in these rates. Roller printers' apprentices start at a minimum of 35 cents an hour and receive an increase of 5 cents an hour each year for four years. Apprentices to plate cutters, bench hands and etchers have a beginning rate of 30 cents which rises by two cents each year to 38 cents an hour in the fifth year. Roller-turning apprentices start at 28 cents and reach 36 cents in the fifth year. Sketch-making apprentices start at 30 cents and receive increases of 3 cents an hour each year for four years.

The particulars which employers in the cotton textile industry governed by Order 8, Revised (L.G., 1941, p. 31) must state on the pay envelopes of their workers were set forth in by-law No. 5 gazetted May 22 by the Minimum Wage Commission. Order 8 requires employers to furnish particulars of the amount paid to each worker and authorizes the Minimum Wage Commission to enact by-laws prescribing the minimum particulars which must be supplied. By-law No. 5 is issued under this authority and lists the following particulars: the name of the employee, the date of the pay and of the pay-period, the number of regular and overtime hours worked, the wage rate, the deductions made and the amount paid. An approved form for listing these particulars is appended to the by-law.

Employers in other industries in the province are also required to furnish particulars of this nature on pay envelopes under the terms of by-law B-4 (L.G., 1940, p. 1037) and Order 4, 1942 (L.G., 1942, p. 586; Jan., 1943, p. 154).

Order 40, governing cinemas and theatres on the Island of Montreal (L.G., 1941, pp. 653, 960) was renewed to July 1, 1944, by an Order in Council gazetted May 22.

Recent Legal Decisions Affecting Labour

Alberta Court holds that Mother who Divorced her Husband after being Deserted is not thereby Ineligible for Mother's Allowance

By a majority of two to one, the Appellate Division of the Alberta Supreme Court on May 6 overruled two lower court decisions and granted the application of a mother for an order that she had been deserted without reasonable excuse by her husband for a continuous period of five years. Such an order was necessary for her to establish her right to an allowance under the Alberta Mothers' Allowance Act. Her action had failed in the lower courts on the ground that she had divorced her husband during the period for which she claimed desertion and that her husband could no longer be considered guilty of desertion after his matrimonial obligations had ceased. The majority of the Supreme Court held, however, that it was not intended by the Mothers' Allowance Act which is

a beneficent statute, passed for the benefit, protection and maintenance of children living and being cared for by their mother, to require that a wife who is entitled to live apart from her husband because of his attachment for and adultery with another woman must wait before bringing an action for divorce until five years have passed on penalty of losing her chance of a mother's allowance, especially where, as here, she has been left in destitute circumstances.

Mr. Justice Hanson, in dissenting, held that the appellant had not proved that the desertion was without reasonable cause and that under the statute this was essential to the making of the order sought. *In re Mothers' Allowance Act and McDonald* (1943) 2 Western Weekly Reports 97.

Ontario Court Awards Damages to Dependents of Worker Killed through Town's Negligence in Permitting Headway under Bridge to be Reduced

Damages were granted by Mr. Justice Chevrier in the Ontario High Court of Justice on January 11 to the widow and unborn child of a workman who had been killed when he struck a railway bridge while riding on top of a loaded truck. The action was against both the Canadian National Railway Company and the town of Parry Sound which maintained the road beneath the bridge. As the company had built the bridge with the headway required by the Board of Transport Commissioners, the Court dismissed the action against it with costs. On the other hand, it found the town negligent in permitting the

surface of the road to be raised by nearly 11 inches, thus reducing the headway. However, it considered that the worker was also negligent in riding backwards with his head above the top of the load. The Court assessed the relative degrees of negligence at 80 per cent against the town and 20 per cent against the worker and ordered the town to pay damages amounting to \$2500 for the widow and \$840 for the child, less deductions for contributory negligence, into the Accident Fund established by the Ontario Workmen's Compensation Act. Because the dependants had elected to receive compensation rather than bring suit against the company and the town, the Workmen's Compensation Board had been subrogated to their right of action under sec. 8 (3) of the Act. Consequently, the proceeds of any action in the dependants' names went to the Accident Fund.

The widow appealed on three grounds: (1) that the damages were insufficient; (2) that there was no negligence on the part of the workman; and (3) that she should have been allowed to recover from the town the costs which she was required to pay to the company on dismissal of her action against it. The town submitted a cross-appeal, contending, (1) that the plaintiff sustained no damages or not the amount awarded; (2) that the degree of negligence of the worker was fixed too low; and (3) that the driver of the vehicle should have been found negligent.

The Court dismissed the cross-appeal without costs and refused to interfere with the trial judge's decision relating to the amount of damages or the costs of the company. It allowed with costs the widow's appeal in regard to the finding of negligence against the workman, holding that there was no evidence of negligence on his part. *Chapman v. Canadian National Railway Company and the Town of Parry Sound* (1943) Ontario Weekly Notes 47, 297.

Quebec Court, Dismissing Damage Action, Holds that Accident is Fault of Worker

A worker's action for damages on account of an injury caused by a wool-carding machine was dismissed with costs by the Montreal Superior Court on April 19, on the ground that the accident was solely the fault of the worker.

The worker was employed by an independent contractor engaged in laying cement floors in the defendant company's premises. When returning to his work after obtaining a drink of water in the plant, the worker attempted to pick up a piece of wool near a

wool-carding machine and his left hand was caught in the rollers of the machine and severely injured. In bringing action for \$24,520 damages against the company, the worker claimed that the accident was due to the company's negligence because the floor was wet and had caused him to slip and fall against the machine which was not properly guarded as required by regulation under the Quebec Industrial and Commercial Establishments Act.

The defendant company claimed that the floor was not wet and denied that the worker had slipped or fallen. Moreover, it declared that the machine was not dangerous and that the worker's injury was the result of his own imprudence in reaching inside the machine to pick up wool from a revolving roller.

The Court accepted the defendants' version of the accident as there was evidence to disprove that the floor was wet and that the plaintiff had slipped and fallen. As regards the argument that the company had violated the Quebec Industrial and Commercial Establishments Act which requires factories and the machinery and equipment in them to be kept in such a manner as to secure the safety of the employees, and had violated also a regulation under the Act which stipulates that guards five feet in height must be provided for transmission machinery situated in places through which workers must pass. The Court agreed that the regulation applied to the machinery in question, but held that, while it might be considered that the accident could not have happened if the regulation had been complied with, failure to comply was not the determining cause of the accident. The Court pointed out that the "plaintiff's act in placing his hand in close proximity to the rollers was purely voluntary, quite unnecessary and, indeed, inexcusable. He had nothing whatever to do with the machinery". Moreover, he had been working in the plant for over a week, was of mature age and therefore ought to have been aware of the danger to which he was exposing himself. "Consequently, the Court concludes that the accident was due solely to the fault of the plaintiff himself". *Earl James v. Ayers Limited*, Montreal Superior Court, April 19, 1943.

**Quebec Court Affirms Judgment Acquitting
Company Official of Making False
Report—Held Report was Made
by Company**

An appeal by the Joint Committee of the Printing Trades for Montreal and district against the acquittal of an official of a newspaper company charged under the Quebec

Collective Agreement Act with submitting a false return to the Joint Committee was dismissed with costs by Mr. Justice Archambault on March 2, in the Quebec Court of King's Bench for the District of Richelieu.

The Joint Committee was established in May, 1941, to administer a decree issued under the Collective Agreement Act on April 24, 1941, to govern printing establishments in Montreal and district. All employers subject to the decree are required to submit to the Joint Committee monthly returns showing the wages paid and regular and overtime hours worked in their establishments. Sec. 43 of the Act makes it an offence to submit a false or inaccurate statement or to falsify a pay-list or other document relating to the administration of the decree. It was under this section that A. O. Cartier, an official of Le Sorelois Ltd., a newspaper company was charged with having submitted a return for the month of December, 1941, containing false statements regarding wages and hours of the company's employees. The magistrate dismissed the charge on the ground that the offences enumerated by the Act could be committed only by employers.

Mr. Justice Archambault, in the Appeal Court, agreed that the statements in the return relating to overtime were false and that the official knew they were false. He disagreed with the Magistrate on the point that all offences listed in the Act could be committed only by an employer, and held that the offence specified in sec. 43 could be committed by anyone, even by a perfect stranger. However, he agreed with the Magistrate that in this case the offence, which was the submission of a false return, was committed not by the official but by the company. The return was made on a form supplied by the company and headed by the company's name and address. Moreover, as the signature of the official was preceded by the words "authorized signature," the official was acting and signing on behalf of the company. In the Court's opinion, it was not a question of determining the responsibility of a representative for the offences of his employer or the personal responsibility of the directors or officers of a company for the acts of the company, but simply of deciding who submitted the false return. The official himself had no personal obligation to submit a return since he was not an employer to whom the printing trades decree applied. The company had such an obligation and the Court held that it was the company which had submitted the false return.

Comité Paritaire de l'Industrie de l'Imprimerie de Montréal et du district v. A. O.

Cartier, Cour du Banc du Roi de Québec, March 2, 1943.

Montreal Firm Awarded Damages for Loss Suffered when Rival Company and Former Employee Entice Away its Workers

On April 6, a Montreal bakery was awarded damages of \$272.83 and costs by Mr. Justice Tyndale in Montreal Superior Court in an action against a rival company, its president (Bousquet) and one of the plaintiff's own former employees (Corbeil). The complaint was that the defendants had wrongfully conspired to entice certain employees to leave the plaintiff's employment and that as a result the plaintiff had suffered monetary loss.

Much of the evidence was contradictory, but the Court accepted the following as proved. Corbeil had persuaded five other employees of the plaintiff to break their contracts and accept employment with the defendant company. All six had quit their former jobs without notice and had immediately proceeded to sell the defendant's bread to the customers they had previously been serving on behalf of the plaintiff. Moreover, the Court was convinced that there had been an arrangement between Bousquet and Corbeil under which the latter, "for money or money's worth", had acted as he had done. The following two arguments were cited to support this conclusion: (1) if Corbeil had simply wanted to better his position and had had no direct interest in enticing workers from the plaintiff to the defendant company, he would not have gone to the trouble of persuading the others to change their jobs, and (2) he had immediately become an inspector in the defendant company, a promotion which might be considered as a reward for his services.

The Court therefore concluded that Bousquet and Corbeil had committed a wrongful act

with the intention, *inter alia*, of injuring plaintiff in his business. It is true that considerable latitude is permitted in business competition even when action is taken for the express purpose of injuring a competitor; but what is in question here, in the view taken by the Court, amounts to a conspiracy to commit a wrongful act and to induce others to commit a breach of contract.

Jonas v. Pain Suprême Ltée et al, Montreal Superior Court, April 6, 1943.

Saskatchewan Appeal Court Affirms Damages to Widow of Workman Killed Due to Defect in a Machine

Holding that failure to engage competent designers to supervise alterations in a machine constituted negligence, the Saskatchewan Court of Appeal dismissed with costs an appeal by Canadian National Railways from

a judgment awarding damages of \$7,500 to a woman whose husband had been killed as a result of a defect in the machine. The decision, which was unanimous, was delivered on April 21.

The machine in question was a pile-driver and the accident occurred when a brace parted from a lead it was supporting. In falling, it struck or shook the workman off a platform causing him to fall about 24 feet to his death. The pile-driver had been used since 1913. At that time the leads had been made of wood, but during the winter of 1937-38 the machine was remodelled in the defendant company's repair shop and steel leads were substituted for the wooden ones. The old braces were retained, however, as were the brackets by which they were attached to the leads.

According to the testimony of an expert engineer, the breakage had resulted from the fact that when steel leads had been substituted for wooden ones, increased strain had been placed on the braces because of the additional weight. Counsel for the defendant submitted that there had been no way of foreseeing this and that there was no evidence that reasonable precautions had not been taken when the machine had been remodelled. The Court found, however, that the alterations in the machine had been made under the supervision of mechanics, who, though competent in their trade, did not have sufficient training to appreciate the consequences of what they were doing. Moreover, it seemed clear that no expert advice had been sought when the alterations were being made. The defendant's counsel argued that there was no evidence to support this last conclusion. The Court, however, pointed to the evidence of the mechanic in charge of the workshop who stated that, as far as he knew, no account had been taken of the effect of the changes on the bracket. In any case the defendant company could easily have proved that it had consulted expert opinion if it had actually done so. *Jansen v. Canadian National Railways* (1943) 2 Western Weekly Reports 109.

English Court Holds that Worker is Reinstated if Employer Pays Wages but does not Provide Work

Whether reinstatement in employment involved the granting of both work and wages in all circumstances was the question at issue in a case arising out of application of the Essential Work Order in Great Britain (L.G., 1942, p. 933). The Order prohibits workers in industries scheduled under it from leaving their jobs or being dismissed without the permission of a National Service Officer, and makes provision for appeals to local Boards against directions of National Service Officers issued under the Order. Local Appeal Boards

are composed of one representative each of employers and workers and of an independent chairman and have power to make recommendations to National Service Officers in cases referred to them.

The case concerned an electrical firm covered by the Essential Work Order. The firm applied for and was granted permission to dismiss seven employees on the ground that there was no work for them. One of the seven appealed against the direction of the National Service Officer ordering her dismissal, and the local Appeal Board recommended that the National Service Officer should direct that she be reinstated. Such a direction was issued and the firm put the worker back on the pay-roll but had no work for her when she reported at the plant.

The National Service Officer then instituted proceedings under the Order against the firm for failure to reinstate the worker in accordance with his direction, but the Magistrates dismissed the charge; and when the Crown appealed the decision, a King's Bench Divisional Court upheld the lower court.

In the appeal court, the Crown contended that reinstatement involved wages plus work and that an offence had been committed if it was shown that the firm had failed to provide work. The company submitted, however, that the worker had all the rights after reinstatement which she had had before. For example, she could not be dismissed without the permission of a National Service Officer. Therefore, the order to reinstate had been complied with.

Mr. Justice Charles, in giving judgment, declared that reinstatement as contemplated by the Order connoted the putting back of a person, so far as was humanly possible, in the same position as he or she held when dismissed. While he disagreed with the assertion that the question of giving work in addition to wages was irrelevant, since work and wages were closely linked in the Order, he considered that the company had done all in its power to provide work and had therefore reinstated the worker as far as was possible in the circumstances. *Rex v. Ultra-Electric Ltd.*, King's Bench Divisional Court, April 15, 1943.

Employers in Great Britain Convicted under Factories Act For Failure to Fence Dangerous Machinery

Two legal cases involving prosecutions under the Factories Act in Great Britain for failure to fence dangerous machinery were reported in the British Ministry of Labour Gazette for April. In both cases a Divisional Court reversed the decision of a Magistrate's Court and convicted the employers.

The first case arose out of the injury of a 16-year old boy who had been ordered by a forewoman to replace a belt which had slipped off a pulley. To do so he had to stand with one foot on a bench and the other on the window-sill. He replaced the belt while the transmission machinery was still in motion, although there was a switch in the room by which it could have been stopped. As he turned, the belt slipped off again and caught his arm against the pulley wheel, breaking it and tearing his fingers. The machinery was not fenced in any way. The employer was prosecuted under the section of the Act stipulating that every part of the transmission machinery in a plant must be securely fenced unless it is in such a position or of such construction as to be as safe as if fenced. The Magistrate dismissed the case on the ground that it was as safe as if fenced because the belt and pulley could not be reached from the floor.

However, the Divisional Court held that the fact that the transmission machinery was out of reach did not justify the Magistrate's decision, and cited another case where an employer had been convicted of failing to fence machinery which was 12½ feet above the floor and which could only be reached by the worker climbing a pipe. In the present case the worker only had to stand on a window-sill to reach the dangerous machinery.

The second case involved a paste-mixing machine of the trough type equipped with revolving arms which caused injury to a woman when she was scraping the inner sides of the trough. The employers were prosecuted under the section of the Act which stipulates that all dangerous machinery must be securely fenced, or if the nature of the operation makes a guard impracticable, there must be a device which automatically prevents the operator from coming into contact with the dangerous part. In their defence, the employers pointed out that they had provided a wooden cover with wire mesh in the centre for use when the blades were revolving, that this was the best type of guard that could be provided, and that the machine would have been perfectly safe if the guard had been used. It was not in place at the time of the accident. The Magistrate accepted the employers' contention that the machine was adequately guarded, but the Divisional Court, in reversing the decision, held that the provision of a guard by the defendants did not avail them, if, while the machinery was in motion, the guard was not in use. *Newby v. Angus Stuart Ltd.*, Divisional Court, March 30, 1943; *Davies v. Batger & Co. Ltd.*, Divisional Court, April 1, 1943.

Prices and Price Control

Price Control in Canada During May, 1943

Meat Rationing Regulations—Other Wartime Prices and Trade Board Orders Affecting Foods and Other Commodities—Enforcement Activities

AS in previous months food prices and supply problems were of major concern. Supply and price problems also arose in the field of civilian manufactured goods, however, especially clothing and footwear, and also in the case of certain types of used goods. In regard to foods, the Wartime Prices and Trade Board was mainly occupied with making preparations for meat rationing which was introduced on May 27, and with overcoming shortages of potatoes which had developed in certain areas. As a result of meat rationing certain other foods such as fish and poultry required special attention, particularly with respect to prices.

Foods

Meat Rationing.—During the month the Board completed its preparations for meat rationing, the plan coming into effect on May 27. As announced in the House of Commons some time ago, the ration allowance was set at two pounds per person per week (B-276, May 17). For details of the plan, see the article following this, entitled "Meat Rationing Regulations."

Beef Prices.—The advance in wholesale price ceilings on beef of 25 cents per cwt., May 27, represented the final price rise in the seasonal adjustment plan outlined in the statement of government policy last October (A-734, May 24). At that time it was provided that the schedule of maximum wholesale prices of beef, reached May 27, 1943, would remain in effect indefinitely, with prices free to fluctuate under the overall ceiling in accordance with market conditions. It was also provided that steps would be taken to ensure that beef cattle prices were maintained at levels appropriate to floor prices.

To prevent any undue fall in cattle prices which might result from meat rationing, a series of floor prices for beef were established, corresponding to the seasonal maximum prices for beef which existed last fall and winter. According to the joint statement issued by the Department of Agriculture and the Prices Board, the floor price for carcass beef from May 27, the date of the final seasonal rise, to

August 14, will be one quarter of a cent per pound below the maximum wholesale prices established by the Board; from August 16 to September 18, when a seasonal decline in beef prices is expected, the floor price will be one cent below the ceiling; and from September 18 to the end of the following April, "the floor price maintained will follow a curve corresponding exactly to the ceiling price schedule of the past fall and winter," that is, it will be 2½ cents below this year's ceiling during the period September 20 to December 18, and starting on December 20, the floor price will be raised one-half cent on February 7, March 20, and April 24, 1944. In periods of surplus supply when prices might ordinarily be expected to fall, the Department of Agriculture will support the market by the purchases of beef at prices which will maintain the floor. From these supplies reserves will be built up for taking care of domestic requirements under rationing in periods of short supply; beyond that point, the rest will be available for overseas shipment.

Poultry.—Because the prices of certain kinds of live poultry were out of line with dressed prices and because poultry was not under the ration it was necessary to place wholesale and retail price ceilings on practically all types of live poultry. The maximum prices in each province at which live birds may be sold under the new order are related to the prices of corresponding kinds of dressed poultry (B-268, April 27).

Fish.—With fish taking on new importance in civilian consumption since meat rationing began, the Board has taken steps in several instances to ensure supplies at reasonable prices. The chief factors determining prices and supply are the requirements of the United Kingdom for certain types of fish, mainly salmon and herring, rising prices in United States markets, and labour shortages in some branches of the fishing industry. For example, since a substantial proportion of such fish as lobsters, oysters, codfish, herring, haddock, halibut, etc., and all fresh water fish, particularly whitefish and lake trout, are exported, a

number of these varieties of fish were exempted from the price ceiling at its initiation in December, 1941. Early this year, however, when prices in certain instances appeared unduly high, the Board passed an order limiting wholesalers' and retailers' markups to those obtained in the basic period, but not exceeding certain specified percentages.

In April it became necessary to fix processors' maximum prices for frozen halibut on the Pacific coast, and control wholesalers' and retailers' markups in an effort to divert some supplies to the Canadian market and at the same time, maintain reasonable prices. Rising prices in the United States, however, continued to attract practically all of the Canadian supplies, and it became necessary, in the latter part of May, to have each processor set aside 50 per cent of fresh halibut to be processed and frozen for the Canadian market. Under this order prices to the primary producer were specified, the prices charged by processors and distributors remaining at the levels established in the April order (A-751, June 2).

In a few cases, when the United Kingdom has not taken all the supplies of certain types of fish as called for in the original contract, it has been necessary to set prices on the amount left available for the Canadian market (e.g. herring packed in tall tins, April, 1943). During the month under review, regulations were passed covering maximum prices of canned salmon on the Pacific coast, including prices to be paid fishermen, canners' prices, and wholesale and retail markups, since it was expected that some salmon of the 1943 pack would be released for sale in Canada (A-723, May 12). (Last year the entire pack went to the United Kingdom.) Price ceilings were also established for fresh and various types of frozen salmon on the Atlantic coast (A-732, May 18). About 80 per cent of the supply is expected to go to the United States where higher prices prevail, and arrangements have been made to divert the other 20 per cent to the Canadian market at the lower level of prices established under the order.

Potatoes.—During the month serious shortages of potatoes developed in some of the larger centres, due mainly to light crops last year in Ontario and Quebec. To relieve the situation the Board, in conjunction with the Department of Agriculture, arranged for the systematic channelling of all shipments from the Maritimes—the surplus area—to the centres of greatest shortage. This was accomplished by freezing, temporarily, parts of the stocks of potatoes held by large wholesalers; by having each potato shipper in the Maritimes send in to his nearest grading inspector of the Department of Agriculture the necessary

information with respect to destination, car number and quantities he intended shipping, and by having this information telegraphed to the Board's central distributing agency in Montreal which was given the authority to reroute consignments of potatoes, depending on where the more serious shortages existed. The Montreal agency was informed as to the supply situation in the different parts of Canada by the regional prices and supply representatives of the Board.

It was also necessary to pass an order prohibiting the sale of certified seed potatoes for any use other than planting as there was evidence that buyers in some instances had been purchasing potatoes of seed quality for purposes of home consumption, thereby reducing the amount of seed available for the 1943 crop. The order became effective on May 13 and covered the period until June 5, considered the normal end of the potato planting season (B-275, May 11). To ease the potato shortage, imports from the United States were encouraged by suspending from May 1 to June 30 the war exchange tax of 10 per cent amounting to about 25 cents a bushel, and thus enabling imports to be sold at ceiling prices.

Other Commodities

Coal.—During the month special consideration was given several commodities which presented difficult problems from the point of view of maintaining supplies at reasonable prices. The most notable case was that of retail coal prices in the city of Toronto. In April, the Board, after making a careful study of the costs of distributing coal in Toronto, came to the conclusion that an increase in price of 25 cents per ton, together with a further service charge of 50 cents per ton for bagging, represented the minimum increase in charges required to permit dealers to cover costs of distribution. Upon the urgent request of the Toronto City Council which expressed the opinion that it could produce a satisfactory alternative to a price increase, the Board suspended the authorized increase in price until May 18, but further investigation convinced the Board that the temporary suspension should not be renewed, and the price increase, therefore, became effective on May 18 (A-679, Apr. 3, A-696, Apr. 16).

The Board's investigations revealed that dealers' margins in Toronto have been sub-normal for a number of years, and that the pressure of rising costs, which was absorbed by adequate profit margins in other areas, could not be met by many of the dealers in Toronto, particularly the smaller dealers, because the profit margin had already been forced below economic levels. The Board concluded that

the best solution under the circumstances, taking into account such factors as the scarcity of equipment for delivery, etc., was to permit the price increase and extra service charge.

Cascara Bark.—An interesting example of the problem of higher costs is provided this month in the case of cascara bark, a product used by pharmaceutical processors for use in different extracts of cascara. In 1942 the cost of obtaining cascara bark (in British Columbia) had increased enormously, mainly because of an acute labour shortage. Formerly the principal gatherers of the bark were Japanese, and in 1941 it was possible for the processors to buy it at about 12 or 14 cents per pound, but in 1942, because of the labour shortage, it became necessary to pay a much higher price—the collectors who sold the product to the processor were paying the “peelers” 20 cents per pound. At the time the 1942 crop was marketed, the maximum price at which collectors could sell the bark to processors was fixed at 24½ cents, while the latter agreed to continue selling their finished products at ceiling prices. This year, in order to ensure adequate supplies of the bark, the price was established at approximately the same level (A-718, May 8).

Used Goods.—The pricing of used goods still remains an acute problem because of the scarcity of many consumer goods whose manufacture has been prohibited or greatly reduced. During the past few months, several kinds of used goods were brought under a system of specific maximum prices, usually bearing some appropriate percentage relation to the prices of the goods when new. This month, two important items in the consumer budget were added to the list: used metal beds and bed springs, and used mechanical household refrigerators. The order covering beds listed prices to consumers and prices for transactions between dealers. In both orders prices and conditions of sale differentiated between used and “rebuilt” models, a factor which should help to stabilize the market and ensure reasonable prices (A-710, May 4; A-712, May 4).

Conservation and Simplification

Several important measures were taken during the month to ensure supplies of certain manufactured goods for civilians (flannelette garments, repair leather for civilian footwear, protective rubber garments). At the same time, the Board's program of simplification and standardization, designed to conserve the use of materials and also to reduce costs, was extended to several additional articles (particularly finished paper products such as carbon paper, counter check books). In one or two cases it has been necessary to increase the quota of materials, mainly metal used in the manufacture of civilian goods which are con-

sidered essential and which have been in extremely short supply. (Wire screen cloth and barbed wire).

Probably the most notable example of measures taken by the Board this month in the field of manufactured goods is that of flannelette garments. By eliminating unnecessary or less important uses of flannelette in the manufacture of children's sleepers, women's and misses' pyjamas and nightgowns, a considerable yardage of flannelette will be diverted to garments of an essential character for infants and children. In addition the Administrator has been given control over the quantity of different classes of flannelette garments which may be manufactured (A-716, May 8). An Order prohibiting the use of full leather soles for shoe repairing will result in a considerable diversion of outsole leather to maintain essential civilian supplies and help meet military requirements for sole leather (A-717, May 8). It was also announced during May that restrictions on the sales of protective rubber clothing to essential users would go into effect on June 1—an extension in time having been allowed to permit manufacturers to obtain the necessary “essentiality certificates” to be affixed to the garment (A-705, April 26 and A-726, May 13).

Enforcement Activities

The number of prosecutions during May continued close to the high level of April, the total being considerably higher than in any other previous month. Prosecutions for alleged violations of prices regulations were again the largest single category as in March and April; before this time rentals afforded the greater number of prosecutions. The percentage of prosecutions for alleged offences remained at the same high level, viz., 95 per cent. The following table shows the number of prosecutions for each of the main classes of alleged offence, for the months of March, April and May.

PROSECUTIONS

(BY TYPE OF ALLEGED OFFENCE)

MARCH, APRIL, MAY, 1943.

Meat Rationing Regulations

Rationing of meat came into effect on Thursday, May 27. The meats which are rationed are beef, veal, pork, mutton and lamb and most cooked meats, but "fancy" meats such as heart, tongue, liver, brains, sweetbreads and kidneys and a few cooked meats such as bologna and weiners are not included in the ration groups, nor are cuts containing 50 per cent or more of bone, such as spareribs, oxtails and pigs' knuckles. Poultry and fish are not included in the ration system.

In purchasing rationed meats household consumers use the brown Spare "A" coupons already included in their ration books—the first pair of Spare "A" coupons, marked No. 1 became goods on May 27, and other pairs become valid each succeeding Thursday. Coupons becoming valid before the 15th of a month expire at the end of that month and coupons becoming good on or after the 15th expire at the end of the month following.

Rationed meats are divided into 4 groups, A, B, C and D, with poundage values per coupon of $\frac{1}{2}$, $\frac{3}{4}$, 1 and $1\frac{1}{2}$ pounds respectively. Different cuts have a higher or lower coupon value depending on the amount of bone content. In this way consumers may choose the cut of meat or the kind of meat product they prefer and they obtain an approximately equal ration of 2 lbs. per week, carcass weight. The amount of shrinkage in cooking is also taken into consideration—for example, cuts included in Group "D" ($1\frac{1}{2}$ lbs. per coupon) are included in Group "C" if they are cooked, i.e. only 1 lb. can then be purchased per coupon.

Retailers and other suppliers started collecting ration coupons and other ration documents (ration cheques, special purchase permits, etc.) from their customers on May 27 but they were not required to surrender these when purchasing meat themselves until June 10—thereby having a period of two weeks in which to accumulate ration documents and thus to maintain their stocks. Certain retailers and suppliers are required to open meat ration bank accounts and others, doing a smaller business, may do so if authorized by the Ration Administration.

Purchases made by retailers and other suppliers on and after June 10 have to be covered by a meat ration cheque if a bank account is operated or by other ration documents if the retailer or supplier does not operate a bank account. The number of coupons required to represent the quantity of meat purchased is determined in accordance with a schedule showing the wholesale coupon value (number of coupons per 100 lbs.) of the cuts, portions and products detailed in Groups A, B, C and

D and also of carcasses, sides, quarters and wholesale cuts.

Operators of hotels, restaurants, etc., must register as quota users with the Board if not already registered and their purchases are limited by quotas set by the Ration Administrator. Every quota user is required to open a meat ration coupon bank account in which he deposits his quota authorization (stated in number of coupons) and against which he issues meat ration cheques. In buying from retailers or other suppliers such users must cover their purchases by coupons either at the retail coupon rate if retail cuts or products are bought or at the wholesale rate if larger cuts or carcasses, etc. are bought.

Manufacturers or processors of meat products are classified as industrial users, and they are required to register with the Board by June 30. From May 27 on, however, they are required to have special purchase permits to buy meat.

The procedure which is followed under the ration system in buying meat for ships' stores for commercial vessels depends upon the classification of the vessel and of its operator. If the operator is a resident of Canada operating solely on the Great Lakes or any other inland or territorial waters he must register and purchase meat as a quota user; if he is a non-resident, he may register as a quota user or he may use special purchase permits. Purchases for all other vessels, except private pleasure craft, are made by requisitions (used in place of coupons) approved by the Administrator of Ships' stores.

The ration documents used by quota users, industrial users, purchasers of ships' stores and retailers or other suppliers in purchasing meat have to be surrendered at the time of payment for the meat or within two weeks of delivery of the meat if payment is not made by that time. Arrangements have also been made for collection of ration coupons on meat shipped C.O.D.

The slaughtering of livestock is controlled by the system of permits to slaughter. Farmers who slaughter livestock for their own use or to supply to other farmers when the meat is consumed right on the farm premises do not require a permit, but they are required to register with their local ration board stating that they are obtaining meat from the slaughter of their own livestock, and also to collect coupons at the rate of one coupon per two pounds (gross weight) of meat, from the farmers they supply. These coupons must be sent at the end of each month to the local board, along with coupons from their own household cards to cover their consumption

of their own farm-killed meat (up to 50 per cent of the total number of coupons valid for use on the last day of the month).

Commercial slaughterers of livestock are required to open ration bank accounts and to collect documents from all persons to whom they sell meat. By the 10th of each month

each slaughterer must send to the Ration Administrator a statement of all his meat transactions in the previous month together with a meat ration cheque certified by the bank, made out in favour of the Administrator and covering all the coupons in his bank account at the end of the previous month.

Prices, Retail and Wholesale, in Canada, May, 1942

Cost of Living, Prices of Staple Articles and Index Numbers

NOTE: Owing to misunderstandings which have arisen regarding retail prices published in this section of the LABOUR GAZETTE, the following explanation has been thought necessary:—

1. The *Cost-of-Living Index* is calculated by the Dominion Bureau of Statistics and is used in the determination of the *Cost-of-Living Bonus*. This index is not calculated from the data as to prices, etc. shown in Tables 2 and 3 below.

2. Tables 2 and 3 include certain data collected by the Dominion Bureau of Statistics and certain other data gathered by official correspondents of the LABOUR GAZETTE, as indicated below.

3. Tables of prices have been printed in the LABOUR GAZETTE along the same lines as at present since 1910—long before the cost-of-living bonus system came into effect.

4. As to Tables 2 and 3, it should be pointed out that the prices of certain commodities, especially meats and food products, vary substantially even within a single locality. In most cases the figures given are average figures for each locality.

5. In the current LABOUR GAZETTE no prices for bituminous coal are quoted for Ontario and Quebec in Table 3. Figures for the prices of bituminous coal published in the last two issues of the GAZETTE may have been interpreted as indicating that the average price of bituminous coal had increased appreciably. Such is not the case. The apparent changes in price were due to a changed basis of quotation, with respect to the different grades of coal included, rather than to a difference in price of the grades of coal previously included. This was

pointed out in a footnote to the Table, but on account of the possible misinterpretation of the figures it has been considered necessary to make the above explanation. The prices for bituminous coal for the cities in the Maritimes, the Prairie Provinces and British Columbia in Table 3 are as supplied by the Dominion Bureau of Statistics. According to figures given by the Bureau these prices were for every city specified the same from January to May inclusive, showing no increase or decrease in prices.

The index number of the cost of living was one-half point higher at the beginning of May than at the beginning of April. This increase from 117·6 in the official index of the Dominion Bureau of Statistics to 118·1 was the third consecutive advance and as in the case of the two previous months was caused mainly by increases in the food group. During the month under review however slight advances were recorded also in the rent and the miscellaneous group. In the food group the index of which rose more than a full point, meats were generally higher while the prices of potatoes and onions also increased. Further slight declines were recorded in the prices of eggs. In the miscellaneous group the increase was due to higher prices for periodicals.

Since the outbreak of war the general index has advanced 17·2 per cent. Foods have advanced 30·8 per cent in the same period; clothing 20·1 per cent; home furnishings and services 16·7 per cent; fuel, and light 13·8 per cent; rent 7·4 per cent; and the miscellaneous group 6·6 per cent.

For the similar period during the last war the index of the cost of living rose from 78·7 for July, 1914, to 116·0 for May, 1918, thus recording an increase of 47·4 per cent. Between October 1, 1941, and April 1, 1943, the period covered since the establishment of the ceiling on prices, the advance in the index

was 2·3 per cent. For the comparable period during the last war, October, 1916, to May, 1918, the advance was 26·9 per cent.

In compliance with Order in Council P.C. 6219, as amended, the prices of cigarettes and tobacco used in calculating the index do not include the tax imposed on June 24, 1942, under the special War Revenue Act.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, be-1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, except under the regulations of the Wartime Prices and Trade Board. In each issue of the LABOUR GAZETTE the activities of the Board in the operation of the price control policy are summarized. Prices of certain fresh fruits and vegetables and certain kinds of fresh, cured and canned fish were exempted by the Board from the provisions of the maximum prices regulations. The order does not apply to sales by farmers and fishermen to dealers or processors of live stock, poultry, eggs, milk, cream, farm-made cheese, and fish, but does apply to sales by such dealers and processors and to sales by farmers and fishermen to consumers.

The index number of the cost of living was constructed on the basis of a survey of expenditure of 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,500 in 1938. The average expenditure was \$1,453.90, divided as follows: food (31·3 per cent), \$443; shelter (19·1 per cent), \$269.50; fuel and light (6·4 per cent), \$90.50; clothing (11·7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22·6 per cent), \$319.40.

The last-named group includes health (4·3 per cent), \$60.80; personal care (1·7 per cent), \$23.90; transportation (5·6 per cent), \$79.30; recreation (5·8 per cent), \$82.10; life insurance (5·2 per cent), \$73.30. Other expenditure not directly represented in the index was \$40.

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. The figures at certain dates since August, 1939, are: August, 1939, 100·0; September, 100·0; October, 103·8; November, 104·3; December 104·3; January, 1940, 104·2; February, 104·3; March, 105·5; April, 105·5; May, 105·3; June, 105·3; July, 106·4; August, 106·8; September, 107·9; October, 108·4; November, 109·7; December,

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.

The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

110-0; January, 1941, 110-4; February, 110-1; March, 110-2; April, 110-7; May, 110-9; June, 112-7; July, 114-9; August, 117-7; September, 119-4; October, 120-1; November, 121-4; December, 120-6; January, 1942, 119-9; February, 120-3; March, 120-6; April, 120-6; May, 120-9; June, 121-8; July, 123-9; August, 123-5; September, 123-0; October, 123-7; November, 125-0; December, 125-2; January, 1943, 122-5; February, 122-2; March, 122-7; April, 123-2; May, 124-0.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922

Explanatory Note as to Retail Prices

Table III on retail prices and rentals shows the prices at the beginning of May of seventy-six staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—monthly, Prices and Price Indexes (Canada); annually, Prices and Price Indexes (Canada and Other Countries).

* Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive, 502; and since January, 1934, the number is 567.

prices of foods and groceries in each city, except the following, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers. The exceptions are milk, bread, shoulder of veal, leg roast of pork, unsliced bacon, dairy butter, evaporated apples, vinegar and coal oil. Information as to the prices of the foregoing, with the exception of milk and bread, is obtained by the correspondents of the LABOUR GAZETTE. The prices of milk, bread, fuel and the rates for rent are obtained by the Bureau of Statistics and by the correspondents of the LABOUR GAZETTE.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

By Order in Council P.C. 8965 (L.G., 1941, page 1462), the price ceiling established by

P.C. 8527 (L.G., 1941, page 1371) was extended to rentals charged for all real property, the order to be administered by the Wartime Prices and Trade Board. Under authority conferred by Order in Council P.C. 5003 (L.G., 1940, page 995) the Board from time to time had fixed maximum rentals for housing accommodation in certain of the cities in the list on page 104. In these cities the maximum rentals already fixed continue unchanged, based in some cases on those in effect of January 2, 1940, and in the others on those in effect on January 2, 1941. The former are Halifax, New Glasgow, Sydney, Thetford Mines, Kingston, Ottawa, Windsor, Brandon, Calgary, Nanaimo, New Westminster, Prince Rupert, Vancouver and Victoria; the latter are Truro, Moncton, Brockville, Belleville, Fort William, Hamilton, Niagara Falls, Oshawa, Peterborough, Port Arthur, St. Catharines, Sault Ste. Marie, Regina, Edmonton, Medicine Hat and Lethbridge. In all other cases the maximum rental for any housing accommodation is the rental which was in effect on October 11, 1941. Pro-

vision is made under the orders of the Board for variation of the maximum rentals for any accommodation under certain special circumstances affecting the accommodation.

Retail Prices

Beef prices averaged a fraction of a cent per pound higher at May 1, reflecting the seasonal advances permitted under the regulations of the Wartime Prices and Trade Board. Sirloin steak averaged 40 cents per pound at the beginning of May as compared with 39·6 cents at April 1. Other cuts showed somewhat similar increases. Fresh lamb and pork also increased in price the former averaging 39 cents per pound and fresh loin of pork averaging 35·5 cents. The price of fresh eggs again declined slightly in many localities and the

Dominion average price was down from 41·3 cents per dozen at April 1, to 40·6 cents at May 1. The price in May 1942 averaged 35·3 cents per dozen. Creamery butter at an average of 39·9 cents per pound was little changed from the previous month. The price in May 1942 was 39·3 cents per pound. Production of butter for the first four months of 1943 increased about 30 per cent over the production during the corresponding period of 1942 while production of cheese declined 5·8 per cent. The price of cheese at 34·4 cents at May 1 was fractionally higher than at April 1 but was about 1·5 cents per pound lower than one year ago. Onions advanced one half cent per pound during the month to 6·5 cents. Potatoes were 49·7 cents for 15 pounds as compared with 46·3 cents at April 1 and 40·9 cents at May 1, 1942.

Prices in Great Britain and Other Countries

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and certain of the principal industrial and commercial countries appeared in the April issue of the *LABOUR GAZETTE*. Since these monthly notes are all compiled from British and foreign sources, the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the *LABOUR GAZETTE*.

Since the outbreak of war, control of prices, production and trade have been extended in many countries, resulting in much less movement in prices than occurred in the inflationary period during the last war.

Great Britain

WHOLESALE PRICES.—The index number of the Board of Trade, on the base 1930=100, was 162·8 for April, an increase of 0·4 per cent for the month. The only change in any group of more than one per cent from the March level was an advance of 1·8 per cent in "other food and tobacco".

COST OF LIVING.—*The Ministry of Labour Gazette* index number, on the base July, 1914=100, was 198 at April 1, a decrease of $\frac{1}{2}$ of one per cent from the March level, due to a decline of one per cent in clothing prices. Other groups were unchanged.

Newfoundland

COST OF LIVING.—The index number of the Department of Health and Welfare, of the cost of living at St. John's, on the base October 1, 1938=100, was 144·6 at April 3, an increase of 0·4 per cent for the month, due to small increases in the food group and in fuel and light. Higher prices were recorded for cabbage and coal, lower prices for eggs and tea.

United States

WHOLESALE PRICES.—The index number of the Bureau of Labour Statistics, on the base 1935-1939=100, was 103·7 for April, an advance of 0·3 per cent for the month. There was an advance of 0·9 per cent in farm products and of one per cent in foods; other groups showed little or no change.

COST OF LIVING.—The Bureau of Labour Statistics index number, on the base 1935-1939=100, was 122·8 at March 15, an increase of 1·5 per cent for the month. This rise occurred prior to the President's April 8 "hold the line" order (L.G., May, 1943, p. 591). This index number for March 15 "takes into account recent changes in food buying because of rationing and other wartime market conditions. . . The changes in the food index as of March 15 will improve the future accuracy of the index, but do not affect the figures for earlier months. The changes involve the inclusion of seven additional foods which people are buying in larger quantities,

like hamburger, liver and corn syrup; changes in the importance of different foods in the index because of reduced supplies, as in the case of canned vegetables, beef and bananas; and increases in the weights given quotations from war production cities because of their population growth." Food prices were 2·8

per cent higher than the February level; rents (which are subject to Federal control in all cities covered by these reports) were unchanged; clothing increased 1·1 per cent, miscellaneous goods and services 0·8 per cent, housefurnishings 0·3 per cent and the fuel, electricity and ice group 0·2 per cent.

VOLUME XLIII

JULY, 1943

[NUMBER 7]

Notes of Current Interest

**Revised
bulletin on
wartime orders
affecting labour
in Canada**

A bulletin entitled "War-time Orders in Council Affecting Labour" has recently been issued by the Department of Labour, replacing a publication of April 1942, which is now out-dated. The new pamphlet brings together all Orders in Council in the labour field which were in effect on June 15, 1943. It contains the full text, as amended, of all Orders of general labour interest, and detailed summaries of others. Included are the Government's declaration of war labour policy, the regulations governing industrial relations, the Wartime Wages and Salaries Orders, the National Selective Service Civilian and Mobilization Regulations and the Post-Discharge Re-establishment Order. The main sections into which the pamphlet is divided deal with industrial relations, wages and hours, health, welfare and safety, man-power, merchant seamen and post-war reconstruction. A statement at the beginning of each section indicates the object and scope of the regulations. A limited free distribution has been made. Other copies are available at 25 cents each on application to the King's Printer, Ottawa.

**Cost of living
index again
advances
slightly**

The official index number of the cost of living in Canada calculated by the Dominion Bureau of Statistics again advanced fractionally from 118.1 at the beginning of May to 118.5 at the beginning of June. The greater part of the increase resulted

from the advance in the food group of one full point to 130.9 at June 1. In this group prices of eggs, meats, potatoes, and oranges were higher while butter declined. The indexes of the fuel, clothing, and miscellaneous groups however each recorded slight increases also.

At the beginning of June the index was 17.6 per cent higher than in August, 1939, the last prewar month. For the similar period during the last war from July, 1914, to June 1918 the advance was 49.3 per cent. Since the establishment of the prices ceiling the index has advanced 2.6 per cent, that is between October 1, 1941, and June, of the current year. For the comparable period during the last war between October, 1916, and June, 1918, the advance was 28.6 per cent.

**Industrial
Disputes
Investigation
Act**

Twelve applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of June. Three boards submitted their reports; seven boards were established and the constitution of nine boards was completed during the month. Eight disputes were referred to Industrial Disputes Inquiry Commissioners and one to an Industrial Relations Officer, while reports were received from commissioners in eleven cases. Ten settlements were effected during the month and three applications were rejected. Thirteen applications were withdrawn and strike votes conducted in two cases.

Employment and industrial statistics The latest statistics available reflecting industrial conditions in Canada are given in the table below.

A further decline was recorded for the index of employment at the beginning of May. This decline of 1.3 per cent is notable because the general trend at May 1 in the preceding 22 years has been favourable. Considerable seasonal decline was recorded in logging but

important reductions occurred also in employment in construction and manufacturing. A reduction in the latter group at May 1 is unusual. The general index at May 1 was 6.5 per cent higher than at May 1, 1942, and for the first five months of 1943 the increase was 9.2 per cent as compared with the similar period of 1942. The total amount of the payroll declined 3.1 per cent during the month due in part to the decline in employment and

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended June 24, 1943.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100.

(5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public.

(7) Figures for four weeks ended June 26, 1943, and corresponding previous periods.

(8) MacLean's Building Review.

in part to a loss of time over the Easter holidays.

The index of the physical volume of business for May was slightly higher reflecting advances in mineral production, manufacturing, construction, and in the production of electric power. The index indicating the volume of distribution of goods was somewhat lower than in the previous month.

Comparing the first five months of 1943 with the similar period of 1942, productive operations as indicated by the index of the physical volume of business were about 20 per cent greater, reflecting the continued expansion in war plants. Manufacturing production increased 29.6 per cent in the same comparison, mineral production 8.4 per cent, and the output of electric power 8.2 per cent while the value of contracts awarded declined 7.4 per cent. The production of flour for the first four months of 1943 was 18.8 per cent higher than for the similar period in 1942, and boots and shoes 2.3 per cent greater. For the first five months creamery butter production advanced 22.5 per cent while the production of factory cheese declined 48.4 per cent. Coal production declined 6.9 per cent, newsprint production 16.2 per cent and steel production 3.5 per cent.

Employment of school children in Manitoba—Correction

In the article on "Out of School Employment of Winnipeg School Children" in the May issue of the *LABOUR GAZETTE*, the paragraph headed "Present Regulations in Manitoba" on p. 682 may have conveyed an erroneous impression of the legislation in effect in Manitoba. The paragraph has been revised as follows:

Manitoba has been the only Canadian province to regulate the employment of school children outside school hours. Such regulation was made by amendments in the Shops Regulation Act in 1916, but changes in the school law and the raising of the minimum age for employment of children in shops have restricted the operation of the sections limiting the hours of employment after school.

The Shops Regulation Act as amended in 1916 forbids the employment of children under 14 in shops which are defined to mean retail and wholesale stores, booths, stalls or warehouses or any premises used in connection with a messenger service, but the amendment permitted two exceptions: (1) boys over 13 and under 14 who are attending school might work in shops for not more than two hours on a school day and eight hours on a holiday; (2) children under 14 might work in a shop for not more than eight hours a day and 48

hours a week if they first obtained a certificate which could be issued under the School Attendance Act to children over 10 years of age relieving them from school attendance, and a certificate from the Department of Labour which had to be satisfied that the employment would not be harmful to the child and was necessary in the special circumstances of the case.

However, this second exception was nullified by the deletion from the School Attendance Act in 1917 of the provision authorizing the issue of certificates excusing children under 14 from school attendance on the ground that their services were needed for the necessary maintenance of the child or some person dependent on him. At present children over 12 and under 14 can be excused for a period up to six weeks in any term only if needed in husbandry or urgent household duties. The cause a Minimum Wage Order, passed in first exception is also largely inoperative because 1937 and revised in 1941, applying to wholesale and retail establishments including delivery of the articles sold, prohibits the employment of children under 15 in such establishments.

Conventions of Canadian labour bodies

For the first time in 25 years Quebec city will be the scene of the Annual Convention of the *Trades and Labour Congress of Canada*. A call has been issued to all affiliated Unions, Trades and Labour Councils and Provincial Federations of Labour to convene at the Chateau Frontenac, on Monday, August 23, 1943.

The forthcoming convention will be the fifth held since the present war began. It is expected that the war, the Government's policy in relation thereto and its general implications with respect to labour and the community in general, will dominate the discussions of the delegates attending the convention. In view of the importance of the issues to be considered it is anticipated that most of the organizations affiliated with the Congress will be represented.

The Fourth Regular Convention of the *Canadian Congress of Labour* will be held in the Windsor Hotel, Montreal, beginning at 10 o'clock on the morning of Monday, September 13, 1943, and continuing until business is concluded.

In the preliminary announcement of the convention the particular attention of the member units of the Congress is drawn to the qualifications of delegates and the procedure to be followed with respect to resolutions and amendments to the constitution which any affiliates or chartered unit, or any officer of the Congress may desire to present at the Convention.

Staff changes in Department of Labour

Arthur MacNamara, Director of National Selective Service and Deputy Minister of Labour, announced on July 12, 1943, that

T. H. Robinson, Assistant Director of National Selective Service (Civilian) has been appointed to direct a special survey in connection with absenteeism in Canadian industry, to be carried out by the Department of Labour.

Harry Hereford, M.B.E., Special Assistant to the Deputy Minister, will take over the duties of Assistant Director of National Selective Service. In his new capacity, Mr. Hereford will give general direction under C. F. Needham, Associate Director of National Selective Service, to labour priorities and transfers of labour. Mr. Hereford will also succeed Dr. W. J. Couper as secretary to the National Selective Service Advisory Board.

U.S. company ordered to dissolve "dominated" union and to refund dues collected

Companies in the United States proved to have "dominated" employee organizations must repay to their workers the dues collected for membership in such organizations under a closed-shop check-off system, according to a recent decision of the U.S. Supreme Court.

The ruling occurred in a case involving an electric power company which the National Labour Relations Board had found to have "dominated" the "independent" union of its employees. When the Board ordered dissolution of the union the company withdrew its support and the association was abandoned. The company however opposed repayment of dues, amounting to \$90,000, collected during the five-year existence of the union under a closed-shop check-off system, and the Supreme Court agreed to review the protest.

Mr. Justice Murphy found, for a majority of six judges, that the Board had complete authority to command the repayment in order to effectuate the policies of the Wagner Act. He quoted the Board as finding that the company concerned had agreed to "give its creature" closed-shop and check-off privileges in order to entrench the union and assure its financial stability. The result, he stated, was that the workers had to authorize wage deductions in order to remain members of the union.

"Thus," he continued, "as a price of employment they were required by the company to support an illegal organization which foreclosed their rights to freedom of organization and collective bargaining. To hold that the Board is without power to order reimburse-

ment of the amounts so exacted is to hold that an employer is free to fasten firmly upon his employees the cost of maintaining an organization by which he effectively defeats the free exercise of their rights to self-organization and collective bargaining. That this may pervert the purpose of the act is clear."

Justice Murphy said that the reimbursement order "returns to the employees what has been taken from them to support an organization not of their own choice and places the burden upon the company whose unfair labour practices brought about the situation."

The company had argued that any wrong done by the employer was closed when the union was dissolved. In supporting this claim Mr. Justice Roberts, representing a minority of three judges, said that the reimbursement order was "penal" and that "the only possible effect of restitution of dues to employees who have not asked for repayment, who have received substantial benefits from their contributions of dues, is to punish the employer and perchance operate as a warning to other employers that they will be similarly punished for unfair labour practices."

A summary of the activities of the National Labour Relations Board since its establishment under the terms of the Wagner Act six years ago appeared in the May LABOUR GAZETTE, p. 561.

U.S. War Labour Board establishes minimum "going wage rates"

On June 7 the U.S. National War Labour Board instructed its twelve regional boards to adopt "minimum going rates" as

ceilings in correcting sub-standards of living or gross inequities. The Board conceded that there was "no automatic, statistical way" of determining wage rate brackets and told the regional boards that use of sound judgment and discretion would be necessary.

Under the instructions, for instance, a regional board might find that rates paid for common labour in a certain city, after an adequate sampling of plants, were 58 cents an hour at one plant, 60 at another, 65 at a third, 70 cents at twenty and 72 at still another. Since a majority paid 70 cents, this would be the minimum going rate.

A directive issued on May 13 by Mr. James F. Byrnes, Director of Economic Stabilization in the United States, had authorized the National Board to determine such wage classifications. The directive constituted a modification of President Roosevelt's "hold the line" order of April 8 (L.G., May, 1943, p. 591).

The directive authorized the Board to establish going rates of wages by occupational groups and labour market areas. Wages could then be raised to the minimum of the going rates found to be sound and tested, whenever such adjustments were deemed "necessary to aid in the effective prosecution of the war or to correct gross inequities."

The directive stated that except in "rare and unusual cases" in which the "critical needs of war production" so required, wage adjustments might not be made above the minimum going rate.

"In connection with the approval of wage adjustments necessary to eliminate substandards of living or to give effect to the 'Little Steel' formula or in connection with the adoption of a longer work week," the Board was empowered to "approve wage or salary adjustments for workers in immediately interrelated job classifications to the extent required to keep the minimum differentials...necessary for the maintenance of productive efficiency."

The directive placed two restrictions on the Board's new powers. First, as heretofore, wage adjustments "which may furnish a basis either to increase price ceilings or to resist otherwise justifiable reductions in price ceilings" must be approved by the Stabilization Director before being put into effect, and second, wage adjustments "which may increase production costs above the level prevailing in comparable plants or establishments" must also be approved by the Director.

Principle of equal pay for equal work reaffirmed in United States

The principle of equal pay for women doing the same work as men was reaffirmed by the United States National War Labour Board early in June.

In a letter to the Secretary of Labour, in response to an inquiry from the Women's Bureau, the Chairman of the Board declared that President Roosevelt's "hold the line" order of April 8 (L.G., May, 1943, p. 591) had not affected the Board's established ruling that employers may grant increases to equalize the pay of women with that of men doing comparable work without prior Board approval. The letter went on to say, however, that there had been a tendency "to abuse this rule" and to warn that "wage adjustments cannot be made under it without prior Board approval unless they are made to equalize the wage or salary rates paid to females with the rates paid to males for comparable quantity and quality of work on the same or similar operations in the same plant."

U.S. War Labour Board orders equal pay rates for negro labourers

Early in June the National War Labour Board of the United States gave a unanimous ruling that wage classifications based solely on difference in race are without validity.

The Board directed a petroleum company in Texas to grant wage increases to its negro employees which would place them on a basis of economic parity with white workers in the same classification. The classifications "coloured labourer" and "white labourer" were abolished and both were re-classified simply as "labourers", with the same rates of pay for all in that classification without discrimination on account of colour.

Negro labourers were thus granted wage increases that placed them on the same economic basis as white labourers. The increase was made without regard to the "Little Steel" formula and "in accordance with the democratic formula of equal pay for work equal in quantity and quality in the same classification."

The Board's decision included the following statement:

"Economic and political discrimination on account of race or creed is in line with the Nazi program. America, in the days of its infant weakness the haven of heretics and the oppressed of all races, must not in the days of its power become the stronghold of bigots...Understanding religious and racial differences makes for a better understanding of other differences and for an appreciation of the sacredness of human personality, as a basic to human freedom."

"It is the acknowledged fact that in spite of all the handicaps of slavery and discrimination, the Negro in America has compressed more progress in the shortest time than any other race in human history. Slavery gave the Negro his Christianity. Christianity gave the Negro his freedom. This freedom must give the Negro equal rights to home and health, education and citizenship, and an equal opportunity to work and fight for our common country."

Office of war mobilization established in United States

On May 28 President Roosevelt created by executive order an Office of War Mobilization headed by Mr. James F. Byrnes to have full supervision of the civilian war effort in the United States. Prior to this appointment Mr. Byrnes was Director of Economic Stabilization (L. G., 1942, p. 1140) and has been succeeded in that office by Mr. Fred M. Vinson, a former justice of the

Kentucky Court of Appeals for the District of Columbia.

The Office of War Mobilization will have three main functions:

1. To establish policies and programs that will assure the maximum utilization of the nation's civilian man-power, and her natural and industrial resources in the prosecution of the war.

2. To consolidate the activities of all Federal agencies and departments concerned with the procurement and distribution of military and civilian supplies and products and to resolve any differences between such agencies and departments, with the exception of disputes arising over agricultural prices and wage increases which affect price ceilings.

3. To issue directives on policy and operations to the several agencies and departments so as to assure the effective carrying out of the policies and programs decided upon.

Mr. Byrnes will be assisted by an advisory committee consisting of the heads of the War and Navy Departments, the Munitions Assignment Board, and the Office of Economic Stabilization.

Trade unionists graduate from special course at Harvard

A special class which graduated at Harvard University during May consisted of a group of trade unionists who had undertaken a nine-months' course in topics

dealing with economics and industrial relations (L. G., Oct., 1942, p. 1117). The men were chosen for the course by their individual unions, which paid all expenses and part of the tuition costs, the remainder being raised by friends of the university. Selection was on the basis of general intelligence, capacity for leadership, and devotion to the labour movement, no particular educational standing being required. The men came from twelve A.F.L. and two C.I.O. unions, representing such varied lines as the garment, radio, machine, electrical, woollen, paint, glazing, and clerical industries.

The topics studied included economic analysis, trade union problems and policies, human problems and administration, economics of collective bargaining, and management controls.

The students also analyzed individual corporations or industries, and studied the records of specific labour settlements or disputes. At intervals prominent labour, government, and management officials addressed meetings.

One requirement was that each student write a report on a current subject to his union president. Thus the hosiery unionist wrote on the changes to be expected in his industry from the increasing use of nylon. Implications of the prefabricated house were

treated in a study by the electrical union representative.

The average age of the men was 32. Their educational background was varied: one had formerly received a master's degree at law; another left school when he was twelve years old. All but one were married; in some cases their wives came with them to Boston and took jobs in war plants.

It is considered likely that a second nine-months' course will be started in September, depending on whether the unions want it.

In discussing the course recently, Professor Sumner Slichter of the Harvard Business School, who helped to set up the plan, said that there are at least 100,000 trade union administrative officers in the United States and that the better trained these officials are, the better it will be for both labour and management. Moreover, "there is no doubt", he said, "that the addition of trade unionists makes Harvard a better university . . . The universities of the country cannot ignore the professional and educational interests of such a large body of men."

Women's work-clothes to be standardized in United States

The American Standards Association has been requested by the Office of Price Administration and the War Production Board to draw up standards for

women's work-clothes which will adequately protect the worker from occupational hazards, conserve critical materials and facilitate the establishment of a simple scale of prices for such articles. The Association will determine the number of types of garment necessary to fulfil the needs of the various occupations, establish size standards for each type and lay down specifications in regard to the making of the garments, and the fabric, trim, hardware and other materials to be used. It will also make recommendations concerning proper nomenclature, labelling and marking of garments. The standardization scheme will not extend to work shoes or special safety equipment such as face-shields but will include body garments, gloves, leggings and such articles of apparel.

Protecting young workers in food-processing plants in U.S.A.

Large numbers of young persons are expected to obtain employment in food-processing plants in the United States this summer because of labour shortages

and a greatly increased demand for canned, frozen and dehydrated foods. The Children's Bureau of the United States Department of Labour and the Office of War Information have summarized Federal legislation regulating

the employment of boys and girls in such establishments, and pointed out that the observance of these legal standards will not only safeguard the health of young workers but will result "in more efficient work, fewer absences and accidents and greater over-all production".

Most establishments processing fruit, vegetables and seafoods engage in interstate commerce and are, therefore, subject to the child-labour provisions of the Fair Labour Standards Act. It fixes a minimum age of 16 for persons engaged in canning, dehydrating and freezing operations but permits children of 14 and 15 to work in plant offices for not more than 40 hours a week. Such children may not be employed in any capacity in work rooms where foods are processed or in manufacturing or processing operations. Children of 14 and 15 may also cut and sort fruit in dry yards where prunes, raisins, dates, apricots, peaches and similar fruits are dried, provided they are not in proximity to sulphur kilns, and proper provision is made for seats, pure drinking water and washing and toilet facilities. They must be granted a 45-minute meal period, a 15-minute rest break each half day and a 6-day week. The minimum age of 16 applies to all other work in dry yards.

For employment in packing sheds the minimum age is 16 for children not attending school. Children of 14 years and over attending school may work in such places for not more than three hours a day and 18 hours a week when school is in session. During holidays their hours must not exceed eight a day and 40 a week. They may not work before 7 a.m. or after 7 p.m. except that during the eight weeks while school is not in session they may stay on the job until 10 p.m. if packaging perishable fruits and vegetables. A minimum age of 18 is fixed for motor vehicle drivers and helpers as this has been declared a hazardous occupation by the Children's Bureau.

Employers are urged to request age certificates when hiring young workers and to familiarize themselves with State laws regulating the employment of minors in food-processing plants. If the Federal standard is higher than the State one it must be followed by employers engaging in interstate commerce.

Safe limits for concentration of chromic acid and chromates and of mercury in the air of work places have been fixed by the American Standards Association.

Inhalation of mercury vapours causes industrial poisoning of a chronic nature. Chromates produce ulcers, are particularly

likely to injure the nasal tissues and may cause kidney and liver damage. Mercury plays a very important part in the manufacture of munitions and every possible source is now being developed.

The maximum concentration of mercury vapour permissible under the new standard is 1 mg. per 10m³ of air. For chromium in the form of chromate, di-chromate dust or chromic acid mist, the concentration should not exceed 1 mg. of chromic acid anhydride in 10m³ of air. This latter standard does not apply to trivalent compounds of chromium which are not directly toxic or as dangerous, but only to hexavalent compounds such as alkali and alkaline earths and acid anhydride. Both standards apply to exposures not exceeding eight hours a day.

Transfer of state legislative powers to Commonwealth Government in Australia

Representatives of the Australian State and Federal Parliaments attending a Constitutional Convention in Canberra from November 24 to December 2 unanimously resolved that certain State legislative powers should be temporarily transferred to the Commonwealth Government to enable the latter to deal with problems of post-war reconstruction. The Convention was of the opinion that wartime was not a suitable time to make permanent alterations in the Constitution but recommended, as an alternative, that action be taken under the provision in the Constitution authorizing the Commonwealth Government to make laws for the peace, order and good government of the nation with respect to such matters as are referred to it by the State Parliaments. Enactments made under this power only extend to those States which have referred the subject of the law to the Federal Government or which afterwards adopt the law.

The Convention also drafted a Bill enumerating the powers which it was considered necessary for the States to transfer to the Commonwealth to ensure an adequate post-war program. By the end of February, New South Wales and Queensland had passed the Bill under the title of the "Commonwealth Powers Act", Tasmania had rejected it and the other States were still considering it.

The Bill stipulates that the transfer of powers is to remain in effect for a period of five years after the war, at the end of which time all Federal laws relating to the subjects enumerated in the Bill will lapse. Any amending or repealing Bill must be endorsed by a majority vote of the electors of the State before it is submitted to the Governor for Royal Assent.

The matters to be referred to the Commonwealth Parliament include the reinstatement and advancement of discharged members of the Armed Forces and the advancement of the dependants of those killed or disabled, employment and unemployment, organized marketing of commodities and the production and distribution of goods. Primary production may be included only with the consent of the Governor in Council and if there is no discrimination between States or parts of States in laws enacted under this power.

In the social sphere, family allowances, national health and the care of the aboriginal race are referred to the Federal Government. In the economic field such subjects are included as profiteering and prices (excluding prices charged by governmental bodies for goods or services), trusts, combines and monopolies, uniform company legislation, the control of overseas exchange and investment and the regulation of the raising of money in accordance with such plans as are approved by the Australian Loan Council. Air transport, uniformity of railway gauges and national works are also enumerated. The consent of the Governor in Council must be obtained before any national work is undertaken and it must be carried out in co-operation with the State concerned.

In executing Federal laws dealing with any of these matters, it was agreed at the Convention that the Commonwealth Government would avail itself of State officials, authorities and other assistance wherever possible.

Post-war industrial reconversion in Great Britain

"Business Week" of July 10 draws attention to what it termed "England's first practical effort to draw up a concrete pattern of post-war industrial reconversion." It is the result of months of effort by such organizations as the Federation of British Industries, the British Employers Confederation and the Trades Union Congress, climaxed by the radio appeal of Prime Minister Churchill on March 21, that "industry peer through the mists of the future to the end of the war and be prepared by ceaseless effort and forethought for the kind of situations which it is then likely to face."

The project which has been launched by the Board of Trade is a plan to survey every major industry in Britain in order to determine: (1) the principal problems which must be solved by each industry in order to reconvert to a peacetime basis; (2) the probable condition of all equipment at the end of the war; (3) the technological improvements which have been introduced during the war and how they will affect the resumption of peacetime production.

To obtain this information a questionnaire has been sent to leaders in 50 key industries. By this means it is expected to obtain a close approximation of the number of firms engaged wholly or mainly in government contracts or sub-contracts and the capacity of their several plants. In addition, information is being sought with respect to the difficulties likely to be encountered and overcome once the government contracts expire and factories have to be restored to peacetime production. Then, too, it is hoped to ascertain the extent and the nature of specific problems and difficulties peculiar to individual industries. Questions are also asked that are designed to ascertain the nature and extent of plant expansion during the war and how these expansions may be made use of, as well as to what extent they can be utilized in making parts or goods for stock, during the transition period at the end of the war.

Definite efforts are being made to get expressions of opinion from industrialists concerning priority of release from military service—as well as from other kinds of national service—of special classes of pivotal workers upon whose return will depend the employment of other workers. Then, too, inquiries are being made as to what will be the probable condition of allied industries which normally supply semi-manufactured material or perform subsidiary processes and the extent to which this factor will likely influence restoration of peacetime activities. Further, the numbers of workers—men and women—employed in the several industries before the war, together with careful estimates of their labour requirements in the first post-war year, will be fully tabulated. An industrial inventory of capital equipment in each industry on a more comprehensive scale than has hitherto been attempted will be compiled along the following lines:

(1) To what extent are existing plants provided with modern machinery for probable peacetime work and also to what extent machines and tools acquired for wartime production can be made use of quickly after the war.

(2) Estimates of probable demands for repairs to machinery, expressed as a percentage by volume of the requirements in 1938, or by value at pre-war prices. This is intended to provide information as to age and degrees of obsolescence of existing machinery, together with the types and the cost of replacements or repairs to equipment that would probably be required.

Until this survey has been completed, naturally no conclusions can be drawn from it. It is pointed out that almost every industry faces a different set of circumstances.

Manpower

Canada's Manpower Situation

Minister of Labour Outlines in House of Commons the Results of Canada's Manpower Program

A DETAILED view of the manpower situation in Canada was given by the Minister of Labour, Honourable Humphrey Mitchell, in the House of Commons on June 23. The text of the Minister's statement may be found in the Official Report of the House of Commons Debates for that date.¹

The Minister stated that to-day in Canada, out of a total population of 8,720,000, men and women, aged 14 and over, 5,000,000 or about 60 per cent, are in the armed forces or at work. "It is a good record," he observed. "It is something to be proud of."

Statistical tables containing this and other information resulting from the manpower survey undertaken by the Department of Labour as of January 30, 1943, (L.G. Jan., 1943, p. 38), were tabled in the House by the Minister, and are reprinted herewith.

The Minister pointed out that table I shows an increase since the start of the war of about 1,000,000 in the number of persons in the forces and at work. A total of about 1,700,000 persons are in the armed services or in industry directly related to the war effort; and in addition there are 2,100,000 persons in agriculture and essential civilian employment. Seventy per cent of all males in Canada 14 years of age and over are included in these categories.

This table indicates that during the year and a half ended January 30, 1943, there was an increase of 915,000 in the number of persons in the armed forces or war industry. Meanwhile there was a decline of 92,000 in the number of those engaged in civilian employment "which," the Minister said, "largely represents a drain of manpower from work unnecessary in wartime."

"Our manpower policy is quite clear," the Minister declared. "It is to provide the greatest possible number for our armed forces, while at the same time supplying the necessary men and women for our war industries,

farms, base metal mines, lumber camps, railways—inland and sea-going shipping.

"To meet this problem we have diverted men and women from low to high priority industries, according to their skills and physical strength, without depriving any young men or women in this country from the privilege and honour of serving voluntarily in the armed forces of this nation, with the single exception of coal mining.

"Because of the great increase in our army of workers we must maintain more of certain civilian services than would otherwise be needed, such as manufacturing, trade, distribution, transportation, communications and construction of homes. But through controls administered by the wartime industries control board, wartime prices and trade board and selective service there has been a sharp drop in the employment of persons engaged in the production and sale of things we can do without until the war is over."

The Minister traced the development of manpower controls and priorities since the establishment of National Selective Service in March, 1942, and announced three new manpower orders relating to the employment of youths and teachers, and the provision of labour for fuelwood-cutting, fishing and fish processing (see article elsewhere in this issue). He referred to the Government's measures to ease the manpower shortage in the coal industry by returning ex-coal miners to the coal mines (L.G., June, 1943, p. 739); and the policy in regard to farm labour.

Emphasis on Farm Labour

Although many men and women had left the farms for the armed forces and war industry, he pointed out that farm production continues to soar. To check this exodus of farm workers, the Government acted more than a year ago to place restrictions in the way of men and women leaving agriculture for civilian employment; since then, amendments to the original order have increased the effectiveness of the freezing regulations. Farm

¹A limited number of reprints of this speech are available from the Department of Labour.

workers not needed in agriculture during the winter months have been urged to take temporary work in other essential industries, especially logging, saw mills, coal mines, and base metal mines. An estimated 175,000 persons from farms worked in other industries during last winter.

The Minister pointed out that mobilization boards, in considering applications for postponement from military service, must prove, before dismissal of such applications, that farm workers are not essential, whereas in the case of all other workers they themselves have to prove to the boards that they are essential. Before May, 1942, 23.4 per cent of the applications for postponement for farm workers were refused. Out of 20,887 applications only 15,996 were granted. Since May 1942, only 9.9 per cent of the farmers' applications for postponement were refused. There were 93,000 applications up to April 16, 1943, and 84,595 were granted.

As of May 25, 1943, mobilization boards had postponed 4,747 men as Mennonites, Doukhobors or conscientious objectors. 3,807 of these are in essential work, mostly agriculture, and 900 are doing essential work in alternative service camps. Also the employable men and women among the 21,000 Japanese evacuated from the protected area of the Pacific coast are being gradually placed in employment wherever they will be of most use in the war effort. Many prisoners of war are to be employed in selected types of agricultural work, in wood-cutting and mining.

Priority Shifts

Table II, in regard to the transfer of workers, reprinted from the Minister's statement, appears elsewhere in this article.

The Minister described the functions of the local Employment and Selective Service Offices in regard to the movement of labour from low to high priority industry. He referred to the magnitude of the placement machinery required to take care of an average of 50,000 persons a week.

Among the activities of the offices designed to make efficient use of manpower, the Minister described the following:—

"Shortage of men in the base metal mines has been met by the transfer of gold miners. Employees of paper plants where operations were also diverted to base metal mines. Halifax freight handlers were used in slack periods in fish processing plants. In British Columbia we dove-tailed vegetable and fruit canning with fish canning.

"Selective service has given special attention to the supply of men for lake navigation

—realizing its importance in our wartime transportation."

He pointed to the vast increase in the employment of women: in the past twelve months about 426,152 were placed in jobs by employment offices. To assist mothers undertaking war work 14 day nurseries have been established in Ontario and Quebec in accordance with Dominion-Provincial agreements and plans have been developed for 18 more.

Overall Requirements

Discussing the overall 'manpower requirements, the Minister declared:—

"When selective service began just over a year ago, the estimated manpower requirements for the ensuing twelve months were 100,000 for industry and 193,000 for the armed forces, a total of 293,000. In the twelve months, March 1, 1942; to March 1, 1943, the strength of the armed forces increased by more than 220,000 and the number of persons in war plant production and associated industries rose by 320,000. . . . When you move 320,000 men and women, with all the detail that involves, into industry in a country the size of Canada, I think it must be agreed that in its very essence that is a gigantic undertaking.

"During the twelve months following April 1, 1943, it is expected there will be a net increase of 127,000 men and 24,000 women in our armed forces, a total of 151,000.

"To meet the male manpower requirements, some will be obtained by a reduction in the number of those temporarily unemployed and of students. The natural increase in the adult population will provide about 55,000. The balance will be met by a curtailment of employment in the less essential industries and services.

"Of the women needed for the armed forces and for essential industry, the large part will be obtained from the natural increase in population of about 60,000. We cannot expect to get a great many from less essential industries and services because preferably we shall take men from these fields. Therefore we must look to housewives and others not now working in urban areas to fill the gap.

"I would like to emphasize to the committee that the figures I have given are net. Because of discharges and casualties the armed services will require a higher gross total of men and women.

"Industry also, because of labour turnover and transfers from war production to the armed forces, from civilian to war production, will need a higher gross total. Selective service is confident of meeting these needs if the present trend of replacing men by

TABLE I—DISTRIBUTION OF CANADA'S HUMAN RESOURCES, 14 YEARS OF AGE AND OVER
(Estimates, given in thousands, are from various official sources)

	August 31, 1939			June 1, 1941			January 30, 1943			Percent total to grand total

NOTE.—1st compulsory employment transfer order was announced on May 5, 2nd on May 15; the 2nd had not closed at June 12, the date of the above compilation. The coal order was announced on May 17, 1943.

women and girls in civilian employment continues and there is the necessary reduction in the less essential industrial and business operations.

"As I have indicated, the more serious labour shortages are in mining, agriculture, logging and other primary industries. The jobs largely demand able-bodied men. The work is heavy. We are doing our best to solve the problem.

"With the co-operation of the armed forces and industry and through our plan of compulsory transfer of men, the situation, I am sure, will be eased."

Survey of Industrial Manpower for Military Service

The Minister outlined the Industrial Mobilization Survey Plan, the purpose of which is to facilitate the orderly withdrawal of replaceable workers from essential industries into the armed services and to provide for their replacement with the least possible disturbance to production. The survey requires the employer to report all employees of military age, along with a description of the work they are doing and the length of time required to train replacements, particularly stressing the use of women. The survey thus acquaints the employment service with the employer's need for replacement, informs them of any surplus labour, and enables a schedule to be drawn up by means of which the employer is advised of the order in which his employees will be called up.

The plan operates through a local committee at each of the Mobilization Board centres, composed of a chairman technically qualified through business experience and representatives of government agencies.

The Minister stated:

"The industrial mobilization survey has progressed to the point where we have a factual picture of fifty-eight companies, engaged in war production, employing a total of 81,070 people—of which 55,083 are men and 25,987 are women. Of the total number of men employed it was found 13,689, or 24.8 per cent were within the designated age classes, subject to military training. It should be borne in mind that a considerable percentage of those subject to call are medically unfit. For the fifty-eight companies referred to these surveys show 1,464 men in the designated age classes can be replaced by women. They also indicate a total of approximately 6,913 men have enlisted in the armed services.

"Some of the plants show a high percentage of women employed. One in Toronto, the General Engineering Company, had 2,848 women out of a total of 4,382, and only 114 of the men were subject to military call-up.

This will give hon. members some idea of the manner in which we are combing out industry for men for the armed forces and for transfer to more essential or other industries.

"The John Inglis Company at Toronto, with 16,491 employees, had 7,493 women and 8,998 men, with 2,080 of the men subject to military service. The survey to date appears to represent a fairly good cross-section of the industrial set-up."

Labour Turn-over

Labour turnover, the Minister reported has shown considerable improvement since last summer. In shell filling operations based on total payroll, the percentage was 9.2 in July, 1942, and 5.7 in February, 1943.

Other changes in the same period were:

Aircraft—6.6 to 4.3.
Steel and base metals—6.3 to 5.0.
Automotive—7.5 to 4.7.
Tanks—3.6 to 2.3.
Small arms—7.0 to 5.3.
Explosives and chemicals—8.4 to 4.9.
Small arms ammunition—5.2 to 3.3.

From August, 1942, to February of this year the general change for all reporting firms was 8.3 to 4.8, or close to 50 per cent betterment.

Labour Representation

The Minister praised the contribution made by labour's representatives to the work of the various boards and committees of the Department, none of which, he declared, "except those which by their nature are restricted to our own officials", are without labour representation. Labour is represented by about 300 leading members of the movement on 8 national bodies, 15 regional bodies, and 70 local or district committees directly related to the Department of Labour. In every case labour and employer representation parallel one another.

Call-up Machinery

Reference was made to the call-up machinery for military service, and a description given of the quota system. A summary of mobilization statistics was tabled showing by administrative divisions the data on medical examinations, postponements, and call-ups for military training as follows:

Medical Examination

Number called	988,475
Number examined	608,642

Postponements

Number requested	233,224
Number granted	190,550
Number in effect	100,973

Military Training

Number called	289,544
Number reported	160,662
Number accepted	126,963

The tabular notations in connection with these figures were as follows:

The difference of approximately 380,000 between the number of men sent notices-medical, and the number examined, is accounted for by notices undelivered, men who joined the forces voluntarily either before or on receiving notice-medical, men sent notices to whom the regulations do not apply, and some defaulters. Men registered from January to March 15, 1943, as not receiving notice-medical narrows the difference between notices sent and men examined. But without doubt voluntary enlistments account for a very substantial portion of the total difference.

The reduction of approximately 319,000, in the number called for military training, compared to the number examined, is accounted for by men being medically unfit, men being granted postponements—and again (but no doubt fewer in number) voluntary enlistments. Defaulters would also add to the difference.

Voluntary enlistments, as well as postponements, account for most of the difference of 129,000 between the numbers called for military training and those reporting. Also, of course, some defaulters enter into this phase of the process, too.

Physical reasons, on further medical examination, are responsible for the reduction in the number accepted for training, compared to the number called.

In a subsequent statement on June 28, (House of Commons Debates, p. 4195) the Minister further clarified the disposition of the above pool of manpower in the designated classes as follows:

Men in designated classes as at 1940:	
Registration total 1,043,163 less those	
in course of being called (54,688),	
net	988,475
Men now in armed forces who came out	
of foregoing pool	550,692
Men now on postponement	100,973
Men unfit	257,103
Men in C.O.T.C. and auxiliary units ..	5,776
Statutory exceptions (firemen, police-	
men, clergymen, judges, enemy aliens)	6,257
Residue of original man-power pool	
unclassified ..	67,674
	<hr/>
	988,475

Emergency Training

The Minister declared that Canada's war emergency training program carried on in co-operation with the provinces, redounded greatly to the credit of the country. "As of March 31 last," he said, "nearly 218,248 men and women had been enrolled in the vocational and plant school classes since the beginning of the program. This total included 135,438 trained or training for industry, and 72,810 for the armed forces. There were 30,591 women in the industrial classes."

Through the Wartime Bureau of Technical Personnel more than 3,000 technicians were transferred to war jobs in the past year. To maintain a good supply of engineers and other technical men, the Government has assisted financially and through promotion of summer employment, 2,022 university students, including 840 in science and engineering, 439 in

training to become teachers, 462 in medicine, 91 in dentistry, and 190 in other faculties. The Minister referred also to the universities' assistance in building up "a small army" of personnel managers, and to the job instructors' and job relations' courses which have helped to make labour more skilled and thus more useful in the war effort.

In reference to the country's production record, he gave full credit to Canada's workers as follows:

"I point out to you that the marvellous achievement was accomplished because of the wholehearted support of the working men and women of Canada in the war effort. It is evidence that the working people have done their full part."

Distribution of Canada's Human Resources, 14 Years of Age and Over

The table appearing elsewhere in this section, entitled "Distribution of Canada's Human Resources, 14 years of Age and Over, as at January 30, 1943," undertakes to show a brief classification of the population in the age class mentioned, in relation to occupation.

Sources: Figures used in the table are derived from several official sources, including a survey of employment as at January 30, 1943, made by the Department of Labour; figures compiled by the Department of Munitions and Supply; and figures gathered by the Dominion Bureau of Statistics, through the census and otherwise.

Basis: The following explanations regarding the basis of classification will be helpful in interpreting the table:

1. In section I "Armed Forces", figures used refer to those in the forces on January 30 last.

2. In section IIA, "In Industry," (a)—Department Munitions and Supply estimates; (b)—balance of labour priority A and all priority B; (c) and (d)—labour priorities C and D respectively. IIB. "In Agriculture," as will be seen, includes only male agricultural workers, including farm operators.

3. In section III, "Farm Women" are set as a class apart, since much of the work of women on the farm goes beyond ordinary housekeeping duties, especially at busy seasons.

4. In section IV, all students, 14 or over, even though they work during the holiday seasons, or engage in part-time work at other times, "Other women (including non-farm housewives)" would be largely housewives, not gainfully employed. Wives in gainful employment are included in II, "In Industry".

5. "(c) Employable men temporarily not at work", includes those seasonally unemployed and those in process of changing jobs at January 30.

Priorities: In examining the table, some of the difficulties of attaining precision when applying priority tables to large numbers of workers, might well be borne in mind. The following illustrations will indicate a few of these difficulties:

Manufacture of a given article for the armed forces would carry a high priority—if for civilian consumption, a low priority. Hence, an estimate of those on high priority work and those in low priority work, within the same plant must be attempted.

Retail stores in general may rate a low labour priority. If, however, labour shortages threatened to interfere seriously with the distribution of important civilian supplies, a temporary rise in the priority would be indicated.

It is not simple to determine, in all cases, what are "essential" civilian services. Of two services, perhaps one may be dispensed with, providing the other remains: both could be

spared only with interference with war production.

Other illustrations might be cited, but the foregoing will serve to emphasize the difficulties in assessing the relative worth in relation to the war effort, of particular lines of employment.

Comparisons: The table makes comparisons for August 31, 1939; June 1, 1941; and January 30, 1943.

Third Compulsory Transfer Order

THE third employment transfer Order under National Selective Service Civilian Regulations was announced by the Minister of Labour, Honourable Humphrey Mitchell, on June 30. Under the Order a further list of low-priority industries was set forth. Male employees in the industries detailed who are in age and marital classes covered by Mobilization Regulations become liable to transfer to more essential industry.

In addition the Order applied to any young men of 16, 17 and 18 years of age in the employments listed. Young men in this age category were made subject to compulsory transfer Orders by a recent Order in Council.

Men in the categories involved were required to report at an Employment and Selective Service Office not later than July 15, if engaged in any of the following lines of employment:

1. All wholesale activities, except the following classifications in wholesale trade:

- Farm products, excluding tobacco,
- Food products,
- Hardware, lumber and building materials,
- Plumbing, heating and ventilating supplies,
- Electrical equipment for industrial use,
- Machinery and equipment,
- Gasoline, oils and greases,
- Fuel and ice,
- Farm supplies,
- Metals, minerals and chemicals,
- Paper and its products,
- Books, newspapers, magazines and sheet music,
- Watches, clocks, and timing instruments,
- Leather and leather goods,
- Scrap metal, junk and waste.

2. Raising of special livestock, such as race horses, and dogs, cats and other pets.

3. Flower growing.

4. Horticultural services, except tree surgery.

5. Leather currying, finishing, embossing and japanning.

6. Brewing.

7. Manufacturing:

- (a) Fur goods,
- (b) Robes and dressing gowns,
- (c) Neckties and scarves,
- (d) Curtains and draperies,
- (e) Metal household furniture,
- (f) Household furniture (except mattresses and bedsprings),
- (g) Metal office furniture,
- (h) Rattan and willow-ware,
- (i) Cigar and fancy boxes (wood),
- (j) Mirror and picture frames,
- (k) Perfumes, cosmetics and other toilet preparations,
- (l) Hand-bags and small leather goods.

The procedures involved in the case of the third Order followed those in effect under the two preceding Orders. Persons affected were required to report in person unless prevented by reason of distance in which case they could write to the nearest Employment Office.

No employer may continue to engage any of the men covered by the Order, in the employments now listed, after the specified date except under special permit from National Selective Service.

Under the first two Orders men discharged after active service with the Armed Forces during the present war were not made subject to transfer, though required to register, while men with dependents were not required to accept transfers which would involve a change of residence; the same practices applied in the case of the recent Order.

Men required to accept alternative employment are protected in so far as fair minimum earnings are concerned. Also, all men have the right to appeal to a Court of Referees should they object to accepting employment to which they may be directed.

The Minister declared that men covered in the earlier Orders had co-operated quite readily with the new regulations. "Over 24,000 men have been interviewed under the earlier Orders, and many of them have already been transferred to higher priority work. The cases

of a considerable additional number are still under review. From the reports we have received it would appear that compliance has been quite general. How many men may be covered by this Third Order has not been determined, but we hope for, and anticipate

the same ready compliance as in the case of the first and second Orders".

The list of occupations covered by the first two Orders appeared in the May and June issues of the LABOUR GAZETTE (p. 566 and p. 738).

Fourth Compulsory Employment Transfer Order

HON. Humphrey Mitchell, Minister of Labour, announced on July 12, 1943, the fourth in the series of Compulsory Employment Transfer Orders. This Order makes young men who have reached age 16, and have not passed their 19th birthday, liable for transfer to higher priority work, if now employed in the list of employments which is carried in the Order.

"I might explain the Fourth Order most simply," the Labour Minister said, "by pointing out that in effect it brings young men of 16, 17 and 18 years of age under the First and Second Compulsory Orders, both of which originally applied only to men in classes designated under Mobilization Regulations. The objective of the Fourth Order is to make the young men affected available for transfer to work which is of more importance to Canada's war effort."

Honourable Mr. Mitchell further pointed out that the Third Compulsory Order, which set forth a list of occupations from which men are to be transferred, was the first order to include both men callable under Mobilization Regulations and the younger men from 16 to 18 years of age.

The following is the list of occupations covered by the present (i.e., this Fourth) Order:—

1. Any occupation in or associated with the following: (a) barber shops and beauty parlours; (b) distilling alcohol for beverage; (c) dyeing, cleaning and pressing, baths, guide service, shoe shining; (d) entertainment, including but not restricted to theatres, film agencies, motion picture companies, clubs, bowling alleys, pool rooms; (e) operation of ice cream parlours and soda fountains; (f) manufacture of feathers, plumes and artificial flowers, chewing gum, wine, lace goods, greeting cards, jewelry; (g) retail stores; (h) factory production of statuary and art goods; (i) retail and wholesale florists; (j) retail sale of confectionery, candy, tobacco, books, stationery, news; (k) retail sale of motor vehicles or accessories;

(l) retail sale of sporting goods or musical instruments; (m) service stations (gasoline-filling stations); (n) taverns; liquor, wine and beer stores.

2. Bus boy; charman and cleaner; custom furrier; dancing teacher; dish washer; domestic servant; doorman and starter; elevator operator; greens keeper; grounds keeper; hotel bell boy; porter (other than in railway train service); private chauffeur; taxi driver; waiter.

The Labour Minister made it clear that Selective Service Officers will take into account the health and domestic circumstances of any young men who are being considered for transfer.

It is explained that any of the young men in the age groups mentioned who will be returning to school at the opening of the autumn school session, will not be stopped by the Order from again attending school. However, even though intending to return to school, young men in the classes affected who are now in the employments listed, working during their summer vacation period, must comply with the Compulsory Order.

The young men covered by the Fourth Order must report to the nearest Employment and Selective Service Office not later than July 24th.

The general conditions applicable in connection with the earlier Orders also apply to this recent Order. Penalties are provided for employers retaining men covered by the Order after July 24th, except under special permit. Any man directed to employment may enter appeal with a court of referees if he feels he has grounds for not transferring.

It is further pointed out by the Department of Labour that the Third Compulsory Employment Transfer Order, affecting both men from 16 to 18 years and also men callable under Mobilization Regulations is still current.

Young men who are indentured apprentices will not be transferred to other employment under these compulsory orders.

Labour Supply for Eastern Canadian Ports

Action Taken to Ensure Prompt Loading and Unloading of Ships by Stabilizing Employment of Longshoremen

THE existence of an emergency situation in the loading and unloading of ships at Eastern Canadian ports, particularly the Port of Halifax, has been reported by the Minister of Labour, and action is being taken under two recent Orders in Council to deal with this acute problem.

One of the new orders (P.C. 5160) provides for the freezing of longshoremen in their present jobs; for the return to the docks of men with previous experience in this occupation; and for the direction of men subject to Mobilization Regulations to work as longshoremen. The other (P.C. 5161) establishes a mobile labour pool to be used in emergencies as needed.

This action is an extension of the wartime plan for the re-organization of ship loading and unloading established by Order in Council P.C. 3511 of April 30, 1942 (L.G., May, 1942, p. 556), which appointed a Controller of Loading Operations and created a Central Dispatching Agency through which gangs of longshoremen could be assigned to jobs.

"Rapid loading and unloading of ships at Eastern Canadian ports," the Minister declared, "is equivalent to increasing the total volume of shipping which we have available. It is hoped that the measures we are now taking will result in handling boats with a reduction in the time required. I think there is no need to stress the urgency and importance of such action as may accomplish the purpose we have in mind."

Control of Employment of Longshoremen

The first of the new orders amends the National Selective Service Civilian Regulations by adding a new section, 210C. It contains the following provisions:

(1) A Selective Service Officer may direct any person designated under Mobilization Regulations and unfit for military training or a conscientious objector to give his present employer immediate notice of separation, and to apply for specified employment as a longshoreman at the Port of Halifax.

(2) No longshoremen at the Port of Halifax or such other ports in Nova Scotia and New Brunswick as the Minister may designate may terminate his employment without the written permission of a Selective Service Officer; and no employer may dismiss a longshoreman without such permission.

(3) No person may take any ex-longshoreman into employment in Nova Scotia or New Brunswick unless he has a permit to seek such employment.

(4) Employers in the two provinces must make every reasonable effort to advise employees of the provisions of this order and to determine which of them are ex-longshoremen.

(5) On or before a day to be designated, (later specified as July 21) ex-longshoremen in the two provinces must notify their employers of their experience; and employers must report to a Selective Service Officer the names and addresses and experience of such of their employees whom they have determined to be ex-longshoremen or who have so notified them.

(6) After the designated date no ex-longshoreman may continue in work other than as a longshoreman and no employer may retain an ex-longshoreman in other employment without a written permit.

(7) A Selective Service Officer may direct any ex-longshoreman to report for interview at a Local Office at any time; the report may be in writing if the man lives in a place from which the return fare to the Office is more than 30 cents.

(8) Unless the Officer finds that an ex-longshoreman is not suitable for employment as a longshoreman he shall direct him to give notice to his present employer and to apply forthwith for employment as a longshoreman.

Longshoremen's Labour Pool

In regard to the second order, the Minister of Labour announced in the House of Commons on June 25 that a labour reserve pool of 750 longshoremen is to be established at Halifax, to supplement regular longshore staffs when the number of men regularly engaged at longshore work becomes inadequate to handle the loading and unloading of ships.

The Stabilization of Longshore Labour Halifax (Order)

The second Order in Council, which is partly based on the British "Essential Work (Dock Labour) Order" of 1941, provides for:—

The creation and maintenance of a Longshoremen's Reserve Pool of whatever size required to supplement the regular longshore force on days when that force is inadequate.

This will also be available for directed transfer to longshore labour at other ports, or to other types of work in Halifax.

The stabilization of the labour supply by means of a guaranteed minimum weekly wage to regular longshoremen and to the Reserve Pool, thereby providing for a degree of economic contentment and of effective government control not otherwise possible.

The basis of the guaranteed weekly wage is set at the equivalent of the basic day-time rate for handling general cargo, plus war bonus as fixed by the current working agreement between the International Longshoremen's Association and the shipping and stevedoring companies, plus cost-of-living bonus. The computation of the guaranteed wage will be made on the basis of 48 hours a week, but the guaranteed wage will not be paid in any week to a man who fails to report for, or fails to perform any work to which he has been directed.

Adequate housing accommodation by temporary or permanent bunk-house and canteen facilities.

Rules for determining when the various classes of men shall be entitled to the benefit

of the guaranteed wage, and the requirement that the men must be available for work, and accept work offered, at specified times.

The protection of the regular worker from undue competition; for Reserve Pool men may only be used when the regular men are inadequate to the job.

The constant availability of sufficient men for recurrent peak days.

The "freezing" of longshoremen and Reserve Pool men to the docks in return for the minimum income assured to them.

The establishment of a regular day and night shift system when sufficient labour is available, a measure which will greatly speed up the turn-round of ships.

It is to be noted that the provision relating to the payment of the guaranteed wage imposes a financial burden on the Government, but this need not be unduly heavy if the size of the Reserve Pool is kept within proper limits. Moreover the Minister may recover all or part of the money so paid by levying an assessment on the firms who obtain the immediate benefit of the provision in the form of constantly available labour.

Control of Employment of Youths

INCREASED control has been taken over the employment of youths aged 16, 17 and 18. Male persons of these ages have been made subject to compulsory transfer orders in the same manner as men in the age groups liable for military service. This action — necessary for the efficient use of Canada's manpower in the direction of such youths into high priority employment — was taken by Order in Council P.C. 4860, June 17, which amended the National Selective Service Civilian Regulations¹ by revoking Subsection (1) of Section 210, and substituting the following in its place:

"210. (1) The Minister may by Order forbid any employer, or group, or class of employers, to retain in employment after a specified date any person, or group, or class of persons, to whom the National Selective Service Mobilization Regulations apply and who belong to an age class, or part of an age class which has been designated for the purpose of the said Regulations and any male person who has attained his sixteenth birthday and has not attained his nineteenth birthday, without obtaining a permit in prescribed form from a Selective Service Officer or may require any employer, or group, or class of employers, to terminate at such time and in such manner as he may specify the employment of any such person, or group, or class of such persons."

¹ P.C., 246, Jan. 19, 1943 (L.G., Jan., 1943, p. 16).

Manpower for Fuelwood-cutting, Fishing and Fish-processing

IN view of a threatened fuelwood shortage for the coming winter, Selective Service officers have been authorized to give compulsory direction for the employment of men between the ages of 16 and 65 in this work. By the same Order (P.C. 4861, June 17) similar provision is made for direction in employment in fishing and fish-processing. The Order adds a new Section to National Selective Service Civilian Regulations as follows:

"210B (1) A National Selective Service Officer may, in accordance with principles and directions set out in instructions given by the Minister, by order in writing, direct any male person who has attained his sixteenth birthday but has not attained his sixty-fifth birthday to accept and enter specified employment in the

cutting of fuelwood, or specified employment in fishing or fish processing, at the expiration of seven days after the date of such direction, if the person is employed at the date of such direction, or immediately, if the person is not employed at the date of such direction;

(2) If a person who is directed to enter specified employment pursuant to Subsection (1) of this Section is employed at the date of such direction, the Selective Service Officer shall notify the employer of such person that his employment shall be terminated at the expiration of seven days, and the employer shall not retain such person in employment after the expiration of the said seven days;

(3) Where a person is directed to take specified employment pursuant to this Section, Subsections (3) (5) and (6) of Section 209 and Subsections (3), (4) and (5) of Section 210 shall apply, *mutatis mutandis* as if enacted in this section."

Employment of Teachers

BY Order in Council P.C. 4862, June 17, provision has been made to retain in the teaching profession the services of teachers presently employed in schools, colleges, and universities which are not operated for gain. The Minister stated that this action was taken following representations from the provincial Departments of Education.

The measure, which amends National Selective Service Civilian Regulations by adding a new section, 207A, provides that:

No person employed as a teacher shall enter or remain during any day in employment outside teaching except

(a) active service in His Majesty's Canadian armed forces, or

(b) employment in agriculture, or

(c) part-time employment which is subsidiary to employment as a teacher, unless he has first obtained from the National Selective Service Officer a permit in prescribed form to enter or remain in such employment.

The order similarly restricts an employer from taking a teacher into employment outside of teaching.

In regard to the furnishing of a permit, the order continues:

The National Selective Service Officer on request may, in accordance with principles and directions set out in instructions given by the Minister, furnish a permit to a person employed as a teacher to enter or remain in employment outside teaching and insert therein restrictions as to

(a) the place where employment may be obtained thereunder;

(b) the employment which may be obtained or retained thereunder;

(c) the nature of the employment which may be obtained thereunder; or

(d) the duration of the employment which may be obtained or retained thereunder.

A permit may be given, subject to the same restrictions, for employment during ordinary vacation periods.

A permit may be cancelled or extended by a Selective Service Officer.

Women in Iron Ore Industry

AUTHORITY for the employment of women in certain occupations is granted the Algoma Ore Properties Limited in connection with the production and processing of iron ore near Sault Ste. Marie, by P.C. 4891, June 17. The occupations are as follows:

warehouse clerks,
surface labour, cleaning,
bin attendants,
belt tenders,
Dwight-Lloyd helpers,

oilers,
samplers,
technical and clerical personnel.

The proviso is made that the company shall furnish "such facilities for safeguarding the health and welfare of any woman so engaged as may be prescribed from time to time by order of the Minister of Labour, issued after consultation with the Minister of Mines of the Province of Ontario and the Minister of Labour of the Province of Ontario".

Other Manpower Orders

IT has been found that in remote areas it is not always possible to have available a medical doctor to examine persons to whom an "Order-Medical Examination" has been sent; and that, in an endeavour to comply with the Mobilization Regulations, there exists the possibility that a person to whom an "Order-Medical Examination" has been sent might be put to considerable personal expense.

Accordingly Order in Council P.C. 45/4690 (June 8) provides that the Director of National Selective Service may defray travel-

ling expenses if the man lives in a remote locality where the necessary medical facilities are not available and if he cannot afford to pay these expenses himself.

P.C. 4826, June 14, effects a technical change in Section 28 of the Mobilization Regulations in regard to enforcement.

P.C. 28/5267, of June 30, authorizes the provision by the Department of Labour of guards for prisoners of war available for work outside internment camps.

Western Farm Labour for Ontario

THE Honourable Humphrey Mitchell, Minister of Labour, announced on June 12th that the Dominion Government was arranging with the Government of Saskatchewan to bring at least 500 farm workers from that Province to Ontario for temporary farm work this summer.

"Ontario faces a critical labour shortage for summer farm work," the Minister said, "and a supply of experienced farm workers from outside of the Province must be secured."

Within a few days of the Minister's announcement a recruiting campaign was under way largely through the local "Win-the-War" Committees in Saskatchewan and during the period from June 20 to July 3 around 700 farm workers left for the east. These men were selected so as not to interfere with farm work in Saskatchewan. In most cases not more than five men were allowed to leave each rural municipality.

The Federal Government is providing the transportation to a central point in Ontario except for \$5 which the men contribute

towards their return fare. From the central points in Ontario, namely Toronto or Ottawa, the transportation to the ultimate destination is shared by the Dominion and the Province of Ontario on a fifty-fifty basis under the joint Farm Labour Agreement.

These men have been sent to the different counties of central and southern Ontario on a quota basis in proportion to the farmers' applications which each Provincial Agricultural Representative received for their services. Placements have been made by these Representatives acting in conjunction with National Selective Service officials.

The lull in western farming operations between seeding and harvesting has made possible this movement of experienced farm workers to Ontario. Their services will be most valuable in relieving the critical farm labour shortage during the haying and early harvesting seasons. They will remain in Ontario until around August 15th when they will be needed back in Saskatchewan for the Prairie harvest.

Manpower Survey in Logging and Lumbering Industries

M. R. Arthur MacNamara, Director of National Selective Service, announced in June that Selective Service was undertaking a survey of the logging and lumbering industries, in order to learn their probable labour requirements during the fall and winter seasons. Questionnaires were sent to all firms which regularly cut lumber.

With much of the present demand for lumber arising directly out of the war effort,

the question of labour supply in the logging industry is regarded by the Department of Labour as very important. Last year a considerable number of farmers were induced to take work in lumber camps during the winter season, when they could be spared from the farms. The Department of Labour has in mind similar plans for next season.

New Transfers of Workers in Great Britain

Women Now Being Directed into Part-time Work and to Replace Workers Transferred from Less Essential Industries

THE British Ministry of Labour has recently begun directing persons into part-time work up to 30 hours a week, and into industries not scheduled under the Essential Work Orders (L.G., August, 1942, p. 934). As a preliminary to this step the government, after consultation with the Trades Union Congress and the British Employers' Confederation, issued a special order to safeguard the conditions of work of such persons. Heretofore the Minister has used his power of compulsory direction under the Defence (General) Regulations to send persons into scheduled industries where workers cannot leave or be dismissed (except for serious misconduct) without permission of a National Service officer and where employers are required to observe prescribed conditions of work. An extension of the use of this power has now become necessary to provide substitutes for workers moved from less to more essential industries and to mobilize women with home responsibilities for part-time work. Already 600,000 women have voluntarily taken up part-time work.

Women's advisory panels of local employment committees will determine which women should reasonably be expected to take up part-time work. Women whose children are under 14 and live with them are still exempt from direction. Women will only be directed to part-time work within reasonable travelling distance of their homes.

Defence Regulation 58A, under which directions are issued, stipulates that the terms of service and wages of directed persons must be

not less favourable than those fixed by collective agreement or arbitration or those prevailing among good employers in the industry and district. The control of Employment (Directed Persons) Order issued April 28, 1943, further safeguards the rights of directed persons not covered by Essential Work Orders. It provides that such persons cannot leave their employment or be dismissed unless a National Service officer withdraws the directions issued to them. Directions are to remain in force for the duration of the period (varying from three weeks to six months) specified in the directions, or if no period was specified, for six months from the date of this order. New directions must be issued every six months. Either an employer or a worker may apply for withdrawal of directions to a National Service officer who may grant or refuse the application. If a worker establishes that he has been laid off without wages his directions are automatically withdrawn. As under the Essential Work Orders, appeals are permitted to tripartite local appeal boards representing labour, management and the public, against decisions of National Service officers who may accept or reject the recommendations of an appeal board.

Employers may dismiss directed persons for serious misconduct but the worker may request that his case be reviewed by a local appeal board which may recommend that the National Service officer order his reinstatement. Employers are required to keep special records of all directed persons and to permit inspectors to see the records and visit the premises.

Record Increase of Women Workers in United States

According to *Victory Bulletin*, the official weekly of the Office of War Information, Washington, another 1,900,000 women not in jobs at June 1, 1943, are expected by the War Manpower Commission to be added to the labour force of the United States before the end of 1943. This duplicates last year's record increase in the number of women workers. The War Manpower Commission anticipates that a similar number of women, in addition to some 800,000 older men, handicapped workers and others not now in the labour market will swell the nation's working force by 2,700,000 during the calendar year 1943. This increase is in addition to replacements which will be supplied for men workers called up

by the armed forces. More than 160,000 women workers are already employed in the transportation industry.

A Census Bureau sample survey was cited as indicating that there are probably 4,000,000 women available and willing to take jobs, although these potential workers have been registered for war work and other essential jobs, in only a few of the major war industry cities.

The Director of the Women's Bureau, United States Department of Labor, has stated that a widespread assignment of women as counselors and personnel officials has resulted from the increase of women factory workers.

Reconstruction

Recommendations of Reconstruction Committee

Parliamentary Committee Urges Immediate Survey of Canada's Resources to Provide Post-war Employment

THE Special Committee of the House of Commons on Reconstruction and Re-establishment has presented an interim report to the House recommending that "certain definite, positive action should be taken immediately" in regard to the creation of post-war employment for the settlement of men and women released from the armed forces, the merchant navy, and war industry.

The report declares that the Government's "chief and most immediate duty" in the matter is "to make certain of the State's ability to maintain full employment immediately following the end of the war when industry is being re-organized for peacetime work, and when men and women are being discharged from the armed forces, and the merchant navy." The report recommends:

(1) An immediate survey of Canada's natural resources in order to ascertain their nature and extent in regard to post-war development;

(2) An inventory of national, provincial and municipal projects, to determine their usefulness, cost, materials and possibilities for employment;

(3) The taking by the Government of authority to finance—or assist in the financing of—better homes, in order to rehouse the people, and to eliminate "repulsive, unhealthy slum conditions."

(4) Amending of the Prairie Farm Rehabilitation Act so as to make its provisions available throughout Canada.

The Special Committee on Reconstruction and Rehabilitation was reconstituted for the current session of Parliament on March 2 (L.G., Mar., 1943, p. 308). Its interim report is contained in No. 23 of its Minutes of Proceedings and Evidence.

The text of the report is as follows:

Text of Report

1. Last session the Committee on Post-War Reconstruction and Re-establishment reported its strong belief that the most immediate reconstruction problem confronting Canada is

the creation of employment for and the proper settlement of men and women released from the armed forces, the merchant navy, and our war industries; and that the solution of this problem should be undertaken by the federal government, with the co-operation of provinces wherever possible or necessary.

2. Your Committee now feels that certain definite, positive action should be taken immediately, in order to make sure that the end of war will not catch us unprepared.

3. Your Committee recognizes that everything cannot be done at once. It realizes that some things, especially those of an international nature, must wait until the war is over. But other things can be done during the progress of the war; and your Committee feels strongly that these things that can be done should be taken in hand immediately.

4. Canada abounds in natural resources, in all its provinces and in the Yukon and Northwest Territories. The proper utilization of our resources will provide both employment and opportunities for colonization and industrial development, through flood control, irrigation, reforestation, conservation of water, the exploration of mineral and oil deposits, the development of water power, and the provision of highway and railway transportation where required by settlers or by industry.

5. Your Committee feels that a proper survey of Canada's natural resources should be undertaken now, in order to ascertain the nature and extent of such resources, their location with respect to existing transportation facilities, their suitability for the post-war requirements of the Canadian people, and for post-war industrial development and settlement, with the dual objective of—

- (a) providing useful employment for men and women now in the armed forces, the merchant navy, and our war industries, and
- (b) the promotion of a better balanced Canadian economy.

Your Committee has positive knowledge of many sound, useful, national, provincial and

municipal projects, involving flood control, power development, rural electrification, the provision of transportation facilities, and other projects some of them being of a self-liquidating character. Your Committee is of opinion that an inventory of all such projects, in all parts of Canada, should be put under way at once, so that the Government of Canada, the Canadian Parliament, and the various provincial governments may have complete information concerning:—

- (a) the usefulness of such project,
- (b) the cost and the financing thereof,
- (c) the materials used and the employment provided by the production of such materials,
- (d) the extent and nature of industrial, agricultural or mineral development and employment such projects will provide.

6. In many parts of Canada the rehousing of our people is an absolute post-war necessity. There are repulsive, unhealthy slum conditions in many of our cities, many of our towns and villages, and many of our rural farming areas. These slum conditions should be totally eliminated in the shortest possible time after the war. To make sure of this, authority should be taken by the Government to finance—or assist in the financing of—better homes for our people. In the opinion of your Committee the cost of home buildings, financed by or with the help of Government, and the payment for such buildings, should be related to the life thereof in terms of years, and should bear as low a rate of interest as possible.

7. In view of all the foregoing, your Committee recommends that the Canadian Government give immediate consideration to your Committee's strong opinion that the Government should take the necessary steps either by the establishment of some body, to be organized under ministerial responsibility, or otherwise to provide for the carrying out of works such as those contemplated in the preceding portions of this report. The chief and most immediate duty is to make certain of the State's ability to maintain full employment immediately following the end of the war when industry is being re-organized for peacetime work, and when men and women are being discharged from the armed forces, and the merchant navy.

8. Your Committee has given some study to the problems confronting the nation by reason of the various hardships that burden our farming population. This study is far from complete. We shall explore further the possibilities of greater uses for farm products

through chemical processes. Further study is needed also on the broad question of a new relationship between agriculture and government, and between agriculture and industry, and of the related question of extended and profitable markets both at home and abroad.

9. Our studies have convinced us, however, that in many respects Canada's agricultural life would be greatly improved if the general provisions of the Prairie Farm Rehabilitation Act could be applied to all of Canada. We, therefore, recommend that the Government consider the advisability of submitting to Parliament, legislation that will so amend the Prairie Farm Rehabilitation Act as to make its provisions available throughout Canada in the same manner as they now apply to certain parts of the three Prairie Provinces.

10. There are many problems of post-war reconstruction and re-establishment that your Committee have not yet been able to study adequately. In many ways, a new relationship must be built up between Government and industry, and within industry, between management and labour. We expect that before the session ends, evidence will be submitted to your Committee from the various Labour Unions operating in Canada, and from associations of industrial employers, so that we may have the benefit of a full knowledge of the viewpoint of capital and of organized labour with reference to those post-war problems which relate to industrial activities.

11. We have had representations from portions of Canadian industry with respect to some questions closely related to industrial operation, and to industry's ability to carry on at the end of the war. We expect further evidence along these lines which will enable us to form an opinion of the amount of time, if any, that will be lost in transferring industry from war to peacetime operation, and as to what action Government may take to help industry at that critical period.

12. The coal industry of Nova Scotia has been under critical review and recommendations with regard to that industry will be made in a later report; and it is expected to obtain evidence from other coal areas in Canada with particular reference to the possible use of coal in the manufacture of chemicals and dyes.

13. We have been told of some of the problems of the fishing industry. Your Committee will make a report with respect to this industry after we have had an opportunity of giving the matter further study.

14. Your Committee is anxious about the conditions that may confront the members of

the armed forces who will be engaged in the final, decisive struggles of the war. Among other things, they will be the last to reach demobilization and, therefore, the last to be absorbed into the industry of the post-war period. We desire to be of every possible help to the General Advisory Committee on Demobilization and Rehabilitation which has this problem actively in hand, and to co-operate with them in a joint effort to reach a solution of this vital problem.

15. Your Committee is strongly of opinion that every member of the armed forces and the merchant navy is entitled to be assured that Parliament and Government will be prepared to do what lies within their power to prevent any recurrence of mass unemployment in Canada. The actual, definite steps that must be taken to prevent mass unemployment permanently are matters of controversy upon which your Committee is not yet ready to make recommendations. We are convinced, however, that since human welfare is the supreme function of Government, Parliament and Government must at all times be prepared to make every effort to maintain full employment.

16. Your Committee recognizes that a great amount of work still lies ahead of it and submits this as an interim report for the purpose of placing before the Government these suggestions in order that immediate action may be taken with respect thereto.

17. When war is over, some other definite aim must take its place as a motivating cause of national economic activity. Thoughts of those who return to us from the field of battle and of the dependents of those who die, and of what they fought and died for, will supply the aim. Your Committee is certain that the means of doing so will be found in the conservation and proper utilization of our natural resources, and in the decision that markets will be sought for our production by governmental intervention where necessary from time to time. In this respect we welcome the conclusion arising from the United Nations Food Conference that never again will food be destroyed simply because people have not enough money to buy it.

All of which is respectfully submitted.

J. G. TURGEON,

Chairman.

United Nations Confer on Food and Agriculture

Prime Minister Reports to House of Commons—Plans for Meeting World Food Shortages After the War

THE Prime Minister, Right Honourable W. L. Mackenzie King, tabled in the House of Commons on June 14 the report of the united and associated nations conference on food and agriculture, which was held at Hot Springs, Virginia, from May 18 to June 3. Its purpose was to assist in freeing the peoples of the world from want, once the axis powers have been defeated.

The Prime Minister stated that: "a consideration of the problems discussed at the conference falls naturally into three parts: the objectives in quantity and quality to be set in the consumption of food; the production of foodstuffs to meet consumption needs; the better distribution of the produce of agriculture and of fisheries.

"The conference recognized that there had never been enough food produced in the world to maintain the health of all its peoples. The development of the science of nutrition has added greatly to the knowledge of the kinds of food needed to maintain health and efficiency. The nutrition experts who were gathered at the conference set the goals for the achievement of better standards of health, and indicated

various measures which might be taken to that end, particularly the provisions of protective and other nutritionally desirable foods. The problem to be faced was stated by the conference to be that of ensuring the production of the necessary food and having it made available to the consumer. The primary emphasis in all the studies made by the nutrition experts, and the basic conclusion of the conference itself was that the production of food must be increased if freedom from want is to be achieved.

"The conference gave attention to methods of increasing the supply of food by such means as raising the efficiency of production, the employment of additional land and labour, the conservation of resources, and the advantages to be derived, in certain cases, from international specialization

"It was recognized by the conference that the general welfare would be promoted by ensuring to the producers of food a reasonable return for their labour. The conference, therefore, considered special measures to increase the purchasing power of agriculturists generally

and particularly the purchasing power of the less advanced and less favoured peoples" Thus it (the conference) "was primarily concerned with agriculture, but it did not overlook the value, as foodstuffs, of fish and marine products. It recognized the importance of fish in the economy of many countries. It recommended that the general conclusions which it had reached, wherever appropriate, should apply to fish, and marine products"

Continuing the Prime Minister said: "The final act of the conference, the result of its deliberations, comprises a declaration and some thirty resolutions. In the first resolution, the conference recommends that all nations represented should set out in a formal declaration their individual obligation to their own people, and to one another, to collaborate in raising the levels of nutrition and standards of living of their peoples, and in improving the efficient production and distribution of agricultural products. It also recommends that they report to one another on the progress achieved. Other resolutions contain statements of principles and recommendations of policy for the short-term and the long-term period. The resolutions also dealt with the opening up of undeveloped areas suitable for settlement and food production, the fostering of desirable changes in the pattern of production designed to give greater emphasis to protective foods; the provision of agricultural credit; the advancement of co-operative societies and the improvement of marketing facilities. I need scarcely assure the house that all these recommendations will receive detailed study by the government.

"To facilitate collaboration among nations in this field of endeavour, the conference recommended that a permanent international organization on food and agriculture be established. It suggested that each government represented at the conference appoint a representative to an interim commission, the duty of which would be to carry out the recommendations of the conference and to prepare a specific plan for a permanent international organization on food and agriculture. The conference invited the President of the United States of America to arrange for the establishment of this interim commission, and for the calling of an early meeting.

"In recommending the functions of the proposed permanent organization, the conference followed closely the comprehensive agenda which had been fixed for its own deliberations. It also urged the interim commission to give consideration to the question of providing for

membership in the permanent organization of countries not represented at the conference. It recommended as well the association of the permanent organization with other institutions, which already exist, or which may be set up later, in the field of food and agriculture, and in related scientific, economic and other fields."

Action Against Inflation

Having drawn attention to the fundamental importance, in the approach to freedom from want of food, of policies to expand and quicken economic activity, the conference discussed the place and functions which might be given, within the framework of such policies, to international arrangements for the control of basic staple foodstuffs entering international trade. There was agreement that the objects of any such arrangements must be to eliminate excessive short-term movements in the prices of food and agricultural commodities, to mitigate general inflationary or deflationary movements and to facilitate adjustments in production which may be necessary to prevent economic dislocation.

The conference agreed that any such arrangements should include the effective representation of consumers as well as producers. It was not possible for the conference, in the time available, to discuss future international commodity arrangements in detail. Some of the discussion was directed to general questions of principle affecting the operation of such arrangements as might later be made. The two questions to which most attention was paid were:—

(a) The place which buffer stocks should occupy in these arrangements, and

(b) How far it would be necessary to achieve the desired objectives to include within the general arrangements agreements for the regulation of production.

The conference agreed that further international discussion of these questions ought to take place with a view to the setting up of broad principles to govern the formulation and operation of future commodity arrangements.

There was general agreement that whatever the nature of the arrangements eventually made for individual commodities, machinery would be needed for co-ordinating their operations in the light of the broad principles to be agreed upon.

Supply and Distribution

It was the consensus of the conference, however, as reported in its "Final Act and Section Reports" that "despite all efforts to increase production, supplies of essential food-stuffs and certain other agricultural and marine products and of the necessary instruments of production, such as fertilizers and machinery, and the means of international transportation will all be inadequate to meet basic requirements in the transition period, which may extend for several years after the cessation of hostilities.

"It is essential for the preservation of life to secure, through equitable distribution, the maximum advantage from such supplies as may be made available.

"It is in the interest of producers and consumers alike to avoid social and economic ills due to monopolistic practices or to violent fluctuations arising from unrestrained competition for inadequate supplies, in the prices of food, the instruments of production, and other necessities, including industrial goods.

"It is in the common interest of all that agricultural production be soundly re-established and expanded with all possible speed in countries now temporarily occupied by the enemy as soon as they have been liberated.

"These objectives can be achieved only by the concerted action of governments in the stimulation of production and in the allocation of supplies."

After carefully considering the information submitted to it on consumption deficiencies and the relation of food to health throughout the world the conference declared:

"That the first essential of a decent standard of living is the provision to all men of those primary necessities which are required to promote freedom from disease, and for the attainment of good health.

"That the most fundamental of these necessities is adequate food which should be placed within the reach of all men in all lands within the shortest possible time.

"That ample evidence has been presented revealing the existence of malnutrition in every country, with its inevitable consequences of preventable ill-health."

It was recommended that the several governments represented should undertake at once

to ascertain the prevalence of deficiency diseases among their respective peoples, and to take dietary and therapeutic measures to correct and prevent their recurrence.

Dietary Standards

Dietary habits and conditions vary widely in different parts of the world and the adoption of one world-wide standard diet is not possible. For example, in most English speaking countries cow's milk is considered to be a first essential in any well balanced diet, whereas in China the use of cow's milk is practically unknown. Climate, too, influences dietary habits. Peoples living in the tropics require different foods from those in the polar and even the temperate regions. It was necessary, however, to determine dietary standards which were based on the best scientific evidence, in order to arrive at a reasonable decision as to the food requirements of the several countries. It might, therefore, be necessary to take measures to see that special "vulnerable groups" of the population such as pregnant and nursing women, infants, pre-school and school children, adolescents and individuals in low-income brackets, should be provided with special foods to assure their health and well-being. In the process of time the general dietary standards could be raised to meet at least the minimum requirements.

A suggested daily diet for optimum nutrition for an adult according to North American standards follows:

Ten ounces of grain products such as bread and cereals.

Slightly more than a pint of milk.

A half-pound of starch-rich vegetables such as potatoes and yams.

Slightly more than one ounce of leguminous vegetables such as peas and beans.

Four ounces of such vitamin-rich products as citrus fruits and tomatoes.

Four ounces of leafy green and yellow vegetables.

Six ounces of other vegetables and fruits.

Five ounces of meat, fish or poultry.

Three ounces of butter and other fats.

Two ounces of sugar.

Three eggs (every two days).

League of Nations Lists Economic and Social Goals

THE League of Nations has recently published the first part of the report of its Delegation on Economic Depressions. The report bears the title "The Transition from War to Peace Economy", and a summary appears in the July issue of the *International Labour Review*. It contains a study of the objectives of economic policy, constituting economic and social goals for mankind which are condensed into seven points as follows:—

1. That the fullest possible use is made of the resources of production, human and material, of the skill and enterprise of the individual, of available scientific discoveries and inventions so as to attain and maintain in all countries a stable economy and rising standards of living.

2. That, in so far as possible, no man or woman able and willing to work should be unable to obtain employment for periods of time longer than is needed to transfer from one occupation to another or, when necessary, to acquire a new skill.

3. That in the use of these productive resources, the provision of goods and services to meet the essential physiological needs of all classes of the population in food, clothing, house room and medical care, is a prime consideration.

4. That society distribute, as far as possible, the risk to the individual from interruption or reduction of earning power.

5. That the liberty of each individual to choose his own occupation is respected and is promoted by equal educational opportunities.

6. That the liberty of each country to share in the markets of the world and thus obtain access to raw materials and manufactured goods bought and sold on those markets is promoted by the progressive removal of obstructions to trade.

7. That the benefits of modern methods of production are made available to all peoples both by the progressive removal of obstructions to trade and by courageous international measures of reconstruction and development.

Coal for the Fifth War Winter in Great Britain

In discussing the fuel situation for the coming winter in Great Britain, the Minister of Fuel and Power made it clear that "the vast majority" of British coal miners were "pulling their weight" in the production of coal. He suggested, however, that mine managements might make more effective use of pit production committees, which have proved a valuable agency in the operation of the mines.

The Minister outlined the means by which a prospective shortage of about 11,000,000 tons that had confronted the country in the autumn of 1942 had been overcome. To meet that situation the Minister had budgeted for 3,000,000 tons by increased production and called for savings of 8,000,000 tons in economies in industrial and domestic consumption. Actually the extra production reached 5,200,000 tons and there had been a saving of 11,000,000 tons by economy in consumption. It was freely admitted however, that the comparatively mild winter in Britain in 1942-43 had helped measurably to make these economies possible, but there could be no assurance that the coming winter would be equally favourable.

Promising factors were to be found in the fact that "the labour position of the industry" was almost as good as it was in the summer

of 1942; that annual wastage was being reduced; that the miners were working more shifts than during the pre-war years; that the output per shift had increased; and that the downward trend of production had been reversed.

On the other hand, less favourable elements in the situation must be taken into account and counteracted as far as possible. In the first place it should be remembered that "mining is probably the hardest physical toil of all" and that the industry had "suffered grievous losses in the younger groups...so that more than twenty per cent of the mineworkers to-day are over 50 years of age." Then, too, "in any one week there are 50,000 miners who did not work as a result of sickness or injury and that the number of absences of three days or more reported each year is between 150,000 and 160,000." The high rate of occupational injury or sickness was declared to be the most important cause of absenteeism. The Minister urged that it was important that every effort should be made to reduce avoidable absenteeism. "If it were reduced by one-half it would mean an additional 4,000,000 tons of coal per annum."

Industrial Welfare

Recreation for War Workers

IN order to determine the extent to which organized labour, welfare and kindred organizations are interested in the provision of recreation for workers, the Honourable Humphrey Mitchell called an Advisory Conference in Ottawa in April, 1943.

Among the 49 delegates to this conference were representatives of churches, organized labour, educational groups, social agencies, etc., who, with the wide range of other interests present, indicated the tremendous interest existing with regard to recreation for workers.

It was the unanimous opinion of all present that the provision of recreation for war workers is a necessity which should be undertaken under direction of or with the co-operation of the Federal Department of Labour, co-operating with local agencies who have already devoted some time to working with the problem.

As a result of this conference and further discussion between members of the Department of Labour and the Minister, an Order in Council was passed on the 8th of June giving approval of Government co-operation in this respect. The Minister of Labour has authorized Mrs. Rex Eaton, Assistant Director of National Selective Service, to formulate plans as set forth in the Order and to carry out the same.

Following is the text of the Order in Council, P.C. 4703:

Whereas the Minister of Labour reports:

(1) That the provision of recreational facilities for war workers will tend to improve morale and increase efficiency;

(2) That the provision of such facilities should normally be a local or community responsibility;

(3) That, in consideration of the increase of population in certain centres of war production, it is nevertheless advisable for the provincial governments and the Dominion Government to accept a certain measure of responsibility in this connection.

Therefore His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, concurred in by the National Selective Service Advisory Board, and under authority of the War Measures Act, Chapter 206 of the Revised Statutes of Canada, 1927, is pleased to order and doth hereby order as follows,—

1. It shall be the duty of the Director of National Selective Service to make every effort to negotiate agreements with provinces or municipalities with respect to the provision of recreational facilities for war workers.

2. Subject to the approval of the Governor General in Council the Minister of Labour may enter into agreements, pursuant to section one of this Order, providing for an equitable sharing of costs by the Dominion.

3. All expenses and costs incurred by the Minister of Labour in connection with the administration of this Order, and measures deemed necessary, including publicity to give effect to the provisions of this Order, shall be paid out of monies appropriated by Parliament to carry out measures deemed necessary in consequence of the existence of the state of war, and an immediate initial appropriation of \$40,000 shall be made and placed at the disposal of the Minister of Labour for such purposes.

Nutritious Foods for Industrial Workers

THE Health League of Canada is actively promoting the idea that adequate, nourishing food and well-balanced meals, served in a sanitary manner in wholesome surroundings, builds up morale and makes for the greater efficiency of industrial workers. The League points out that surveys show that over half the industries of Canada are not taking advantage of the morale- and health-building effects resulting from helping workers

to be well fed. It is asserted that this situation is partly due to hesitation about "plunging unguided into a complicated field," in spite of the fact that "many Canadian workers are literally underfed" and that "sickness and absenteeism are the penalties of malnutrition."

To counter this objection, the League has undertaken to provide the necessary education in nutrition along much the same lines instituted for war industries in 1941 by the Nutri-

tion Services of the Department of Pensions and National Health. (L.G., Nov. 1941, p. 1340.)

The educational material issued by the Health League is designed to reach the employee in the factory and the housewife at home. It consists of educational posters on nutrition, pay envelope inserts for employees, economical menus and recipes for the housewife and supplementary data on nutrition to be issued periodically.

These are furnished to employers at cost for distribution among their workers. The series of posters are well printed and attractively illustrated and are to be posted in suitable places in factories and other industrial plants. The other literature is designed for use in the homes of workers.

It is pointed out that one of the most effective ways of improving the eating habits of employees is to provide food supervision at the plants. This can be done by operating a cafeteria, lunch counter or snack bar—or even by serving box lunches. In Britain every factory with more than 250 employees provides adequate food facilities in the plant, employs trained cooks, and serves nutritious meals from available foods. This service has resulted in a preference by workers for wholesome, nutritious meals, not only on the job, but in their homes.

It is suggested that the following factors be kept in mind by employers when considering the advisability of starting a cafeteria. (1) Lack of good restaurant facilities outside the plant. (2) High charges for food outside the plant. (3) Undesirable neighbourhood. (4) Short lunch period. (5) Large number of employees. (6) Continuous shift operation and inadequate transportation facilities.

It has been found that cafeteria service in plants employing 300 or more workers is practical, if the meals and prices are planned to appeal consistently to at least 150 persons. A practical dietitian, assisted by a chef or cook, should be employed to supervise the cafeteria and additional personnel will be determined by the size of the plant. The general management may be handled by a concessionaire or by the company. Some companies organize committees elected by the workers themselves to consult with the management, thus securing greater co-operation. It should be remembered too, that most industrial firms have found it necessary to subsidize the cafeteria in order to provide meals at costs within the means of their workers. This yearly subsidy in the average 500-employee plant is about \$7,000 or roughly five cents for each meal served.

The cost of cafeteria equipment in the average 500-employee plant is given as approximately \$12,000—based on minimum needs; for a 400-employee plant about \$10,000 and for a 300-employee plant about \$8,000. The cost of setting up a lunch counter service for 300 employees is about \$3,000.

The practice of serving a light snack during rest periods or between shifts is now widely accepted. Food may be served from a snack bar built on wheels for convenience in reaching different portions of the plant, or it may be sold at permanent locations in the plant. In either case the food offered for sale should be carefully selected with the object of providing nutritious food at reasonable prices. The equipment for a snack service is relatively inexpensive.

Proposed Plan of Medical and Nursing Services for Industrial Workers

Health League of Canada Survey of Absence due to Illness in Wartime Industry

FOLLOWING a study of several months into the problem of reducing the heavy cost of absence due to sickness in wartime industry, the Industrial Division of the Health League of Canada has formulated a plan for providing health education and medical supervision in Canadian industrial plants. The study was carried out by a committee of leading industrialists, together with a number of public health officials and technical experts, and has had the cordial approval of the Department of Pensions and National Health.

The suggested medical services involve pre-employment physical examination, periodic physical examination, emergency and first aid facilities, advice to employees suffering from non-industrial illness while at work, education of employees in accident prevention and personal hygiene, elimination or control of health hazards, adequate medical records filed by medical department, supervision of plant sanitation and the use of approved local hospitals. It is also urged that these services be carried out in full co-operation with the

plant management in all cases, as well as with the worker's family physician.

It is pointed out that a trained nurse, especially one with public health experience, is also essential to the health program. In plants employing 300 and over it was recommended there should be one full time nurse and an additional nurse for each 500 increase in the number of workers. It is not considered economical for plants with less than 300 workers to employ a full time nurse. In such cases, a co-operative nursing system for small plants is already being developed in some areas. Graduate nurses make visits to several small plants each day. Their duties include giving new employees advice on personal hygiene and accident prevention. They go through the plants, get to know employees, and do necessary surgical dressings. Under such a plan one nurse can serve two or three plants of 100 employees, or four plants employing not more than 60 each. The supervision of food served at a lunch counter or snack bar can also be included in the nurse's duties. The approximate cost of a nursing service of this type is given as \$2 per hour.

Basic equipment such as a first aid room and doctor's office, an adjoining room with cubicles for preparation for physical examinations and a waiting room. Large plants often have separate waiting rooms for men and women and a nurse's dressing room is an added convenience. Factors regarded as of major importance are quietness, good ventilation, adequate heating, toilet facilities, hot and cold running water and proper lighting. The dispensary equipment would vary naturally with the size of the plant, but should be provided with

essential medical instruments, furniture and supplies.

An elaborate portfolio of graphic posters, pay envelope inserts, and circulars giving data on the prevention of sickness has been prepared and is available at cost to employers of labour. This literature is intended for distribution by employers to their employees to impress workers and their families of the great importance of the health of the individual in the national economy. A descriptive folder points out that the average earner loses at least nine days each year due to illness. That is an aggregate of approximately 3,000,000 man days a month for Canadian industrial workers, a very serious loss, especially in wartime.

In addition to the educational campaign among workers, the Health League is promoting among employers the importance and the necessity of providing medical inspection and nursing services in industrial plants. With this has been associated a campaign for improved sanitary conditions in plants and in plant cafeterias. The nutrition services of the Department of Pensions and National Health is lending active assistance in efforts to assure workers well balanced meals served in wholesome surroundings at reasonable cost in plant restaurants and cafeterias.

Plant surveys show that a factory health program costs from \$5 to \$10 per worker per year. It is asserted that "savings are almost double the cost". (The National Association of Manufacturers in the United States, following a survey of 2,064 industrial firms has computed the average saving in a 500-employee plant in the United States at \$5,611 per year.) (L.G., January, 1943, p. 11.)

Prevention of Weight-Lifting Injuries in the United States

A BULLETIN entitled *A Guide to the Prevention of Weight-Lifting Injuries*, was recently issued by the Division of Labour Standards of the United States Department of Labour as Special Bulletin 11 in a series published by the Department on important problems of working conditions and war production. Two recent bulletins—*Controlling Absenteeism* and *Safety Speeds Production*—were summarized in the LABOUR GAZETTE, June, 1943, p. 759.

Material handling, it is pointed out, has long been the foremost source of work injuries in manufacturing, and strains, sprains and hernias incurred in manual lifting and carrying loom large among such injuries. The influx into war production of untrained workers, many of them women, older men and youths who are unused

to heavy work, has increased the danger of this type of accident in wartime. That such accidents are a serious cause of time-loss is indicated by the fact that one important industrial state reports that back strain has resulted in an average time-loss of 19 weeks and another state reports the average length of disability for all strains due to lifting as 7.2 weeks.

The bulletin begins with an analysis of the causes of weight-lifting accidents, and then proceeds to outline certain basic principles for their avoidance. These include good planning by management in the use of mechanical lifting and conveying devices and in controlling the amount, pace and duration of manual lifting and carrying, the proper selection of workers in safe lifting and carrying practices.

Numerous photographs and diagrams illustrate the practical application of these principles.

As a general guide, in fixing limits to the weights workers may be required to lift, it is recommended that consideration be given to fifty pounds in compact form for male workers and to twenty-five pounds in compact form for female workers. "It is essential that workers engaged in continuous lifting and carrying of

weights be given 'break' periods—periods free from strenuous physical exertion."

The bulletin was prepared under the guidance of a technical advisory committee, consisting of representatives of the Ford Motor Company, General Motors, the United Aircraft Corporation, Westinghouse, Ohio Crankshaft, the U.S. Public Health Service and the U.S. Department of Labour.

Importance of Proper Seats and Good Posture for Women Workers

THE relation between good posture and the efficiency of women in industry is pointed out in a recent pamphlet* published by the Women's Bureau of the United States Department of Labour. Poor posture caused by continuous standing or improperly adjusted seats is one of the factors producing fatigue which leads to reduced output, increased spoilage and accidents. The harmful effects of continuous standing on the health of women workers are indicated by figures showing a much higher incidence of varicose veins among women than men. Cases are described where output increased appreciably when women workers were provided with seats.

Each job should be studied to determine whether it can be done seated and to discover the best arrangement of work-bench and seat, the pamphlet recommends. "Re-arrangement of work material, readjustment

of seats, or planning of special types of seats can make it possible to provide seating at almost any factory job on which women may be employed." Conveyors can bring work to seated workers and sliding seats have been devised for those working at several machines.

It is considered that the best arrangement of work is one which permits alternating between sitting and standing, but if this is not possible, rest periods should be introduced in which the worker can change her position. Seats should be adjusted to the individual and should meet certain minimum requirements which are laid down in the pamphlet. In addition proper illumination must be provided if good posture is to be developed, and workers should be instructed in good posture habits.

A list of references on industrial seating and posture is given, and the pamphlet contains illustrations of satisfactory seats for workers manufactured out of wood due to wartime metal shortages.

* Special Bulletin No 10, "Women's Effective War Work Requires Good Posture". Washington, 1943. Price 5 cents.

Labour Conditions in War Contracts in Canada, Great Britain, and the United States

IN September 1941, a meeting of Canadian and United States Government officials and representatives of employers and workers was held in New York, under the auspices of the International Labour Office. At that conference special consideration was given to the problem of preventing rival bidders for Government contracts cutting costs by reducing wages, or economizing in other ways at the expense of labour. A brochure based on a study of the subject in Canada, Great Britain and the United States by the I.L.O. was presented to the conference under the title "Labour Conditions in War Contracts". This was brought up-to-date in February, 1942, and a second enlarged revision was issued in June which contains information received up to May 1, 1943.

In the introduction to the study it is pointed out that in many other countries, as well as in the three countries under review, it is an accepted factor in public policy to require manufacturers of government supplies and contractors engaged in government construction work to maintain proper standards of wages, hours and working conditions. According to United States administrative officials, such stipulations in government contracts have benefited three groups: (1) the workers engaged directly in the performance of work on government contracts; (2) other labour engaged in similar employments, since the standards for government work tend to become general; and (3) employers who customarily maintain equitable standards and who formerly were adversely affected by the com-

petition of firms observing lower working standards.

It is emphasized that in ordinary times the direct influence of such provisions in government contracts is probably relatively limited, since there are few industries in which government purchases form a sufficiently large proportion of the total output to influence general conditions and practices to any great extent. But in time of war, government industries and constructional activities expand enormously and the character and terms of government contracts tend to have a correspondingly important bearing on the practices of manufacturers and contractors in general. It is considered that the acceptance by governments of this responsibility and the effective enforcement of fair conditions, whether by special rules applying to contractors, or by some more general type of regulation, do much to prevent labour unrest and work stoppages and the consequent holding up of the flow of essential supplies.

A great deal has been done in Canada, Great Britain and the United States to formulate and apply policies to achieve this end. In Great Britain, for example, a Fair Wages Clause has figured in all government contracts since 1891. The clause requires the observance of recognized wages and hours;

but these wages and hours are not themselves specified in the contract.

In Canada and the United States, on the other hand, specific minimum rates of wages and maximum normal hours of work which must be observed, are set out in detail in certain classes of contracts, or are prescribed for all contracts in certain industries. In both countries the problems of wartime labour policy have been complicated by the division of authority between Federal and provincial or state governments. In the United States, for example, though none of the Federal labour laws prohibit continuous operation or shift work, or sets a rigid limit to the number of hours which may be worked in any week, there are a number of state laws which prohibit Sunday work, or the employment of women at night, or the employment of any worker for more than 48 hours in one week. In Canada, the limited range of federal authority before the war made it necessary to insert special labour clauses in government contracts.

The brochure provides an interesting digest of the procedures followed in each of the three countries with respect to the labour problems inherent in the placement of government wartime contracts.

Off-the-Job Accidents Reduce War Manpower

“STATISTICAL BULLETIN,” published by the Metropolitan Life Insurance Company, is authority for the statement that “at least three workers in the country at large are killed in off-the-job accidents for every two that are fatally injured while on the job.” These conclusions were reached following a statistical study of several thousand cases of industrial life insurance claims.

Even before the war manpower shortage had become acute, many safety-conscious employers were aware of this off-the-job wastage, and many of them had designed their accident prevention programs to extend beyond their plant boundaries. National and local organizations, too, were making efforts to prevent “after-the-whistle-blows” accidents on the highway, in the home and in recreational centres.

It is asserted that for many industries and occupations, the ratio of workers killed in non-occupational to those killed in occupational accidents is greater than three to two. However, in times of great industrial activity, such presumably as the present, the proportion of industrial accidents would probably be higher, and in some instances much higher than in normal times.

On the other hand, in certain occupations,

such, for example, as that of store clerks, office workers, or printers, occupational accidents account for less than ten per cent of all accidental deaths. It would seem, therefore, that workers in these and similar occupations are safer at work than after hours, in so far as fatal accidents are concerned. To a lesser degree this is claimed to be true of such tradesmen as machinists, carpenters and iron and steel mill workers, whose employment is subject to considerable hazards.

It was found that it is only in the definitely hazardous occupations that fewer workers are killed off the job than during work. The occupation with the greatest hazard reported in this study was electric light and power linemen for which more than six times as many occupational as non-occupational accidents were reported; coal miners had 2½ times as many, while among structural iron workers and railway trainmen the ratio was two to one.

In the interest of the war effort it was indicated that safety engineers, and employers should make off-the-job safety an integral part of their safety programs. It is considered essential, too, that workers should co-operate fully in checking and reducing this wastage of manpower.

National War Labour Board

Revision of Cost-of-Living Bonus for Construction Industry

THE National War Labour Board issued a finding and direction, effective June 1, 1943, on the application of the National Joint Conference Board of the Construction Industry. This direction was the result of resolutions passed unanimously at the May 3, meeting of the Conference Board. These resolutions recommended a minimum bonus of \$2.25 per week, to be mandatory instead of permissive, and to remain in effect for one year.

The finding and direction of the National War Labour Board approved this principle, the major exception being that apprentices and others under 21 years of age should receive 9 per cent of their weekly earnings. For periods of less than a week the bonus will be on a pro rata basis.

Those workers already receiving more than \$2.25 per week as a cost of living bonus will not be affected, and the Order does not affect the basic wage. The following is the text of the Board's finding and direction:

Finding

The National War Labour Board finds that the National Joint Conference Board of the Construction Industry, representative of both employers and employees, at its meeting held in Ottawa on Monday, May 3, 1943, unanimously approved the following Resolution:

"The meeting noted the recommendations that had been considered by the Regional War Labour Boards concerning the amount and adjustment of cost of living bonus for the construction industry, and approved the proposal that those manual workers in the construction industry who have not received, pursuant to the provisions of E.M. No. 4, a cost of living bonus of five cents per hour or its equivalent should have their present bonus increased as from a date hereunder proposed, to an amount calculated on the increase in the cost of living index from April 1, 1941, to February 1, 1943, or thereabouts, and amounting to approximately \$2.07½ per week. This amount is to be paid on a weekly basis in accordance with the provisions of Section 38(2) of P.C. 5963. Those manual workers in the industry who pursuant to the provisions of E.M. No. 4, have received a cost of living bonus of 5 cents per hour or more, should continue to be paid such bonus as is now in effect on the condition that it be paid with respect to standard working hours only.

"When permissive decisions have been made it is desired that these and other decisions affecting cost of living bonuses should be made mandatory.

84545—3½

"It is understood that the acceptance of the wage rates in effect on April 1, 1941, or in fact at any date, as a base from which cost of living bonus should be paid or computed, or the amount of cost of living bonus itself, shall not prejudice the right of either employers or employees to contend as to the extent, if any, to which such rates reflected or reflect increase in living costs occurring since August, 1939.

"It is contemplated that employers and employees shall not be precluded from making application for adjustment of the base wage rates in such cases as it can be shown that the wage rates in any trade in any locality are 'low' within the meaning of the provisions of P.C. 5963. It is anticipated, however, in view of the provisions of the resolution and recommendation adopted by the National Joint Conference Board of the Construction Industry, (as referred to in E.M. No. 4) and having regard to the time which has since elapsed, also changes in conditions which have since occurred, that any application to justify approval of any increase in basic wage rates would necessarily have to show exceptional conditions.

"Concerning the date of adjustment of bonus awards, it is agreed that the first payroll period beginning on or after May 15th should be set as the date at which the annual adjustment of the cost of living bonus for all manual trades in the construction industry should be made.

"Those employees who would receive an increase under the above noted proposed adjustment with respect to the amount of the cost of living bonus would receive such increase commencing May 15th, 1943. In regard to those cost of living bonus awards made pursuant to E.M. No. 4 and amounting to five cents per hour or more, those which expire before May 15, 1943, would be extended to this latter date while those expiring after May 15, 1943, would be extended to May 15, 1944."

In Section 46 of Order in Council, P.C. 5963, it is provided:

"(1) The National Board, may, with respect to any employer or employee, or any class of employers or employees, direct that any increase or decrease in a cost of living bonus or that the commencement of the payment thereof be made at a time and in respect of intervals other than those specified in Sections 34.

"(2) No direction may be made under this Section by a Regional Board."

It would be fair and reasonable that the amount of cost of living bonus should be adjusted as provided in the Resolution of the National Joint Conference Board of the Construction Industry, as quoted herein, and under the stated conditions applicable thereto, except that;

- (i) the amount of such cost of living bonus shall be calculated on the rise in the adjusted cost of living index number from the month of April, 1941, (107.7) to the adjusted cost of living index number for the month of April, 1943, (116.7) and

- (ii) manual workers in the construction industry who, by authority of Findings and Directions issued by a Regional War Labour Board, are receiving cost of living bonus of more than five cents per hour shall continue to be paid the existing rate of bonus on the condition that such bonus shall be paid only with respect to normal working hours.

Direction

The National War Labour Board, under the power conferred upon it by Section 46 of Order in Council, P.C. 5963, orders that the provisions of the above mentioned Resolution of the National Joint Conference Board of the Construction Industry shall be made effective by employers in the construction industry for their manual workers with effect from June 1, 1943, except that the amount of cost of living bonus to be paid shall be calculated on the rise in the adjusted cost of living index number from the month of April, 1941, (107.7) to the adjusted cost of living index number for the month of April, 1943, (116.7) amounting to a cost of living bonus of two dollars and twenty-five (\$2.25) cents per week to employees to whom Section 48 (iii) (a) of the Wartime Wages Control Order, P.C. 5963, applies, and of nine (9%) per cent of their weekly wage rates to employees to whom Section 48 (iii) (b) of the

Order applies; the payment of such weekly amount of cost of living bonus where less than the normal number of working hours in the week, not including overtime, are worked to be made proportionately in accordance with Section 38 (2) of P.C. 5963, which reads:

Where an employee works less than the normal number of working hours in a week, not including overtime, the cost of living bonus paid to him in respect of such week shall be that proportion of the cost of living bonus payable with respect to the whole of such week which the number of hours, not including overtime, he actually worked, is to the normal number of working hours in the week.

In cases in which manual workers are receiving amounts of cost of living bonus of more than five cents per hour by authority of Findings and Directions issued by a Regional War Labour Board, such amounts of bonus shall be maintained and continued in effect, provided that the bonus shall be paid only in respect of normal working hours, as provided by Section 38 (2) of P.C. 5963.

Payment of cost of living bonus in amounts as provided herein shall be maintained and continued in effect until May 15, 1944, subject to such adjustment, if any, as pursuant to the terms of P.C. 5963, may be determined to be effective from that date.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published month by month in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1942 will be found on page 949.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Recent Proceedings under the Industrial Disputes Investigation Act

IN the month of June, three Boards of Conciliation and Investigation submitted their reports in connection with the following disputes:—

(1) Between the Allison Logging Company, Ltd., the Kelley Logging Company, Ltd., J. R. Morgan Ltd., and Pacific Mills, Ltd., all of Queen Charlotte Islands, B.C., and their employees, members of Local 1-71, United Woodworkers of America.

(2) Between the Canadian Car and Foundry Company, Ltd., Brantford, Ont., and its employees, members of Local 397, United Automobile Workers of America.

(3) Between Defence Industries Ltd., Brownsburg, P.Q., and its employees, members

of the Munitions Workers' Federal Union (T. & L.C.)

The texts of the reports of the Boards will be found at the conclusion of this statement.

Applications Received

During the month of June, 12 applications* for the establishment of Boards of Conciliation and Investigation under the provision of

* By P.C. 5963, the National and Regional War Labour Boards are specifically charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

the Industrial Disputes Investigation Act were received in the Department of Labour as follows:—

(1) From employees of the Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., members of Circo Employees Association. The dispute, which concerns union recognition and the negotiation of a collective labour agreement, was said by the applicants to affect 1,000 employees directly and 200 indirectly. On June 10, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(2) From employees of the Collingwood Shipyards, Limited, Collingwood, Ontario, members of Local 4, Industrial Union of Marine and Shipbuilding Workers of Canada. Nine hundred employees were said by applicants to be directly affected in the dispute, which developed out of a request for the negotiation of a collective labour agreement.

(3) From employees of West Coast Shipbuilders, Limited, and Hamilton Bridge (Western), Limited, Vancouver, B.C., members of the following trade unions: Local No. 1, Boilermakers and Iron Shipbuilders Union of Canada; Local No. 2, Dock and Shipyard Workers' Union of Vancouver and District; Lodge No. 692, International Association of Machinists; Local No. 115, International Union of Operating Engineers; Local No. 1, Amalgamated Building Workers of Canada; Local No. 2, Amalgamated Shipwrights, Joiners, Boat Builders and Caulkers; Local No. 170, United Association of Journeymen, Plumbers and Steam Fitters of United States and Canada; and Local No. 3, Amalgamated Electrical Workers. The disputes concern the inclusion of a closed shop clause in agreements with the employing companies, and were said by the applicants to affect 4,134 employees. On June 15, Mr. G. R. Currie, Industrial Relations Officer, Dominion Department of Labour, Vancouver, B.C., was appointed as Industrial Disputes Inquiry Commissioner to investigate the dispute. In his report received on June 24, the Commissioner stated that he had been unable to effect a settlement of the disputes and recommended that a Board of Conciliation and Investigation be established. Accordingly, the Board was established by the Minister of Labour on June 28, and Mr. H. W. Herridge, M.L.A., Nakusp, B.C., was appointed a member of the Board on the nomination of the employees. At the end of the month the employing companies had been requested to submit their nomination of a person to be appointed to the Board.

(4) From employees of the Aluminum Company of Canada, Limited, La Tuque, P.Q., members of Local 23435, International Union of Aluminum Workers (A.F. of L.). The dispute, which was said to affect 600 employees, concerns union recognition and the negotiation of a collective labour agreement.

(5) From employees of the Canadian Automotive Trim, Limited, Windsor, Ontario, members of Local 195, United Automobile Workers of America. The dispute, which concerns the negotiation of a collective labour agreement, was said by the applicants to affect 206 employees. On June 28, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ontario, was authorized as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

(6) From employees of Maranda and Labrecque, Limited, Quebec, P.Q., members of Local No. 170, International Union of Dyers and Finishers. The dispute, which arose out of the employees' request for union recognition and the negotiation of a collective labour agreement, was said to affect 41 employees directly and 49 indirectly. During May, the employees had gone on strike. On June 26, following the receipt of the application for a Board of Conciliation and Investigation, Mr. Frank Lafortune, Industrial Relations Officer, Dominion Department of Labour, Ottawa, who was in Quebec City, was requested to investigate.

(7) From employees of Leavens Brothers Training, Limited, London, Ontario, members of Unit No. 5, Canadian Aircraft Workers' Association (C.C.L.). The dispute, which was said by the applicants to affect 250 employees, concerned the dismissal of one employee. The application was returned for revision and at the end of the month had not been re-submitted.

(8) From employees in the Dining and Sleeping Car Service of the Canadian National Railways, Montreal, P.Q., members of the Canadian Brotherhood of Railway Employees and Other Transport Workers. The dispute, which developed out of a request to open negotiations for a revision of the schedule governing wages and working conditions, was said by the applicants to affect 2,100 employees.

(9) From employees of the North American Cyanamid Company, Limited, Niagara Falls, Ontario, members of Local 175, United Gas, Coke and Chemical Workers of America. The dispute, which concerns the negotiation of a collective labour agreement, was said to affect 700 employees directly and 950 indirectly.

(10) From employees of the Peck Rolling Mills, Limited, Montreal, P.Q., members of Local 2174, United Steelworkers of America. The dispute, which was said by the applicants to affect 201 employees, concerns the negotiation of a collective labour agreement.

(11) From employees of Central Aircraft, Limited, London, Ontario, members of Central Aircraft Workers' Association, Unit 2 of the Canadian Aircraft Workers' Association (C.C.L.). The dispute, which concerns the negotiation of a collective labour agreement, was said to affect 1,150 employees directly and 400 indirectly.

(12) From employees of the Dominion Textile Company, Limited, (General Machine Shop and Merchants Branches) Montreal, P.Q., members of Local 102, United Textile Workers of America. The dispute, which was said by the applicants to affect 966 employees, concerns the negotiation of a collective labour agreement.

Boards Established

On June 8, a Board of Conciliation and Investigation was established to deal with a dispute between the Burgess Battery Company, Niagara Falls, Ontario, and its employees, members of the United Gas, Coke and Chemical Workers of America (L.G., March, 1943, p. 324). On June 7, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ontario, who was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, recommended that a Board of Conciliation and Investigation be established as he had been unable to bring about a mutually satisfactory settlement of the dispute. The personnel of the Board is as follows: His Honour Judge Ian M. Macdonell, Toronto, Ontario, chairman, appointed on the joint recommendation of the other two members; Colonel Hugh A. Rose, K.C., Welland, Ontario, and Mr. Drummond Wren, Toronto, Ontario, appointed on the nomination of the employer and employees respectively.

A Board of Conciliation and Investigation was established to deal with a dispute between Canadian Furnace Limited, Port Colborne, Ontario, and its employees, members of Local No. 1177, United Steelworkers of America, (L.G., May, 1943, p. 598). Following the receipt of the application for the establishment of a Board, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ontario, was authorized as Industrial Disputes Inquiry Commissioner to make an investigation. The Commissioner reported that the circumstances warranted the establishment of a board and

recommended accordingly. The personnel of the board is as follows: His Honour Judge A. J. Gordon, Windsor, Ontario, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the board; Messrs. J. J. Robinette, Toronto, Ontario, and Maxwell Sauder, Hamilton, Ontario, appointed on the nomination of the employer and employees respectively.

On June 16, a Board of Conciliation and Investigation was established to deal with a dispute between the Canadian National Railways (Work Equipment Department), Winnipeg, Manitoba, and its employees, members of Divisions 142 and 226, Canadian Brotherhood of Railway Employees and Other Transport Workers (L.G., June, 1943, p. 765). On May 24, Mr. Bernard Wilson, Industrial Relations Officer, Dominion Department of Labour, Ottawa, Ont., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner's report received on June 15, recommended the establishment of a board. Mr. William J. Waines, Winnipeg, Man., was appointed on the nomination of the employees, but on June 22, he advised the department that owing to previous commitments he would be unable to accept the appointment. Subsequently on further nomination of the applicants, Mr. John E. L. Graham, Winnipeg, Man., was appointed a member of the board. Mr. Frederick T. Collins, K.C., Montreal, P.Q., was appointed a member of the board on the nomination of the employer and at the end of the month the two members were conferring with a view to making a joint recommendation of a person to act as third member and chairman of the Board.

On June 21, a Board of Conciliation and Investigation was established to deal with a dispute between Atlas Steels, Limited, Welland, Ont., and its employees members of Local 525, United Electrical, Radio and Machine Workers of America (L.G., June, 1943, p. 762). Following receipt of the application for the establishment of a board Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was authorized as an Industrial Disputes Inquiry Commissioner to investigate the dispute. On June 16, a vote was taken to determine the bargaining agency of the employees which resulted in favour of the applicant union. Subsequently the Commissioner reported that he had been unable to effect a mutually satisfactory settlement of the dispute and recommended that a board be established. The National vice-president of the organization concerned advised the

department on June 25 that the union had made an application under the provisions of the Ontario Collective Bargaining Act for certification as the bargaining agency of the employees of the Company, and until the decision of the Labour Court is made, he requested that the Department do not proceed further with the constitution of a Board of Conciliation and Investigation.

A Board of Conciliation and Investigation was established on June 21, to deal with a dispute between the International Nickel Company of Canada, Limited, Port Colborne, Ont., and its employees, members of Local 637, International Union of Mine, Mill and Smelter Workers (L.G., June 1943, p. 763). On May 27, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., had been authorized as Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute and recommended the establishment of a Board. At the end of the month, Mr. Drummond Wren, Toronto, Ont., had been appointed to the Board on the nomination of the employees and the employing company had been requested to submit the name of a person for appointment to the Board.

On June 3, a Board of Conciliation and Investigation was established to deal with a dispute between Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 2982, United Steelworkers of America (L.G., June, 1943, p. 763). Following the receipt of the application, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized, as Industrial Disputes Inquiry Commissioner, to make an investigation. Being unable to effect a satisfactory settlement of the dispute, the Commissioner recommended the establishment of a board. At the end of the month Messrs. Guy Desaulniers and D. A. Paterson, both of Montreal, had been appointed on the nomination of the employees and employer respectively, and were conferring with a view to making a joint recommendation of a person to act as third member and chairman of the board.

Other Boards Fully Constituted

The Board of Conciliation and Investigation established on May 27, to deal with a dispute between the Ford Motor Company of Canada, Limited, Windsor, Ont., and its employees, members of Local 240, United Automobile Workers of America and employees, members of the Formocan Employees' Association (L.G., June, 1943, p. 763) was fully constituted on June 19. The personnel of the Board was as follows: Honourable Mr.

Justice John Keiller MacKay, Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Dr. H. A. Logan, University of Toronto, Toronto, Ont., appointed by the Minister of Labour in accordance with arrangements made with both of the applicant organizations; and Mr. W. H. Furlong, K.C., Windsor, Ont., appointed on the nomination of the employer.

The constitution of the Board of Conciliation and Investigation established on May 24, to deal with a dispute between the Dominion Glass Company, Limited, Hamilton, Ont., and its employees, members of Local No. 3, Canadian Brotherhood of Glass Workers (C.C.L.) (L.G., June 1943, p. 764), was completed during the month of June. The personnel of the board is as follows: Dr. C. A. Wright, K.C., Osgoode Hall, Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the board; Messrs. R. R. Evans, K.C., Hamilton, Ont., and Bora Laskin, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The Board of Conciliation and Investigation established on May 26 to deal with a dispute between the Office Specialty Manufacturing Company, Limited, Newmarket, Ont., and its employees, members of Local No. 7, National Union of Furniture Workers (C.C.L.) (L.G., June 1943, p. 764) was fully constituted on June 18. The personnel of the board is as follows: Dr. Alexander Brady, University of Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. Bora Laskin and J. J. Robinette, appointed on the nomination of the employees and employer respectively. All three members of the board reside in Toronto.

The constitution of the Board of Conciliation and Investigation established in May to deal with the dispute between the Canadian Pacific Railway Company, Montreal, P.Q., and its dining-car service employees, members of the Brotherhood of Railroad Trainmen (L.G., June 1943, p. 764), was completed on June 2. The personnel of the board is as follows: Honourable Mr. Justice J. G. Gillanders, Osgoode Hall, Toronto, Ont., chairman, appointed on the joint recommendation of Messrs. W. A. Sinclair, K.C., and George B. Bagwell, both of Toronto, Ont., respectively the employer's and employees' nominees on the Board.

The Board of Conciliation and Investigation established by the Minister of Labour to deal with the dispute between Sawyer-Massey,

Limited, Hamilton, Ont., and its employees, members of Local 520, United Electrical, Radio and Machine Workers of America (L.G., June 1943, p. 764) was fully constituted on June 7. The personnel of the board is as follows: His Honour Judge Ian M. Macdonell, Toronto, Ont., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Mr. Gordon R. Munnoch, K.C., Toronto, Ont., appointed on the nomination of the employer; and Dr. Christian Silvertz, London, Ont., appointed on the nomination of the employees.

In the last issue of the *LABOUR GAZETTE*, it was reported that the Honourable Mr. Justice Joseph Archambault had been appointed chairman of the Board of Conciliation and Investigation established to deal with the dispute between Sorel Industries, Limited, Sorel, P.Q., and its employees, members of the Metal Trades Council of Sorel. On June 10, Mr. Justice Archambault advised the department that he would be unable to accept the appointment. Messrs. J. A. L'Heureux, Sorel, P.Q., and Paul Fournier, Montreal, P.Q., members of the board were then requested to reconfer on the recommendation of another person to act as chairman. On June 17, Hon. Mr. Justice Wilfrid Lazure, Montreal, P.Q., was appointed chairman of the board on the recommendation of the other two members.

On June 14 the constitution was completed of the Board of Conciliation and Investigation established May 24 to deal with a dispute between the Morrow Screw and Nut Company, Limited, and Ingersoll Machine and Tool Company, Limited, Ingersoll, Ont., and their employees, members of Local 2918, United Steelworkers of America (L.G., June 1943, p. 764). The personnel of the board is as follows: His Honour Judge Ian M. Macdonell, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members; Messrs. J. J. Robinette, Toronto, Ont., and John J. Sullivan, Hamilton, Ont., appointed on the nomination of the employer and employees respectively.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

A revised application was received on June 3, for the establishment of a Board of Conciliation and Investigation to deal with a dispute between Prairie Airways, Limited, Aircraft Division, Moose Jaw, Sask., and its employees, members of Local 2688, United Steelworkers of America (L.G., April 1943, p. 468). On June 9, Mr. H. S. Johnstone, Indus-

trial Relations Officer, Dominion Department of Labour, Winnipeg, Man., was appointed an Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

On June 12, Mr. Raoul Trepanier, Industrial Relations Officer, Dominion Department of Labour, Montreal, P.Q., was appointed an Industrial Disputes Inquiry Commissioner, to deal with a dispute between L. Sable, Limited, Montreal, P.Q., and its employees, members of Local 54, International Fur and Leather Workers' Union of the United States and Canada. (L.G., June 1943, p. 763). The Commissioner recommended the rejection of the application as he found that the employing company was not engaged in war work and therefore the dispute did not fall within the scope of the Industrial Disputes Investigation Act, as extended by Order in Council P.C. 3495. Accordingly the parties to the dispute were advised that a board would not be established.

Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was authorized on June 10, as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute between the Anglo-Canadian Leather Company, Limited, Huntsville, Ont., and its employees, members of the International Fur and Leather Workers of the United States and Canada (L.G., June 1943, p. 763).

An application for the establishment of a Board of Conciliation and Investigation was received in May from employees of Electric Steels, Limited, Cap de la Madeleine, P.Q., (L.G., June 1943, p. 763). On June 9, Mr. Raoul Trepanier, Industrial Relations Officer, Dominion Department of Labour, Montreal, P.Q., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

Mr. H. R. Pettigrove, Industrial Relations Officer, Dominion Department of Labour, Fredericton, N.B., was authorized on June 9, as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute between Saint John Dry Dock and Shipbuilding Company, Limited, East Saint John, N.B., and its employees, members of Local No. 3, Industrial Union of Marine and Shipbuilding Workers of Canada (L.G. June 1943, p. 763).

Other Reports of Industrial Disputes Inquiry Commissioners

In the dispute between the Toronto Terminals Railway Company, Toronto, Ont., and its employees, members of the Canadian Association of Railwaymen (L.G., May, 1943, p. 597), a report was received from Mr. J.

Douglas McNish, K.C., who had been appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute. In view of the agreement between the Brotherhood of Railroad Trainmen and the company, effective January 1, 1943, the Commissioner recommended that a board be not established. This recommendation was concurred in and the interested parties advised accordingly.

A report was received from Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute between the Massey-Harris Company, Limited (Verity Works), Brantford, Ont., and its employees, members of the United Automobile Workers of America (L.G., May, 1943, p. 595). The Commissioner reported against the establishment of a Board of Conciliation and Investigation, the officials of the union having failed to produce evidence that it represented a majority of the employees concerned. The interested parties were therefore advised that a board would not be established.

Settlements

On June 23, the department was advised that an agreement had been signed by Border Cities Industries, Limited, Windsor, Ont., and its employees, members of Local 195, United Automobile Workers of America (C.I.O.) (L.G., Nov., 1943, p. 1246). Following the receipt of the application for a Board of Conciliation and Investigation in this case, Mr. Louis Fine, Chief Conciliation Officer, Ontario Department of Labour, who had been authorized as Industrial Disputes Inquiry Commissioner, reported that he had been successful in having the parties to the dispute agree to the taking of a representation vote of the hourly rated employees. The vote resulted in favour of the applicant union. In view of the agreement now reached between the parties the application for the establishment of a board has been withdrawn. The agreement between the company and the union is summarized in the article entitled "Recent Collective Agreements", appearing elsewhere in this issue.

The Department was also advised during the month of June that an agreement had been signed between the Breithaupt Leather Company, Limited, Kitchener, Ont., and its employees, members of Local 300, International Fur and Leather Workers' Union of the United States and Canada (L.G., May, 1943, p. 594). Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, who was authorized as Industrial Disputes Inquiry Commissioner to

make an investigation of the dispute following the receipt of the application, reported that he had arranged for the taking of a representation vote of the employees, to determine their choice of a bargaining agency. The vote resulted in favour of the local union of the International Fur and Leather Workers' Union. An agreement having been reached the application for the establishment of a board has now been withdrawn. The agreement between the company and the union is summarized in the article entitled "Recent Collective Agreements", appearing elsewhere in this issue.

During June a settlement was reported in the dispute between the De Havilland Aircraft of Canada, Limited, Toronto, Ont., and its employees, members of Local 112, United Automobile Workers of America (L.G., Dec., 1942, p. 1376). In November His Honour Judge Ian M. Macdonell, the Industrial Disputes Inquiry Commissioner appointed to investigate the dispute had recommended that the matter in dispute be allowed to stand until March, 1943, when the continuation or expiration of the existing agreement between the company and the Employees Association would come up for decision. The Commissioner further recommended that in March an election be held to decide the bargaining agent desired by the employees. Accordingly, on March 22, 1943, a representation vote was held and resulted in favour of Local 112, United Automobile Workers of America. Following the representation vote an agreement was signed between the company and the union and the application for the establishment of a Board of Conciliation and Investigation was withdrawn by the applicant union. The agreement is summarized in the article entitled "Recent Collective Agreements", appearing elsewhere in this issue.

During the month of June, the Department was advised that a collective labour agreement had been concluded between the Consumers' Gas Company, Toronto, Ont., and its employees, members of Local 12291, District 11, United Gas, Coke and Chemical Workers of America (L.G., June, 1943, p. 779). The agreement between the company and the union which is based on the recommendations of the Board of Conciliation and Investigation appointed in this matter, is summarized in the article entitled "Recent Collective Agreements", appearing elsewhere in this issue.

On June 10, on the request of the applicant union, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between

Clark-Ruse Aircraft, Limited, Lakeburn, N.B., and its employees, members of Local 2889, United Steelworkers of America (L.G., April, 1943, p. 472), was withdrawn, the parties to the dispute having concluded a collective labour agreement.

The Department was notified on June 3 that the application for the establishment of a Board of Conciliation and Investigation to deal with the dispute between the Sterling Clothing Company, Limited, Montreal, P.Q., and its employees, members of the Amalgamated Clothing Workers of America (L.G., March, 1943, p. 325) had been formally withdrawn, an amicable settlement having been reached between the company and the union.

Following the taking of a representation vote, in which the applicant union received a majority of the votes cast, the application for the establishment of a Board of Conciliation and Investigation established to deal with a dispute between the Anaconda American Brass Company, Limited, Toronto, Ont., and its employees, members of Local No. 1, Industrial Union of Copper and Brass Workers (C.C.L.) (L.G., May, 1943, p. 598) was withdrawn, the company having previously agreed to bargain collectively with any agency which represented the majority of their employees.

On June 16 the Department was advised that an agreement had been signed by the Breithaupt Leather Company, Limited, Penetanguishene, Ont., and its employees, members of Local No. 24, Shoe and Leather Workers' Organizing Committee (L.G., May, 1943, p. 595). As a result, the application for the establishment of a Board of Conciliation and Investigation was withdrawn at the request of the applicant union. The agreement reached between the parties is summarized in the article entitled "Recent Collective Agreements", appearing elsewhere in this issue.

On June 9, the application for the establishment of a Board of Conciliation and Investigation established to deal with a dispute between the Dunlop Tire and Rubber Goods Company, Limited, Toronto, Ont., and its employees, members of Local 132, United Rubber Workers of America (L.G., June, 1943, p. 763), was withdrawn, the company and the union having agreed to draw up a contract covering all matters on which there was agreement.

Applications Withdrawn

On June 1, at the request of the applicant employees, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Massey-Harris Company, Limited, Toronto,

Ont., and its employees, members of Local 2901, United Steelworkers of America (L.G., Jan., 1943, p. 70) was withdrawn. The union representative advised the department that this action was taken in view of the fact that the United Steelworkers of America had transferred its membership and jurisdiction at the company's plant, to the United Automobile Workers of America.

The Department was requested on June 22, to withdraw the application for the establishment of a Board of Conciliation and Investigation to deal with the dispute between the Sangamo Company, Limited, Leaside, Ont., and its employees, members of the United Electrical, Radio and Machine Workers of America (L.G., Feb., 1943, p. 194). In requesting the withdrawal of the application the union representative advised that in all probability the matter would be taken before the Ontario Labour Court, under the provisions of the Ontario Collective Bargaining Act.

The Department was notified on June 2, by the union's representative that the application for the establishment of a Board of Conciliation and Investigation to deal with the dispute between the Steel Company of Canada, Limited, Hamilton, Ont., and its employees, members of Local 1005, United Steelworkers of America (L.G., Feb., 1943, p. 196), was being withdrawn.

The application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Canadian Car and Foundry Company, Limited, Fort William, Ont., and its employees, members of Local 719, International Association of Machinists (L.G., May, 1943, p. 595), was withdrawn, the company and the union having reached an amicable settlement of the matter in dispute.

Strike Votes

On May 12, the Department received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Davie Shipbuilding and Repairing Company, Limited; Morton Engineering and Dry Dock Company, Limited; and the George T. Davie and Sons, Limited, Lauzon, P.Q., and their respective employees, members of Locals 3, 6 and 7, Boilermakers and Iron Shipbuilders Union of Canada (L.G., June, 1943, p. 766). The union representatives informed the department that they would accept the recommendations of the board but the companies, while accepting certain provisions in the board's findings, refused to accept the recommendation of the board with respect to the closed shop and check-off provisions. When the companies

failed to implement the board's findings, the representatives of the unions involved requested that a strike vote be taken under the supervision of the Department of Labour as provided for in Order in Council P.C. 7307. The vote was taken on June 10 and resulted in 5,895 voting in favour of going on strike and 217 against, with 63 spoiled ballots. Later, a strike occurred when the companies and the unions failed to reach an amicable settlement of the dispute. On June 15, the Government appointed a Controller of certain Quebec shipyards including the Morton Engineering and Dry Dock Company, Limited and George T. Davie and Sons, Limited. Later, an agreement was reached and the men returned to work.

In the understanding reached the companies agreed to support and press for the following conditions before the National War Labour Board:—

(1) The basic wage rates existing in the Montreal district shipyards and that the new wage rates set by the Board be retroactive to April 16, 1943; (2) holidays with pay; (3) cost-of-living bonus of \$4.25 per week as against the present bonus of \$2.10 per week; (4) overtime to be paid after 48 hours in any one week or after 8 hours in any one day. The understanding provided that the starting and quitting

time on the night shift would be between 6 p.m. and 7 a.m., at the discretion of the companies but no less than 8 hours.

The companies agreed to work aggressively for an improvement in labour relations and to set up production committees composed of labour and management. They also agreed to instruct their superintendents, foremen and other officials to take no steps to dissuade employees from becoming members of the union.

The unanimous report of the Board of Conciliation and Investigation established to deal with the dispute between the F. X. Drolet Company, Quebec, P.Q., and its employees, members of Local 74, International Moulders and Foundry Workers' Union of North America was received in April 20 (L.G., May, 1943, p. 613). The recommendation of the board that a representation vote of the employees be taken was subsequently rejected by the company. The applicant-union then requested that a strike vote be taken under the provisions of Order in Council P.C. 7307. The vote was taken on June 17 and of the foundry employees, 15 voted in favour of going on strike and 13 against; while of the employees in the remainder of the plant 7 were in favour of going on strike and 53 against, with 1 spoiled ballot.

Report of Board in Dispute between the Allison Logging Company, Ltd., the Kelley Logging Company, Ltd., J. R. Morgan, Ltd., and Pacific Mills, Ltd., and their Employees.

ON June 7, the Minister of Labour received a report from the Board of Conciliation and Investigation established to deal with a dispute between the Allison Logging Company, Ltd., the Kelley Logging Company, Ltd., J. R. Morgan, Ltd., and Pacific Mills, Ltd., all of Queen Charlotte Islands, B.C., and their employees, members of Local 1-71, International Woodworkers of America (L.G., Nov., 1942, p. 1249).

The personnel of the Board was as follows: His Honour Judge A. M. Harper, chairman, appointed on the joint recommendation of the other two members; Mr. R. H. Tupper, appointed on the nomination of the employer; and Mr. Arthur J. Turner, M.L.A., appointed on the nomination of the employees. All three members reside in Vancouver, B.C.

The report of the Board is signed by the chairman and Mr. A. J. Turner; Mr. R. H. Tupper submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

In the matter of a dispute between The Allison Logging Company, Limited, The Kelley Logging Company, Limited, J. R. Morgan, Limited, and Pacific Mills Limited, all of Queen Charlotte Islands, B.C., Employers; and their respective employees, members of Local 1-71, International Woodworkers of America.

This Board held its first sittings at the City of Vancouver on the 4th day of January, 1943. It should be explained that, owing to the inaccessibility of the Queen Charlotte Islands and the difficulties and uncertainties of transportation to and from the Queen Charlotte Islands during the winter season, it was decided after consultation with the parties involved that the hearings of this arbitration should be held at the City of Vancouver.

As required by the Industrial Disputes Investigation Act, an endeavour was made by the Board to have the parties reach an

amicable settlement, but these efforts proved futile and it became necessary to hear the evidence adduced by both parties in due course.

At the first public hearing of this Board objection was taken by Counsel for the employers to the jurisdiction of the Board, the point being raised that the issue as to whether the employers should bargain with the International Woodworkers of America was not a dispute within the meaning of the Statute. The Board decided that this was a matter for the decision of the Minister, and the Minister having given his decision and established the Board, that under Sec. 7, Subsec. 2 of the "Industrial Disputes Investigation Act" the authority of the Board was not open to question, and accordingly the hearings proceeded.

At the first sittings of the Arbitration Board it was agreed by Counsel of both parties that the employer, the Allison Logging Company, Limited, should be eliminated from these proceedings, as a large part of its holdings had been taken over by the Aero Timber Products Limited. Counsel for the employees stated that he had no authority to represent the few remaining workmen who were still in the employ of the Allison Logging Company, Limited. Accordingly no evidence was presented on behalf of these employees.

The main issue involved in this dispute was recognition by the employers of the International Woodworkers of America as the bargaining agent of the employees. A very large majority of the employees (over 90 per cent) are members of this International Union. Their demand was that the employers should negotiate with the officers of that Union as the bargaining agent of the employees.

The employers refused to do so and offered an employer-employee agreement as an alternative. This alternative proposal, by secret ballot of the employees, was rejected.

Collective bargaining and written agreements with democratic unions under their own selected leadership is the best machinery for producing and maintaining a condition of harmony in industry whilst at the same time providing a means of expression of opinion and protection for the employees.

We might here quote Hon. Mr. McLarty, Minister of Labour in 1941, and now Secretary of State, who, when explaining the government's policy on Labour stated, "Might I suggest that we can defeat totalitarianism at home and abroad only if we really put our trust in the democratic process, not only in our political life but in our industrial life. I believe this is the essence of industrial

democracy and that it must be woven even more firmly into the fabric of industrial relations." And further, "Employees should be free to organize in trade unions free from any control by employers or their agents." "Employees should be free to negotiate with employers through representatives of their own choosing with a view to the conclusion of a collective agreement."

Counsel for the employers emphasized that the political opinions of certain of its officials and certain resolutions passed by the union's International Conventions in the U.S.A. made this union unworthy to be a party to any contractual relation. It may be noted in passing that the active leaders of the I.W.A. have been in Canada since the beginning of the present war and no action has been taken against them by the Dominion Authorities for any utterances or actions of theirs during that time. If the Government of Canada under the drastic powers of the War Measures Act found no occasion to interfere or make any attempt to suppress their activities, it is not the function of this Board to delve into the political opinions of its leaders and to use such opinions as a ground to deny the large body of workmen involved in this arbitration their right to collective bargaining.

In our opinion the good sense and sound judgment of Canadian workmen can be trusted to select such representatives as are capable of voicing and pressing their legitimate claims for better working conditions, and it would be a dangerous and unwise policy for any outside body or person to endeavour to direct the selection of their leaders or to attempt in any way to pick or choose such representatives of labour. Any attempt of this kind would surely be resented, would lead to continual friction, and would hamper the promotion of satisfactory relations between employer and employees. The day of paternalism in the selection of representatives of labour is gone, and any employers or others who seek to interfere with or control in any way the representatives of Unions only invite trouble.

The members of Local 1-71 I.W.A. elect delegates to attend an annual convention at which the election of officers takes place. This organization being conducted on a democratic basis, then obviously it is the character and reliability of the union as a body, which must be considered in relation to the value of contracts entered into by it. No attack was made on the reliability or loyalty of the members of this local.

The responsibility for the fulfilment of the terms of any agreement is in the members of Local 1-71, and it must be presumed the

members of this Local would act in good faith and also guarantee that their elected leaders would do the same until the contrary is shown.

In reference to the relations between the employers and the employees in the Queen Charlotte Islands, the disputes and differences as to working conditions were not of a serious nature and were such as could be adjusted from time to time by reasonable men sitting around a conference table. The employers in our opinion were desirous of adjusting any minor grievances and there was no hostility to dealing with their employees as such, but they were adamant in their refusal to deal with representatives of the International Woodworkers of America.

The observations of the Board of Arbitration in the Kirkland Lake dispute on the effect of P.C. 2685 supports the view that the employers should leave the employees unhampered as to what unions they select as their bargaining agent. A short quotation from the above finding states:

"Regardless of whether P.C. 2685 as a whole is merely declaratory, it is difficult to read Sections 6 and 7 together (and they must be read together) and find any authority for the proposition that an employer has to have any voice in selecting the employees' union or other bargaining agent or to impose any condition of his own as to just what union or what type of union or bargaining agent he is prepared to bargain with."

A subsequent Order in Council (P.C. 10802) of date December 1, 1942, re-affirmed the principles set forth in P.C. 2685 in so far as "Crown" Companies were concerned and contained in Section 6 a declaration of the right of employees to treat with employers;

"Whether or not such representatives are accompanied by persons not employees of the company who are representatives of a trade union of which the employees' union is a part."

There would seem to be no reason to hold that the freedom of workers to choose their own bargaining agency or representatives to treat with employers should be more limited in ordinary industrial organization disputes than in the operation of Crown Companies. Indeed, the declaration of policy to be pursued by companies operating under the authority of the Crown whilst not binding on a Board of Arbitration constituted as this Board is, should carry the greatest weight in formulating recommendations as to union recognition.

Our conclusion is that the fears the employers entertain of what would happen if they dealt with the officials of this union are unfounded and we are of the opinion that

the employers should enter into an agreement with the Local Union 1-71 International Woodworkers of America, for a period of one year with the right of either party to abrogate such agreement after the expiration of the said period of one year, on thirty days' notice.

Though the main issue between the parties was union recognition, other matters of minor importance were dealt with in evidence, and our conclusions as to these may be briefly set forth:—

1. *Hours of Labour.*

These are not within the jurisdiction of the Board.

2. *Wages.*

These also are not within the jurisdiction of the Board.

3. *Holidays.*

The holidays to be allowed should be left to the parties to determine.

4. *Check-off.*

In our opinion the employers should honour written assignments of wages made by any of the employees of which due notice in writing is given, to the extent that monies are owing to the assignor at the time of the receipt by the employer of notice of such assignment.

5. *Seniority and Leave of Absence.*

These may be linked together. For employees entering the armed services and for those suffering from illness or from injury, leave should be given with the right to retain seniority; and in the event of shut-downs, all former employees who have filed applications with the employer for re-employment and are available, should be hired before new employees are engaged.

6. *Strikes and Lockouts.*

We would recommend that during the life of any agreement between the parties, no strikes shall be caused or sanctioned by the union and no lock-outs shall be caused by the employers, until every peaceful method of settlement is exhausted.

7. *Transportation.*

This should be left to agreement by the parties.

8. *Safety Committee.*

Owing to the hazardous nature of the work and the high fatality rate in the logging industry, full scope should be allowed for the functioning of a safety committee. In case of disagreements the decision of the Workmen's Compensation Board should be final.

9. *Paydays.*

This is already covered by legislation.

10. *Sanitation.*

This we understand is fully provided for.
All of which is respectfully submitted.

Vancouver, B.C.

(Sgd.) A. M. Harper,
Chairman.

(Sgd.) Arthur J. Turner,
Member of Board.

Minority Report

To the Honourable HUMPHREY MITCHELL,
MINISTER OF LABOUR,
Ottawa, Canada.

*Re: Dispute between Pacific Mills Limited,
Logging Division, Kelley Logging Com-
pany, Limited, and J. R. Morgan Logging
Company, Limited, employers, and Local
1-71, International Woodworkers of Am-
erica.*

The employers' reason for refusing to contract with the I.W.A. Local 1-71 is that the senior officers of that Association have acted improperly; and under their leadership the Association has not the reasonably fair character which is a necessary qualification to both parties to a contract of a personal nature.

It seems self-evident that while the willing association of persons for purposes of mutual advantage, whether as shareholders in a joint stock company or as members of a Trade Union, is a useful development in our society,

yet the mere fact of such association should not exempt the character of an association from enquiry when determining whether to recommend that it be given or refused, contractual rights by another. There are companies of good and of bad repute, and their reputations arise not from the character of their shareholders, but from the conduct of those who direct their actions.

Notwithstanding the argument of Counsel for the Local that there are no "good" and no "bad" unions, it is submitted that a Trade Union, when seeking contractual rights which are refused by others on the ground that the Union is not a fit contracting party, must accept responsibility for the actions of those who direct its affairs.

Again, it seems self-evident that in a quasi-judicial examination of character, nothing should be presumed against the subject of such examination, and that weight should be given only to conduct which is reprobated by law. It is not right here to condemn conduct which is not illegal on the ground that others might have acted otherwise.

No useful purpose will be served by reciting in this minority report the uncontradicted evidence which has led me to the conclusion that while the I.W.A. in British Columbia is under its present direction, I cannot recommend that a contract be made between the employers and Local No. 1-71.

Report of Board in Dispute between the Canadian Car & Foundry Company, Ltd., Brantford, Ont., and its Employees.

ON June 9, a unanimous report was received by the Minister of Labour from the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Car and Foundry Company, Ltd., Brantford, Ont., and its employees, members of Local 397, United Automobile Workers of America. (L.G. Apr. 1943, p. 471).

The personnel of the Board was as follows: His Honour Judge James Parker, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members of the Board; Mr. D. A. Paterson, Montreal, P.Q., appointed on the nomination of the employer and Mr. Drummond Wren, Toronto, appointed on the nomination of the employees.

The Board's report follows.

Report of Board

THE HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR,
Ottawa, Ont.

*Re: Industrial Disputes Investigation Act,
and re dispute between the Canadian Car
and Foundry Co., Ltd., Brantford, Ont.,
and its employees, members of Local 397,
United Automobile Workers of America.*

Sir:—

The Board of Conciliation and Investigation appointed to investigate this dispute issued an Interim Report on the 28th day of April, 1943, in which the Board, for reasons stated therein, recommended as follows:—

"Under all the circumstances, the Board respectfully recommends that a vote be taken

in the plant of those employees eligible to membership in the Union, under the supervision of the Department of Labour, to determine the agency for collective bargaining purposes with a view to the conclusion of a collective agreement in accordance with the provisions of P.C. 2685, Section 7."

The Board has now been advised that a vote was taken pursuant to the above recommendation, with the following result:—

Number of votes cast.....	332
Number voting in favour of Local	
397	246
Number voting against.....	83
Spoiled ballots	3
	— 332

The vote having established that a large majority of the employees are members of

the union, we, the undersigned members of the Board, recommend that the company recognize the union through its officers or through representatives chosen by them as the bargaining agent on behalf of the company's employees who are members of the union.

All of which is respectfully submitted.

(Sgd.) J. Parker,
chairman.

(Sgd.) Drummond Wren,
member.

(Sgd.) D. A. Paterson,
member.

Dated at Toronto this 7th day of June, 1943.

Report of Board in Dispute between Defence Industries Ltd., Brownsburg, P.Q., and its Employees.

THE Minister of Labour recently received a report from the Board of Conciliation and Investigation established to deal with a dispute between Defence Industries Ltd., Brownsburg, P.Q., and its employees, members of the Munitions Workers' Federal Union (T. & L.C.). (L.G., June, 1943, p. 765).

The personnel of the Board was as follows: Mr. Gerald H. Brown, Ottawa, Ont., chairman, appointed on the joint recommendation of the other two members; Messrs. D. A. Paterson and A. Feiner, both of Montreal, appointed on the nomination of the employer and employees respectively.

The report of the Board is signed by the chairman and Mr. D. A. Paterson; Mr. A. Feiner submitted a minority report.

The texts of the report of the Board and the minority report follow:—

Report of Board

THE HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR,
Ottawa, Ont.

June 8, 1943.

Re: Industrial Disputes Investigation Act and re dispute between Defence Industries, Ltd., Brownsburg, P.Q., and employees, members of the Munitions Workers' Federal Union, Trades and Labour Congress of Canada.

The Board of Conciliation and Investigation in the above matter was established by the Minister of Labour on April 21, 1943, in conformity with an application dated March 30, which had been made by the employees of the Defence Industries, Limited, of

Brownsburg, Quebec, members of the Munitions Workers' Federal Union, Trades and Labour Congress of Canada.

The dispute as outlined in the form of application has to do with the desire of the applicants that a vote be held of the Defence Industries Limited employees "to determine whether or not the majority of the employees wish to have the said union represent them in the negotiation of a collective agreement", whereas, the company maintained before the Board that if any vote was to be taken to determine whether the Munitions Workers' Union was to be recognized as the bargaining agent of the employees and to displace the Consolidated Works Council at present existing in the plant, on which the employees both of the Canadian Industries, Limited, and the Defence Industries, Limited, (hereinafter referred to respectively as the C.I.L. and D.I.L.) are represented, the voting should not be confined to the D.I.L. section of the plant, but should include as well the employees of the C.I.L., who comprise the majority of the total working force in the Brownsburg small arms ammunition works.

The members of the Board of Conciliation and Investigation, after taking the prescribed oath, visited Brownsburg on May 18 for the purpose of viewing the works and the operations which are carried on therein. Sitzings of the Board were held in Brownsburg on May 21, at which time witnesses were examined on behalf of the employees of the D.I.L., members of the Munitions Workers, Federal Union, and on May 26, when evidence was taken on behalf of the Company, and witnesses appeared also on behalf of the Consolidated Works Council, which was

established in the plant in 1935, following consultation between the management of the C.I.L. and its employees, and which was re-constituted in 1940 to include representation as well of the D.I.L., when the plant was extended under agreement between the Dominion Government and the last named Company. A further sitting of the Board was held in Montreal on May 31 with representatives of the Munitions Workers' Federal Union and of the management in attendance.

The Union representatives in their evidence contended that the D.I.L. is an enterprise separate and distinct from the C.I.L., despite the contiguity of the former to the latter in a physical and managerial sense, and claimed that the C.I.L. were using the fact that their workers had not yet joined the Union as a means of restraint against the workers of the D.I.L. in the free exercise by the latter of their right to bargain collectively with the management through the agency of their own choice. Complaint was made of the D.I.L. employees not being given any seniority rights in the C.I.L. portion of the plant on transfer to the latter, for their period of service with the D.I.L. Union. Witnesses spoke also of lower scales of wages being in effect at Brownsburg than in the D.I.L. plants at Bouchard and Verdun. The Union asserted besides that the employment conditions in the D.I.L. section of the combined works are different in some respects from those that apply to employees of the C.I.L., and that the D.I.L. workers wanted a Union to uphold their cause to equal treatment in all respects and to protect their rights when the war comes to an end and the manufacture of small arms ammunition for the armed forces is discontinued. It would appear that an effort was made within recent months to enroll, as Union members, the employees of both C.I.L. and D.I.L., who worked within the same plant premises, but that the unionization campaign was not as successful in the C.I.L. section as the other. This was in fact freely admitted by the Union organizer and, moreover, was admitted in the Board application, wherein it is stated that the Union does not claim to have a majority of the employees of the C.I.L. within their membership.

It is noted that the Board application is dated from Brownsburg, but that the workers authority to present this application to the Minister of Labour for the establishment of a Board of Conciliation and Investigation was granted at a meeting in Hawkesbury, Ont., on March 28. Evidence presented before the Board went to show that large numbers of the workpeople employed in the Brownsburg

ammunition factory travel to and from work daily from Hawkesbury, which is 14 miles distant from Brownsburg, also from Lachute and other neighbouring settlements, and that the governmental restrictions on the sale of gasoline had occasioned considerable complaint and inconvenience. With further reference to the meeting of employees in Hawkesbury on March 28, at which authority was granted for the Board application, it was claimed by the Works Manager of the Brownsburg plant that this meeting was called at a time when all roads leading to Hawkesbury were completely blocked with snow, making it impossible for employees from Brownsburg and other points to attend, and that there were about 60 employees in all present out of the 2900 persons employed in the combined works. On the part of the Union it was declared, however, that meetings in connection with the proposed Board application had been held also at Brownsburg and Lachute.

The management made it clear to the Board that they had no objection to their employees at Brownsburg joining a labour union and that if the majority of the total working force so desired they were prepared to enter into a union agreement, both for the D.I.L. and C.I.L. As proof of their good faith in this statement the management referred to the fact that agreements are in effect at present at D.I.L. plants in Bouchard, Verdun and Salaberry, P.Q. with the Munitions Workers' Federal Union, who are the Board applicants in the present case; furthermore, that the C.I.L. also had made union agreements in their plants at Windsor, Ont., and at Victoria, B.C. It was stressed, however, that the agreements in question were applicable in all cases to the entire working forces in the respective plants.

Evidence before the Board on the Company's behalf went to show that D.I.L. came into existence as a separate corporation for accounting purposes only, by reason of the fact that certain portions of the plant were built and equipped by the Dominion Government for the manufacture of specified products required in the war effort, necessitating separate financial arrangements with the governmental authorities from those applicable to the rest of the plant. The Company's statement on this point was corroborated on enquiry made by the chairman of the Board of one of the responsible officers of the Department of Munitions and Supply. The manager of the combined plants in a brief submitted to the Board made the statement that 41 per cent of the C.I.L. payroll is

used and paid by the D.I.L. and that 1053 of the total personnel of 1822 employed by the C.I.L. or 59.8 per cent perform part time service on behalf of the D.I.L. section.

Written statements prepared by the management in reply to the Board application were submitted both to the Minister of Labour and at greater length to the Board during its second sitting in Brownsburg. It was emphasized in both these declarations that the works of C.I.L. and its wartime subsidiary D.I.L. are situated on the one plant site and within the one plant fence and that the employees are engaged in combined operations doing similar work, working in general the same hours per day and paid at the same rates, also that for board and lodging all employees pay the same rates. As at March 31, 1943, there were 1237 employees in D.I.L. and 1663 employees in C.I.L. at Brownsburg. The D.I.L. plant is engaged 100 per cent in the production of munitions of war, while the C.I.L. plant is devoted to the production of military ammunition and supplies to the extent of approximately 85 per cent. The two plants operate under the same management, the Works Manager and the Assistant Works Manager (employees of C.I.L.) having charge of operations in both sections. The general facilities of the C.I.L. plant, such as the power house, machine shop, tool shop, laboratories, etc., and including employee relations department and payroll department, supply items such as tools, power, and general services to the D.I.L. plant, which is not equipped with its own general facilities of this nature and cannot, therefore, operate independently of C.I.L.

The Company went on to explain that because of the close relationship between C.I.L. and D.I.L. at Brownsburg a body known as the Works Council providing for employee representation was extended in 1940, when D.I.L. operations began in Brownsburg, to apply to the latter Company and that the Consolidated Works Council, as it is now known, consists of three representatives appointed by the management, six representatives elected by the C.I.L. employees and three representatives elected by D.I.L. employees. It was further stated that the Consolidated Works Council feel that if a vote is to be taken it should be a combined vote of the employees of both Companies. The policy of both C.I.L. and D.I.L. in the matter of employee representation is, they stated, that they will recognize and deal with any representative body which is selected by a majority of their employees but that it would be impracticable to have a division of employee representation at Brownsburg

because of the present close relationship between D.I.L. and C.I.L. and their employees. It was contended also that such a division of employee representation as would occur in the event that D.I.L. employees were represented by the union and C.I.L. employees were represented by the Works Council, would be definitely harmful to the production of ammunition by creating two separate channels of communication to the management on common problems.

Employee representative of the Consolidated Works Council in the combined plants attended at the second sitting of the Board at Brownsburg and maintained that the system of labour relations existing at present is most satisfactory to the bulk of the employees and that if the workpeople in the D.I.L. section were dissatisfied with their elected representatives, or the Works Council, they are at liberty, under the Works Council plan, to take steps through which the present representatives can be replaced by others. Regular meetings of the Works Council are held fortnightly and the elections of employee representatives of the C.I.L. have been held annually in November since 1935 and in the D.I.L. annually since 1940. It was added that at the election in November, 1942, the number of employees who recorded their votes constituted 86.4 per cent in the D.I.L. and 89.9 per cent in the C.I.L. The Works Council spokesmen asserted that nothing could be more representative and democratic than the manner in which their elections were held and that the fullest opportunity was afforded by the Company for the redress of employees' grievances and for building up common interest between the management and the working force in the common cause of the war effort.

The local clergy of the Brownsburg parish, Reverend Father Bouchard, who has been in charge of this parish for thirty-one years, and his curate, Reverend Father Lacelle, availed themselves of one sitting of the Board in Brownsburg to state their views of the case and spoke in terms of commendation of the relations existing between C.I.L. and D.I.L. and the combined working staffs, declaring that their knowledge of these matters was based on constant contact with the working population both male and female, in Brownsburg. Reverend Father Bouchard was of the opinion that the movement to establish a union had originated among the newcomers in the locality who were not fully conversant with the existing relations in the ammunition plants. Reverend Father Lacelle felt that the movement for recognition of a labour union to supersede the Consolidated

Works Council had come from outside of Brownsburg altogether.

It is provided in Section 26 of the Industrial Disputes Investigation Act that if a settlement of a dispute is not arrived at between the employing and the employed interests concerned, the Board shall make a full report on the facts and circumstances of the case and its findings therefrom, including the cause of the dispute and the Board's recommendation for the settlement of the dispute, "according to the merit and substantial justice of the case." Nothing was left undone on the Board's part to secure a settlement by mutual consent, but without effective results and in these circumstances its duty is to submit a finding and recommendation for the settlement of the dispute.

After hearing the evidence submitted by both parties and giving careful consideration thereto, the Board considers that if any vote is to be held it should be of a plant wide nature in view of the interdependence of the operations carried out in the combined plant and the fact that the D.I.L. could not operate without services which are furnished to them by the parent Company. The Board finds that the D.I.L. is not an enterprise separate and distinct from the C.I.L., as claimed by the union, but that on the contrary the D.I.L. came into existence not as a complete operating unit but on account of separate financial arrangements made by the Government as to some of the products required and the necessity of maintaining separate accounts for the company-owned portion of the plant, namely the D.I.L. section which was built and equipped with Government funds and operated by the D.I.L. under specified terms of contract.

The Board desires to express the pleasure it had in learning that no serious labour conflicts have ever occurred in the Brownsburg ammunition works throughout the long period which has elapsed since the establishment of these works in 1886. It was impressed, moreover, with the difficulties which had been overcome in extending the working force in the plant from approximately 300 before the war to some 3,000 at present many of whom travel long distances daily during summer and winter months alike to carry out the important operations which are involved.

The Board was given to understand by the union organizer and by the Company management that they would respectively abide by the findings of the Board and the union organizer declared that he would not sanction any stoppage of work in the ammunition plant at Brownsburg on account of the public interests which are involved on which so much depends in the manufac-

ture of small arms ammunition for the use of the armed forces.

In the light of the evidence the Board feels that the only further observation called for having regard to the merits and substantial justice of the case is that it would be impracticable to have two channels of communication between employees and management in the combined ammunition works in Brownsburg and that the application made by the union to the Federal Minister of Labour for the holding of a vote should remain in abeyance unless and until the union is prepared for a vote to be held in the entire plant.

The whole respectfully submitted.

(Sgd.) GERALD H. BROWN,
Chairman.

(Sgd.) D. A. PATERSON,
Member.

Minority Report

THE MINISTER OF LABOUR,
Department of Labour,
Ottawa, Ont.

Re: Defence Industries Ltd., Brownsburg, Que., and employees, members of the Munition Workers' Federal Union, Trades and Labour Congress of Canada.

Sir:—

The matter in controversy before the present Board is the determination of the proper "Bargaining Unit" in the selection of a bargaining agent to represent the employees in their dealings with their employer.

It must be noted that there are two plants operated by Canadian Industries Limited in Brownsburg. One is the Canadian Industries Limited plant proper and the other is the Defence Industries Ltd. plant operated by Canadian Industries Ltd. by contract with the Government. These plants are within the same site. It is further established that some of the essential services for the D.I.L. plant are provided by C.I.L.

The Union contends that it has a majority among the employees of D.I.L. It admits that it has not a majority among the employees of the C.I.L. It contends that the employees of D.I.L. are entitled to representation by a bargaining agent of their own choice.

The employer, while admitting the principle of collective bargaining, insists that for all practical purposes there is only one plant at Brownsburg and that a vote, if taken, should be a single vote among the employees of both plants.

Evidence was made of the existence at Brownsburg of an Employees' Works Council covering the employees of both plants. It is admitted, however, that the employees of D.I.L. were never given the opportunity to accept or reject this Council and it is further admitted that there is no contract in existence between the Works Council and either employer at the present time.

The evidence did not disclose any obstacle whatsoever to the holding of a vote among D.I.L. employees only. It is admitted that there is no confusion as far as the records go between employees of the two companies. In fact, before an employee can be transferred from one company to another he must first of all be given his separation notice by the one company and then at the expiry of the notice he is engaged by the other company, as a new employee. In addition as a matter of fact the set-up of the Works Council segregates the employees of the two plants. The C.I.L. employees elect six representatives. The D.I.L. employees elect three. Representation from each plant is entirely separate.

It is thus quite clear that there is no physical or technical obstacle to the taking of a vote among D.I.L. members only. It is necessary to make this point quite clear although in fact it is admitted by the employer.

The D.I.L. employees presented serious reasons why they needed separate representation. Their employer has not the power to make any decisions or changes which would involve increases in expenditures. Permission must be first obtained from the appropriate government body to incur the additional expenditures. This situation does not exist in C.I.L. It is thus apparent that collective bargaining in D.I.L. is quite different from collective bargaining in C.I.L. Representations were also made to the effect that the scale of wages at D.I.L. in Brownsburg was lower than that at D.I.L. in Verdun and Bouchard. Other grievances of the employees were that they received only one week's holiday with pay instead of two weeks given to C.I.L. employees, a lack of seniority rights, no adequate grievance committee. Employees also expressed a desire to associate themselves in a Union which embraced all D.I.L. employees in the province of Quebec so that they could discuss together such common problems as increased production, planning for the post-war period, etc.

A considerable mass of evidence was presented to the Board which I believe to be irrelevant. The majority report deals with the merits of the Works Council as set forth by Works Council members themselves, and

with the opinion of two clergymen to the effect that a union is undesirable in Brownsburg. I must make it quite clear that such evidence should not, in the first place, have been placed before the Board, and that the Board should not consider such evidence. It is not for the Board to decide on the merits or otherwise of the Works Council. Nor should the Board be influenced by the expressed hostility of the two reverend gentlemen to the application of the principle of collective bargaining in Brownsburg.

It is not for us to determine the merits of the Union as compared to the Works Council or vice versa. It is not for us to determine whether or not the best interests of the employees or the residents of Brownsburg would be served by the establishment of a Union in Brownsburg. It is not for us to determine the merits or demerits of the company's policy toward its employees. It is for the Board to decide on the proper bargaining unit. It is for the employees only to decide on the bargaining agent they desire.

Our sole concern with the Works Council is whether it fulfils the requirements of P.C. 2685. In my opinion it does not.

The Board is bound to base its decision upon "the merits and substantial justice of the case". It is admitted by all that one vote among both plants would result in the defeat of the union while the union maintains that it could win a vote in D.I.L.

If, therefore, the Board recommends a single vote for both plants, the employees of D.I.L. will be deprived of their right to select a bargaining agent in violation of P.C. 2685; and the employees of D.I.L. will have imposed on them a so-called bargaining agent which contravenes the terms of P.C. 2685 in that in the first place it was never selected by the employees of D.I.L. and secondly it contains members who are not elected but appointed by the employer; and its chairman, the works manager has an absolute veto power over every proposal placed before the Council.

The present set up is also greatly unfair to the employees of D.I.L. in that although they compose over 40 per cent of the qualified employees in both plants they elect only 25 per cent of the members of the council.

In essence the sole reason advanced by the company in refusing to hold a vote of D.I.L. employees is its fear that confusion would result and friction arise if employees of D.I.L. were represented by one bargaining agent and employees of C.I.L. were represented by another. I must state that the evidence of the witnesses heard in support of this contention was coloured by their admitted hostility to

the idea of having a union in Brownsburg at all.

It is thus clear that if the employees of D.I.L. are not given an opportunity to select alone their bargaining agent a most substantial injustice would be done to them. On the other hand, if a bargaining agent is set up for D.I.L. alone there is only a possibility of friction which may or may not materialize. The weight of probability appears to be that such friction would not materialize. In support of this there is the admittedly excellent record of the union in other D.I.L. plants. Furthermore, the declared policy of the union is to avoid friction and to stimulate maximum production. Thus there is no reason to anticipate any difficulty unless it is created by some other body.

The principles of separate votes in similar situations has been admitted by the employer. According to the employer's brief the physical situation at Windsor is the same as at Brownsburg, and in Windsor both C.I.L. and D.I.L. consented to separate votes which were actually taken on October 29, 1942.

I would add, in fairness to the union, that its agents have made several material con-

cessions before the Board in an attempt to arrive at a compromise. Firstly, they agreed to a vote among both plants provided that the results would be tabulated separately. They also agreed to have the name of the Works Council on the ballot although the setup of the Works Council violates P.C. 2685. They also agreed that the Works Council could continue to exist even with the union recognized as bargaining agent, with the Works Council confining itself to recreational, social and benefit activities, etc. The employer did not make any counter proposals to the union.

I have, therefore, come to the conclusion that the "merits and substantial justice of the case" demand that a vote be taken among D.I.L. employees only to determine their choice of a bargaining agent. However, in view of the union's offer, I recommend that a vote be taken among both C.I.L. and D.I.L. employees but that the vote be so conducted that the results of the vote in each plant will be shown separately.

The whole respectfully submitted.

Montreal, June 10, 1943.

(Sgd.) A. FEINER,
Member of the Board.

Conciliation Work of the Department of Labour During June, 1943

DURING June 48 new industrial disputes came to the attention of the Industrial Relations Branch, while 42 others which were already known to the Department received further attention. These disputes were dealt with under the Conciliation and Labour Act and were distinct from those handled under the Industrial Disputes Investigation Act, which are described elsewhere in this issue.

The disputes of chief interest or importance which were dealt with by Industrial Relations Officers or, in Ontario, by the additional services of the Provincial Conciliation Officers, are summarized in the statement below. It will be noted that a settlement was secured by the investigating officer in almost every instance.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal and Fredericton. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and North Western Ontario; three officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the Province of

Quebec and one officer resident in Fredericton, N.B., represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

RADIO FACTORY WORKERS, BELLEVILLE, ONT.— When a set-up man was discharged by Stewart Warner Alemitte, Ltd., Belleville, Ont., an international representative of the United Automobile Workers of America applied to the Department late in May for an investigation under the provisions of Order in Council P.C. 4020, charging that the dismissal constituted discrimination on account of union membership and activity. A preliminary investigation was conducted by Mr. H. Perkins, Industrial Relations Officer, Toronto, who reported that, on the facts presented to him, he could find no evidence of discrimination as claimed by the Union. Accordingly no Commissioner was appointed under P.C. 4020 to investigate the case further.

BOILERMAKERS, ETC., VANCOUVER, B.C.— Toward the end of May, the Vancouver office of the Department reported a dispute involving three companies, West Coast Shipbuilders, Limited, Hamilton Bridge (Western) Limited,

and Dominion Bridge Company Limited, all of Vancouver, and Local No. 1 of the Boilermakers and Iron Shipbuilders Union of Canada. Some 3,200 workers were said to be directly affected by the dispute which concerned the desire of the Union to have a closed shop provision embodied in proposed agreements. Industrial Relations Officers of the Department arranged conferences of the parties in an effort to arrive at a settlement. No compromise was reached, however, with regard to the matter of a closed shop and Mr. F. E. Harrison, Western Representative of the Department, advised the representatives of the Union that in view of the important war work being performed, it was their duty to apply for a Board under the Industrial Disputes Investigation Act. The Department was informed that various other unions having members employed by the companies also desired to negotiate closed shop agreements with the companies covering the employees coming within the jurisdiction of their respective organizations. On June 14, applications for the establishment of Boards of Conciliation and Investigation were received from the above mentioned union and seven other organizations to deal with the dispute as it related to West Coast Shipbuilders, Ltd. and Hamilton Bridge (Western) Limited. For further information see Recent Proceedings under the Industrial Disputes Investigation Act in this issue.

RUBBER WORKERS, BOWMANVILLE, ONT.—Commencing with the night shift on June 4th, 1943, the entire plant of the Goodyear Tire and Rubber Co. Ltd., Bowmanville, Ont., was closed down by strike action on the part of approximately 275 employees. The cause of the strike was the alleged delay on the part of the management in entering into negotiations with Local No. 189, United Rubber Workers of America, following a representation vote won by that organization on May 17th. (LABOUR GAZETTE, June, 1943, p. 802.) Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, visited the plant and arranged for negotiations to take place between the parties on June 8th, on which date work was resumed. The negotiations were reported as still proceeding at the end of the month.

VENEER WORKERS, SAINT JOHN, N.B.—On June 1 a strike by 464 employees of Canada Veneers Limited, Saint John, N.B., occurred in protest against a Finding and Direction of the Regional War Labour Board for New Brunswick, made in the matter of a request for a 10 cent increase in wages to all classifications of workers. The application for the wage increase was made by Local Union No.

2533, United Brotherhood of Carpenters and Joiners of America. The decision of the Regional Board was that the Company should be authorized to increase wages only on a sliding scale from 1 cent to 5 cents per hour. H. R. Pettigrove proceeded to Saint John on June 2nd but agreed to leave the matter with the management until the morning of June 3, when representatives of the Company proposed to clarify its position before a mass meeting of the employees. This procedure proved abortive and Mr. Pettigrove attended a meeting of the employees during the afternoon. The issues involved were lengthily and vigorously discussed, and the legal requirements governing proper procedure were explained. Finally a secret ballot was conducted in which the employees voted by a large majority to return to work pending an appeal to the National War Labour Board for a review of their case. Work was resumed on June 4. At the end of the month there was some uncertainty as to whether an appeal would be made to the National Board or whether a new case would be presented by the Union to the Regional Board.

COAL MINERS, MINTO, N.B.—When the Minto Coal Company, Minto, N.B., made a change in its system of remunerating twelve employees (involving not only a change in the method of computing wages, but making certain employees responsible for paying wheelers who had formerly been paid by the Company), a strike of 16 miners occurred on June 7, 1943, and spread until about 100 were directly involved. In the absence of Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., the situation was investigated on behalf of the Department by Mr. N. D. Cochrane, Director of Labour for New Brunswick. The representatives of Local 7409, United Mine Workers of America, of which the strikers were members, charged that the change in the basis of remuneration was a violation of the Wartime Wages Control Order and of the contract between the Company and the Union. At the request of Mr. Cochrane and an officer of the National War Labour Board, the Company reverted to the former wage rate system pending an application to the Board. Work was resumed on June 10th.

COAL MINERS, MINTO, N.B.—On June 28th eleven employees at the C2 Shaft of the Minto Coal Company, Ltd., members of Local No. 7409, United Mine Workers of America, ceased work because the Company had allegedly altered its method of paying the cost-of-living bonus. An investigation by Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., revealed that the Company was

paying the full amount of the bonus if the employees worked a full 8-hour day (or, in the case of hand-pick miners, if six one-half ton boxes of coal were produced). If a full day's work was not performed by the employee, the Company paid a bonus upon a *pro rata* basis. Following a further discussion of the situation between Mr. Pettigrove and the Union's Sub-District Board Member for Minto, the employees agreed to return to work on June 29, pending a conference between Company and Union representatives. At this meeting it was decided to seek a ruling on the matter from the National War Labour Board.

PIPE AND TILE WORKERS, NEW GLASGOW, N.S.—On June 2, 1943, a strike of 60 employees of Standard Clay Products, Limited, New Glasgow, N.S., members of Local No. 1231, United Steelworkers of America, occurred in connection with an alleged violation of the seniority clause contained in the Union's agreement with the Company. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., immediately got in touch with the parties to the dispute, with the result that the Union's secretary-treasurer at Trenton, N.S., agreed to request the employees to return to work pending an investigation by Mr. Pettigrove as soon as the pressure of other duties permitted. However, the workers refused to terminate the strike until June 8th. A joint conference was arranged by Mr. Pettigrove on June 9 at which consideration was given to the respective merits of the member of the kiln gang whom the Union desired promoted to the position of kiln setter and the man whom the Company had selected. The Company manager considered but refused to acquiesce in a suggestion that the former be promoted for a trial period. The parties then agreed to follow established grievance procedure and, if necessary, submit the matter to an umpire.

RUBBER FOOTWEAR WORKERS, KITCHENER ONT.—About 567 employees in the Merchants Rubber Plant of the Dominion Rubber Company, Ltd., Kitchener, Ont. stopped work for one day on May 31, 1943, in order to attend a "conference" in connection with their demands for a general wage increase of six and one-half cents per hour. On June 7 537 again ceased work for the same cause and remained in "conference" until June 16th. Prior to the stoppages the Company had agreed to various wage adjustments, but contended that the general increase desired by the workers would impair its competitive position. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, acted as mediator and induced the

parties to compromise by making a joint application to the Regional War Labour Board for authority to institute a general increase of 2 cents per hour. Later it was reported that the general increase and other adjustments had been sanctioned by the Regional Board.

METAL WORKERS, LACHINE, P.Q.—On June 14 nearly 1,500 employees of Dominion Engineering Works, Lachine, P.Q., ceased work in support of the desires of the chasers to be classified as hourly-rated employees and to be included in the Agreement between the Company and Lodge No. 1660, International Association of Machinists. The situation was investigated by Mr. R. Trepanier, Industrial Relations Officer, Montreal, who explained the lawful steps which should be taken by the workers in support of their demands. Following a meeting of the employees work was resumed at noon on July 16. It was understood that the wage question would be referred to the Regional War Labour Board.

UPHOLSTERERS, MONTREAL, P.Q.—On June 5 about 344 upholstery workers employed by four Montreal firms went on strike over demands for holidays with pay. The companies involved were Atlas Bedding Limited, Living Room Furniture Limited, St. Louis Bedding Company, and Montreal Upholstering Co. Ltd. The strikers were members of the Upholsterers' International Union, Local No. 302 (A.F. of L.). On June 11, the management of Atlas Bedding Limited notified the Department that it was engaged on the production of certain Government orders for hospital beds and asked for assistance in securing termination of the strike of its employees which involved 185 directly and 60 indirectly. Mr. R. Trepanier, Industrial Relations Officer, Montreal, was assigned to the case and held a lengthy meeting with members of the Atlas Bedding Employees Committee. Mr. Cyprien Miron, Conciliation Officer of the Provincial Department of Labour, also was present since the other three companies were within the sole jurisdiction of his Department. Mr. Trepanier recommended that the Atlas employees resume work and make a proper application to the Regional War Labour Board. For its part, the Company undertook to reinstate the workers without discrimination. Work was resumed by some of the Atlas strikers on June 24 and all returned by June 29.

SHIP REPAIR WORKERS, SYDNEY, N.S.—A threatened strike was averted among 82 employees of the Sydney Foundry and Machine Co. Ltd., Sydney, N.S., on June 9th in connection with the alleged unjust dismissal of an employee, and requests for union recogni-

tion and collective bargaining rights. Conferences with the parties were held by Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B. Following consultation with plant supervisors, the manager of the Company undertook to reinstate the employee who had been discharged. Action was deferred in the matter of recognition of the union as bargaining agent for the employees. The organization involved was Local No. 1, Industrial Union of Foundry and Machine Workers (C.C.L.), and its executive agreed to adopt proper procedure in regard to negotiations for an Agreement.

COAL MINERS AND WAITRESSES, GLACE BAY, N.S.—On June 28 approximately 3,500 coal miners employed in six collieries of the Dominion Coal Company in the Glace Bay area, all belonging to local of Sub District No. 1, United Mine Workers of America, staged a sympathy strike in support of eight waitresses who had been replaced by new workers following a strike at the Glory Cafe in Glace Bay. The waitresses were members of Local Union No. 1, Hotel and Restaurant Employees, (Canadian Congress of Labour), which was registered under the Trade Union Act of Nova Scotia on May 5, 1943. On May 21, the Union approached Mr. Yen Yee, proprietor of the Cafe seeking recognition and a Collective Agreement. Negotiations were progressing favourably until June 6, when one girl was allegedly ill-treated and dismissed when she refused to start work at the proper time. Twelve other waitresses then ceased work and, although four later resumed work, the others were replaced. On June 12 Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B. conferred with representatives of the Nova Scotia Federation of Labour and informed them that, the strike came within the exclusive jurisdiction of the Nova Scotia Government. The Federation officials agreed that the dispute should be handled by the Provincial Director of Labour who went to Sydney to investigate on June 20, A Conciliation Board composed of three civic officials of three local municipalities was established by the Department of Labour of Nova Scotia. This Board rendered a report (with the Mayor of Glace Bay dissenting) stating that the proprietor of the Cafe was justified in refusing to reinstate the eight waitresses. Although the parties had agreed earlier to abide by the Board's decision, further strikes by the coal miners in the area were threatened. Because of this, the consent of the Provincial authorities was granted to officials of the Federal Department to deal with the situation. The Director of Industrial

Relations approached the Counsellor of the Legation of the Republic of China, in Ottawa, as a result of which the Chinese Minister of Canada used his good offices in urging Mr. Yen Yee to effect a settlement in the interests of the war effort of Canada and the United Nations. Mr. Pettigrove also entered the situation, as a result of which the United Mine Workers' Officials agreed to binding arbitration of the dispute by a Commissioner appointed under the Nova Scotia Conciliation Act of 1941, provided that Mr. Pettigrove himself was the Commissioner. This was agreed to by the Cafe management. The Commissioner's recommendations for settlement were that five of the girls should be re-employed immediately and that the rest be re-employed without discrimination when business conditions warrant; that the new employees engaged by Mr. Yee since June 6 be released as soon as alternative employment could be arranged by the combined efforts of the Union and National Selective Service; that the supervisor of the waitresses be instructed to use every possible discretion in carrying out those duties; and that the parties resume negotiations with a view to consummation of a collective bargaining agreement.

WIRE AND CABLE FACTORY WORKERS, GUELPH, ONT.—On June 16 a group of 153 workers, members of a newly organized local of the United Steelworkers of America, employed by the Federal Wire and Cable Co., Ltd., Guelph, Ont., went on strike in an effort to secure union recognition. On behalf of the Department, Mr. James Hutcheon, Provincial Conciliation Officer, Toronto, dealt with the situation. He was unable to bring about a joint meeting of the parties but secured a resumption of work on June 18 by a considerable number and the rest returned the first of the following week. The company agreed that there would be no intimidation or discrimination and that as soon as the employees were able to establish their rights under the Ontario Collective Bargaining Act, negotiations would begin immediately.

ROLLING MILL WORKERS, MONTREAL, P.Q.—On June 14 about 280 common labourers employed at Peck Rolling Mills, Montreal, P.Q., went on strike in connection with demands for an increase in pay and a cost-of-living bonus readjustment, and another group of 130 workers walked out in sympathy. Earlier, on June 1, a group of employees ceased work for one day for the same cause. Mr. R. Trepanier, Industrial Relations Officer, Montreal, visited the plant and got the employees to return to work upon condition that their case would be

reconsidered by the Regional War Labour Board.

LUMBER WORKERS, MIDDLETON, N.S.—Sixteen unorganized employees of the Middleton Milling Co. Ltd., Middleton, N.S., went on strike on June 11, 1943, to enforce demands for a wage increase of 10 cents per hour. Mr. H. R. Pettigrove communicated with the company and later reported that the employees returned to work on June 12 and agreed to submit their case to the Regional War Labour Board.

LIME AND ALABASTINE WORKERS, MONTREAL EAST, P.Q.—Claiming that the Regional War Labour Board for Quebec had "paid no attention" to their "claim" for increased wages, 72 unorganized employees of Gypsum, Lime and Alabastine Canada Limited, Montreal East, went on strike on June 14, 1943. Upon investigation, Mr. R. Trepanier, Industrial Relations Officer, Montreal, ascertained that no reference for wage adjustments covering the employees in question was before the Regional Board, and that no representations on their behalf had been made since July, 1942. This information was conveyed to the strikers and, as it was evident that some misunderstanding existed, work was resumed on June 16. The workers were informed as to the correct procedure and the Regional Board undertook to deal promptly with any application which might be made.

LOGGERS, MASSETT AND CUMSHEWA INLETS, B.C.—Demands for union recognition made on behalf of members of Local 1-71, International Woodworkers of America, upon their employer, Aero Timber Products Limited, Vancouver, B.C., occupied the attention of G. R. Currie, Industrial Relations Officer, Vancouver, during the latter part of June. The employer is a Crown Company engaged in the production of Sitka spruce for aeronautic purposes and the employees involved, numbering about 600, work in seven camps in the Massett Inlet and Cumshewa Inlet areas. The company was not prepared to accept the Union's claims that it represented a majority of the employees and took the position that it would bargain or deal with the officers of the Union with respect to any camp where it was shown to have been chosen by the majority of the employees. However, the company officials declared that a collective agreement would not be signed, maintaining that the provisions of Order in Council P.C. 10802 relating to the Crown Companies were permissive only, and not mandatory. No solution of the dispute had been found at the end of the month.

SHIPYARD PLUMBERS, ETC., MIDLAND, ONT.—A brief stoppage of work on the part of 33 pipefitters and plumbers took place at Mid-

land Shipyards Limited on June 15 because of the dismissal of a pipefitter's helper. The employees involved were members of Local Union No. 702, United Association of Plumbers and Steamfitters. On advice from Union headquarters, the men resumed work pending an investigation, which was undertaken on behalf of the Industrial Relations Branch by Mr. G. L. Fenwick, Conciliation Officer for Ontario, Toronto. The company maintained that the man in question had been discharged for insubordination. The Union claimed it was a case of "discrimination". The man had asked for a transfer to the Machine Shop and an argument arose between himself and his foreman. Mr. Fenwick succeeded in having the man returned to his former work with a promise that he would receive a transfer in the near future.

COAL MINERS, NEW VICTORIA, N.S.—Three hundred miners at No. 18 Colliery, Dominion Coal Company, New Victoria, N.S., took unauthorized strike action on June 15. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., reported that the strike was in protest against the alleged employment of foreign labour from another mine which had been temporarily closed. Work was resumed on June 17 pending an investigation by the executive of District No. 26, United Mine Workers of America.

STEEL FABRICATORS, TRENTON, N.S.—When employees of Trenton Steel Works, Limited, Trenton, N.S., objected to the adoption of a standard shift of eight hours with a lunch period of thirty minutes, it appeared that a strike was imminent and Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., investigated. Following a joint conference the company agreed to revert to a straight eight-hour shift for the duration of the labour contract and strike action was averted. The employees involved were members of Local No. 1231, United Steelworkers of America, and numbered 130 out of a working force of 3,000.

COAL MINERS, STELLARTON, N.S.—The action of the management of Albion Mine, Acadia Coal Company, Stellarton, N.S., in transferring a machine runner's helper to the coal face resulted in a strike by six machine runners and helpers on May 26 which automatically affected 46 other mine workers. The situation created a loss of about 400 tons of coal production per day, but the management was able to reduce this to 180 tons per day by using the miners indirectly affected at hand picking operations. The helper whose transfer caused the dispute had refused to follow the customary practice of operating the machine

in the event the machine runner was absent. An underlying factor in the dispute was the restoration of a differential in the wage rates of machine runners and their helpers as the result of levelling up the wages of employees of the Acadia Coal Company with those of other companies in Cape Breton. No agreement could be reached through the intervention of Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., but work was resumed on June 12 and the man in question temporarily accepted work on the coal face.

COAL MINERS, STELLARTON, N.S.—Forty underground employees at the Allan shaft of the Acadia Coal Company were refused transportation to the surface at 2.30 p.m. on June 25 because they had not completed a full eight-hour day's work. The result was a strike by the forty employees which affected a total of 285 men. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., reported that the strike was not supported by officials of the United Mine Workers of America and that all employees returned to work on June 28.

COAL MINERS, SPRINGHILL, N.S.—When 90 contract miners and 285 datal employees, members of Local No. 4514, United Mine Workers of America, employed by the Cumberland Railway and Coal Co. Ltd., Springhill, N.S., refused to work with a miner directed to the mine by National Selective Service under the compulsory transfer Order in Council, about 1,650 employees in three collieries were thrown into idleness on June 7, 1943. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., got in touch with officials of the union and the company. He reported that the men returned to work on June 10 and that the stoppage would be investigated by National Selective Service and the Executive of District No. 26, United Mine Workers of America. On June 24 some twenty contract miners employed by the Cumberland Railway and Coal Co. Ltd. discontinued work because of a lack of picks and forty datal hands went on strike "to spite the contract men." Work was resumed on June 26 after a conference between company and union representatives.

MACHINISTS, VILLE LA SALLE, P.Q.—Toward the end of May a strike of some 185 workers, members of Lodge 631, International Association of Machinists, employed by Peacock Bros. Limited, was called in protest against a decision of the Regional War Labour Board that no increase take place in the cost of living bonus being paid, for a vacation with pay, and because of the transfer of one man to another department of the plant. The man in question

gave notice of separation on being transferred and representatives of the union alleged discrimination by the company against the man for his union membership and activity. In view of the absence of Federal officers, the Director of Industrial Relations requested the intervention of the Provincial Department of Labour. Mr. Cyprien Miron, Chief Conciliation Officer for the Province, dealt with the dispute and succeeded in having the parties agree to submit the matter to an arbitrator appointed by the Dominion Department of Labour whose decision in the matter was to be final and binding. On June 1, Mr. Bernard Rose, K.C., was nominated as Arbitrator. After hearing the evidence, it was his decision that the man be reinstated in his former position. This was done, and the employees returned to work on the morning of June 2. Later in the month the employees were granted an adjustment in their cost-of-living bonus and also holidays with pay.

SHIPYARD WORKERS, NEW WESTMINSTER, B.C.—In the latter part of May, 1943, the assistance of departmental officers was requested in connection with demands for union recognition made by the Amalgamated Building Workers of Canada upon the management of Star Shipyard (Mercer's) Limited, New Westminster, B.C. During June, Mr. F. E. Harrison, western representative of the department, and Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., approached the company to find out if it would give joint consent to the taking of a vote under their supervision to ascertain the wishes of the 110 employees involved. The company pointed out that it had entered into an agreement with a committee of employees in September, 1941. Although no meetings between the committee and the management had taken place and the committee members were no longer in its employ, the company took the position that the 1941 agreement was still in force and that it could not in good faith accede to the request for a vote.

RIVER DRIVERS, NIPIGON RIVER, ONT.—Toward the end of May the department received word that driving operations on the Nipigon river had been stopped because of the refusal of twenty-five river drivers and five other workers employed by the Abitibi Power and Paper Company, Limited, to work for current wages. The stoppage of the movement of wood on this main artery of the entire Nipigon system prevented the transfer of sawlogs and pulpwood to mills at the lakehead and elsewhere, and the congestion threatened to interfere with secondary towing and driving operations on Lake Nipigon and its tributaries.

It was alleged that the action of the men resulted from the improper payment by other operators of wages in excess of the rates authorized by the wartime wages control order. The Director of Industrial Relations, Ottawa, promptly took the matter up with the officials of the Provincial Conciliation Service and Regional War Labour Board. The latter body had already made a ruling on the wage question but it had not been communicated to all parties concerned. This was at once rectified and an inspector was sent into the district by the Regional War Labour Board to investigate the wages being paid on other rivers in the same general locality. Following this action work was gradually resumed and operations fully restored by June 6.

MINING AND REFRACTORIES WORKERS, KILMAR, P.Q.—During May negotiations for a collective agreement commenced between the management of Canadian Refractories Limited, Montreal, P.Q., and the employees at its mine and processing plant at Kilmar, P.Q., members of the Magnesite Workers' Federal Union (A.F. of L.). The Montreal office of the Industrial Relations Branch was requested by the company to take steps to verify the union's claim that it represented a majority of the employees. On June 1 a vote was conducted among the 345 eligible employees under the supervision of Mr. L. Pepin, Industrial Relations Officer, Montreal. There were 302 ballots cast in favour of recognition of the union as bargaining agent and twenty against, with three spoiled ballots. Drafts of proposed agreements were then exchanged between representatives of the union and the company but the negotiations became dead-locked over the issue of the union's demand for a closed shop. At the end of the month strike action was threatened by the employees, and Mr. R. Trepanier, Industrial Relations Officer, Montreal, entered the situation to try to secure a mutually satisfactory settlement of the dispute.

LONGSHOREMEN, VANCOUVER, B.C.—On June 7, Mr. G. R. Currie, Industrial Relations Officer, Vancouver, reported that a controversy between the Vancouver Waterfront Workers' Association and the North Vancouver Longshoremen's Association had been amicably settled when the latter organization agreed to disband and have its members join the former body. The dispute had been drawn to the attention of the Vancouver representative of the department by the employer, the Shipping Federation of British Columbia, which had agreements with both organizations, and which had been advised that unless an amalgamation took place the Vancouver

Waterfront Workers' Association would refuse to work with members of the other organization.

METAL WORKERS, SCARBORO, ONT.—During June the Department was advised that on the 10th of the month the management of Metal Stampings Limited, Scarboro, Ont., entered into a collective agreement with Local No. 35, Aluminum Workers of America. The agreement was consummated following negotiations which were assisted by Mr. Louis Fine, Chief Conciliation Officer for Ontario, and Mr. H. Perkins, Industrial Relations Officer of the federal Department of Labour. Earlier a representation vote had been conducted among the employees under the supervision of Mr. Perkins. It was the first collective agreement secured by this Union in Canada.

BOILERMAKERS, ETC., VANCOUVER, B.C.—On June 23, a stoppage of work by some 550 workers, members of Local No. 1 of the Boilermakers and Iron Shipbuilders' Union of Canada, employed by the Dominion Bridge Company, Limited, took place in protest against a notice posted by a foreman. Industrial Relations Officers dealt with the situation and advised that work be resumed at once as the strike was contravening Federal statutes. The management of the company were of the opinion that the general tone of the notice was improper and, after explanations were made, work was resumed on June 24.

PAINTERS, VANCOUVER, B.C.—At midnight on June 24, 1943, a strike by 184 painters employed by three shipbuilding companies and one painting sub-contractor, engaged at the same shipyards, occurred in protest against the refusal of the National War Labour Board to approve an application for an increase in basic wage rates. Of those on strike, 70 were employed by North Van Ship Repairs Limited, 80 by Burrard Dry Dock Co., Ltd., 4 by Burrard (Vancouver) Dry Dock Co. Ltd., and 26 by J. Boshard and Son, all of Vancouver. Although the participants were members of Local No. 138, Brotherhood of Painters, Decorators and Paperhangers of America (A.F. of L.) the strike was opposed by the union officials. The cause of the dispute was the endeavour of the workmen to secure increases from 80c to 90c per hour for brush painters and from 95c to \$1.10 per hour for spray painters. The Union had signed Agreements for the duration of the war with the shipbuilding companies concerned, but contended that brush painters should nevertheless receive the basic wage recognized for other tradesmen. Its application for increases was denied by a Finding and Direction of the National War Labour Board issued on June 3,

1943. When the strike took place following a meeting of the shipyard painters on the evening of June 24, the Companies refused to negotiate with the men and took the position that, when work was resumed, they would deal only with the Union's officers. Industrial Relations Officer G. R. Currie, of Vancouver, drew to the attention of the representatives of the Painters' and other A.F. of L. Unions that the strike constituted an infraction of Federal regulations and insisted that the Union should live up to its contractual responsibilities under existing collective agreements. The striking painters met on the afternoon of June 25 and decided to return to work immediately. Normal operations were resumed at 7 p.m. that evening. On June 28, Mr. Currie met the business agent of the Union, a committee representing the painters involved, and representatives of the various employers. The situation was fully canvassed and the proposal made that the only proper course open to the workmen was to apply to the National War Labour Board in accordance with the procedure required under the Wartime Wages Control Order. The operators took the position that they would not oppose a general increase for wages and would assist the employees in securing full consideration of their case by the Board, but that they could not for various reasons support the men by way of making a joint application.

MOULDERS, ETC., HULL, P.Q.—On June 29, some 400 workers, members of Local 318, International Moulders & Foundry Workers' Union of North America, employed by the Hull Iron & Steel Foundry, ceased work in protest against a finding of the Regional War Labour Board that a uniform bonus of \$3.10 be paid by the employer. The employees had been receiving various amounts from 60 cents to \$3.10 per week and desired, before resuming work, a full cost-of-living bonus of \$4.25 per week. Industrial Relations Officers McCullagh and Wilson, of Ottawa, were assigned to the dispute and advised those on strike to return to work and make application to the Regional Board for a reconsideration of the matter or for leave to appeal to the National War Labour Board that the full bonus be paid. Work was resumed on July 5, and the Regional Board was requested to allow an appeal to the National Board.

SHIPWRIGHTS, TORONTO, ONT.—A jurisdictional dispute between rival unions organized among employees of the Toronto Shipbuilding Company, Toronto, Ont., reached a climax on June 17, 1943, when several hundred employees, members of Local No. 2999, United Steelworkers of America, congregated before

quitting time around the office of the plant superintendent and demanded that a vote be taken to establish the wishes of the employees in regard to a bargaining agency. When warned by company officials that such union activity during working hours was contrary to established company regulations, the workers declared their firm intention of repeating the demonstration the following afternoon and every day thereafter until the management complied with their wishes. The identification badge numbers of the demonstrators were noted and the next morning 289 participants were discharged without notice. Protests were immediately lodged with the Departments of Labour and of Munitions and Supply to the effect that the dismissals without seven days' notice were unjust and improper and constituted wholesale discrimination on account of union membership and activity. The company, on the other hand, took the position that it was only exercising its prerogative under National Selective Service Regulations of dismissing workers without notice for "serious misconduct." Underlying this dispute was the fact that the Toronto Shipbuilding Company had for some time had signed agreements with seven craft unions affiliated with the A.F. of L. These agreements were similar to those which had been in effect when the property had been owned by a private company whose operations were taken over by the Toronto Shipbuilding Company when the latter was created as a Crown Company. The United Steelworkers of America, an affiliate of the C.I.O., and, in Canada, of the Canadian Congress of Labour, started organizing in the yard on March 15, 1943, and from the first contended that the existing A.F. of L. unions did not represent a majority of the employees whose total is roughly 4500. On March 25 a representative of the steelworkers charged that two employees had been discharged on account of membership in that organization. Following a preliminary investigation by an Industrial Relations Officer, Mr. H. Perkins of Toronto, the Minister of Labour appointed an Industrial Disputes Inquiry Commissioner to investigate the case under the provisions of Order in Council P.C. 4020. The Commissioner reported that the Union's allegations were without foundation. On May 9 the Union made similar charges in connection with a third man but withdrew these on May 13 before a formal inquiry was conducted. The president of Local No. 2999, United Steelworkers of America, requested the Department of Labour on June 2 to supervise a vote to determine the bargaining agency desired by the employees in dealing with their employer. He was informed that

this could be arranged only if a joint application was received from all parties concerned. An attempt was then made to secure joint consent to such procedure from the company and the A.F. of L. unions, but this was not forthcoming. In the early part of June, the Steelworkers Union applied to the Department for the appointment of a Commissioner to investigate the dismissal of a man whose discharge followed threats by 130 A.F. of L. union members that they would strike unless this workman was released. No decision has yet been reached in regard to this matter. Following the incident which led to the dismissal of 289 shipwrights, attempts were made to secure their reinstatement in a body providing the union gave assurance that further demonstrations would not be held during working hours. These were unsuccessful, the company agreeing only to take back as many men as fulfilled their requirements and insisting that they apply individually to be taken on strength as new employees. The situation, which was handled locally by Mr. F. J. Ainsborough, Industrial Relations Officer, of Toronto, was then left in the hands of the Department of Munitions and Supply which controls the operations of Crown Companies. Subsequently an application to have the men reinstated was made to the local Selective Service Officer, but was disallowed. Later an appeal from the Selective Service Officers ruling was made to a Court of Referees but no decision in this regard has yet been made known. An action for reinstatement of the men brought before the Ontario Labour Court early in July was dismissed by Mr. Justice Gillanders.

Union Representation Votes

ELECTRICAL WORKERS, TORONTO, ONT.—Following application to the Ontario Department of Labour, a vote was conducted on June 23rd by joint consent of the parties under the supervision of Mr. H. Perkins, Industrial Relations Officer, Toronto, to determine whether the employees of Amalgamated Electric Corporation, Ltd., Toronto, desired to be represented in collective bargaining with their employer by a Shop Council or by Local No. 518, United Electrical, Radio and Machine Workers of America. There were 668 eligible voters, of whom 295 voted in favour of the Shop Council and 312 in favour of the Union. There were 2 spoiled ballots.

CHEMICAL FACTORY WORKERS, TORONTO, ONT.—By joint consent of the parties, a representation vote of the employees of the Dominion Tar & Chemical Company, Limited, was conducted on June 4, under the supervision of Mr. Harold Perkins, Industrial Relations Officer, Toronto. The arrangements for the vote had been made following a request of representatives of the union concerned to the Ontario Department of Labour that a vote be taken. The ballot read: "Do you want to bargain collectively with your employer through Local 174, United Gas, Coke and Chemical Workers of America, C.I.O.?" Of 60 eligible to vote, 55 voted for the union, 4 voted against, and 1 ballot was spoiled.

METAL PRODUCTS FACTORY WORKERS, WINDSOR, ONT.—By joint consent of the parties a vote was conducted on June 10, 1943, under the supervision of Mr. George Fenwick, Provincial Conciliation Officer, Toronto, among employees of L. A. Young Industries Ltd., Windsor, Ont., to ascertain the number who wanted Local No. 195, United Automobile Workers of America, to act as bargaining agency on their behalf. There were 234 eligible voters, of whom 204 cast their ballots for the Union and 12 against.

METAL FACTORY WORKERS, BRANTFORD, ONT.—By joint consent of the parties, a representation vote was conducted under governmental supervision on June 22 among employees of the Brantford Oven and Rack Co., Brantford, Ontario. Out of a total of 56 ballots cast, 41 voted in favour of being represented for collective bargaining purposes by Local No. 397, United Automobile Workers of America, and 15 in favour of the Shop Committee.

METAL WORKERS, SHERBROOKE, P.Q.—By joint consent of the parties a representation vote was conducted on June 5 to ascertain whether the employees of The Canadian Fairbanks-Morse Company, Limited, Sherbrooke, P.Q., wished United Steelworkers of America, Local 2983, to represent them as exclusive collective bargaining agent in respect of wages, hours, and all other working conditions. There were 144 eligible voters of whom 114 cast their ballots in favour of the Union and 14 voted against it, while 2 spoiled their ballots. Mr. L. Pepin, Industrial Relations Officer, Montreal, supervised the taking of the vote. Prior to the voting the Union had made application for the establishment of a Board of Conciliation and Investigation, but the Company's statement in reply revealed that it would not be necessary to resort to Board procedure.

Strikes and Lockouts in Canada During June, 1943

THE number of strikes and lockouts recorded for the month of June was greater than in the previous month. Both the number of workers involved and the time loss in man working days showed substantial increases, the time loss being more than three times as great as in May. The figures for June show 55 strikes, with 22,331 workers involved and a time loss of 140,885 days, as compared with 39 strikes in May, involving 15,351 workers and a time loss of 46,792 days. During June, 1942, there were 55 strikes, with 16,275 workers involved and a time loss of 41,593 days.

During the month under review four strikes accounted for more than 60 per cent of the workers involved. These were: two strikes in the mining industry, at Springhill and Glace Bay, N.S., and two in the shipbuilding industry, one at Prince Rupert, B.C., and the other at Quebec City and Lauzon, P.Q. Two strikes caused almost 70 per cent of the time loss, one a strike of metal factory workers at Galt, Ont., carried over from May, and the other the shipyards strike at Quebec and Lauzon.

Seven strikes, involving 1,564 workers, were carried over from May and 48 commenced during June. Of these 55 strikes, ten resulted in favour of the workers, ten in favour of the employers, four were compromise settlements and 22 were indefinite in result, work being resumed pending final settlement of each strike. At the end of the month, therefore, there were nine strikes reported as un terminated: namely three strikes of fur factory workers at Toronto, Quebec and Pointe-aux-Trembles, motor vehicles factory workers at

Hamilton, metal factory workers at Galt, foundry workers at Hull, upholsterers at Montreal, township employees in Sudbury district and waitresses at Glace Bay.

The record does not include minor strikes such as are defined in another paragraph, nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Such strikes are listed in this paragraph for a period up to one year after their removal from the table of current strikes.

The following table gives information for June and May, 1943, and June, 1942:—

Date	Number of strikes	Number of workers involved	Time loss in man working days
*June, 1943	55	22,331	140,885
*May, 1943	39	15,351	46,792
June, 1942	55	16,275	41,593

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

CORRECTION.—*Labour Gazette*, May, 1943, page 633. Strike of shipyard carpenters listed as occurring at Saint John, N.B., should have read Windsor, N.S.

Strikes and Lockouts in Canada During 1942

DURING the year, 354 strikes and lockouts were recorded as occurring in Canada. These involved 113,916 workers and resulted in a time loss of 450,202 man working days. The record for 1941 was 231 strikes which involved 87,091 workers and caused 433,914 man days of idleness. During 1942, both industrial production and employment were at the highest levels recorded up to that time. Industrial production was 28 per cent higher than in 1941 and employment 14 per cent higher while the time loss due to strikes increased four per cent. A large proportion of the strikes were of short duration and many involved a comparatively small number of workers. Two strikes, one involving motor vehicle factory workers at Windsor and the other gold miners at Kirkland Lake together involved more than 16,000 workers and caused more than 30 per cent of the total time loss. Twelve strikes involved about one-third of the workers and caused about 55 per cent of the time loss.

Strikes in manufacturing industries accounted for nearly two-thirds of the total time loss a substantial increase as compared with 1941. A great increase in time loss resulted from strikes in shipbuilding, which in recent years had been relatively unimportant. Also in the manufacture of boots and shoes, pulp and paper, and in the liquor and tobacco industries substantial increases were recorded. Strikes in mining on the other hand were of relatively less importance than in 1941, when they caused 44 per cent of the time loss or a total of 191,689 days as compared with a percentage of 28.8 in 1942, or a total of 129,529 days. Strikes in coal mining resulted in somewhat more than half of this total and most of the remainder was due to the strike of gold miners at Kirkland Lake, Ontario.

The principal cause of strikes in 1942 as is usually the case was to obtain increases in wages there being a total of 174 during the year. Forty-three strikes were for union recognition. About 30 per cent of the workers involved in all strikes were successful in their demands and about 23 per cent were partially successful while 42 per cent were unsuccessful. For the remainder of the workers the result was indefinite and one strike was terminated at the end of the year. Conciliation was an important factor in the settlement of 127 strikes during the year and negotiations in the case of 112.

Compilation of Statistics

Since its establishment toward the end of 1900 the Department of Labour has maintained a record of strikes and lockouts in

Canada, publishing in the *LABOUR GAZETTE* each month a complete list of those in progress, so far as available, with particulars as to the nature and result of each strike. In each year a review of the previous year has been given, including statistical tables analysing the data, and since 1912 including a complete list of the disputes on record during the year. As the monthly statements in the *LABOUR GAZETTE* are necessarily of a preliminary nature the annual review constitutes the revised record for the year. A special report on "Strikes and Lockouts in Canada, 1901 to 1912", issued in 1913, contained a complete list of strikes and lockouts for that period with analytical tables. The annual reviews in the *LABOUR GAZETTE* have brought the lists of strikes and lockouts and analytical tables down to date each year.

The annual review for 1930 appearing in the *LABOUR GAZETTE*, February, 1931, included summary tables back to 1901, the result of a revision of the record on the basis of the classification of industries adopted by the Dominion Bureau of Statistics and other government departments for official statistics. This classification had been used for strikes and lockouts since 1921, and it was advisable to have the record for earlier years on the same basis. Other revisions to secure uniformity throughout the whole period were also made.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical tables, therefore, strikes and lockouts are recorded together.

A strike or lockout included as such in the records of the Department, is a cessation of work involving six or more employees and lasting one working day or more. Strikes of less than one day's duration and those involving less than six employees have not been included in the published record unless a time loss of 10 days or more is caused. A separate record of such strikes involving less than 10 days' time loss is maintained in the Department.

In Tables I and X the number of employers involved is given. In strikes which involve large numbers of shops or factories, clothing, fur, furniture, etc., or building construction jobs, logging and fishing operations, etc., only the approximate number of employers is usually reported.

The figures in this report are inclusive of all strikes which come to the knowledge of the Department, and the methods taken to secure information practically preclude prob-

ability of omissions of a serious nature. As to duration of strikes, numbers of employees concerned, etc., it is not always possible to secure exact information, but the estimate made in such cases is the result of painstaking methods in the collection of data, and it is believed that the statistics indicate the conditions with reasonable precision. The estimate of time loss is reached by multiplying the number of working days during which each strike lasted by the number of employees directly involved from time to time so far as known. The number of employees recorded for each strike is the number of those directly involved, that is on strike or locked out, and does not include those indirectly affected. The figures in the tables as to workers are therefore the number of those directly involved. In recent years, when the information was available, the numbers indirectly affected, if important, have been shown in footnotes to Table X, which is a detailed list of the strikes and lockouts during the year. The workers indirectly affected in each strike are those in the establishment who are unable to continue work because of the stoppage but not participating in the strike.

Charts

The accompanying chart of the time loss in working days by groups of industries for each year back to 1901, shows that in Mining considerable time loss occurred in 1909, 1910, 1911 and 1913, and again in 1917, 1922, 1924 and 1925, while in 1932, 1934, 1937, 1939, 1940, 1941 and 1942, the time loss was greater than in the other years since 1925. In 1919 the time loss due to general strikes is shown separately. In Manufacturing considerable time loss occurred in metal manufacturing in 1919, 1920, 1937, 1941 and in 1942, in clothing (including textiles, furs, boots and shoes, leather, etc.) in 1903, 1908, 1912, 1914, 1917, 1919, 1925, 1926, 1930, 1931, 1932, 1933, 1934, 1936, 1937, 1939 and in 1940; in cigar manufacturing in 1901; in printing in 1921, 1922, 1923 and 1924; and in sawmilling in 1931 and 1932. In Construction time loss was considerable in 1912 and 1919. In Transportation, etc., there was considerable time loss in 1901, due to a strike of trackmen; in 1903 due to a strike of railway clerks and freight handlers throughout western Canada, and a strike of longshoremen at Montreal, with a sympathetic strike of teamsters; and in 1908, due to a strike of railway shop machinists. In Other Industries considerable time loss was due to strikes of fishermen in 1901, to strikes of loggers in 1919, 1920, 1933, 1934 and 1935.

From the chart showing results of the strikes it appears that the majority of employees

were successful or partially successful in 1901, 1902, 1907, 1915, 1916, 1917, 1918, 1926, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941 and 1942, but were unsuccessful in 1908, 1921 and 1923. In 1919, a large percentage of the workers who were unsuccessful were involved in the general strike at Winnipeg and in general strikes in other localities in sympathy with it.

Analysis of Statistics, 1942

Table I is a summary of the principal statistics for the period for which the record has been compiled, beginning in 1901. The table shows the number of strikes and lockouts beginning in each year, and the number in existence during the year, the difference in each case being the number carried over at the end of the previous calendar year. A small number of strikes have been carried over at the end of every year except 1903, 1929 and 1934. The approximate number of employers involved in all strikes as well as the number of workers involved and the time loss, is given. In addition to these data, the number of strikes in existence during each year in coal mining and in industries other than coal mining is given, along with the number of workers involved and the time loss. A study of the latter figures reveals that a few strikes in coal mining in some years account for a large proportion of the workers involved and for a still larger proportion of the time loss resulting.

Table II, an analysis of the 1942 record by the number of workers involved shows that slightly more than 50 per cent of the strikes and lockouts during the year involved less than 100 workers in each case. The total number of workers in these 182 strikes was only 6.4 per cent of the total in all strikes during the year and caused only 5.4 per cent of the total time loss. Twenty-five strikes or 7.5 per cent of the total, were recorded each of which involved more than 1,000 workers. These strikes together involved 55.1 per cent of the total number of workers and caused 56.7 per cent of the total time loss.

Table III, an analysis by time loss, shows that of the 354 strikes and lockouts during the year, 136 or 38.4 per cent caused a time loss of less than 100 days in each strike. In these were involved only 7.2 per cent of the numbers of workers in all strikes and the resulting time loss was only 1.1 per cent of the total time loss. Two hundred and eighty-one strikes or 79.4 per cent of the total had a time loss less than 1,000 days in each. These involved 30.3 per cent of the total number of workers in all strikes during the year while the resulting time loss was only 10.4 per cent

of the total time loss. In 67 strikes, 18.9 per cent of the total, the time loss was between 1,000 and 10,000 days. The aggregate number of man days of idleness in these stoppages was 45.6 per cent of the total. Two strikes had a time loss of more than 50,000 days each and the combined loss was 31.8 per cent of the total for all strikes and lockouts.

Table IV, an analysis by duration, shows that 281 strikes or 79.4 per cent of the total lasted less than 5 days and involved 67.8 per cent of the total number of workers and resulted in 25.9 per cent of the total time loss. Ten point seven per cent of the strikes lasted between 5 and 10 days and caused 33.4 per cent of the time loss. Thirty-two of the strikes extended to more than 10 days and resulted in 25.9 per cent of the total time loss. Of these, eight had a duration of 25 days or more and caused 6.8 per cent of the total time loss.

Table V, an analysis by Provinces, shows that the greatest number of strikes was in the province of Quebec but that the time loss in Ontario was greater than in any other province accounting for 38.1 per cent of the total. This was due mainly to two strikes involving motor vehicle factory workers at Windsor, and gold miners at Kirkland Lake, which together caused a time loss of 143,000 days. In Quebec 135 strikes resulted in a time loss of 34.5 per cent of the total due in large part to six strikes, involving workers in the boot and shoe factories, textiles, and in munitions factories. The time loss in Nova Scotia from 52 strikes was 13.3 per cent of the total mainly in coal mining while in British Columbia the time loss was 11 per cent of the total and resulted from 48 strikes the most important of which were in shipbuilding and in coal mining.

Table VI, an analysis by industries, shows that in manufacturing there were 219 strikes and lockouts which was more than 60 per cent of the total number in all industries. These involved 80,037 workers or 70.3 per cent of the total and caused 296,135 days time loss which was 65.8 per cent of the total. The largest number of strikes occurred in industries engaged in the manufacture of metal products and in shipbuilding. These included a strike of motor vehicle factory workers at Windsor, Ontario, which caused a loss of 85,000 days, and munitions workers at Cherrier, Quebec, which resulted in a loss of 8,000 days. Two strikes of workers engaged in the shipbuilding industry at Vancouver caused a loss of 16,000 days and another at Lauzon, Quebec, 6,000 days.

Forty thousand days time loss resulted from 10 strikes in the boot and shoe manufacturing

industry. Most of this was caused by three strikes involving workers in plants in the cities of Quebec and Montreal. Thirty strikes in the textile and clothing industry resulted in a loss of 25,000 days. Two thirds of this resulted from two strikes, one at Lachute and the other at Montreal.

About 17 per cent of all strikes were in mining which involved nearly 20 per cent of the workers and resulted in 28.8 per cent of the total time loss. Fifty-three strikes were recorded in coal mining and these cause 14.7 per cent of the total time loss. About one-half of the time loss in this industry was due to five strikes three of which were in Nova Scotia and two in British Columbia. Only two strikes were recorded during the year in gold mining but one of these involving 2,800 miners at Kirkland Lake, commencing in November 1941, caused a time loss in 1942 of 58,000 man working days in addition to 78,000 days lost in 1941.

Table VII, an analysis by causes and results shows, that as is usually the case the predominant cause of strikes in 1942 was for increases in wages. During the year 150 strikes were due to this cause alone. In addition 24 strikes were due to demands for increases in wages and other changes. These strikes numbering 174 involved 57 per cent of all the workers affected and caused 49 per cent of the time loss. The workers demands were obtained in about one-third of these strikes and were not obtained in about an equal number while in about one-quarter a compromise settlement was reached. The remainder were terminated or indefinite in result. The cause next in importance was for union recognition, this being the principal cause in 43 strikes during the year which resulted in a time loss of 112,538 days. The workers were successful in six of these, were unsuccessful in 18 and in 14 a compromise settlement was reached. Nine strikes were for employment of union members only and four of these were successful. Discharge of workers was the cause of 32 strikes with a loss of 44,265 days. Nine resulted in favour of the workers, seven were partially successful and 15 were unsuccessful.

Table VIII, an analysis by industries and methods of settlement, shows that in the case of 114 of the strikes involving demands for increased wages, final settlement was reached by reference to the National or a Regional War Labour Board after resumption of work was brought about by conciliation in 64 cases, by direct negotiations of the parties involved in 38 cases and in 10 cases the workers returned

pending reference to the National or a Regional Board. Of the remaining 240 strikes during the year conciliation was the method of settlement in 64 cases and negotiations in 74 others. Of the total of 354 strikes and lock-

outs during the year conciliation was an important factor in the settlement of 127 and negotiations in the case of 112. Sixty-seven were settled by return of workers, nine by reference to Boards, under the Industrial Dis-

LOSS IN MAN WORKING DAYS THROUGH STRIKES AND LOCKOUTS BY GROUPS OF INDUSTRIES EACH YEAR 1901-1942

putes Investigation Act or to an Industrial Disputes Inquiry Commissioner and 18 strikes were recorded as terminated by replacement of workers. One strike was unternminated at the end of the year.

Table IX gives an analysis by months during the past eleven years, showing the number of strikes and lockouts commencing during the month, as well as the number in existence and the number of workers involved

RESULTS OF STRIKES AND LOCKOUTS ACCORDING TO NUMBERS OF WORKERS INVOLVED EACH YEAR 1901-1942

each month, both in new strikes and in all strikes in progress with the total time loss by months.

During recent years the number of strikes in progress has tended to be lowest during the early months and the final months of the year and highest during the intervening period. In 1942, 14 strikes were in progress in January, the lowest during the year. The number increased irregularly to 68 in July and then declined to 15 in December. The number of workers involved in 1942 was greatest in

July when 21,736 were on strike but in August and November the number was nearly as great the figure for November being unusually high due to the strike of 14,000 motor vehicle factory workers at Windsor. This strike caused the time loss in November to be greater than in any other month during 1942, while in December the lowest time loss for the year was recorded.

Table X is the list of strikes and lockouts in existence during the year with details as to causes, results, dates, etc.

TABLE I—STRIKES AND LOCKOUTS IN CANADA BY YEARS, 1901-1942

Year	Number beginning during the year	Strikes and Lockouts in existence during year									
		All Industries				Coal Mining			Industries other than Coal Mining		
		Number of strikes and lockouts	Number of em- ployers	Number of workers involved	Time loss in man working days	Number of strikes and lockouts	Number of workers involved	Time loss in man working days	Number of strikes and lockouts	Number of workers involved	Time loss in man working days

Recent Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. The annual review including a table summarizing the principal statistics as to strikes and lockouts in Great Britain and other countries appears elsewhere in this issue.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August 1940, page 760.

The number of disputes beginning in April was 121 and 10 were still in progress from the previous month, making a total of 131 disputes in progress during the month; 31,900

workers were involved in the disputes in progress during the month and the time loss was 68,000 working days.

Of the 121 disputes beginning in April, 35 arose out of demands for increased wages and 39 over other wage questions; 4 on questions as to hours; 17 over questions as to employment of particular classes or persons; 21 over other questions as to working arrangements; one on a question of trade union principle; and 4 were sympathetic strikes. Final settlements were reached in 103 disputes, of which 16 were settled in favour of workers, 63 in favour of employers and 24 resulted in compromises; in 17 other disputes, work was resumed pending negotiations.

United States

The number of strikes beginning in May was 395, involving 620,000 workers in these new strikes. The time loss for all disputes in progress during the month was 1,275,000 man working days.

Strikes and Lockouts in Other Countries During 1942

THE accompanying table gives the principal figures as to strikes and lockouts in certain other countries since 1919, as compared with Canada, showing the number of disputes (strikes and lockouts), the number of employees involved in stoppages of work and the time loss in man working days. All countries for which this information was available were included in the tables published in the LABOUR GAZETTE, March, 1940, page 234. The countries included in the tables published below are restricted to those for which additional information was received since March, 1940. Throughout the year the latest available figures (including those from annual reports) for each country are given in a monthly article in the LABOUR GAZETTE.

Methods of compilation of trade dispute statistics vary greatly with various countries. In some countries figures as to strikes and lockouts are published separately, but, where possible, they have been included together in the table here given. In some cases the number of strikes and lockouts shown for a year is the number beginning during the year; in other cases it is the number ending during the year; and in still other cases it is the number in existence during the year, including those carried over from the previous year with those beginning during the year.

The figures as to the number of employees involved published by some countries show not only the number of employees directly involved, but also the number of those indirectly affected, that is thrown out of work by disputes to which they were not parties; but exact information on this point is not always given. In the table given herewith the column showing the numbers of employees involved includes figures for the numbers directly involved or the total number directly and indirectly involved according to the method adopted by the country concerned.

Footnotes to the table indicate the nature of the statistics with reference to the above points.

Many countries publish statistics dealing with trade disputes only once each year or even less frequently, the figures being issued in some cases after an interval of some length. Most countries revise their figures when additional facts are brought to light, even though such revisions may necessitate changes in statistics published a considerable time previously.

In most cases the statistics dealing with disputes in other countries published in the LABOUR GAZETTE are obtained from official publications of the countries concerned.

Great Britain

There were no outstanding disputes in 1942, the great majority of them involving only small numbers of workers. More than one-half of the time loss occurred in the coal mining industry. There were numerous disputes at individual coal mines, most of them over wages, during the first half of the year. After general increases in wage rates in coal mines had been granted as recommended by a board of investigation, the number of disputes in this industry and the number of workers involved were much less in the later months of the year. In the shipbuilding and metal industries, a strike of 20,000 workers in shipbuilding and ship repairing on Tyneside, in October, accounted for a time loss of 135,000 working days, and in the same month 9,000 workers in the engineering industry in Belfast were on a strike which resulted in a time loss of 120,000 working days.

Of the disputes beginning in 1942, 62.3 per cent were over wage questions, 3.6 per cent over hours of work, 12.7 per cent over the employment of particular classes or persons, 18 per cent over other working arrangements, rules or discipline, 1.4 per cent over trade unionism, and the remaining 2 per cent over sympathetic action or other questions. The record of the methods of settlement of disputes show that 52.7 per cent were settled by direct negotiation between the parties or their representatives, 36.1 per cent by return to work on employers' terms without negotiation, 8 per cent by conciliation, 1.8 per cent by arbitration and 1.4 per cent by other methods.

United States

Strike activity was considerably less in 1942 than in the previous year. Although the

number of strikes in 1942 was slightly more than the average for the last ten years, the number of workers involved was less than this average and the time loss was less than in any year (except 1930) for which information is available. The greatest time loss in any one industry in 1942 was in the mining industry, amounting to 515,600 man working days, the most of which was in coal mining; 463,700 man working days were lost in textile mill products industries, 304,000 man working days in wholesale and retail trade and 270,000 in the iron and steel industries. The average number of workers involved in strikes was small, the largest number in any one strike being 16,000 in the strike at textile mills at Fall River, Massachusetts, in March.

The classification of strikes by causes shows that wages and hours (chiefly demands for wage increases) were the chief causes of 47 per cent of the strikes and partly the cause of others. Union organization questions were the chief cause of 14 per cent of the strikes and partly the issue in others. Methods of settlement of disputes include 27.3 of the strikes settled directly by employers and workers or their representatives, 62 per cent settled by government officials or boards, 1.4 per cent by private conciliators or arbitrators, 9.2 per cent terminated without formal settlement and in 0.1 per cent the method was not reported.

The results of the strikes ending in 1942 show that 34.6 per cent terminated with substantial gains to workers, 34.8 per cent with partial gains or compromises, 17 per cent with little or no gains to workers; in 5.2 per cent the results were jurisdiction, rival union or faction settlements, and in the remaining 8.4 per cent the results were indeterminate or not reported.

(a) Disputes beginning in period. (b) Disputes ending in period. (c) Disputes in existence in period. (d) Method of counting disputes not stated. (e) Directly involved only. (f) Directly and indirectly involved. (g) It is not stated whether or not employees indirectly involved are included. (h) Preliminary figures. (i) Strikes only.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under the Industrial Standards Acts are summarized in separate articles following this.

Mining, Non-Ferrous Smelting and Quarrying

COPPER MOUNTAIN, B.C.—GRANBY CONSOLIDATED MINING, SMELTING AND POWER CO. LTD. AND INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS LOCAL 649 (METAL MINERS).

Agreement, reached with the assistance of an officer of the Department of Labour, is to be in effect from June 1, 1943 to May 31, 1944. The parties to meet before expiration date to discuss its renewal; the obligation of the company to do this is conditional on the majority of the employees being members of the union at that time. The company recognizes the union as exclusive representative of all its employees as long as a majority are members of the union, and union members may sign check-off for union dues, assessments, etc., to be deducted from their pay by the company and turned over to the union.

Hours: for all underground employees, eight hours "from Shifters' Office to Shifters' Office shall constitute a shift". The regular working week to be 8 hours per day, 48 per week. Provision is made for a "safety promotion committee" of employees, for labour-management committee, for seniority rights and for the settlement of disputes.

Manufacturing: Animal Foods

CALGARY, ALBERTA.—BURNS & CO. LTD. AND PACKING PLANT EMPLOYEES, LOCAL UNION No. 105.

Agreement to be in effect from May 1, 1943, to April 30, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the exclusive bargaining agency for the employees covered.

Hours: basic hours are 8 per day, 48 per week, but when necessary to exceed these, hours may be increased to 10 per day, 50 per week, for male employees and 9 per day,

48 per week for female employees at straight time rates. Overtime and all work on Sundays and holidays is payable at time and one half. Minimum hourly wage rate for regular adult male employees is 45 cents, for regular female employees and male employees under 19 years of age, 36 cents. The wage question and hours are to be referred to the Regional War Labour Board and present wage rates to remain in effect until any changes are approved by this board. Vacation: an annual vacation with pay of one week after one year's service, two weeks after five years' service, three weeks for female employees after fifteen years' service and for male employees after twenty years' service.

Provision is made for seniority rights, for vacations with pay and for the settlement of disputes.

Manufacturing: Fur and Leather Products

MONTREAL, QUEBEC.—A CERTAIN FUR DRESSING AND DYEING ESTABLISHMENT AND THE FUR DRESSERS AND DYERS UNION, MONTREAL (A.F. OF L.).

Agreement to be in effect from May 8, 1943, to October 31, 1944. Only union members to be employed, with the exception of foremen. The employer agrees to deduct union dues from wages and turn them over to the union.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Overtime is payable at time and one half. All employees working those weeks shall receive pay for Christmas Day and Labour Day. Wages: minimum wage is \$13.75 per week. During the slack period, all available work to be distributed equally among all workers of the various departments, as far as possible; arrangement is made for the adjustment of disputes.

KITCHENER, ONTARIO.—THE BRIETHAULT LEATHER CO. LTD. AND INTERNATIONAL FUR AND LEATHER WORKERS' UNION, LOCAL 300 (C.I.O.).

Agreement reached following application for a board under the Industrial Disputes Investigation Act and the subsequent withdrawal of the application, (see page 924 of this issue). Agreement to be in effect from June 1, 1943, to May 31, 1944. The company recognizes the union as the sole collective bargaining agent of the employees. No discrimination to be shown by the company or by the employees against any employee on account of union membership or activity or the lack of it.

Hours and overtime: for the day shift, 9 hours per day, 5 on Saturdays (a 50-hour week) with time and one quarter for overtime; for the night shift, 9 hours per shift, 6 nights per week, with time and one quarter for time over 9 hours in any shift or 50 hours in the week. (These hours do not apply to firemen, engineer-

ing staff or watchmen). Rest period: employees of some departments allowed a 15-minute rest period, those of other sections a 10-minute rest period in the morning. Vacation: one week's vacation with pay for employees with at least one year's service. Provision is made for seniority rights and for the settlement of disputes.

PENETANGUISHENE, ONTARIO.—THE BREITHAUPT LEATHER CO. LTD. AND SHOE AND LEATHER WORKERS ORGANIZING COMMITTEE, LOCAL 24.

Agreement reached following application for a board under the Industrial Disputes Investigation Act and the subsequent withdrawal of the application (p. 925 of this issue). Agreement to be in effect from April 29, 1943, to April 30, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the exclusive bargaining agency of the employees. All employees now members of the union shall remain union members and all new workers hired shall become union members. No discrimination by the company or the union against any employee on account of trade union membership or activity or the lack of such.

Hours: 9 per day, 6 days per week, a 54-hour week; for night shift, 10 hours per night, 6 nights per week. (These hours do not apply to firemen, engineering staff or watchmen.) Overtime is payable at time and one quarter. Rest period: all employees allowed a 10-minute rest period in the morning. Vacation: one week's annual vacation with pay for employees with one year's service.

Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Pulp, Paper and Paper Products

GEORGETOWN, ONTARIO.—ALLIANCE PAPER MILLS LTD., GEORGETOWN DIVISION, AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL 474.

Agreement reached following strike as noted in the *LABOUR GAZETTE*, April, p. 633, and mediation of an officer of the Department of Labour. Agreement to be in effect from May 1, 1943, to May 1, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the sole bargaining agency for its employees. Present employees who are union members are to retain their membership and new employees are to join the union.

Hours: for men, 10 per day, 5 days a week, a 50 hour week, except boiler room employees whose hours are 48 per week; for women, 9 per day, a 45-hour week. Overtime is payable at time and one half; work on four specified holidays, double time. Wage rates are to be those approved by the Regional War Labour Board. Vacation: one week's vacation with pay for employees with one year's service or more.

Provision is made for seniority rights and for the adjustment of grievances.

Manufacturing: Metal Products

DARTMOUTH, N.S.—CLARK RUSE AIRCRAFT LTD. AND INDUSTRIAL AIRCRAFT UNION, LOCAL No. 1 (C.C.L.).

Agreement reached following the settlement of the dispute at the plant of this company at Lakeburn, N.B. (L. G., May, p. 598). Agreement to be in effect from May 12, 1943, to May 11, 1944, and thereafter from year to year, subject to notice. The company agrees

to bargain with the union as long as the union represents a majority of employees.

Hours: 8 per day, 48 per week. Overtime is payable at time and one half; double time for all work on Sundays (or other day assigned in place of Sunday) and five specified holidays. Wages: a classification of employees and wage schedule was being prepared by the company and was to be submitted to the union and made the subject of a supplementary agreement. Employees on regular night shift to be paid time and one eighth. Arrangements are made for the recognition of seniority rights and for the adjustment of disputes.

LAKEBURN (MONCTON), N.B.—CLARK RUSE AIRCRAFT LTD. AND UNITED STEELWORKERS OF AMERICA, LOCAL 2889.

Agreement reached following an investigation of a dispute by an Industrial Disputes Inquiry Commissioner (L. G., May, p. 598). Agreement to be in effect from June 9, 1943, to June 8, 1944, and thereafter from year to year, subject to notice. The company recognizes the union and will exercise no discrimination against any employee because of union membership; the union agrees not to intimidate any employee into joining the union.

Hours: 8 per day, 48 per week. Overtime is payable at time and one half, and all work on Sundays (or other day of rest assigned) and holidays at double time. Wages: a classification of employees and wage schedule was being prepared by the company and was to be submitted to the union and made the subject of a supplementary agreement. Employees on regular night shift to be paid time and one eighth. Provision is made for seniority rights and for the settlement of disputes.

TORONTO, ONTARIO.—DE HAVILLAND AIRCRAFT OF CANADA LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 112.

Agreement reached following application for a board under the Industrial Disputes Investigation Act and its subsequent withdrawal (p. 924 of this issue). Agreement to be in effect from June 7, 1943 to June 6, 1944 and thereafter from year to year subject to notice. The company recognizes the union and will not discriminate against any employee because of his union membership or connection; the union will not coerce other employees. The company will also deal with the plant committee elected by the employees. The company and the union agree to co-operate in the establishment of a joint employer-employee production committee to advise the management and to serve as a channel for the communication of ideas and suggestions relating to production problems. Arrangements are made for seniority rights and for the settlement of disputes.

Schedules of hours, vacations with pay and wage rates and overtime are to be submitted to the Regional War Labour Board, and will form part of this agreement when this Board has rendered its decision.

WINDSOR, ONTARIO.—BORDER CITIES INDUSTRIES LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

Agreement reached following application for a board under the Industrial Disputes In-

vestigation Act, the mediation of an officer of the Department of Labour and the subsequent withdrawal of the application (see p. 924 of this issue).

Agreement to be in effect from February 2, 1943, to February 1, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the bargaining agency for members of the union and will not bargain collectively with any other agency on behalf of its hourly rated employees. Employees are free to join or not to join any union or association. No discrimination or coercion to be exercised by the company or by the union against employees on account of union membership or non-membership.

Hours: 48 per week. Overtime is payable at time and one half. Provision is made for seniority rights and for the settlement of grievances.

Transportation and Public Utilities: Electricity and Gas

TORONTO, ONTARIO.—CONSUMERS GAS COMPANY OF TORONTO AND UNITED GAS, COKE AND CHEMICAL WORKERS OF AMERICA, LOCAL 30 (C.I.O.).

Agreement reached on the basis of the recommendations of the board under the Industrial Disputes Investigation Act. (L. G., June, p. 779 and this issue p. 924). Agreement to be in effect from June 15, 1943 (wage payments as of the pay period which includes April 1, 1943) to September 30, 1944, and thereafter from year to year subject to notice. The company recognizes the union as the sole collective bargaining agency of the employees covered by the agreement. Every employee who is a member of the union at the date of signature of the agreement or who later joins the union is to maintain his membership, but every employee who is not a member and every new employee is to be free to decide whether or not to join the union. No discrimination or coercion to be exercised by the company or the union against any employee because of his membership or non-membership in the union.

Hours (which may be changed by mutual agreement) vary with the different departments: meter and commercial departments—fitters and helpers and care service, 8 per day, 4 on Saturdays, a 44 hour week, emergency crews 8 per day 48 per week (shift work); meter repair department—9 per day for 5 days, general utility man 9 per day, 5 on Saturdays, stove repairs 8 per day, 4 on Saturdays; stores and delivery departments—9 per day, 5 on Saturdays; garage and Mutual Street buildings—auto mechanics and machine shop, 9 per day, 5 on Saturdays, carpenters, painters and maintenance men 8 per day, 4 on Saturdays; miscellaneous 6 day week of 54 hours, watchman 6 nights per week; street department, 9 per day, 5 on Saturdays; meter readers, 8 per day, 4 on Saturdays; retort houses and water gas plants—8-hour shifts for 6 days per week except for cleaners, labourers, etc. who work 9 hour shifts for 6 days; conveyors—operators 8 hour

shifts in retort house section and water gas section, 9 hours in other sections, maintenance men 9 hours for 5 days per week; engine and boiler room—8 hour shifts 6 days per week except boiler maintenance room men who work 9 hours 5 days per week; truck drivers and helpers, 9 hours per week for 6 days per week; mechanical maintenance 9 hours per day for 5 days per week. Overtime is payable at time and one half; except for work regularly performed on Sundays and holidays, all work on Sundays and holidays is payable at time and one half. Holidays: all employees with six months or more service to receive pay for the six statutory holidays.

Maximum hourly basic wage rates for some classes as approved by the Regional War Labour Board; meter and commercial departments—special fitters 75 cents, fitters 60 to 70 cents, helpers 40 to 55 cents, emergency crew fitters \$36 per week, emergency crew drivers \$34, care service men \$30; meter repair department—meter repairers and testers 60 to 75 cents, helpers 40 to 55 cents, stove repairers 60 and 65 cents; stores and delivery departments—stockkeepers 65 cents, drivers 60 cents, helpers 55 and 60 cents; garage and Mutual Street buildings—sign painters, blacksmith and welder 75 cents, other tradesmen 65 and 70 cents, others 60 to 65 cents, watchman and elevator man \$29 per week; street department—caulkers, mainlayers, repairmen and service men 65 cents, labourers 50 cents, watchmen \$27.50 per week; meter readers \$22.50 to \$27.25 per week; retort houses and water gas plants—retort house operators and water gas makers 70½ cents, valve house operators 66 and 70 cents, cleaners, etc. 50 to 63½ cents, maintenance repairmen 73 cents, pipefitters 68 cents; conveyor operators 63 cents, maintenance repairmen 65 to 75 cents, maintenance machinist 80 cents; engine and boiler rooms—engineers 75 cents, firemen 65 cents, condensing house operator 57½ cents; yard—assistant in yard 63 cents, purifier house assistant 55 cents, coal unloaders 56 cents, general labourers 50 cents; truck drivers 60 cents, truck drivers' helpers 55 cents; mechanical maintenance—iron worker and welder 85 cents, machinists, blacksmiths, 80 cents, pipefitters 75 and 80 cents, carpenter 75 cents, drill hand 70 cents, tinsmith 68 cents, lathe hand 65 cents, helpers 53 to 68 cents, painters 60 cents, construction labourers 55 cents. A cost of living bonus is to be paid in conformity with existing legislation and as amended from time to time.

Vacation: one week's vacation with pay to all employees with one year or more service. Sick leave: all employees with one year or more service shall, beginning with the eighth day of disability and for a period of not more than eight weeks for one illness, or in any consecutive twelve months, receive \$15 per week, if married, and half pay not exceeding \$15 per week, if single. Eligible employees will be entitled to medical attention by a qualified practitioner appointed by the Company, for a period of not longer than nine weeks from the date of disability; medicine will also be provided for the same period. Seniority rights and grievance procedure and arbitration are also provided for.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement, the amendment of four agreements and the extension of the period of four other agreements, all of which are noted below. A request for the amendment of the agreement for building trades at Sherbrooke was published in the *Quebec Official Gazette* June 5, for the amendment of the agreements for retail stores at Quebec, in the issue of June 12, barbers and hairdressers at St. Hyacinthe, in the issue of June 19, and bakers at Quebec in the issue of June 26.

In addition, Orders in Council were published in the *Quebec Official Gazette* during June, approving or amending the constitution and by-laws of certain joint committees, and others approving the levy of assessment on the parties, or amending previous Orders in Council in this connection by certain other joint committees.

Mining, Non-ferrous Smelting and Quarrying

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.

See below under "Manufacturing: Non-Metallic Minerals, Chemicals, etc."

Manufacturing: Textiles and Clothing

CLOAK AND SUIT INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated June 9, and gazetted June 19, extends the term of this agreement (L.G., Oct., 1937, p. 1157; May, 1940, p. 496; Aug., p. 866; Nov., p. 1202; Oct., 1941, p. 1314; Aug., 1942, p. 978; Sept., p. 1097) to June 30, 1944.

84545—8½

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (UNCORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated June 12, and gazetted June 19, amends the previous Orders in Council (L.G., April, 1939, p. 528; Sept., p. 950; May, 1940, p. 496; Dec., p. 1310; April, 1941, p. 473; June, p. 704; Dec., p. 1572; Jan., 1943, p. 88). The average minimum wages of female employees, including apprentices, is raised to 26 cents in Zone I and 24 cents in Zone II (and increase of one cent); the average minimum wage for male employees, including apprentices, is 37 cents in Zone I and 35 cents in Zone II (increases of 4 cents per hour).

Manufacturing: Printing and Publishing

PRINTING TRADES, QUEBEC.

An Order in Council, dated May 31, and gazetted June 5, extends the term of this agreement (L.G., April, 1940, p. 388; Feb., 1941, p. 183; April, 1943, p. 490) to August 1, 1943.

Manufacturing: Non-Metallic Minerals, Chemicals, Etc.

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated June 9, and gazetted June 12, amends the previous Orders in Council for this industry. (L.G., July, 1940, p. 731; June, 1939, p. 628; Sept., p. 941; Feb., 1940, p. 172; Sept., 1941, p. 1159; June, 1942, p. 738; Sept., p. 1097) by changing the provisions for the payment of the cost-of-living bonus for the granite industry, making the weekly bonus \$2.25 per week, subject to variation with future changes in the cost-of-living index number.

Transportation and Public Utilities: Water Transportation

CHECKERS AND COOPERS (OCEAN NAVIGATION), MONTREAL.

An Order in Council, dated June 16, and gazetted June 19, makes obligatory the terms of a new agreement between certain steamship companies and the International Longshoremen's Association, Local 1657. Agreement to be in effect from June 19, 1943 to December 31, 1943, and thereafter from year to year, subject to notice.

Basic wage rates are 64 cents per hour for checkers, 63 cents for coopers for day work; 10 cents per hour extra for night work. A war bonus of 6 cents per hour is added to these basic rates. In addition to the basic rates and the war bonus, a cost-of-living bonus of 8 cents per hour is paid, this to be subject to adjustment with changes in the cost of living. Work performed during meal hours and all work on Sundays and three specified holidays is payable at double time. Checkers when employed temporarily as head checkers, and checkers doing office work, stowage or employed as warehousemen to receive 5 cents per hour extra.

Trade

GARAGES AND SERVICE STATIONS, MONTREAL.

See below under "Service: Custom and Repair".

*Service: Public Administration***MUNICIPAL EMPLOYEES (INSIDE SERVICES),
QUEBEC CITY.**

An Order in Council, dated June 12, and gazetted June 26, amends the previous Orders in Council for these employees (L.G., Aug., 1940, p. 868; July, 1941, p. 854; July, 1942, p. 856) by making a few minor changes in the salary scale.

**MUNICIPAL EMPLOYEES (OUTSIDE SERVICES),
QUEBEC CITY.**

An Order in Council, dated June 16, and gazetted June 26, amends the previous Orders in Council for these employees (L.G., Aug., 1940, p. 868; Oct., p. 1076; July, 1941, p. 854; July, 1942, p. 857) by increasing the hourly wage rates for drivers of rented trucks from \$1.25 to a graded scale of \$1.40 to \$1.90. The

rate of 50 cents per hour for linemen is changed to \$21.60 per week of 48 hours and entitled to overtime. Maintenance men are added at \$23 per week.

*Service: Custom and Repair***GARAGES AND SERVICE STATIONS, MONTREAL.**

An Order in Council, dated June 16, and gazetted June 19, extends the term of this agreement (L.G., Aug., 1941, p. 1013; April, 1942, p. 483; July, p. 857) to June 24, 1944.

*Service: Business and Personal***FUNERAL UNDERTAKERS, MONTREAL.**

An Order in Council, dated June 23, and gazetted June 26, extends the term of this agreement (L.G., March, 1942, p. 354; March, 1943, p. 353; May, p. 639) to July 10, 1943.

*Industrial Standards Acts, Etc.***Schedules of Wages and Hours Recently Approved by Provincial Orders
in Council in Saskatchewan and Alberta**

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such

a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies, to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and of amendments to them are given in the *LABOUR GAZETTE*, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Saskatchewan*Manufacturing: Miscellaneous Wood Products***PORTABLE SAW MILL INDUSTRY, PRINCE ALBERT**

An Order in Council, dated February 4, and gazetted February 15, makes binding on employers and employees a schedule of wages for the portable saw mill industry in the city of Prince

Albert and within five miles of it, the schedule to be in force from February 25, 1943, "during pleasure".

Minimum wage rates: employees to be paid at least 30 cents per hour or 15 per cent of the earnings of the machine, whichever is the greater. Minimum charges for cutting a cord of wood and for cutting poles are set.

Alberta*Manufacturing: Vegetable Foods***BAKERS, EDMONTON.**

An Order in Council, dated April 21, and gazetted April 30, with correction in *The Alberta Gazette* of May 15, makes binding a new schedule of wages and hours for bakers in Edmonton and within 15 miles of it, to be in effect from May 10, 1943, to May 9, 1944, and thereafter "during pleasure".

Hours: for male workers, a maximum of 10 per day, 52 per week; for female workers, a maximum of 9 per day, 48 per week. Any employee who works a minimum of 42 hours in a week to be paid the full weekly wage rate. On shifts immediately preceding a statutory holiday, two hours extra may be worked at straight time rates. Overtime is payable at time and one-half.

Minimum weekly wage rates: doughman, ovenman and bench hand, \$27.50, shipper \$21.50, truckers \$21, cake wrappers \$14, bread wrap-

pers \$17, apprentices \$12.50 to \$22, experienced salesmen \$23, inexperienced salesmen (1st three months) \$17.50, salesman owning delivery vehicle \$30. For temporary or part-time employees, 5 cents per hour over the regular rate. Re war workers, the Advisory Committee may fix a minimum rate of wages lower than these minimum rates for inexperienced male and female workers who are doing work formerly done by experienced doughmen, ovenmen and bench hands, subject to the approval of the Board of Industrial Relations, Province of Alberta, and the Regional War Labour Board for Alberta.

Holidays: employees to be allowed eight statutory holidays and to be paid for same. Vacation: one week's vacation with pay to all employees with one or more years' service. One apprentice allowed to the first three journeymen or fraction thereof and one for each two additional journeymen over the first three in any shop; apprentices to serve four years.

War Emergency Training

Enrolment in Pre-employment Classes Declines—New Plant Schools Established—Other Aspects of Program.

THE enrolment in full-time pre-employment classes showed a further decline during the month of May both in the number of men and of women. The enrolment at the end of May was the lowest since the program started. In some places in Ontario it was found impossible to recruit enough trainees to form classes and several of the schools have had to be closed. The placements from the pre-employment classes during the month of May, 1943, represented the lowest number since February of 1941. Very few additional trainees were referred to the program for training from those workers employed in non-essential occupations who were being transferred to essential employment.

The enrolment in the part-time classes showed a marked drop during the month. For the most part, these classes are held in the evening and this drop in enrolment was anticipated with the coming of summer. Most of those attending these classes are already employed in industry and are taking the part-time training at the request of their employers with a view to their promotion and upgrading.

Plant Schools

There was a slight increase in the enrolment in the plant schools during the month of May. Approval was given to 7 additional schools during this period, making a total of 91 plant schools that have operated up to May 31. Some of these, having completed their objective, have been closed. The enrolment in these schools is divided fairly evenly between men and women, with the former slightly in the majority.

Training of Foremen and Supervisors

The various forms of foremanship training proceeded satisfactorily during the month. The latest unit in the program, Job Methods Training, was put into operation and has been well received. An interesting development in the training of foremen was a request from the Department of Justice to make Job Instructor Training available for the foremen in charge of the vocational shops in the penitentiaries. An initial experiment was made at one of these institutions and was so well received that similar training is now being provided in all penitentiaries throughout the country.

Rehabilitation Training

The number of persons discharged from the Armed Forces who were referred to the program for training remained fairly stable during the month. Detailed arrangements have been worked out for training individuals in industrial establishments for those occupations for which training cannot be given adequately in any vocational school. Increasing use is also being made of private commercial schools to give types of training in various branches of commercial and office work.

Farm Training

The courses arranged in Alberta to train men in the construction of grain sweeps have been concluded. It is yet too early to say just what practical benefits will be received from these courses, but it is anticipated that use of these implements will greatly reduce the amount of manpower needed for harvesting. Co-operative plans were completed in Alberta and Saskatchewan to give some preliminary training in farm work to the older boys from the secondary schools during their vacation period. This training may be given either on selected farms for four weeks or, in the case of Alberta, may be given in special centres where the boys are given appropriate physical training as well as basic instruction in certain phases of farm work.

Classes for the Armed Forces

The total enrolment in the classes for the Navy and Army was pretty well stabilized. During the month the Army decreased the number of tradesmen under training but the enrolment for the young soldiers in various trades training classes more than made up for this reduction. The young soldiers groups, composed of boys between 17 and 18 years of age, are being given a three months preliminary course which includes almost 50 per cent academic classroom work, and three hours a day of practical work in various shops such as electrical, machine shop, wood-working, etc., to determine the type of work for which the individual is best suited. At the end of the preliminary course a ten months course of training in a specific trade will be given.

During the month training was commenced for two or three additional trades for the R.C.A.F., including instrument mechanics, electricians and metal workers.

Activities of the Unemployment Insurance Commission

Change of Policy with Respect to Unemployment Insurance Books— Insurance Registration—Claims for Benefit.

A change in policy has been adopted by the Unemployment Insurance Commission in regard to the exchange of unemployment insurance books at the end of each fiscal year. Up to this year, in order to give employers an opportunity of becoming familiar with the Act, prosecutions were not entered against those who delayed an unreasonably long time or failed to exchange the insurance books of their employees, as required by the regulations set up under the Unemployment Insurance Act, 1940.

However, it was felt this year that infractions of these regulations were no longer excusable. Prosecutions have been proceeded with therefore, in a number of centres across Canada. Several employers were convicted by local magistrates. In some instances only the minimum fines were levied, but in other cases a more serious view was taken of the offence and rather heavy penalties were imposed, with the added warning that future infringements of the regulations relating to insurance books would be subjected to even more severe punishment.

Insurance Registration

Reports from Local Offices of the Unemployment Insurance Commission showed that at July 1st, 154,562 employers with insured employees and 2,921,501 insured persons were registered.

Commencing this month, only employers with one or more insured employees have been included in totals of employers registered. Similarly, number of insured persons registered has been adjusted to eliminate persons registered under two or more insurance numbers.

Claims for Benefit

The amount paid in claims for unemployment insurance benefit during the period from April 1, 1943, to May 31, 1943, was \$270,110.84. In this period 7,261 claims were received for adjudication at the nine offices of the Commission, of which 5,374 claims were allowed, 1,367 claims were not allowed, with 520 claims pending.

An analysis of the 5,374 claims not allowed by insurance officers reveals the following reasons for non-allowance: 399 claims under Section 28 (i) in which the claimants had insufficient contributions; 74 claims under Section 28 (ii) in which 51 applications were not made in the prescribed manner, and 23 of the claimants were not unemployed; 28 claims under Section 28 (iii) in which 22 claimants were not capable of work and 6 were not available for work; 6 claims under Section 43 (a) for loss of work due to labour dispute; 9 claims under Section 43 (b) (i) for refusal of an offer of work; 6 claims under Section 43 (b) (ii) for neglect of opportunity to work;

* Cumulative figures of claims received for adjudication for the period February 1, 1942, to March 31, 1943, were published on page 653 of the May issue of the Labour Gazette. Commencing with the June issue the figures published monthly will be cumulative for the current fiscal year only.

833 claims under Section 43 (c) in which 83 were discharged due to their own misconduct, and 750 were disqualified for voluntarily leaving without just cause; 1 claim under Section 43 (d) for being under 16 years of age; 11 claims under Section 43 (f) in which 6 were in class "O" contributions and 5 for other reasons.

APPEALS AND REFERENCES

During the month of May there were 198 references and 25 appeals made by claimants to Courts of Referees. In addition there were 8 references by insurance officers to Courts

of Referees. Of the 341 cases, 253 were heard, 72 had not yet been heard at the end of the month, and 16 were withdrawn. The Courts of Referees allowed 73 claims and disallowed 180.

APPEALS TO UMPIRE

Four claimants have sought permission from the Chairman of the Courts of Referees to appeal to the Umpire under Section 58 (c) (ii). Of the four appeals, which have not yet been heard, one was made by a claimant or association on behalf of the claimant, and one by an insurance officer.

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of May, as reported by employers.

—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

This month's article shows a slight decrease in employment according to reports submitted by 13,590 establishments employing a total of 1,788,320 persons at the beginning of May—20,761 fewer than at the beginning of April. The decline took place largely in the logging, construction and manufacturing industries.

The index number of employment (based on the average for the calendar year as 100) was 178.2, as compared with 180.6 in the preceding month. A year previously at May 1, 1942, the index registered 167.4. At the outbreak of war it stood at 119.6.

Each month the same employers furnish information regarding payrolls which is incorporated in this article. The per capita average weekly wage in the industries submitting returns fell from \$31.14 at April 1 to \$30.57 at the beginning of May. The figure for May 1, 1942, was \$28.59.

Employment conditions at the end of June as reported by Employment and Selective Service Offices.—Reports from the Employment and Selective Service Offices of the Unemployment Insurance Commission give a brief survey of the employment situation in various industries at the end of June. These reports describe employment conditions in the Maritimes, Quebec, Ontario, the Prairie Provinces, and British Columbia.

Applications for employment; vacancies, and placements; May.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come

reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports of the Employment and Selective Service Offices during the four week period April 30, to May 27, 1943, showed an increase of 7 per cent in the average daily placements as compared with those of the four-week period ending April 29, and a gain of 391 per cent in comparison with the month of May, 1942. Vacancies during the four weeks numbered 283,247. There were 223,312 applications for employment and 161,245 placements were effected in regular and casual employment. The marked increase over last year was due to National Selective Service Regulations under which employers seeking workers, and persons desiring employment, must notify Employment and Selective Service Offices.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of June, 1943, the percentage of unemployment among trade union members was .7, as compared with percentages of 1.0 in May and 2.4 at the beginning of June, a year ago. The June percentage was based on returns compiled from 2,301 labour organizations with a total membership of 436,364 persons.

Annual review of employment in Canada, 1942.—A report on the industrial employment situation in Canada during 1942, prepared by the Dominion Bureau of Statistics, indicates an unprecedented expansion in employment during that period. The trend was generally favourable during nine of the twelve months, curtailment having been indicated only during the first quarter of the year; the contractions then were moderate.

The employers whose returns were included in the Dominion Bureau of Statistics' current surveys of employment and payrolls in 1942 numbered 13,081, and their staffs averaged 1,738,848 per month. At the 1942 peak at

December 1, the number in recorded employment in the eight leading industrial groups was 1,867,597, while the low figure was that of 1,651,757, reported at the first of March. From the minimum to the maximum of em-

ployment, there was an increase of 21.4 points, or practically 13 per cent, in the index. Based on the 1926 average as 100, the annual index of employment in 1942 was 173.7, or 14.1 per cent higher than the 1941 average of 152.3.

The Employment Situation at the Beginning of May, 1943, as Reported by Employers

THERE was a further recession in industrial activity at the beginning of May, when the 13,590 establishments furnishing information to the Dominion Bureau of Statistics reported the release of 23,769 persons, reducing their staffs to 1,788,320. The contraction of 1.3 p.c. is particularly noteworthy, for the reason that the general trend at May 1 in the preceding 22 years has invariably been favourable. The decline, (the second in succession), was substantial, being the largest indicated in any month since the outbreak of war, with the exception of those of a wholly seasonal character at Jan. 1 in the last four years. There was also an important reduction in the payrolls reported at the date under review, when they were lowered not only by the curtailment in employment, but also by loss of working time due to the observance of the Easter holidays by many establishments.

To a considerable extent, the shrinkage in employment at May 1 took place in logging, in which it was seasonal; the decrease of 17,100 men, however, was decidedly above-average for the time of year, no doubt reflecting the return of unusually large numbers of workers to the farms. There were also important reductions in construction and manufacturing, in both of which they were contra-seasonal; 3,936 workers were released from the former, and 7,600 from the latter. A falling-off in manufacturing in the early spring is unusual, but not unique in the 23 years for which monthly statistics of employment are available. Iron and steel, textile, tobacco and chemical factories reported the largest losses in manufacturing. On the other hand, the animal food and a few other divisions of manufacturing showed improvement; there were considerable gains in transportation and retail trade, together with smaller increases in services. Expansion in these industries is customary at the beginning of May; that in trade was greater-than-average, but in transportation and services it was below normal.

Based on the 1926 average as 100, the general index of employment at the date under review was 178.2, compared with the revised figure of 180.6 at Apr. 1, 1943. As compared

with the index of 167.4 at May 1, 1942, there was a gain of 6.5 p.c. This is the smallest increase in the 12 months' comparison in a lengthy period. The seasonally-adjusted index fell from 191.3 at Apr. 1, 1943, to 185.0 at May 1.

Payrolls

As at May 1, employment at June 1 in earlier years of the record has without exception shown important advances, the greatest gain in the 12 months ordinarily being indicated at that date. Much of the increase at the beginning of June in the period, 1921-1942, has been reported in construction and manufacturing, but the tendency in each of the main industrial groups has generally been favourable. Although the movements consequent upon the development of the industrial war effort have frequently cut across seasonal trends, it is highly probable that the next report will show a resumption of the upward course of employment.

As already stated, the decline in industrial activity at the date under review was accompanied by a relatively larger falling-off in the payrolls disbursed on or about May 1 for services rendered in the week preceding. The latest reported aggregate of salaries and wages was \$54,663,148, as compared with \$56,421,311 paid at the beginning of April; this decrease of 3.1 p.c. was partly due to the curtailment in employment, but also reflected a very general loss in working time over the Easter holidays. The per capita average fell from \$31.14 at Apr. 1, to \$30.57 at the beginning of May. The May 1, 1942, figure had been \$28.59. In the intervening period, the index number of payrolls has advanced by 12.7 p.c., accompanying the rise of 6.5 p.c. in the number in recorded employment. These gains in the 12 months' comparison are lower than any recently recorded; the increase at Apr. 1, 1943, over Apr. 1, 1942, was 18.9 p.c. in the case of the payrolls, and 9.3 p.c. in the case of employment.

The survey shows that, including the figures for financial institutions, the total number of persons in recorded employment in the nine leading industrial groups at May 1 was 1,851,-

502, as compared with 1875.318 at the beginning of April. The weekly salaries and wages paid at the latest date amounted to \$56,623,070 as compared with \$58,382,138 in the preceding period of observation. The per capita average for the nine main industries, including finance, was \$30.58, as compared with \$31.13 at the beginning of April, and \$28.65 at May 1, 1942.

Table I summaries the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the eight leading industrial cities, and gives comparisons as at Apr. 1, 1943, and May 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The report indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 16.5 p.c., while the aggregate weekly earnings of these workers are higher by 39.8 p.c. Including finance, the gain in employment from June 1,

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

1941, to May 1, 1943, amounted to 16.1 p.c., and that in payrolls, to 38.7 p.c.

From May 1, 1942, to May 1, 1943, there was an increase of 6.5 p.c. in employment in the eight industries, accompanied by that of 12.7 p.c. in the weekly payrolls. The explanation previously given for the much greater rise in the latter than in employment may again be stated:—(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the payment of a cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been increased on more than one occasion since its institution, and (3) the progressive up-grading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been granted. In spite of these main factors reacting favourably upon the earnings of the typical wage-earner, the average weekly pay envelope, as a result of the continued dilution of labour and other factors, has not shown advances commensurate with those in the index of aggregate payrolls. Thus, the latter has risen by 12.7 p.c. from May 1, 1942, while the index of per capita earnings has increased by 6.9 p.c. in the 12 months.

The influence of the war has resulted in particularly marked expansion in employment

and payrolls in factories, in which the rate of acceleration in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 32.7 p.c. from June 1, 1941, and that of payrolls has advanced by 59.9 p.c., proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater influence in the case of manufacturing.

The growth in employment and payrolls in the production of durable goods has been outstandingly large in the months for which data are available; in this class, the index of employment shows a gain of 52.4 p.c., accompanied by an increase of 87 p.c. in the salaries and wages distributed between June 1, 1941, and May 1, 1943. Although there has more recently been a slackening in some of the non-durable goods, the index number of employment in this group at May 1 was higher by 15.2 p.c. than that indicated at June 1, 1941, since when there has been an increase of 31.8 p.c. in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated

¹ Revised.

with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregate and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Employment and Payrolls by Industries

Manufacturing.—There was a decided recession in employment in manufacturing at the date under review, according to data furnished

by 7,634 establishments whose staffs aggregated 1,163,589, as compared with 1,171,189 at Apr. 1. The loss is contra-seasonal; in only three years in the period, 1921-42, had the trend at May 1 been retrogressive, declines having been reported at that date in 1921, 1932 and 1938. The expansion at the beginning of May in previous years in the war period, like that in most other months, has been exceptionally great. It is also worthy of note that the seasonal advances recorded in preceding months of 1943 have generally been less-than-normal in extent.

The latest index, at 222.9 p.c. of the 1926 average, was 0.6 p.c. lower than the revised figure of 224.3 at Apr. 1, but was 10.2 p.c.

TABLE II—EMPLOYMENT AND EARNINGS

¹ This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

higher than the May 1, 1942, index of 202.3. After adjustment for seasonal variation, the latest index was 221.2, as compared with the revised figure of 226.2 in the preceding month; the falling-off in the seasonally-corrected index was the fourth indicated since the opening of the year.

Employment in iron and steel plants was curtailed at May 1, the first interruption in an upward movement dating from the opening of 1940, and the second recession since the outbreak of hostilities. There were declines in a great many of the various divisions of the industry, the largest being in the production of firearms. Textile, tobacco and chemical factories also afforded considerably less employment, and there were losses on a smaller scale in leather, lumber, vegetable food, rubber, beverage and miscellaneous non-metallic mineral plants. The reductions in textiles were quite widely distributed among the different branches, those in the primary textile and the garment groups being largest; the general contraction in the industry as a whole was seasonal, but exceeded the average at May 1 in the experience of the years since 1920. On the other hand, improvement was indicated in the animal food, clay, glass and stone, non-ferrous metal and miscellaneous manufactured product industries, and in elec-

tric light and power. The gains in some cases, particularly in edible food factories, were seasonal in character.

A comparison of the latest statistics with those for May 1, 1942, shows a gain of 20.4 p.c. in recorded employment in the durable goods industries, accompanied by an advance of 26.5 p.c. in the reported payrolls. The expansion has largely taken place in the metal-using industries. On the other hand, employment in a number of industries in the non-durable goods class has in recent months been at a lower level than at the same date a year earlier, but in the group as a whole the comparison has until now been favourable. At May 1, however, the index of employment in the production of light manufactured goods was fractionally below its position at May 1, 1942, despite the maintenance of an exceptionally high level of employment in the chemical industries and in plants turning out miscellaneous products required in the conduct of the war. The losses mainly responsible for the slight falling-off in the non-durable goods division as a whole took place in the textile, tobacco, beverage, footwear and pulp and paper industries. In spite of its decline from May 1, 1942, employment in these industries was generally in greater volume than in earlier years of the record.

TABLE III—INDEX NUMBERS OF EMPLOYMENT BY PROVINCES AND ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

As compared with a year earlier, the May 1, 1943, payrolls in the light manufacturing classes were higher by just over four p.c.

The amounts disbursed in weekly payrolls at May 1 by the co-operating manufacturers were given as \$36,171,111; this was less by \$1,086,222, or 2.9 p.c. than the total reported

by the same firms at Apr. 1. The relatively greater production in payrolls than in employment was mainly due to the loss in working time over the Easter holidays. This factor had not entered into the situation in 1942. However, the trend of aggregate payrolls presumably would in any case have been down-

TABLE IV—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	¹ Relative Weight	May 1 1943	April 1 1943	May 1 1942

All Industries	100.0	178.2	180.6*	167.4

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

* Revised.

ward at the date under review, in consequence of the diminution in the number in recorded employment.

The index of payrolls, based on the disbursements at June 1, 1941, as 100, was 159.9. This was 16.5 p.c. higher than at May 1, 1942; over the 12 months the index of employment has risen by 10.2 p.c. The disparity in the rates of gain is less than any recently recorded; the reasons for the disparity have already been given. In the manufacturing industries, the upgrading of employees as they acquire experience is a factor of particular and growing importance, tending to counteract the effect of the large scale dilution of labour occasioned by the stringency which has developed as the industrial war effort progresses. Another factor of especially great influence in manufacturing is the changing industrial distribution of the wage-earners in recorded employment, with the increase in the proportion of workers in the more highly-paid heavy industries. Thus at May 1, 1943, this group provided employment for 56.5 p.c. of all those engaged in manufacturing, exclusive of electric light and power, while at the same date in 1942, the proportion was 51.7 p.c. Since the latest per capita average in the durable goods was \$34.25 (lowered from \$35.05 at Apr. 1 mainly by the observance of the Easter holidays) and that in the non-durable class was \$26.82 (\$27.50 at Apr. 1), the effect of the change in distribution upon the current payrolls is very evident.

From the institution of the payroll statistics early in 1941, there have been especially pronounced increases in the payrolls distributed to persons employed in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured products, electrical apparatus and tobacco industries. The advances in those industries have been accompanied by important though relatively smaller gains in employment. In practically every case, and notably in the industries just mentioned, the per capita averages in the various branches of manufacturing were considerably higher at the date under review than at May 1, 1942.

The latest per capita average weekly earnings in the various industries are published in Tables 7, 8 and 9. Many factors contribute to the differences found in these averages. Prominent among these is the sex distribution of workers in the various industries, a factor which is associated with that of age, the women workers, in general, tending to belong in the younger age groups, where earnings normally are less than among more exper-

enced employees. The presence or absence of overtime work also substantially affects the per capita average earnings.

Logging.—There was an important contraction in logging operations at May 1; the 496 co-operating companies reported 39,474 workers, a reduction of 17,100 from their staffs at Apr. 1. This loss of 30.2 p.c., has rarely been exceeded at May 1 in the years since 1920; it was considerably larger than that indicated at the same date in 1942, when the index of employment was 16.8 p.c. higher than the latest figure of 131.9. The sums disbursed in salaries and wages at May 1 amounted to \$989,258, as compared with \$1,352,869 at Apr. 1. This decrease of 26.9 p.c., was proportionately less than that noted in the number of employees. Accordingly, the per capita average showed a further rise, from \$23.91 at Apr. 1, to \$25.06 at the date under review; the May 1, 1942, figure had been \$21.30. The latest increase in the average is seasonal in character, reflecting the release of workers in the lower-paid categories. It must again be noted that the figures of aggregate and per capita earnings in logging do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings.

The decline of 16.8 p.c. in the latest index of employment as compared with May 1, 1942, was accompanied by a falling-off of 4.4 p.c. in the index of payrolls during the 12 months.

Mining.—Further losses in employment were recorded in mining; these were seasonal, but they exceeded the average May 1 in the period since 1920. Quarrying and the mining of other non-metallic minerals again showed heightened activity, but the extraction of coal and of metallic ores afforded less employment. Information furnished by 445 operators indicated a combined working force of 73,777 persons, as compared with 75,130 at the beginning of April. The index in the mining group stood at 157.8, a few points below the Apr. 1, 1943, figure of 160.6, and nine p.c. lower than that of 173.5 at May 1, 1942. This reduction was accompanied by that of 8.1 p.c. in the reported payrolls, which this year were affected by the Easter holidays. The aggregate salaries and wages disbursed at the beginning of May were given as \$2,615,870, as compared with \$2,742,822 in the preceding period of observation. The latest per capita average was \$35.46, as compared with \$36.51 at Apr. 1, 1943, and \$34.83 at May 1, 1942.

Communications.—Little general change was reported in employment in communications at the first of May; statistics were received from 59 establishments employing 27,387 men and women, as compared with 27,471 in the month before. This slight decline was contra-seasonal. The payrolls distributed at May 1 totalled \$796,575, as compared with \$782,555 in the preceding report. The per capita average advanced from \$28.49 at Apr. 1, to \$29.09 at the first of May, as compared with \$27.71 at the same date of last year. The latest index of employment, at 102.5, was slightly lower than that of 103.7 at May 1, 1942, while the index of aggregate payrolls showed a gain of 3.8 p.c. in the 12 months.

Transportation.—Continued expansion was reported in the transportation group at May 1, the co-operating companies and branches having increased their personnel by 2,923 employees to 141,023. All three branches—local, steam railway and shipping and stevedoring—shared in the upward movement. The gain in water transportation was largest. The index, at 111.7, was higher by 7.3 p.c. than that of 104.1 at May 1, 1942; this rise was accompanied by that of 10.8 p.c. in the index of payrolls. The amounts earned by the persons in recorded employment in transportation at May 1, 1943, were given as \$5,034,019, as compared with \$5,037,571 at the beginning of April. The latest per capita average was \$35.70, as against \$36.48 at Apr. 1, and \$34.49 at May 1, 1942.

Construction and Maintenance.—Further shrinkage in employment was indicated in building and railway construction and maintenance, but work on highways was brisker. Data were furnished by 1,524 contractors and branches, with an aggregate working force of 145,900 persons, as compared with 149,836 at Apr. 1. This decline of 2.6 p.c. was relatively smaller than that of five p.c. in the reported payrolls, which amounted to \$4,392,162 at May 1. The per capita average was lowered from \$30.86 in the preceding period of observation, to \$30.10 at the date under review, as compared with \$25.73 at May 1, 1942. The latest index of employment, at 115.6, was 5.8 p.c. above that of 109.3 at May 1, 1942, while the payroll index was higher by 20.2 p.c.

Services.—Moderate improvement of a seasonal character took place in services at May

1, when the 611 firms supplying statistics reported a staff of 40,770 persons, 323 more than in their last return. There were gains in laundries and dry-cleaning establishments, and in hotels and restaurants. The weekly salaries and wages paid to the persons in recorded employment at May 1 aggregated \$752,601, as compared with \$747,655 at Apr. 1. The index of employment, at 182.7, was higher by 3.6 p.c. than that of 176.3 at the beginning of May in 1942, while the index of payrolls showed a rise of 10.3 p.c. in the year. The latest per capita average was \$18.46; this differed little from that of \$18.48 at Apr. 1, but was higher than the May 1, 1942, figure of \$17.30. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 61 p.c. of the total personnel reported in the service division as a whole at the date under review.

Trade.—There was a considerable seasonal gain in the number of persons engaged in retail trade at May 1, when the improvement was slightly above-normal. The 2,228 wholesale and retail establishments furnishing information reported 156,400 employees at the date under review, as compared with 153,342 at Apr. 1. This increase of two p.c. exceeded that of 0.9 p.c. in the salaries and wages paid to those in recorded employment; these aggregated \$3,911,547, as compared with \$3,876,984 in the last report. The per capita average declined from \$25.28 at Apr. 1, to \$25.01 at the first of May, as compared with \$24.15 at the same date in 1942; the most recent figure was affected by the observance of the Easter holidays. Over the year, the index of employment has fallen by 1.1 p.c., while that of payrolls has risen by 1.9 p.c.

Financial Institutions.—Information received from 753 financial institutions showed a reduction of 47 in the number employed therein; their staffs included 63,182 men and women. The amounts earned by these persons were given as \$1,959,930, as compared with \$1,960,827 paid on or about Apr. 1. The per capita average was \$31.02 at May 1, compared with \$31.01 at Apr. 1, 1943, and \$30.11 at May 1, 1942. The index of employment in financial institutions, at 122.4, was slightly below that of 122.7 at May 1, 1942, while the index number of payrolls was higher by 2.7 p.c.

Employment Conditions at the End of June as Reported by Employment and Selective Service Offices

THE following abstract of regional summaries of reports from Local Employment and Selective Service Offices of the Unemployment Insurance Commission indicate that employment conditions across Canada at the end of June were as follows:

Maritime Region

In some districts where the season was more advanced than in others haying was at hand, and it was probable that there would be a shortage of help required to cut, cure, and carry the crop to storage. The small fruits season was expected to begin about July 5, with the marketing of strawberries, the picking to be done by girls of the farms. Where haying will not commence for two or three weeks, farmers were seeking and securing temporary work in other lines.

Generally large hauls of fish, with high prices received, have made the fishing season very profitable to date. Fish processing plants and lobster canneries were very busy and seeking more women helpers. The salmon, mackerel and sardine catches had been especially good.

With few exceptions, the winter cuts of logs had arrived at the mills, which were busy. Sawmills working on orders for overseas shipment were operating at capacity. There was a shortage of experienced men to cut and peel pulpwood. The season for cutting had been extended in order to permit the quota of cut wood to be reached.

With the extinguishing of the fire in No. 12 Colliery, Glace Bay, it was anticipated production would be resumed in a few days. The movement of former coal miners from the armed services and industry to the coal mines continued. Limestone quarries were unable to secure sufficient men to maintain normal production.

A few construction jobs were slightly behind schedule due to scarcity of labourers. There was a heavy demand for ships carpenters. It was expected that a large number of new jobs would soon be under way. The Charlottetown airport was being given increased facilities.

Manufacturers were operating at high speed, but were having difficulty in getting common labourers.

A sustained effort resulted in 100 men being sent by the employment offices of the region to help meet the shortage of freight handlers at Halifax. The C.P.R. had taken on some women to do work formerly done by men.

Hospitals, hotels and restaurants were very short of women workers; it was impossible to secure for them their normal number of workers.

Quebec Region

In Southern Quebec, haying had begun, and as elsewhere, labour to help the farmers was very scarce. Quebec city employment office found difficulty in placing students, since the farmers of that district were not ready to accept them.

Bushmen were needed in all wood cutting districts, and especially in the Lake St. John area, where cutting will be continued throughout the summer. United States operators had asked for a large number of woodsmen from Eastern Quebec. At Montreal and Campbell's Bay few men were available to supply the needs of sawmills.

The base metal mines around Rouyn and the gold mines at Val d'Or required many men. Production at Quebec's gold mines was down to 50 per cent of 1940 output. At Thetford Mines the asbestos and chrome mines were experiencing a general shortage of miners.

Sewing machine operators were badly needed in Montreal, Granby and Valleyfield. Some textile firms in St. Hyacinthe and Farnham had given most of their employees a week's vacation with pay. Montreal reported a dwindling supply of women for war plants, and a grave labour shortage in packing houses, copper refineries, and brass and steel mills. At Arvida the need for pot men in the aluminum refinery was pressing.

Construction at the Naval Signal School barracks in St. Hyacinthe, was under way; the cost of the undertaking will be at least \$1,800,000. Lodging 5,000 sailors in this barracks was forcing St. Hyacinthe to enter on a water supply and sewer plan which will cost \$187,000.

Transportation facilities were operating to capacity. Coal truck drivers and railway truckers were needed in Montreal.

The serious shortage of women workers for hospitals and hotels had not been relieved.

Ontario Region

Saving a very heavy crop of hay was in general progress throughout Ontario and it had created a heavy demand for farm labour. The farm workers from the Prairies had helped considerably but more were needed; lads 14 to 18 were engaged in some districts. A few districts reported enough

farm labour, but generally there was an acute shortage.

Around Kapuskasing operators were working with skeleton crews, owing to the scarcity of loggers. Perth needed cordwood cutters, and a large number of pulpwood cutters were wanted at Sault Ste. Marie. The flies were keeping men away from forestry work around Sudbury, where the demand for men was steady.

Every mining district in the region presented a demand for skilled and unskilled underground labour.

For the textile industry weavers, spinners and knitters were in general and urgent demand. Students had been taken into the pulp mill at Kapuskasing and into paper products plants at Brantford. Skilled mechanics, in almost every line, were required in nearly all manufacturing centres. At Sault Ste. Marie, where labourers were scarce, husky school boys were being employed. The canning factories, by use of full time and part-time employees, seemed to be able to take care of the early fruit crops. Wood workers for aircraft plants were needed in Stratford and Brantford.

Construction work was calling for great numbers of labourers; 400 were needed at Kingston. Toronto, Hamilton and Niagara Falls were seeking carpenters and painters.

There was an increasing demand for seamen at Toronto. Bus and truck drivers were also required. Maintenance men and labourers for extra gangs were asked for by the railways.

Owing to lack of help some hotels and restaurants had closed; there was an acute shortage of waitresses, cooks and kitchen help. Laundries, offices, and retail stores were badly in need of women workers.

Prairie Region

Haying was in full swing on the Prairies. There was a good crop, but there was a scarcity of labourers. Dairy farmers were still very short handed. Grain crops were in a healthy condition. Many beet workers were available. Around Medicine Hat farmers in the drought areas refused to work for farmers in the irrigated areas.

The shortage of labour for logging was so severe that timber operators were switching from pulpwood cutting to fuel wood cutting, and many more men were needed to fill the orders for this work. Sawmills seemed to be getting along satisfactorily. Fort Frances reported the largest shipments of fish in its history, with consignments to Eastern Canada and United States ports.

Operations at Steep Rock were expanding rapidly, and there was need for more

labourers. Miners applying for work were directed to base metal mines. Coal mines were in need of muckers, trimmers, and surfacemen. School teachers and students were getting summer employment at the Hudson Bay and Sherritt Gordon Mines. Turner Valley required many derrick men and labourers. Canadian Car and Foundry Company's Fort William airplane building schedule was to be stepped up. An additional 1,200 men will be required by the end of September. Pulp and paper mills, and ship builders needed skilled and unskilled labour. Regina's industries were operating five days a week. Many school boys had found work in flour mills and packing plants.

Construction projects in Manitoba were progressing slowly. Alberta needed carpenters, plasterers and painters. At Dawson Creek the highway contractors needed operators, mechanics, cooks and labourers.

It was difficult to fill the demands for railway firemen. At Fort William women were employed on track work and in the roundhouse.

Hotels and restaurants were short of women workers. Hospitals had been given some help. At Banff and Lake Louise many students had been employed.

Pacific Region

The hay crop had matured, and had been harvested, the farmers doing a fine job in spite of the scarcity of labourers. The yield of strawberries was only 25 per cent of normal production, but raspberries and cherries were coming to the markets and good yields were in prospect. Preparations for fruit canning had been made. The acute shortage of dairy farm help was causing many farmers to consider a reduction in the size of their herds.

Orders for loggers in the coastal areas had increased and there was little relief in sight. A number of logging camps closed down for Dominion Day and for a following period of from six to ten days; many of the men were given temporary work locally pending the re-opening of the camps. The shortage of loggers in the interior remained acute, despite transfers-in, and the employment of Japanese. Many Japanese were employed cutting fuel wood.

The demand for sawmill and shingle mill workers was reduced in the Vancouver area by the employment of students, but continued to be heavy in other areas. Chinese employed in shingle mills, and who were maintaining wives in China were puzzled when told that the Federal Income Tax Department classed them as single men.

courses. The ratio of vacancies to each 100 applications being 126.8 during the four weeks ending May 27th, in contrast to 116.5 during the previous four weeks and 93.4 during the month of May, 1942. The ratio of placements to each 100 applications during the period under review was 72.2 compared with 70.1

for the four weeks April 2nd, to April 29th, 1943, and 60.6 during May last year.

The average number of vacancies reported daily by employers to the Employment and Selective Service Offices throughout Canada during the four weeks April 30th, to May 27th, 1943, was 11,801 as compared with 10,435

during the preceding four weeks and with 2,111 during the month of May a year ago. The average number of applications for employment received daily by the offices during the period under review was 9,304 in comparison with 8,957 during the previous period and with 2,260 during May, 1942. The average number of placements made daily by the offices during the four weeks ending May 27th, 1943, was 6,718, of which 6,539 were in regular employment and 179 in work of one week's duration or less, as compared with a total daily average of 6,277 during the previous four weeks. Placements during the month of May last year averaged 1,368 daily, consisting of 968 placements in regular and 400 in casual employment.

During the period April 30th, to May 27th, 1943, the offices referred 220,270 persons to vacancies and effected a total of 161,245 placements. Of these, the placements in regular employment were 156,946 comprised of 106,351 males and 50,595 females, while placements in casual work totalled 4,299. The number of vacancies reported by employers was 196,238 for men and 87,009 for women, a total of 283,247, while applications for work numbered 223,312, of which 145,140 were from men

and 78,172 from women. Reports for the previous four weeks, April 2nd, to April 29th, 1943, showed 240,025 positions available, 206,022 applications made and 144,373 placements effected, while in May, 1942, there were recorded 52,759 vacancies, 56,475 applications for work and 34,200 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year from January 1933, to date:—

Year	Placements		
	Regular	Casual	Totals
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450

1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943 (21 weeks).....	731,788	26,137	757,925

Owing to a change in the industrial classification of industries, the usual analysis of vacancies and placements by industries was not available at time of going to press.

Unemployment in Trade Unions at the Close of May, 1943

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are sick or engaged at work outside their own trades are not counted as unemployed, while reports from unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference, only to the organizations reporting.

Reports were tabulated for May from 2,301 labour organizations, in which the combined membership was 436,364 persons, of whom, 3,036, or a percentage of .7, were unemployed, in a large measure temporarily, in comparison with percentages of 1.0 in April and 2.4 in May, a year ago. The moderately higher employment level for the month under review, was due principally to an appreciable increase in work afforded union members in the building and construction trades, as the unemployment percentage among these workers was down from 5.1 to 2.6. In addition to this betterment, the percentages of unemployed members in the manufacturing and transpor-

tation industries were slightly lower also at .4 and .7, respectively. These improvements were offset slightly, by the decline in work for lumber workers and loggers; the unemployment percentage among these workers was up from full employment to .9. The Dominion unemployment percentage of .7 in May was the lowest for any corresponding month in trade union records and the lowest, also, for any month since October, when the same percentage was recorded.

In table I are shown the unemployment percentages by provinces. At the end of May, these figures ranged from .2 per cent in Nova Scotia and British Columbia to 1.3 per cent in Quebec. Less than one per cent was reported as unemployed in every province excepting New Brunswick and Quebec. In comparison with April, an appreciably higher employment level was observed in Ontario, while with the exception of Alberta, where there was a very minor employment contraction, as the percentage was up from .8 to .9 per cent, each of the other provinces reflected a slight increase in available work. In comparison with the situation in May, a year ago, pronounced expansions in work were observed in Ontario, Manitoba and Al-

berta. Noteworthy increases occurred also in Quebec and British Columbia; while in New Brunswick and Saskatchewan, there were moderate employment advances, only.

A separate compilation is made each month of unemployment among trade unions in the largest city in each province, with the exception of Prince Edward Island. At the close of May, these percentages ranged from .2 in Vancouver to 1.4 in Edmonton. Every city with the exceptions of Montreal, Winnipeg and Edmonton indicated that less than one per cent of the members was unemployed. In comparison with the situation in April, the employment level in Toronto was substantially higher, as the percentage declined from .8 to .3. In Halifax, Montreal, Winnipeg, Regina and Vancouver the unemployment

The level of the curve in May continued in a downward direction, as conditions improved moderately over April. The point of the curve was at a substantially lower level than in May, a year ago, thus reflecting a noteworthy employment expansion.

For the manufacturing industries, 816 reports were tabulated having a combined membership of 239,806 persons, of whom, 1,066 or a percentage of .4 were unemployed, as compared with percentages of .5 in April and 1.9 in May, 1942. In comparison with the previous month, employment levels for wood and garment workers were appreciably higher, as these percentages of unemployment stood at 1.3 and .3 respectively. The percentages for union members in the printing and iron and steel trades were .5 and .1, respectively;

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

percentages stood at .3, 1.2, 1.0, .4, and .2, respectively; each of these reflected a favourable tendency, also. In Saint John the percentage remained unchanged at .9, while on the other hand, a moderately lower employment level prevailed in Edmonton, as the percentage of those without work was up from .3 to 1.4. As compared with conditions in May, 1942, much higher employment levels were observed in Toronto, Winnipeg and Regina and to a somewhat lesser degree in Vancouver, Montreal and Halifax, while in Edmonton the percentage was reduced moderately from 2.2 to 1.4. On the other hand, the percentage of those without work in Saint John was up slightly from .6 to .9.

The accompanying chart shows the trend of unemployment from January, 1938, to date.

each of these reflected slightly better conditions, while among the smaller organizations, unclassified manufacturing workers indicated a minor increase in work, also, as the percentage declined from 3.8 to 3.2. Among the organizations in which there was no unemployment reported at either date, were cigar and tobacco workers, textile and carpet workers, butchers, meat and fish packers, rubber, jewellery, aluminum, mineral products and chemical products workers. A tendency toward slightly reduced activity was apparent for soft drink workers, bakers and confectioners, electric current employees, etc.; fur workers and members in clay, glass and stone products; very little unemployment was observed in any of these trades. The percentage of those out of work among hat, cap and glove workers and

metal polishers, etc., remained unchanged at .1. On the other hand employment for paper-makers declined to a moderately lower level, as the unemployment percentage was up from .6 to 1.8. As compared with conditions in May, a year ago, much higher employment levels were observed for union members in the printing, garment and iron and steel trades, as the percentages of those without work declined from 1.9, 3.6, 1.5 to .5, .3 and .1, respectively. Among the smaller organizations, workers in chemical products and unclassified manufacturing industries, reflected impressive percentage improvements. On the other hand, employment decreased for wood-workers and papermakers, as these percentages were up from .2 to 1.3 and .5 to 1.8 respectively.

Reports were tabulated from 59 unions of coal miners, whose total membership was 20,006 persons. Of these, 19, or a percentage of .1 were unemployed. This percentage remained unchanged from April, while that of May, a year ago, was 3.8. In comparison with April conditions, union members in Nova Scotia, New Brunswick and British Columbia were fully employed at both dates, while the percentage of those without work in Alberta remained, as in April, at .3. As compared with May, 1942, employment for Alberta members was greatly expanded, as the unemployment percentage declined from 9.3 to .3, while full employment prevailed in Nova Scotia and British Columbia, as compared with unemployment percentages of 2.2 and .2 respectively, in these provinces, a year ago; in New Brunswick, no unemployment was reported in either period.

For the metallic ores group, 4 unions were tabulated having a combined membership of 10,324 persons. Of these, 14, or a percentage of .1 were without work as compared with full employment both in April, 1943, and in May, a year ago.

Returns were received from eight unions of non-metallic mineral workers having a total membership of 3,608 persons, of whom, 100, or a percentage of 2.8 were unemployed, in comparison with percentages of 3.7 in April and 4.8 in May, a year ago.

Unions in the building and construction trades returned 209 reports with an aggregate membership of 34,721 persons, of whom 912, or a percentage of 2.6 were unemployed, in comparison with percentages of 5.1 in April and 8.4 in May, 1942. As compared with the situation in April, substantially higher employment levels were apparent among bricklayers, masons and plasterers, carpenters and joiners and hod carriers and unclassified building workers, as these unemployment percen-

tages were 8.9, 2.6 and .5, respectively, while the corresponding figures in April stood at 12.8, 5.7 and 4.5. Among plumbers and steamfitters and bridge and structural iron workers, there were moderate increases in available work; not much unemployment prevailed for the members in these trades. Electrical workers were fully employed, in comparison with the percentage of .1, reported as out of work in April, while organizations with smaller memberships, such as steam shovel men and granite and stonecutters, recorded minor improvements, also. Wood, wire and metal lathers did not report any unemployment at either date, while for painters, decorators and paperhangers the unemployment percentage remained unchanged at .3. As compared with conditions in May, 1942, bricklayers, masons and plasterers, carpenters and joiners, painters, decorators and paperhangers, plumbers and steamfitters and hod carriers and unclassified building workers were much better employed. Among the groups with smaller memberships, granite and stonecutters and wood, wire and metal lathers registered im-

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

May 1943.....	.2	1.2	1.3	.4	.8	.6	.9	.2	.7

pressive employment expansions; not many members were involved, however, in these changes.

In the transportation industries, 885 reports were tabulated with a total membership of 85,131 persons. Of these, 610 or a percentage of .7 were out of work, in comparison with percentages of .9 in April and 1.3 in May, a year ago. In comparison with April, the steam railway division (see table II), in which is included over 79 per cent of the entire group membership, reflected a slightly higher employment level. Navigation workers were much better employed, as the percentage of those without work declined from 4.5 to 1.5. On the other hand, although there was very little unemployment, the situation for teamsters and chauffeurs showed a minor recession in available work, while that of street and electric railway employees remained unchanged. As compared with conditions in May, 1942, the employment level for steam railway employees was moderately higher, while for navigation workers the change was substantially the same as that shown in the previous comparison. The percentage of unemployment among street and electric railway employees was identical with that of May, a year ago, while for teamsters and chauffeurs the employment level declined slightly, as the percentage was up from .8 to 1.1.

For the retail and wholesale trades, reports were received from 9 unions with a total membership of 2,221 persons, all of whom were employed, as in the preceding month and in May, 1942.

For unions of civic employees there were 108 returns tabulated, having 11,009 members of whom 4, or less than .1 per cent were without work, in comparison with the percentage of .1 as shown in both the preceding month and in May, a year ago.

In the miscellaneous group of occupations returns were received from 141 unions with a

combined membership of 12,507 persons, of whom, 156, or a percentage of 1.2, were without employment, in comparison with percentages of 1.7, in April and 1.0 in May, a year ago. The employment level was appreciably higher than that of the previous month for stationary engineers and firemen, as the percentage of those without work was down from 1.2 to .5. Slightly better conditions prevailed also, for hotel and restaurant, theatre and stage employees and barbers, while on the other hand, employment for unclassified workers was very slightly contracted. In comparison with conditions in May, 1942, stationary engineers and firemen registered about the same employment increase as that shown in the previous comparison, while among theatre and stage employees and barbers, the unemployment percentages of 2.5 and .4 remained unchanged; among unclassified workers, on the other hand, there was a slight contraction in available work.

Returns were received from 2 unions of fishermen having a total membership of 2,775 persons. Of these, 2, or a percentage of .1 were without work in comparison with full employment in the preceding month and 6.0 per cent reported as without work in May, a year ago.

Reports were tabulated from 4 unions of lumber workers and loggers, having a total membership of 4,438 persons. Of these, 41, or a percentage of .9 were without work. There was no unemployment reported in April, while in May, a year ago, the percentage of those without work was 3.9.

Table I shows by provinces the average percentage of union members, who were unemployed each year from 1932 to 1942, inclusive, and also the percentage of unemployment for May of each year from 1932 to 1941, inclusive and from May, 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in Table I.

Annual Review of Employment in Canada, 1942

Report of Dominion Bureau of Statistics Indicates Unprecedented Expansion in Industrial Employment

IN its annual review of employment in Canada, 1942, the Dominion Bureau of Statistics reports that employment reached unprecedentedly high levels. The trend was generally favourable during nine of the twelve months, curtailment having been indicated only during the first quarter of the year; the contractions then were moderate. The extent of the general upswing, however, was not equal to that reported in the earlier phases of the

expansive movement, which, dating from the outbreak of hostilities, had received great impetus from the events of the spring and early summer of 1940, climaxed by the collapse of France. This slowing down in the rate of acceleration during 1942 was an obvious development in view of the magnitude of the expansion since the beginning of the war, with its consequent depletion of the labour market, seriously affected also by the recruitment of

some 600,000 persons by the armed forces. In the 1942 stage of the war, the distribution of the workers taken on differed from that indicated in preceding phases. As shortages of labour and materials became increasingly a problem in industrial organization, the shift of workers from the less-essential to the more-essential production and services assumed an ever-growing importance in the industrial pattern—a transfer which in general was facilitated by relatively high earnings in war plants and other essential industries.

The employers whose returns were included in the Dominion Bureau of Statistics' current surveys of employment and payrolls in 1942 numbered 13,081,* and their staffs averaged 1,738,848 per month. In the preceding year, statistics had been received from some 12,589 firms, with an average of 1,514,953 employees. At the 1942 peak at December 1, the number in recorded employment in the eight leading industrial groups was 1,867,597, while the low figure was that of 1,651,757, reported at the first of March. From the minimum to the maximum of employment, there was an increase of 21.4 points, or practically 13 per cent, in the index; in 1941, the gain from the low at January 1 to the high at December 1 had amounted to 34.6 points, or almost 26 per cent. Based on the 1926 average as 100, the annual index of employment in 1942 was 173.7, or 14.1 per cent higher than the 1941 average of 152.3, and 57.2 per cent higher than in 1939, which for practical purposes, may be regarded as the last year on a peace-time economy.

Payrolls

The distribution of the employees and the payrolls reported by firms in the various areas and the leading industrial groups in 1942, was fairly equable, on the whole; in general, the variations reported in the proportions of employees and payrolls in the different provinces and cities were partly due to the industrial distribution of employees within the given unit of population. The sex and age distributions also had an important influence, while the question of overtime and short time likewise entered into the picture. The incidence of labour disputes in industries with relatively large payrolls in a province or city may also

contribute to the disparities which may be shown; an example of this is found in the case of Nova Scotia, where disputes in the coal-mining areas lowered the provincial payrolls on several occasions in the period of observation.

In the cities whose returns are segregated, the greatest disparity in the proportions of employees and payrolls in 1942 was in Windsor, where the co-operating establishments provided work, on the average, for 2.2 per cent of the total employees, and disbursed three per cent of the aggregate earnings. The eight cities taken as a unit paid out 45 per cent of the reported Dominion total of payrolls, while the employees therein constituted 44 per cent of the total number of persons in recorded employment in 1942. The weekly per capita earnings in the eight cities in the year under review averaged \$29.27, as compared with the Canada average of \$28.56; in view of the higher rents and other living costs usually found in the larger centres of population, the differences in the averages is perhaps less than would be expected.

The fact that manufacturers, with 61.9 per cent of the reported total of employees in 1942, distributed 63.2 per cent of the aggregate of salaries and wages, is partly due to the concentration presently existing in the heavy industries, in which there is also a considerable amount of overtime work. This class employed 32 per cent of the total personnel, and paid 36.2 per cent of the reported payrolls in 1942; in 1939, the employers in the heavy manufacturing industries reported 20.4 per cent of the total working force. In mining and transportation, the payrolls were disproportionately large in relation to the number of workers, partly because of generally high wage rates, associated also with the employment of predominantly male staffs, together with a good deal of overtime work. On the contrary, in logging, construction, services and trade, the employees in 1942 earned disproportionately small shares of the aggregate payrolls. In the last two, the majority of the reported staffs are females, which ordinarily implies many workers in the younger age classes, while there is frequently a considerable proportion of part-time work. In logging and services, the payrolls reported do not include the value of board and lodging, in many cases part of the remuneration of workers in these industries. Still another factor in the case of logging, is the seasonal nature of the work, and a particularly high rate of labour turnover. These factors also affected construction, in which the employees constituted 9.4 per cent of the total wage-earners reported in 1942, but their payrolls made up only 8.8 per cent of the Dominion aggregate. Another reason

* In addition, information was furnished by financial institutions, for which the general record commenced in 1940; including the data for such organizations, the reports tabulated monthly in 1942 aggregated 166,071, a monthly average of 13,839; their employees averaged 1,802,320. The weekly payrolls of these persons averaged \$51,634,595, a per capita figure of \$28.65. In 1941, the reporting firms in the nine leading industries—manufacturing, logging, mining, communications, transportation, construction and maintenance and services, trade and finance, had numbered 13,440, whose staffs had averaged 1,575,972.

contributing to the disparity is the intermittent nature of the work, dependent upon weather conditions and upon available supplies of materials, while the fact that workers on highway and railway construction and maintenance are usually paid at rates below the general average in industry, also lowered the proportion of the payrolls. In 1942, these two groups employed 58.2 per cent of the total number in construction as a whole. In communications, the ratios coincided, the industry employing 1.6 per cent of the personnel of all co-operating establishments in the eight leading industries, and reporting 1.6 per cent of their disbursements in salaries and wages.

Employment in Provinces and Cities

Employment in all provinces except Prince Edward Island was in greater volume in 1942 than in 1941 or any earlier year. The growth was generally less pronounced than in 1941 or 1940, but was nevertheless considerable in most provinces. The increases ranged from that of 2.4 per cent in Saskatchewan and 8.2 per cent in Manitoba, to 18 per cent in Quebec and 21.5 per cent in British Columbia. The magnitude of the gains was, of course, mainly dependent upon the industrial distribution within the area. In all provinces, the increases in the payrolls disbursed by the co-operating firms were relatively greater than those in the number of employees, so that, despite considerable dilution of labour, the general per capita weekly average earnings in all provinces were substantially higher in 1942 than in the period for which information was available in 1941.

Manufacturing on the whole in each of the provinces reached new peaks of activity in the year under review. The gains in iron and steel and other heavy industries were very widely distributed, while the light manufacturing groups in some areas showed curtailment towards the latter part of the year, largely as a result of shortages of labour, and in some cases, of materials. Among the non-manufacturing industries, employment in mining was generally in smaller volume in 1942 than in the year before. Transportation and communications were active. Trade and services provided work for considerably more persons in the earlier part of the year, but in the latter months, the growing shortage of labour made increasingly difficult the maintenance of staffs at full strength, and there was consequently a diminution in the volume of employment afforded in certain cases, while in others, seasonal expansion was below normal in extent.

For many years, statistics have been segregated for the eight leading industrial centres—Montreal, Quebec, Toronto, Ottawa, Hamilton,

Windsor, Winnipeg and Vancouver. During the year under review, as in 1941, activity in these centres as a unit was accelerated more rapidly than in the Dominion as a whole, although the rate was not equal to that of the year before. The composite index for the cities rose from 149.0 in 1941, to 177.7 in 1942, or by 19.3 per cent; in the smaller centres and rural areas in the Dominion, there was an increase of 10.1 per cent, while the general gain in Canada as a whole was 14.1 per cent. In 1941, there had been an advance of 22.6 per cent in the Dominion, resulting from a rise of 25.3 per cent in the larger cities and of 21 per cent in the smaller centres and the rural areas. Agriculture is of course excluded in all cases from the monthly surveys. This is the first year in the decade in which employment in the cities as a unit reached a higher level in relation to the 1926 average, than was recorded in the other parts of Canada. The cities' index in 1942 was 177.7, four points higher than that of 173.7 in the Dominion as a whole.

The index number of employment in manufacturing in the eight leading cities taken as a unit averaged 213.0 in 1942, as compared with 206.5 in Canada as a whole. As compared with 1941, there was an increase of 27.2 per cent in employment in manufacturing in the cities, as compared with 22.6 per cent in the Dominion as a whole. Employment in many industrial groups also showed more rapid expansion in the larger centres during the year under review than was elsewhere recorded.

During 1942, approximately 52 per cent of the persons in recorded employment in manufacturing in the Dominion belonged in the eight leading cities, a proportion slightly exceeding that of 51 per cent in 1941. Another fact which may be of interest in this connection is that the number of females in manufacturing in the eight leading cities at October 1, 1942, constituted 59.8 per cent of the Dominion total for the manufacturing group as reported by the firms making returns. Trade, services and communications in the cities also reported disproportionately large percentages of the total number of persons reported by the co-operating firms in these industries, together with even larger proportions of the total female employees.

Employment by Industries

Geographically, the expansion in industrial activity in the year under review was widely distributed. Except Prince Edward Island, all provinces reported considerable gains, while employment in the eight leading cities for which data are segregated generally increased in greater-than-average proportion. Industri-

ally, the advance was, in general, confined to a relatively smaller number of groups than in recently preceding years. Employment in the manufacture of durable goods rose by 32.6 per cent in 1942, whereas that in the production of non-durable goods increased by only 14.1 per cent. Within the latter, the gain took place to an important extent in chemical works and in plants turning out miscellaneous products, largely manufactured for the war. The relatively small advances which were indicated in the other "light" manufacturing industries in the year under review as compared with 1941, took place mainly in the earlier months; as the year progressed, activity in many instances was at a lower level than in the latter months of 1941. This situation resulted in some instances from curtailment of employment, and in others, from inability to increase staffs in accordance with the usual movements indicated in recent years. Employment in trade generally showed curtailment from 1941, the declines developing as the year advanced. In transportation, communications, construction and maintenance and services, the volume of employment was greater in 1942 than in 1941; in the last-named, the latest annual index was the highest in the record. In construction and communications, the favourable comparison goes back to 1931, while recorded employment in transportation was more active than in any other year since 1929.

Sex Distribution of Persons in Recorded Employment at October 1, 1942

Problems arising from wartime labour conditions emphasized the need for information respecting the sex distribution of the persons employed by the co-operating establishments, whose working forces generally comprise the great majority of wage-earners in the industries included in the surveys. Accordingly, the monthly enquiry for October 1, 1942, was extended to ask for a statement of the number of females then on the payrolls of the firms furnishing data.

The survey showed that in the nine leading industries, (manufacturing, logging, mining, communications, transportation, construction and maintenance, services, trade and finance), were employed 441,156 women, a number which constituted 23.5 per cent of the total of 1,879,845 persons of both sexes in recorded employment at the beginning of October. The proportions of female workers varied from 13.3 per cent in the Maritime Provinces and 16.5 per cent in British Columbia, to 26.7 per cent in Ontario, where 208,200 of the indicated employees were women. This number made up over 47 per cent of the total females in

recorded employment in the Dominion at October 1, 1942.

The statistics also revealed a marked concentration of female workers in the larger cities, the eight centres for which data are regularly tabulated accounting for almost 60 per cent of the total number employed by the establishments reporting throughout the Dominion; this proportion is very much higher than that of 45.1 per cent at October 1, 1942, for workers of both sexes. The ratio of female workers was highest in Ottawa and Toronto, where they constituted 37.2 per cent and 36.6 per cent, respectively, of the totals in the nine main industrial groups. In Montreal, the percentage was 31.7. In Vancouver and Windsor, on the other hand, the proportions were below average, 21.3 per cent of the total reported in the former being women and girls, while in Windsor the ratio was only 14.9 per cent.

In the manufacturing division, the proportion of female workers was 25.7 per cent; when central electric stations are excluded from manufacturing, the ratio rises to 26 per cent. These figures may be compared with that of 21.8 per cent according to the Annual Census in Industry for 1940 and 22.6 per cent in 1941; in the former the proportion was not altered by the inclusion of data for central electric stations, while in 1941 the ratio was 22.3 per cent when the electric light and power figures were included. In view of the fact that the smaller industrial establishments co-operating in the Annual Census, but not in the monthly surveys on employment and payrolls, probably tend to employ a greater-than-average proportion of female labour, the growth indicated by this comparison is highly significant.

Within the manufacturing group, the ratio of females at October 1, 1942, ranged from 2.2 per cent in steel shipbuilding, 6.1 in pulp and paper mills, and 6.4 per cent in rough and dressed lumber mills, to 64.1 per cent in hosiery and knit goods, 66.4 per cent in tobacco, and 66.5 per cent in garments and personal furnishings.

The proportions of women employed in construction and maintenance, logging and mining were low, being 2 per cent or under. In transportation, the ratio was 6 per cent, while in the remaining industries—communications, services, trade and finance—the female workers constituted substantial proportions of the total. The largest of these was that of 51.6 per cent in services. In each of the non-manufacturing industries, the percentage of female labour was considerably higher than that indicated in the 1931 Decennial Census, whose data were the latest available for comparative purposes.

Employment and Unemployment in Great Britain and the United States

Great Britain

THE British *Ministry of Labour Gazette*, May, 1943, summarizes the employment situation* in Great Britain as follows:—

The number of men and boys registered at Employment Exchanges in Great Britain as wholly unemployed at April 12 (exclusive of 21,026 men who had been classified by interviewing panels as unsuitable for ordinary industrial employment) was 51,216; those registered as on short time or otherwise temporarily suspended from work on the understanding that they were shortly to return to their former employment numbered 753; and those registered as unemployed casual workers (being persons who normally seek their livelihood by jobs of short duration) numbered 1,869. As compared with January 18, the latest date for which comparable statistics are available, the numbers wholly unemployed showed a decrease of 7,118, those temporarily suspended from work showed a decrease of 538, and unemployed casual workers showed a decrease of 215.

The corresponding figures for women and girls at April 12 were 25,553 wholly unemployed (exclusive of those, numbering 643, who had been classified by interviewing panels as unsuitable for normal full-time employment), 559 temporarily stopped, and 141 unemployed casual workers. Of the 25,553 wholly unemployed, 1,023 had been classified as unable for good cause to transfer to another area. As compared with January 18, the numbers wholly unemployed showed a decrease of 9,821, those temporarily stopped showed a decrease of 1,264, and unemployed casual workers showed an increase of 30.

The number of applicants for unemployment benefit or allowances, included in the foregoing totals for April 12, was 55,679 as compared with 67,859 at January 18 and 79,663 at April 13, 1942.

United States

According to an official report issued by the United States Department of Labour, the total number of employees in non-agricultural establishments in April, 1943, was 38,341,000, about 150,000 more than in March and almost two and a half million more than in April, 1942. The gain during the month was primarily the result of an increase of almost 100,000 employees in trade and reflects the large spurt in retail buying during the Easter season.

*See LABOUR GAZETTE, May, 1943, page 680; June, 1943, page 844.

Industrial and Business Employment

Wage-earner employment in all manufacturing industries increased 4,000 over the month, the smallest monthly increase since January, 1942. In the non-durable-goods group of industries, where a relatively short work-week had prevailed, wage-earner employment declined by 49,000.

Among the nine durable-goods groups, furniture, iron and steel, non-ferrous metals, and lumber showed declines in wage-earner employment. The only sizable increase was in the transportation-equipment group, a result of the continued expansion in aircraft and shipbuilding. Employment in this group was 2,230,000, an increase of 53,000 over March, 1943, and of 980,000 from April, 1942.

Among the non-durable groups, only the chemical group and the miscellaneous group, which includes the professional and scientific instruments industry, showed increased employment over March. Both these groups had scheduled work-weeks or approximately 48 hours in March.

Employment in both coal-mining industries continued to decline because the supply of experienced miners has been exhausted. The anthracite-mining industry employed about 5,000 fewer wage earners in April, 1943 than in April, 1942 and 600 less than in March, 1943. Employment in the bituminous-coal-mining industry was 394,000, about 47,000 less than in April of last year and 11,000 less than in March.

Public Employment

Federal employees in April, 1943, totalled 3,058,000, with 74 per cent in the War and Navy Departments and other war agencies. The increase of 33,800 over March, the smallest non-seasonal gain in 18 months, reflected the influence of the employment-ceiling order of the Bureau of the Budget. The order was not applicable, however, to part-time, temporary, or construction workers, or to consultants and experts.

From April, 1942, the increase in Federal employment amounted to almost a million persons (998,000), and since Pearl Harbor, to almost a million and a half (1,458,000). The war agencies alone added 1,069,000 employees during the past year. Although the decline of 38,800 employees in other agencies was partially the result of reorganizational shifts, transferring some offices to war agencies, the distinction between "war" and "other" agencies is still not clear-cut because of the conversion of many of the "other" agencies to almost completely war activities.

Employment of Part-time Workers in the United States

THE continuing labour shortage in many areas of the United States has impelled the Federal and state governments, as well as industry to search for new sources of workers and to study every possible means of increasing the contribution of men and women already employed.

The Industrial Relations Section, Department of Economics and Social Institutions of Princeton University, recently published a pamphlet covering an analytical study of the problem and endeavoured to present the results "from the point of view of the company executive" who is considering the advisability of employing part-time workers. In addition, the pamphlet is designed to serve as a practical guide for employers who have already decided to use this means of increasing their employee forces. The conclusions reached and the suggestions made are based on both British and American experience.

The study was made under the following five headings: (1) Present use and possible extension of programs for part-time employment. (2) Recruitment and selection. (3) Induction and training. (4) Hours of work, and (5) Wage rates and benefits. This is followed by a statement of conclusions with respect to the advantages, problems and successful procedures in the recruitment of part-time workers.

British Experience

British experience with the problem of part-time workers is recognized as having special value, as Britain has felt the impact of labour shortages in wartime industries for a longer time than has the United States. During two years of war the use of part-time workers in Britain was on a voluntary basis, but elements of compulsion and control have become a part of British policy in order to make the greatest possible use of every available unit of manpower and womanpower.

The British Ministry of Labour has been active in compiling and publishing information on occupations in which part-time workers are employed in Britain. A fairly detailed list of jobs on which women are being utilized on part-time in engineering and air frame manufacturing industries contains more than 30 distinct mechanical operations, many of them requiring some measure of special skill. Although it has been found that women prefer light, clean operations, a few British firms are using women on part-time as warehouse labourers with great success.

Experience of United States

Very few American plants have had long experience with part-time workers, the pamphlet states. Those few, for the most part, have had co-operative arrangements with the schools for a number of years and had employed teachers and students for a variety of jobs. Retail merchants made use of part-time workers during the depression years as a means of "spreading work" and the practice is being extended under the necessities of war. Public utilities and banks have instituted part-time schemes in recent months, chiefly for clerical work.

The types of plant jobs varied naturally with the type of industry, but there was reported to be considerable agreement among American industrialists who were consulted, that unskilled labour jobs such as those in shipping departments, light machine jobs, simple assembly work, and parts inspection were most suitable for part-time workers, as all such jobs require but short periods of instruction. However, it was the opinion of certain experienced personnel directors that "practically all jobs can be broken down so that people may work part-time."

In addition to clerical work, non-manufacturing industries are using part-timers in a variety of ways, as for example, railway track work, bus driving, messenger work, selling, and in several branches of the food industry, etc.

Company officials in the United States who have had experience in the employment of part-time workers were not unanimous in their approval of the plan. The greater number who were consulted, however, expected either to employ more workers on this basis as it becomes necessary, or are now seeking more qualified workers for part-time work.

The Sources of Part-time Workers

The report points out that the most important sources are students, housewives and certain classes of clerical workers. Of these the most sought for are students. Neither in the United States nor Great Britain have there been any difficulties in securing recruits for part-time work. United States employment offices have been playing a notable part in stimulating the adoption of part-time plans among war industries and in recruiting for these programs. Special publicity is used and staff members are assigned exclusively for part-time groups. Other recruiting agencies are community organizations, colleges, women's

clubs, churches and present employees—both full-time and part-time. It is said that 90 per cent of those offering themselves for part-time work during the war do so for patriotic reasons; about five per cent want to try out factory work with a view to full time work later on if they like it, and five per cent express financial and other varied reasons.

Selecting and Placing

The procedure in selecting and placing recruits depends to some extent on the requirements of specific jobs, the procedure deemed necessary by individual employers, and also upon the urgency of the need for workers. British firms have found that printed descriptions of the work available are helpful in the pre-employment interview. Prospective workers are asked to study these at home and this has been found to lower labour turnover. British experience has also shown that careful planning to maintain basic standards are desirable, if it becomes necessary to alter usual procedures or policies. Medical examinations are required in many instances to make reasonably sure that applicants are fit to carry out the work to be done, although peacetime fitness is not usually expected. It was found necessary in Britain to eliminate intelligence and special aptitude tests.

Induction of Workers

Before part-time workers are inducted into a plant, it has been found desirable for employers to discuss the plan with their department heads in order to obtain their full co-operation in rearranging work schedules and other plant readjustments. Union workers have at times objected to part-time workers but in most instances this objection has not been pressed and such difficulties are generally easily adjusted. In some cases part-time workers were admitted to partial membership in the unions for nominal fees. In other cases where the labour shortage was not urgent the union wanted its members to have a chance at overtime work. But where the need for workers has been unmistakable the unions have not offered serious objections and union officials relaxed their rules in many instances and granted work permits without charge. The National Labour Relations Board has decided that part-timers employed regularly are eligible to share in the selection of bargaining representatives.

In some British plants part-time workers are segregated in one floor or one wing of a factory, but the more general practice in both British and American plants is to place the new recruits among experienced workers to facilitate training. However, in the case of

small assembly plants where the training is simple, the work is sometimes sent to local communities to be handled in warehouses and store rooms.

Training Part-time Workers

Adequate training of part-timers is now generally considered by industrialists as of great importance, as "mistakes are costly whether made by part-timers or full-timers." Preliminary training of part-time workers seems to be utilized more widely in non-manufacturing than manufacturing companies. Regular and special training classes are provided by many retail stores and home training kits supplement class room instruction. Vocational schools provide courses extending over several weeks. However, too long preliminary training has been found to discourage many part-timers. On-the-job training is imperative in all cases. Relatively little appears to have been done with the upgrading of part-time workers in industry, probably due in part to difficulties in plant organization. But department stores have been able to make more progress in this regard.

Hours of Work

Generally part-time workers are assigned to day or evening work and seldom to the "graveyard shift." A favourite arrangement is to pair workers so that two part-timers will handle a full job, whether working on four-hour shifts, or on alternate days, or weeks.

Wage Rates and Benefits

The general practice with respect to wages is reported to be to pay at least the same hourly rate to part-timers as to regular employees, inexperienced workers getting beginners' rates, which are increased progressively as experience is gained. In some cases it appears to be the practice, notably in department stores, to pay part-time workers more than the usual hourly rate. With respect to holidays with pay and other benefits there appears to be a good deal of variation in practice. One company executive is reported as saying: "As certain of our employee benefit plans now function, the part-time employees are not able to enjoy full benefits. If the number of persons in this (part-time) group increased materially above that now used we no doubt would take steps to rectify this position. As a general rule, we endeavour to grant equal privilege to all employees."

As a compendium on an important phase of wartime activity the study is useful alike to employers as well as to prospective and actual part-time workers.

Labour Law

Labour Legislation in Quebec and Nova Scotia in 1943

Quebec

DURING the session of the Quebec Legislature which began on February 23 and ended on June 22, 1943, new laws were enacted to provide for the setting up of a Commission to draft a scheme of health insurance and for the establishment of an Economic Advisory Council. A section was added to the Education Act to provide for compulsory school attendance, the Collective Agreement Act was amended to permit family allowances to be paid under an agreement and amendments were made in Acts relating to workmen's compensation, vocational education, and licensing of chauffeurs.

Workmen's Compensation

Two statutes amend the Workmen's Compensation Act. One of these provides that where the total cost of compensation, including medical treatment, payable for an accident to a blind workman exceeds \$50 the excess is to be repaid by the Provincial Treasurer to the Accident Fund or to the employer, as the case may be, provided that at the time of the accident the workman was employed, with the approval of an institute for the blind recognized by the Lieutenant-Governor in Council, on recommendation of the Workmen's Compensation Commission. A workman is deemed to be blind if he is incapable of doing work for which sight is essential. In 1931 a similar Act was passed in Ontario.

The other Act amending the Quebec Workmen's Compensation Act makes a number of changes. Where an action is taken, by subrogation, by an employer against a third party responsible for an accident in an industry in which the employer is individually liable for compensation, not only is any agreement or compromise between the parties void unless ratified by the Commission, but payment of the amount agreed upon or adjudged may now be made only in the manner indicated by the Commission. A further amendment makes it clear that the workmen, as well as the servants and mandatories of the employer of the injured workman, are exempt from actions of the kind referred to above and from actions under the common law.

An injured workman is now entitled to be provided with prosthetic and orthopaedic ap-

pliances and to their renewal as may be necessary, instead of for a period of two years only, as formerly.

A workman suffering from an industrial disease is now entitled to compensation if it is proved that the disease was caused by the nature of the process in which he was employed even if he is not employed in any of the processes in which that would be presumed.

The sections relating to silicosis were replaced by new provisions and the term "silicosis" was replaced by "pneumoconiosis", which is defined to include, especially, silicosis and asbestosis. Formerly compensation was granted only for infectious silicosis (i.e. silicosis complicated by intercurrent tuberculosis). To be entitled to compensation for pneumoconiosis, the workman must have been employed in the Province in an industry where he was exposed to silicious dust for a total period of at least five years and must establish his claim within five years of leaving such employment. The Commission is authorized to establish or subsidize clinics, the cost to be paid from the Accident Fund, and to make regulations requiring workmen exposed to silicious dust to undergo periodical medical examinations at such clinics. After the coming into force of such regulation no employer may, under penalty of a fine not exceeding \$500, employ a workman in a class of industry covered by the regulations unless the workman produces a certificate stating that he has undergone the necessary examination. Pottery is added to the list of industries in the schedule in which pneumoconiosis is presumed to be due to the nature of the workman's employment.

Family Allowances

The Collective Agreement Act was amended to add family allowances to the provisions of a collective agreement which may be made binding on employers and employees who were within the scope of the voluntary agreement and on all those to whom it was extended by Order in Council. Where such provision is made, the joint Committee appointed to enforce the agreement may collect contributions, pay the allowances, either directly or through the employer, and verify the existence

of the dependants for whom the allowances are payable. The Committee may also determine the person to whom the allowance is to be paid, by resolution and in accordance with the following principles: (a) The allowance belongs to the child or other person on whose account it is granted; (b) Normally the employee receives it as trustee for such person; (c) If the employee does not use the allowance for the benefit of such person, payment is made to whoever takes care of such person.

Vocational Education

The Youth Aid Act, 1938, was also amended. Under this Act agreements may be made between the Provincial Government and any Government, person or corporation to assist young persons to establish themselves in employment. Subsidies granted by the Government of Canada under such an agreement are now to be placed in a special fund to be used for the purposes agreed upon, under the control of the Lieutenant-Governor in Council. The Provincial Treasurer is authorized to advance, for purposes of an agreement, a sum not exceeding the Government of Canada's subsidy, which sum is to be reimbursed out of the special fund when the subsidy is paid. The amendments are retroactive to September 17, 1937, the date of the first agreement, which was validated by the Youth Aid Act.

Amendments in the Specialized Schools Act, which will come into force on Proclamation, bring under the Act the arts and trades schools already established under the name "centres d'initiation artisanale" as well as those which may be set up by the Lieutenant-Governor in Council. The Vocational Courses Act, 1922, and the Technical or Professional Schools Act, 1926, are repealed.

Changes in the Trade Schools Act which are retroactive to July 15, 1941, when the principal act was proclaimed in force, restrict operation of the Act to schools which are operated for profit and provide that where a student abandons a course for which he has made a contract, the amount which the school may recover shall not exceed the price of one-fifth of the total number of lessons, together with the price of the number of lessons followed by the student in proportion to the total price agreed upon. A contract is void if the school does not hold a permit under the Act.

School Attendance

New sections, effective July 1, 1943, were added to the Education Act and require every child between the ages of six and fourteen years to attend school for the full time during which the public schools are open, unless the child is under effective instruction at home,

and the parents, guardian or tutor of a child must see that the child complies. Exception is made in case a child is prevented from attending by illness or infirmity or has been expelled from public school or has obtained a certificate showing that he has completed the elementary or primary elementary school course, or an equivalent certificate. Also exempt are any child under ten years of age residing more than two miles by the shortest road from the nearest public school which he has the right to attend and any child who resides more than three miles from such school, provided in each case that the school board has made no provisions for conveying children to school free of charge.

School boards are now obliged to admit to the schools every child domiciled in the school municipality from the beginning of the school year following his fifth birthday until the end of the school year in which he reached the age of 16. Tuition in the elementary and primary elementary grades is to be free. As formerly, no school fees may be exacted from indigent persons.

The annual census of children of school age is now to be made in May and June, instead of in January, and must show, as to each child, whether he attends special or night courses during part of the year, and if he does not attend school the reason for non-attendance.

A school attendance officer may, on the written request of a child's parent, tutor, or guardian, grant a certificate releasing such child from school attendance for one or more periods, not exceeding in all six weeks in the school year, if the services of the child are required for farm work or for urgent and necessary work at home or for the maintenance of such child or his relatives. Like Nova Scotia, Quebec permits such exemption for a maximum of six weeks in a school year. In Alberta, Manitoba, New Brunswick and Ontario, such exemption is permitted for as much as six weeks in a school term, that is 12 weeks in a school year.

No person may employ a child of school age in school hours unless a certificate has been granted by the attendance officer, as provided above. For breach of this provision a fine not exceeding \$20 may be imposed. Every school attendance officer has the powers of a constable and may enter industrial or commercial establishments, places of amusement or playgrounds where children of school age may be employed or assembled and may, without a warrant, apprehend and take to school any child who is required to attend.

The secretary-treasurer of the school municipality must furnish the attendance officer and, on request, the school inspector with a

list of the children required to attend school, according to the annual census. The attendance officer must investigate all cases of non-attendance reported by a teacher, school inspector, school principal, or ratepayer. If he cannot persuade the parents or guardian to send the child to school, the attendance officer must give them special notice and if the child still does not attend the parent or guardian is liable to a fine not exceeding \$20 and may be required by the court or judge trying the case to give a bond not exceeding \$100.

Mining Villages

An Act respecting the Municipal Organization of Mining Villages was amended to enable such a village to sell immovable property for taxes under the provisions of the Cities and Towns Act.

Licensing of Workmen

The Pipe Mechanics Act was amended to enable the Lieutenant-Governor in Council to make regulations withdrawing from its application refrigerating systems, of a capacity fixed by the Board of Examiners, used for cooling air, making ice or chilling articles, and also mechanical sprayers for fire-fighting.

An amendment in the Motor Vehicle Act lowers the minimum age for obtaining an operator's licence from eighteen to seventeen years. The driver of an autobus must, as formerly, be at least 21 years of age.

The licence year under the Electricians and Electrical Installations Act is now to agree with the financial year and licences must be renewed between April 1 and May 1.

Prison Labour

The Prison Labour Act was amended to provide that both first offenders and recidivists may be employed on work either within or without the gaol limits. Formerly first offenders might only be employed within the gaol limits.

Garnishing of Wages

By an amendment in the Code of Civil Procedure the prothonotary is no longer required to distribute the amount deposited on a garnishment after every deposit but is to make such distribution every three months.

Superior Labour Council

An Act passed in 1940 to establish the Superior Labour Council was amended to increase the membership of the Permanent Board from six to nine by making the president and the two vice-presidents of the Coun-

cil ex-officio members of the Board. As formerly, the remaining six members are to include two representatives each of the labour and employers' groups and two of the economists' and sociological group.

Economic Advisory Council

The Economic Advisory Council Act provides for the establishment of such a Council consisting of not more than fifteen members appointed by the Lieutenant-Governor in Council. Representatives of the various departments of the Provincial Government may be appointed as associate members, taking part in the discussions but without the right to vote. Members of the Council are to serve without remuneration but may be paid their expenses when attending meetings. The Council is to investigate the resources of the Province and suggest measures to ensure their fullest use, with special reference to the needs of farmers, fishermen, artisans, small industrialists and small traders. It is also to draw up, in collaboration with the Dominion and the other Provincial Governments, a program for utilizing the labour which will be available at the end of the war. The Lieutenant-Governor in Council may ask the Council to give priority to the study of any urgent problem.

Health Insurance Commission

An Act to constitute a Health Insurance Commission states in its preamble that the Commission which inquired into the hospitals in the Province recommended the introduction of universal health insurance financed by a threefold contribution, by the Government, the employer and the insured, involving a premium calculated, not on an individual basis, but per family group, and administered by a Commission whose first responsibility would be to prepare the plan of insurance.

The Act provides for such a Commission consisting of not more than three full-time members appointed by the Lieutenant-Governor in Council, who is to name one of the members as chairman.

The Commission, after consulting interested parties, is to prepare a plan of health insurance, defining, in particular, the extent of the risks to be covered, nature of the benefits, methods of hospital care and home treatment, formation of administrative and consultative bodies, rates of contribution from employers and insured persons, manner of collecting contributions and responsibility for payment of premiums in cases of indigence. The Commission is also to provide for means of furnishing medical aid to persons unable to benefit by

the insurance plan, such as visitors, and for incorporation of the health insurance plan in a general scheme of social security. Pending enactment of a statute to give effect to the Commission's plan, the latter may recommend to the Lieutenant-Governor in Council the taking, within the limit of existing laws, of such action as is considered likely to facilitate transition from the present system to that outlined in the preamble to the Act.

Co-operative Societies

A number of changes were made in the Co-operative Syndicates Act. Such a syndicate is declared to be a civil corporation and its members liable only for the unpaid amount of their subscriptions. Syndicates are authorized to change their names, to admit as members persons who have a residence or place of business in their territory instead of, as formerly, only those who are domiciled in

such territory, and, in the case of credit associations, to receive the savings of their members to earn a profit. It is declared that the business of a co-operative association does not constitute the carrying on of a trade or financial establishment or means of earning a profit.

By-laws of a society may provide for admitting minors and married women common as to property as auxiliary members and permit them to do business over their signature up to \$1,000. Such by-laws may also deny the right to vote to members of less than three months' standing.

Other changes give syndicates the right to set off sums due by a member against the amount due him on his shares and prohibit persons not incorporated as a co-operative syndicate from using the designation "credit union".

Nova Scotia

The Nova Scotia Legislature which met on March 3 and was prorogued on April 14, 1943, amended laws relating to workmen's compensation, boiler inspection, mothers' allowances and old age pensions.

Workmen's Compensation

Amendments in the Workmen's Compensation Act increase the compensation payable to a widow or invalid widower from \$30 to \$40 a month and payments in respect of children from \$7.50 to \$10 a month. Compensation to orphan children is raised from \$15 to \$20 a month. In all the above cases maximum total benefit is \$80 a month, instead of \$60, as formerly. These increases apply to compensation for accidents happening before or after the passing of the amendment but not so as to increase compensation payable in respect of any period before May 1, 1943.

A clause was added to the section enabling the Board to grant compensation to residents of another province, country or jurisdiction in respect of an accident happening in Nova Scotia if reciprocal benefit were given under the law of such place to residents of Nova Scotia. Except in such cases and in cases where a workman was injured while working temporarily outside the Province no compensation was payable to persons who were not residents of the Province. The Board may now order compensation to be paid under the Act to persons resident in Canada in respect of death or injury as a result of an accident

happening in Nova Scotia on or after April 15, 1938.

Part III of the Act, which applies to the industries of fishing and dredging and under which the employer is individually liable for payment of compensation, was amended to provide that the employer shall not be so liable in any case where the workman or dependants are entitled to compensation under the War Measures Act or Regulations.

The Board is declared to have, and always to have had, authority not only to invest funds under its control in authorized trustee securities but also to sell such securities and re-invest the proceeds in like manner.

Steam Boilers

The Steam Boiler Inspection Act, 1941, was amended to transfer its administration from the Minister of Public Works and Highways to the Minister of Mines and Labour.

Employment of Non-residents

The Nova Scotia Labour Act, which is to remain in force until May 1, 1944, re-enacts the provisions of a statute of similar name, first passed in 1933 for a year and renewed annually. The Act forbids any person or corporation employing 25 or more workers to hire any person who has not been a resident of Nova Scotia for at least a year, unless the person hired produces a certificate from the Government Employment agent or municipal clerk in the place where he is to be employed, stating that there are no unemployed persons

resident in such place who are capable of doing and willing to do the work. As formerly, a fine not exceeding \$500 may be imposed for violation of the Act.

Payment for Fighting Forest Fires

An amendment was made in the section of the Lands and Forests Act which authorizes the Minister of Lands and Forests to pay any person called out to assist in extinguishing a forest fire. Such remuneration may not exceed 20 cents per hour but the total payment may not be less than a dollar. Formerly the maximum remuneration was one dollar per day.

Chauffeurs

The section of the Motor Vehicle Act fixing the minimum age for obtaining a chauffeur's licence at 18 years, was amended to provide that such a licence may be issued to any person over 16 authorizing him to operate a motor vehicle not exceeding 7,000 pounds gross weight.

Exemption from Jury Service

A new list of persons exempt from jury service under the Juries Act does not specifically exempt any class of workers except full time salaried members of a police force but the presiding judge may exempt other persons at his discretion.

Post-War Reconstruction

An amendment in the Towns Incorporation Act enables the council of an incorporated town to create a special reserve fund to provide for all or any part of post war capital expenditure and to pay into such fund any surplus in this or a subsequent year and such other sums as the council may provide. No money may be withdrawn from the fund except with the written consent of the Minister of Municipal Affairs.

Certain Regulations to be Laid Before the Legislature

An amendment was made in the Act, passed in 1941, which requires a copy of all regulations issued by certain authorities, including the Workmen's Compensation Board and the Land Settlement Board, to be laid before the Legislative Assembly within the time fixed by the Act and provides that where this is not done, the regulations shall stand

repealed. The amendment provides that such copy shall be *prima facie* deemed to have laid before the Assembly in compliance with the Act unless the contrary is shown.

Mothers' Allowances

A number of changes, effective June 1, 1943, were made in the Mothers' Allowances Act. "Child" is redefined to mean a lawful child and to include a child legally adopted. The maximum allowance is raised from \$60 to \$80 a month. An allowance is now payable if the husband of the applicant is unable to support his family by reason of permanent physical or mental disability. Formerly the wife of a disabled man was not eligible unless her husband was an inmate of an institution for the treatment of mental illness or tuberculosis. The conditions on which allowances are paid are unchanged but the Advisory Commission must certify in writing to the Director of Child Welfare, in the case of an adopted child, that adoption took place before the death or disablement of the husband, and in cases where a husband is alleged to be permanently disabled that he is so disabled. The Director, with the approval of the Lieutenant-Governor in Council, may make regulations defining permanent physical or mental disability.

Old Age Pensions

The Old Age Pensions Act was amended to enable the Pension Authority, in its absolute discretion, to grant a supplemental allowance not exceeding \$10 a month to any pensioner whose total income, exclusive of pension granted under the Act and regulations, does not exceed \$125 a year, but in no case may the supplemental allowance together with the pensioner's income and pension exceed \$365 a year. The Lieutenant-Governor in Council may make regulations prescribing the time and manner of payment of such supplemental allowances and the conditions under which they may be suspended or discontinued. No such allowance is to be paid in respect of any period prior to June 1, 1943. The Pension Authority may, subject to the provisions of the Act, increase, diminish, suspend or discontinue any pension or supplemental allowance.

The Halifax Charter was amended to enable the City Council to prepare and adopt, by not less than a two-third vote, a plan for superannuation of its officials and employees.

Recent Regulations Under Dominion and Provincial Legislation

Seamen—Housing—Minimum Wages in Nova Scotia and Quebec—Hours in Alberta and British Columbia—Alberta Mines and Theatres—Industrial Diseases in Ontario—Saskatchewan Public Service.

THE scheme for relieving the housing shortage in certain areas by converting large houses into apartments at Government expense has recently been extended to Toronto. Amendments have been made in the regulations under which seamen and fishermen or their widows or next of kin are compensated for loss of personal effects due to enemy action, and in the Order in Council relaxing load-line rules for ships in the Canadian coastal trade. Other Dominion Orders in Council passed recently relating to labour supply, recreation of war workers and cost-of-living bonuses are listed below and summarized elsewhere in this issue of the *LABOUR GAZETTE*.

In the provincial field Alberta has exempted certain men in the sign-painting and outdoor-advertising industry from the requirement of time-and-a-half for overtime, and British Columbia has issued its annual Order exempting women workers in resort hotels from the hours provisions of the hotel and restaurant Order during the summer season. Alberta has passed new regulations to govern the granting

of emergency certificates to miners and made a minor change in the regulations governing motion-picture projectionists. Nova Scotia has revised two minimum wage Orders applying to women in the food trades and to those employed by telephone companies. In Ontario the section adding diseases caused by radioactive substances to the schedule of compensable diseases under the Workmen's Compensation Act has been reworded. Quebec has revised a minimum wage Order governing stationary engineers, renewed several other Orders and made special rules in regard to the payment of the payroll levy for administrative costs by employers in forest operations. Minor amendments have also been made in the regulations governing electricians and electrical installations. Where acute staff shortages exist in the Saskatchewan Public Service curtailment of the annual three-weeks vacation has been authorized, and regulations have been made under the Act providing for the reinstatement and preferential treatment of employees of the Saskatchewan Government on Active Service.

Dominion

Seamen

Loss of Personal Effects.—The regulations providing compensation for loss of personal effects to the widow or next of kin of a seaman or salt-water fisherman who loses his life as a result of enemy action or counter-action (L.G., 1942, p. 1173; April, 1943, p. 527) have been amended by Order in Council P.C. 105/4690 passed on June 8 under the War Measures Act. The amendment restricts the meaning of "next of kin" to father, mother or children and provides that compensation payable to widows, fathers, mothers or children is not to exceed 70 per cent of the amount which the seaman or fisherman would have received himself for loss of his personal effects. The original regulations contain a schedule of maximum compensation payable to each rank. The amendment also declares that a seaman or fisherman may be presumed dead when the evidence, in the opinion of the Minister, leaves no reasonable doubt that death has occurred.

Load-Line Certificates.—Deeper loading of ships trading between ports along the coast of Canada was permitted by Order in Council P.C. 6497 of August 22, 1941, under the War Measures Act because most of the larger ships in the trade had taken up ocean-going service

and the smaller ships were unable to carry all the cargoes available. The regulation provided that local load-line certificates issued for such ships in accordance with the Load-Line Rules passed December 18, 1937 under the Canada Shipping Act must be marked by the Assigning Authority to indicate the extent to which the Load-Line Rules had been relaxed in each case. Such certificates were to expire June 30, 1943, unless cancelled by the Minister of Transport at an earlier date. However, an amending Order in Council (P.C. 4817) passed June 14, 1943, provides that certificates will now remain in force for the period, not exceeding five years, specified in them and may be renewed for further period of not more than five years, but in no case will a certificate remain in effect after the regulations authorizing the relaxation cease to have effect. Moreover certificates may still be cancelled at any time by the Minister of Transport. A similar provision was made recently in respect of load-line certificates for Great Lakes' ships (L.G., June, 1943, p. 860).

Housing

The Government scheme for converting large houses into multiple dwelling units, first put into effect in Ottawa, Vancouver and Victoria

(L.G., June, 1943, p. 859) has been extended to Toronto by Order in Council P.C. 4892 of June 17. The order authorizes the Minister of Finance to lease for a five-year period not more than fifty buildings in Toronto suitable for conversion. He will pay a monthly rental not exceeding one per cent of the appraised value of the property plus one-twelfth of the increase in annual municipal real estate taxes resulting from conversion of the property. The lease may be extended for a further three years or cancelled at any time on thirty days' notice. The Minister may incur costs up to \$250,000 for converting the houses into apartments but no one unit is to cost more than \$1,500. The apartments constructed will be sublet by the government to suitable tenants at reasonable rentals. On expiration of the leases the buildings will be returned to their owners in their then existing condition.

Other Orders in Council

The National Selective Service Civilian Regulations (L.G., Jan., 1943, p. 19) have been amended by the following Orders in Council summarized elsewhere in the GAZETTE: P.C. 4860, June 17, controlling the employment of boys of 16, 17 and 18 years, p. 902; P.C. 4861, June 17, relating to labour for wood-fuel cutting, fishing and fish processing, p. 903; P.C. 4862, June 17, concerning school teachers, p.

903; and P.C. 5160, June 25, relating to long-shoremen, p. 901. Compulsory Employment Order No. 3 was issued under the Regulations on June 30, p. 899.

The National Selective Service Mobilization Regulations (L.G., Jan., 1943, p. 153) were amended by P.C. 4826, June 14, regarding penalties for violations of the Regulations, p. 904. P.C. 45/4690, June 8, provides for the payment of the travelling expenses of persons called for medical examination under the Regulations, p. 904.

Other Orders in Council summarized elsewhere include: P.C. 4703, June 8, authorizing the Director of National Selective Service to co-operate with the provinces and municipalities in providing recreational facilities for war workers, p. 912; P.C. 4891, June 17, authorizing the employment of women in certain occupations at Algoma Ore Properties Ltd., p. 903; P.C. 28/5267, June 30, providing for the supervision of prisoners of war engaged on labour projects outside internment camps, p. 904; and P.C. 5161, June 25, establishing the Stabilization of Longshore Labour (Halifax) Order, p. 901. The National War Labour Board issued an order on June 1 under the Wartime Wages Control Order (L.G., 1942, p. 778) concerning cost-of-living bonuses in the construction industry, p. 917.

Provincial

Alberta Male Minimum Wage Act

Order 22, gazetted May 31, applies to designers, wall men, sign-painters' helpers, bill posters and construction mechanics who are permanently employed at a salary of at least \$25 per week in the outdoor advertising and sign-painting industry in Edmonton and Calgary. It exempts these workers from section 6 of Order 8 (LABOUR GAZETTE, 1939, p. 674) if their hours do not average more than 50 a week during any calendar year. Order 8 is a general order applying to all men not covered by other minimum wage orders or by schedules under the Industrial Standards Act, and section 6 provides that any worker who works hours in excess of those prescribed by the Hours of Work Act must be paid time and one-half. The Hours of Work Act limits hours for men to 9 a day and 54 a week but where, by practice or agreement, the daily hours of work in an undertaking vary, a maximum of 10 hours may be worked in any day provided that weekly hours do not exceed 54. Overtime is permitted in emergencies or when specially authorized by the Board of Industrial Relations.

Alberta Mines Act

The regulations suspending the sections of the Mines Act relating to miners' certificates and authorizing the Chief Inspector of Mines to issue emergency certificates (LABOUR GAZETTE, 1942, p. 1439) were rescinded by an Order in Council gazetted May 31, and a new set of regulations for this purpose were gazetted June 30 in response to the Dominion Government's request for co-operation from the provinces in meeting the national emergency in coal production. The new regulations differ from the former ones in three respects: (1) they apply to all mines in the Province instead of only to those in certain specified districts; (2) the District Inspector of Mines may now authorize an applicant for an emergency miner's certificate to go to work pending the issue of the certificates, if he is satisfied as to the applicant's ability; (3) certificates issued under the former regulations were to expire March 15, 1943, but no time limit has been placed on certificates issued under the new regulations although, as before, they may be recalled or cancelled without notice by a District Inspector or the Chief Inspector of Mines.

Alberta Theatres Act

A slight amendment in the regulations governing motion-picture projectionists (LABOUR GAZETTE, 1942, pp. 691, 1173) was gazetted on May 31. It provides that an applicant for an apprentice's certificate must be 18 years of age and must be vouched for by the manager of the theatre and by a projectionist holding a certificate of the class required for the theatre in which he is working. Formerly, the projectionist who vouched for an apprentice had to hold at least a second-class certificate.

British Columbia Female Minimum Wage Act

The annual Order varying for resort hotels during the summer season the hours provisions of the Order governing hotels and restaurants was gazetted on June 10 and is effective from June 14 to September 11. It is identical with last year's Order (LABOUR GAZETTE, 1942, p. 797) and permits maximum hours of ten per day and 56 per week, but hours in excess of 48 per week must be paid for at one and one-half times the worker's regular rate. A rest period of 24 consecutive hours must be permitted during each calendar week, although in special cases the Minimum Wage Board may approve different arrangements for which the employers and workers concerned make application.

Nova Scotia Minimum Wage for Women Act

Revisions of Orders 2 and 5, as amended by Order 10, were approved on March 17 and gazetted on June 16. Order 2 (LABOUR GAZETTE, 1931, p. 769) governs female workers in the food trade in cities and towns and Order 5 (LABOUR GAZETTE, 1931, p. 884) applies to women employed by telephone companies in cities and towns. Order 10 (LABOUR GAZETTE, 1941, p. 1110) amended all orders in effect at the time it was passed by raising all rates established by them by \$1. In addition, it amended some of the Orders, including Orders 2 and 5, by reducing the maximum hours for which the regular weekly rates are to be paid from 50 to 48. The amendments effected by Order 10 are now incorporated in the revised Orders 2 and 5. In addition, changes have been made in both Orders in the provisions relating to inexperienced workers.

Order 2, as amended by Order 10, provided that inexperienced workers 18 years and over would be paid \$10 per week in cities and \$9 in towns during the first six months of employment, \$11 and \$10 during the second six months and then the full rate of \$12 and

\$11. In the revised Order the rates are unchanged but the length of each of the two periods to which they apply is reduced from six to three months. A similar change has been made with regard to inexperienced workers under 18. Formerly these workers were to receive \$8, \$9.50 and \$11 per week in cities and \$7, \$8.50 and \$10 in towns during successive six months' periods. These rates now apply to four months' periods.

Order 5 formerly provided special rates for learners 18 years of age and over and for those under 18. The special rates for girls under 18 have been abolished and all inexperienced workers must now receive the rates which were formerly in effect for those over 18, viz., \$10 per week during the first six months and \$11 during the second six months in Halifax, Sydney, Dartmouth and Glace Bay; \$9 and \$10 in Amherst, New Glasgow, North Sydney, Truro, Yarmouth, Sydney Mines and Westville; and \$8 and \$9 in all other incorporated towns. The rates for experienced workers remain at \$12, \$11 and \$10 according to the locality.

Ontario Workmen's Compensation Act

A regulation, gazetted on June 12, amends the schedule of compensatable diseases with regard to diseases caused by radio-active substances. An earlier regulation (LABOUR GAZETTE, 1940, p. 926), added to the schedule "inflammation, ulceration or malignant disease of the skin or other tissues due to X-rays, radium or other radio-active substances" contracted in "any process in the refining or handling of radium or involving exposure to X-rays". This has now been changed to "any disease due to exposure to X-rays, radium or other radio-active substances".

Quebec Electricians and Electrical Installations Act

Two amendments in the regulations governing electricians and electrical installations (LABOUR GAZETTE, 1940, p. 927) were gazetted on March 27 and July 3 to bring the regulations into conformity with recent amendments in the Act. The provision prescribing fees for annual inspections of electrical installations in public buildings was repealed as a 1942 amendment made such inspections free of charge. The time during which owners of public buildings who employ electricians permanently must renew their annual permits has been changed from the period between July 1 and August 1 to that between April 1 and May 1 to conform with a 1943 amendment.

Quebec Minimum Wage Act

Stationary Enginemen.—A new Order 6 relating to stationary enginemen and firemen in the Montreal District (LABOUR GAZETTE, 1938, p. 624; 1942, p. 448) was gazetted on June 12 and is effective from that date until January 1, 1945.

The method of classifying enginemen for the purpose of fixing minimum rates has been revised. Rates are now set for three classes of chief enginemen, three classes of enginemen and also for firemen and for enginemen in charge of portable engines, Diesel engines, sawmill stationary engines and engines in butter and cheese dairies.

There are to be four classes of installation. In each of the first three classes, one of the enginemen is to be paid the rate for a first, second or third-class chief engineman depending on the class of the establishment. The minimum wage for first-class chief enginemen is the same as was fixed under the old Order for first-class enginemen (\$220 a month). In addition minimum rates of \$42 and \$36 per week have now been set for second- and third-class chief enginemen. The engineman supervising a fourth-class installation is to receive the rate for a fourth-class engineman which is 50 cents an hour.

Enginemen who, under the supervision of a chief engineman, successively direct the operation of any installation must be paid at least the rate applicable to the class of enginemen immediately below the class of the establishment. If several direct operations simultaneously, only one need be paid this rate and the others may be paid the rate for firemen. The wages of second-, third- and fourth-class enginemen and firemen are the same as for the same classes under the old Order, viz., 66 cents, 55 cents, 50 cents and 40 cents per hour.

The wages for enginemen in charge of portable engines, Diesel engines, sawmill stationary engines and engines in dairies are, respectively, 55 cents, 50 cents, 40 cents and 40 cents per hour. Firemen working on these installations are to receive 40 cents per hour.

In all cases, hours in excess of 60 per week are to be paid for at overtime rates. In addition, in the case of enginemen, apart from chief enginemen, and of firemen working on first- to fourth-class installations, hours worked in excess of 12 per day, on weekly rest days or on New Year's Day, Good Friday, May 24, Dominion Day, Labour Day, Thanksgiving Day or Christmas Day, are to be paid as overtime. For second- and third-class chief enginemen, the overtime rates are \$1.05 and 90 cents per hour respectively. For workers

paid on an hourly basis they are one and one-half times the actual rate.

The regular provisions requiring the keeping of registers appear in the Order as well as the provision that the terms of Order 4 apply except where inconsistent.

Forest Operations.—An amendment to by-law B-1 Revised which provides for a levy of one-eighth of one per cent on employers' payrolls to defray the cost of administering the Minimum Wage Act (LABOUR GAZETTE, February, 1943, p. 267) was gazetted June 26. It stipulates that employers in forest operations are to pay the levy annually, instead of semi-annually like other employers. Those engaged in timber-driving are to pay the levy by February 10 on the wages paid during the preceding calendar year. Those in other forest operations must pay the levy by June 10 on the wages paid in the preceding 12 months from May 1 to April 30.

Renewals.—Order 9 governing teachers in Verdun (LABOUR GAZETTE, 1938, p. 626) and Order 35 applying to retail foodstuffs establishments in Quebec City and Quebec West (LABOUR GAZETTE, 1942, p. 927) were renewed until July 1, 1944, by notices gazetted June 19 and June 26. Order 37 relating to establishments manufacturing glass containers (LABOUR GAZETTE, 1940, p. 927) was renewed to August 1, 1944, by a notice gazetted June 19.

Public Service of Saskatchewan

Regulations were gazetted June 30 under the 1940 Act respecting the Absence on Active Service of Employees of the Government of Saskatchewan which provides for the reinstatement of permanent employees and the protection of their superannuation rights while on Active Service and guarantees preferential treatment in appointments to non-permanent employees who serve in the Armed Forces. The regulations stipulate that any person who fails within three months of discharge to return to his position or to make application for an appointment in the Public Service loses his rights under the Act unless the Government personnel authority concerned is satisfied that the person was unable to take such action due to physical or mental incapacity or other justifiable cause.

Departmental Permanent Heads and Superintendents of Mental Hospitals have been authorized by a regulation gazetted June 30 to reduce from three weeks to two the annual holidays granted with pay to members of the Public Service of Saskatchewan. This power may only be used where acute shortages of staff exist and the employees concerned must be paid additional salary in lieu of the week's vacation.

Wartime Regulation of the Employment of Women and Young Persons in Quebec

THE Quebec Minister of Labour has recently announced that steps are being taken to ensure a stricter enforcement of the provisions of the Industrial and Commercial Establishments Act relating to the employment of women and young persons. The minimum standards which the Minister has laid down for war plants exempt under an Order in Council of March 15, 1940, from the provision prohibiting night work for women and young persons will also be strictly enforced.

The Industrial and Commercial Establishments Act forbids the employment of children under 14 in factories and shops and permits children from 14 to 16 years of age to be employed in such establishments only if they can read and write or are attending night school. Women and girls and boys under 18 are forbidden to work in the dangerous or unhealthy industries specified in regulations made under the Act, such as abattoirs, cement crushing, mirror painting and places where benzine, white lead, certain acids and other harmful substances are used. Certain other industries such as rubber works, dry polishing of iron, brass or horn, match dipping and carpet beating are closed to boys under 16 and girls under 18. However, specified types of work in these forbidden industries are exempted and children over 14 may be engaged in such work.

Maximum hours of work in factories for women, girls and boys under 18 are fixed by the Act at 10 a day between 6 a.m. and 6

p.m. and 55 a week. In commercial establishments in cities or towns with a population over 10,000, not more than 60 hours a week may be worked and the day must not begin before 7 a.m. or end after 11 p.m. In emergencies, the Inspector may authorize extensions of these hours up to 12 a day and 65 a week for a period of not more than six weeks but work must not commence before 6 a.m. or finish after 9 p.m. With the Inspector's permission, women and young persons under 18 may work in factories on a two-shift system provided neither shift exceeds eight hours or begins before 6 a.m. or ends after 11 p.m. A lunch period of one hour must be granted if the Inspector so directs, but this is not counted as part of the working hours.

An Order in Council (1257) of March 15, 1940, exempted establishments on war work from the provision prohibiting night work but stipulated that the system of hours worked in such establishments must be agreed upon by the Inspector and the employer and approved by the Minister. Certain minimum standards have been laid down which must be observed by all plants exempt from the prohibition concerning night work. No boys under 16 nor girls under 18 may work between 11 p.m. and 6 a.m. and shifts must not begin or end between midnight and 6 a.m. Night shifts must not exceed 10 hours if five turns are worked in a week or nine hours if six turns are worked. Provision must be made for pauses and rests during working hours.

Labour Union Regulation by State Legislatures in U.S.A.

ACCORDING to the May issue of the *Monthly Labour Review*, published by the United States Department of Labour, State legislatures in 1943 considered more measures concerning industrial relations than in any preceding year. Most of this legislation "was designed to restrict picketing, strikes and other activities of organized labour".

Arkansas

The so-called "Anti-Violence Act" of Arkansas provides that it shall be unlawful for any person by the use of threat of force or violence to prevent or attempt to prevent any person from engaging in a lawful vocation; or for any person acting in concert with others to assemble for that purpose, at or near a place where a labour dispute exists. A labour

dispute is defined as including any controversy between an employer and two or more of his employees concerning the terms or conditions of employment, or concerning the association or representation of persons in negotiating terms or conditions of employment. Violations are punishable by imprisonment for not less than one year nor more than two years.

Idaho and South Dakota

In Idaho and South Dakota similar laws are directed against the unionization of farm labour and of employees in processing plants. Under these new laws representatives of any labour union may not enter, without the consent of the owner, "any ranch, farm or feedyard, shearing plant or other agricultural premise" to solicit members, collect dues, or

order or promote a strike. Picketing of such premises and boycotting of agricultural products are prohibited. The law further forbids any person soliciting or accepting money, or other things of value for services rendered, or claimed to be rendered, to employees because of labour union connections or associations. Trade unions operating in either State must file annual financial statements with the secretary of state. Violations of any of the provisions of these Acts are punishable by fines of not more than \$300 or imprisonment of not more than three months, or both fine and imprisonment.

Texas

The Texas law not only requires unions to file information on officers and finances with the secretary of state, but also compels all labour organizers to obtain identification cards from the secretary of state before they solicit members. Unions must keep accurate accounts which must be open to the inspection of members. Union officers, with certain exceptions, must be elected annually by secret ballot, and union fees are restricted to "reasonable requirements," which may include mutual insurance benefits, charity and legislative representation. Contributions to political campaigns, charging of fees for work permits and expulsion of members without a public hearing are forbidden.

The Texas law served as a model for legislation introduced in some fifteen other state legislatures, but in most, if not in all of these, it has been rejected.

Kansas

In the Kansas statute, the right of employees to refrain from engaging in concerted activities for the purpose or organization, collective bargaining, and mutual aid and protection, receives equal emphasis with the right to engage in these activities. Although the law defines unfair labour practices of employers in much the same terms as in the Federal Labour Relations Act, it does not prohibit discrimination against union members or non-members in hiring and firing. However, numerous activities of employees and labour organizations are classified as unfair. For example, it is forbidden to take part in a strike without the authorization of the majority of the employees as determined by a secret ballot. Similarly, entering into a closed shop agreement, picketing which interferes with employees right to work, must be decided by a secret ballot. Jurisdictional strikes, and sympathetic strikes are outlawed. Business agents of unions must be citizens of the U.S.A. and must be licensed annually by the Secretary of

State. Before it may operate in Kansas, a union must file copies of its constitution and by-laws. All amendments to these must be filed within 30 days after their adoption. Trade unions having more than 25 members must file annual reports with the Secretary of State, showing the names and compensation of their officers, dates of elections, rates of dues and assessments and furnish sworn financial statements. All the information filed is open for public inspection and any violation of the act is considered to be a criminal offence.

Colorado

The so-called "Labour Peace Act" of Colorado provides that whatever the rights of disputants in labour controversies, their conduct shall not be permitted to intrude on the primary rights of third parties to earn a livelihood and to transact business. The Colorado Industrial Commission which has had administrative control of workmen's compensation, minimum wages, hours of work, safety and health laws, etc., has been given additional powers regarding the limiting of picketing. At least 30 days' notice of intention to strike must be given in cases involving the production, harvesting or initial processing of farm and dairy products and 20 days' notice in all other industries. Closed shops are forbidden unless authorized by a three-fourths vote of the employees. The Act defines in some detail unfair practices of both employers and employees. Breaches of contract, generally subject only to civil sanctions, constitutes criminal conduct. All trade unions, collective bargaining units and company unions must be incorporated. Union books must be audited annually by the State Industrial Commission, elections held annually and dues and membership fees must be "reasonable" and are subject to the approval of the Industrial Commission, which may alter them. The use of union funds for political purposes is forbidden.

According to "Labour Relations Reporter" the legislatures of Florida and Minnesota have passed laws regulating labour union activities.

Florida

The Florida statute requires: (1) The filing of financial statements and other union data annually with the secretary of state; (2) the registration of union organizers; (3) the annual election of officers by majority vote; (4) the filing of collective bargaining contracts with the Secretary of State; (5) the abolition of union work permits; (6) the review by the courts of the expulsion of union members; and (7) it forbids unions making financial contributions to political parties or to persons

running for public office. Penalties up to \$1,000 are provided for each violation of any of the provisions of the Act.

Minnesota

In addition to amending the state Labour Relations Act, the legislature of Minnesota passed a new law known as the "Labour Union Democracy Act." The amendment to the Labour Relations Act forbids: (1) The institution of a strike in violation of any collective bargaining agreement, so long as the employer is complying with the terms of the agreement in good faith. (2) The calling of a strike which has not been voted for by a majority of the employees. (3) Interference with the production, transportation, processing or marketing by a producer, processor or marketing organization of agricultural products, except in further-

ance of the employees' right to bargain collectively. (4) Interference with the free and uninterrupted use of public roads. (5) Conducting a strike or a boycott or picketing against an employer in connection with a jurisdictional dispute after the governor has appointed a referee to determine the controversy or it has been submitted to some tribunal for arbitration.

Under the "Labour Union Democracy Act" unions are required: (1) To hold elections of officers not less than once in four years by secret ballot after reasonable notice has been given to all persons eligible to vote; (2) to submit financial reports to members at least once a year. Unions failing to comply with the requirements of the Act shall be disqualified from representing employees in collective bargaining.

Adoption of Anti-Strike Legislation in United States

Act Empowers President to Take Over War Plants Affected by Disputes and Provides Penalty for Instigation of Work Stoppages in Such Plants

AN Act designed to prevent strikes and lockouts in war industry has been passed recently by the government of the United States. The measure, known as the Connally-Smith Bill, became law at the end of June under the title of "War Labour Disputes Act", when Congress overruled President Roosevelt's veto of the legislation. It empowers the President to take over any war plant where a work stoppage occurs, and provides for a fine or imprisonment of any person instigating a strike or lockout. A summary of the chief provisions of the new law follows:

(1) The President is authorized to take possession of any "plant, mine or facility" equipped to aid the war effort whenever operations have been so interrupted by "a strike or other labour disturbance" as to impede or delay the war effort. Such possessed properties are to be operated by the government under the terms and conditions of employment in effect when they were taken over, except that any changes requested by a majority of the employees and approved by the War Labour Board, must be put into effect. Provision is made for the return to the owners of such seized plant, mine, or facility as soon as practicable, but in no event more than 60 days after the restoration of productive efficiency.

(2) It is unlawful for any person to instigate or encourage a lockout, strike, slowdown or other interruption in the operation of properties taken over by the government,

or to provide or to distribute strike or other benefits for those taking part in the stoppage. Any person who wilfully violates this provision will be subject to a fine of not more than \$5,000, or to imprisonment for not more than one year, or both. No individual shall be deemed to have violated this provision by reason only of having quit work or having refused to accept employment.

(3) The War Labour Board is authorized to decide finally all labour disputes certified to it by the United States Conciliation Service as threatening to interfere with the war effort, or in which it has intervened on its own motion. It may prescribe wages, hours and all other terms and conditions governing relations between the parties, and issue subpoenas requiring the attendance of witnesses and the production of records. A member of the War Labour Board is forbidden to participate in any decision in which such member has a direct interest as an officer, employee or representative of any party in the dispute.

(4) When a dispute arises in a plant, mine or facility not taken over by the government, that threatens seriously to interrupt war production, representatives of the employees involved must notify the Secretary of Labour, the War Labour Board and the National Labour Relations Board to that effect, and for thirty days thereafter production must be continued under the conditions that prevailed when the dispute arose, except as they

may be modified by mutual agreement or by the National War Labour Board.

(5) On the thirtieth day after notice of a dispute has been given, unless the dispute has been settled, the National Labour Relations Board shall forthwith take a secret ballot of the employees in the industrial establishment concerned "on the question whether they will permit any such interruption of war production". The results of such balloting shall be open to public inspection.

(6) Labour organizations, banks and corporations organized under Federal law in the United States are forbidden to make political contributions in any election involving officials

of the Federal Government. Violation of this provision is punishable by a fine of \$5,000 for corporations or labour organizations, and \$1,000 or imprisonment for one year for individuals, or both fine and imprisonment.

(7) The Act is to terminate six months after the termination of the war.

Immediately after the announcement of the passage of the Act, William Green, President of the American Federation of Labour and Philip Murray, President of the Congress of Industrial Organizations sent messages to President Roosevelt, renewing their allegiance to labour's no-strike pledge for the duration of the war.

Prices and Price Control

Price Control in Canada During June, 1943

Orders of Wartime Prices and Trade Board Affecting: Foods—Freezing of Business—Rooming Accommodation—Simplification and Conservation—Enforcement Activities

THE price problem in the field of foods proved of major importance again during the month of June. Price and supply problems were particularly difficult with respect to certain fresh fruits and vegetables and special measures were taken in the case of potatoes involving price adjustments and a subsidy arrangement.

Maximum prices for jams and jellies have been standardized and are to be maintained by means of subsidies. Maximum prices were also set for canned rhubarb, honey and spices and adjustments made in the markups allowed for cheddar cheese.

Additional simplification was carried out in the field of textile products and clothing and steps were taken to conserve wool cloth and feathers and down for essential uses. Control was placed over the production of elevators and commercial cooking equipment.

Fresh Fruits and Vegetables

Potatoes.—Maximum prices for new potatoes were reduced on June 7 from the level set early in May by Order No. 273 to the ceiling price for Canada No. 1 Grade of old potatoes. New potatoes have had to be regarded as necessities this year because of prevailing shortages of old potatoes and the Board has therefore arranged that they will be subsidized until August 31 to sell at the ceiling price for old potatoes.

In the case of Canadian-grown potatoes the subsidy will be paid to distributors buying new potatoes direct from a primary producer or his agent for resale, subject to a maximum purchase price provision. The amount of the subsidy paid through the wholesaler will represent the difference between his laid-down cost in carload lots at his distributing point and the lawful wholesale ceiling for new potatoes at that point. When a retailer buys from a primary producer the subsidy will represent the difference between his laid-down cost at his distributing point and the lawful wholesale ceiling in less than carlots at that point. The amount of subsidy is controlled by specifying

the maximum purchase price f.o.b. original shipping point, the amount being gradually reduced as the season advances.

In the case of imported new potatoes, the original arrangement was to pay the subsidy on shipments ordered on or after May 3 and entered for consumption during the period June 3 to July 31. This was later changed and the subsidy is now being paid only on new potatoes entered at customs prior to midnight July 8 or shipped on a bill of lading dated after that time when a permit to import has been granted by the Board.

Oranges.—The basis of subsidy on imports of oranges was changed during the month leading to a reduction in prices of oranges to Canadian consumers. The increase in subsidy was allowed primarily in order to cover an increase in price of oranges in California.

General.—Also put into effect during June was a recommendation of the Wartime Prices and Trade Board that imports of potatoes, onions, green beans, and some other vegetables and pineapple, grapefruit and lemons be exempted from the 10 per cent war exchange tax and the special excise tax in order to reduce their landed cost and consequently prices to consumers.

The Board has in addition been reviewing the situation regarding fresh fruits and vegetables in general. When the price ceiling regulations were drawn fresh fruits and vegetables were exempted because of their perishable and seasonal character; subsequently oranges, bananas, potatoes and onions were brought under the ceiling. In a statement on June 8 the Board explained that recent high prices have been affected by two factors: the substantially higher price levels prevailing in the United States and the lateness of the season which has extended our dependence upon U.S. sources of supply into a period when ordinarily domestic products are coming into the market. Fluctuations in supply and demand and perishability of these products render inappropriate or unworkable any but a very complex method of markups or price control. The use of a subsidy to offset the

high import costs is not felt to be justified as many of the imported commodities at this time of year are of a luxury character. The problem is still under examination however and the Board stated that "if prices continue at present abnormally high levels an effort will be made to establish control even though it may cause radical changes in present marketing methods".

Processed Fruits

Jams and Jellies.—During the month standard maximum prices were fixed for jams and jellies. Uniform prices were set, f.o.b. factory, replacing individual manufacturer's ceilings, for the different varieties and grades (pure, pectin and blended or compound) of jams and jellies. Lower prices were set for British Columbia than for the rest of the Dominion. Manufacturers' prices and distributors' markups have been limited so that prices for consumers will on the average not be above those of the basic period (A-787, June 25).

The levelling out of the price differences and maintenance of ceiling prices is to be achieved in large measure by the use of subsidies, one paid by the Commodity Prices Stabilization Corporation Ltd. to compensate manufacturers for the reduction made in their prices to June, 1941, levels, and the second provided by the Department of Agriculture on certain fruits to compensate manufacturers for increased costs in 1943 over 1942. This reduction in manufacturers' prices was originally made under an order in March, 1942, coupled with a subsidy arrangement, requiring manufacturers to set back their prices on certain grocery items, including jams and jellies, in order that wholesalers and retailers could continue to replenish their stocks and sell under their ceiling prices. Under the present subsidy plan not all jams and jellies will be eligible for subsidy. The C.P.S.C. will not subsidize manufacturers on sales of pure strawberry and pure raspberry jam, sales of blended or compound jams other than strawberry and raspberry, nor sales to the Department of Munitions and Supply.

The subsidy from the Agricultural Food Board (Department of Agriculture) is to be paid on certain fruits purchased for manufacture into jam. There is evidence of a shortage in the current year of the fruits, especially strawberries, used for jam manufacture. Payment of the subsidy will enable manufacturers to compete with prices offered for fresh consumption of these fruits in short supply and at the same time be able to sell the manufactured product under the ceiling. To date,

announcement has been made of the subsidies, payable on strawberries, raspberries and loganberries used in the manufacture of "pectin" and "compound" jams. These subsidies are paid to the growers through the manufacturers and must be paid in addition to a specified minimum amount, the manufacturer's minimum net purchase cost.

A further order during June requires any person in British Columbia processing or preserving any strawberries, raspberries, loganberries, black currants or apricots in SO₂ or by heat sterilization or by freezing, to sell all such products to C.P.S.C. Ltd., unless he uses the products himself to manufacture jam or ice cream in B.C. or if he packages them ready for household consumption. These fruits are often processed by one of these methods first and then sold to a jam manufacturer. Purchase of the product by the Corporation is designed to ensure that a supply will be available and will be distributed equitably to manufacturers. The price paid by the Corporation will be that fixed by the Administrator of Processed Fruits and Vegetables (A-794, June 29).

Canned Rhubarb.—Maximum prices were set on sales by canners of canned rhubarb, in the three capacities of containers in which it can be packed. The production of canned rhubarb has been increasing and it was found advisable to standardize maximum prices since some manufacturers had not established a maximum price during the basic period. Distributors are allowed to charge basic period markups, not exceeding specified percentages of selling price (A-779, June 25).

Other Price Orders

Honey.—Maximum prices were set for extracted honey and for pasteurized granulated honey in an order, effective June 21. Producers' maximum prices were specified and limits placed on the markups which may be added by wholesalers and retailers in determining their ceiling prices. Records must be kept of all purchases by the trade, and invoices must be issued covering all sales (B-286, June 14).

Cheese.—A new order was issued regulating maximum prices and markups on cheddar cheese. It is a normal procedure in the cheese trade to have the product handled by more than one wholesale distributor and the new order allocates on a more equitable basis the markups allowed to different types of wholesale distributors rather than merely limiting the aggregate wholesale markup. In addition provision has been made for sales by a manufacturer to a retailer, with the same

markup basis as for wholesalers, and maximum cutting charges have been specified. Prices specified for manufacturers and the amount allowed for paraffining are unchanged; amounts allowed for storage charges were reduced from 3/8 to 1/4 cent per pound. (A-752, June 2, replacing Part IV, Board Order No. 195.)

Spices.—Spices have been deleted from the list of grocery items on which a subsidy may be paid by C.P.S.C. Limited in consideration of a reduction in price by the manufacturer to June, 1941, levels. Spices are now being bulk purchased by the Corporation. An order has been issued specifying maximum prices for a manufacturer selling ground spices to wholesalers, retailers and industrial users and limiting the markups which may be used by wholesale and retail distributors (A-758, June 8).

Clothes Pins.—Clothes pins have also been eliminated from the subsidy arrangement mentioned in the preceding paragraph. In its place specific maximum prices were set at slightly increased levels to cover higher manufacturing costs for clothes pins made entirely of wood; regional differentials were provided for Eastern Canada, Western Canada and British Columbia (A-786, June 25).

Used Goods.—Curtailement of production of durable consumer goods, particularly kinds of household electrical goods, has necessitated a gradual extension of price control orders covering used goods in this field. Recently maximum prices were set for used sewing machines, refrigerators and metal beds. During the month maximum prices were fixed for used domestic radios and for used domestic electric washing machines. One schedule of prices is set for rebuilt machines or for used ones which are capable of giving substantially the same performance as a new one (an implied warranty as to performance, etc. must be given by the dealer on such sales) and a second one for used machines not coming up to this standard (A-761, June 9 and A-755, June 5).

Business Controls

Certain further controls have been placed on the movement and expansion of businesses by amendments to the regulations put into effect in November, 1942. In general these regulations prohibited, except under special permit from the Director of Licensing, the establishment of a new business, the manufacture or distribution of a new line of goods, or the use of any larger premises by a manufacturer, wholesaler, retailer or by an operator of certain designated services.

There are three main changes in the new order: Each branch or outlet of a firm must now be treated as a separate business; an operator of a business may not, without a permit, move into a city, town or village in which he did not carry on business in November, 1942 (this supplements the restriction on movement to larger premises and makes it possible to prevent some centres becoming over-served and others insufficiently served); and thirdly the handling of new lines of goods is more closely controlled by increasing the number of categories of goods listed but reducing the range of goods covered by a single category (B-284, May 25, effective June 14, replacing B-184).

Rooming Accommodation

Four additional areas were designated as areas to which the provision of A-488, which provides for control of rental rates charged for rooming accommodation, applies. Landlords renting rooms in a designated area are required to apply to the local Examiner for a maximum rate card and to post in the room the card issued applicable to it. All the orders prescribe the rate cards and the application forms which are required. The following areas were affected: The City of Kingston, Ont., and a three mile radius; the cities of Lachine, Montreal, Outremont, Verdun and Westmount and the towns of Hampstead, Montreal East, etc., in Quebec; the town of Shelburne in Nova Scotia; and the towns of Digby and Annapolis in Nova Scotia and the area within a distance of 5 miles from the main highway between the two towns.

Simplification and Conservation

Textiles.—Several additional orders have been issued furthering the simplification of textile products and clothing. As a result fewer operations will be required and more effective use made of factory space and machinery. These orders cover the manufacture of knitted lingerie and of rayon fabrics for such lingerie and the manufacture of fabric labels, bias binding, laces, and suspender and garter fabrics. (Nos. A-768 to A-771, June 12, A-777, June 21.) A shortage of ribbon and other textile trimmings used in the manufacture of women's hats has led to the removal of the prohibition on use of fur trimming which utilizes principally ends and scraps of fur (A-783, June 24).

In May, 1942, the style range of men's hats, which had numbered in some cases as high as 150 to 175 was cut by 33-1/3 per cent; a new order this month limits the number of styles

a manufacturer may make to 50. The number of colours for fur felt hats for each manufacturer has been cut from 19 to 12; "homburg" style hats have been prohibited; and specifications for binding, stitching, etc. have been simplified. (A-774, June 18, replacing A-154.)

The sale to any person of any fabrics containing wool which have been put in process for military accounts and later rejected, has been prohibited, without the Wool Administrator's permission, to ensure that such rejects do not get out to non-essential uses (A-781, June 23). Steps were taken during the month to control the sale, delivery and use of feathers and down for which there has been an increased demand for military and other essential requirements, such as sleeping bags for the armed services and the Alcan Highway, aviators' coats and pillows for hospitals. Sales of certain kinds of processed down and feathers may be made only to manufacturers requiring them for such essential uses, their use in other goods requiring permission. Maximum prices were set on sales by processors and certain processors were licensed to ensure that the washing, sterilizing and grading of feathers and down would be undertaken by qualified and capable persons. Other regulations are designed to encourage maximum collection of feathers and down and speed their delivery to processors and manufacturers (A-773, June 18).

Metal Products.—Control over the manufacture of elevators, equipment and parts was formalized and extended during the month and the use of non-ferrous metal, stainless steel or alloy steel has been prohibited in the manufacture of certain parts (A-767, June 12).

Controls similar to those already set up in the United States have been placed over the manufacture of commercial electrical cooking equipment and commercial electrical appliances. A permit is now required for their manufacture except when ordered by the Departments of Munitions and Supply, National Defence or Pensions and National Health or for "certified" public hospitals. Parts may be made without restriction for the repair of equipment or appliances now in use (A-782, June 24).

Regulations covering the manufacture and sale of razors and razor blades have been revised. Permission is now required for the production and sale of safety razors except for orders of certain government departments and agencies; production of straight razors is entirely prohibited. Because of increased demands for razor blades an increase has been allowed in production quotas for safety razor blades for domestic sale to 100 per cent of 1941 production. (A-754, June 4, replacing A-416.)

Miscellaneous Products.—Sizes of facial tissues have been reduced to two and specifications given as to maximum weight of paper and as to packaging in order to help meet a situation caused by increased demand and limited plant capacity (A-765, June 11). Also designed to save materials and labour were certain additional restrictions placed on the manufacture of greeting cards covering amount of paper, number of designs and packaging (A-746, May 28).

An order by the Administrator of Oils and Fats reduces by 10 the number of sizes of containers for packaging shortening and restricts the number of brands which a manufacturer may produce after July 1. The order is designed to keep costs from exceeding their present level and to reduce them, if possible; operating costs occasioned by change-overs in packaging will be reduced; duplicate inventories of finished materials will be eliminated and considerable saving in metal containers will also be effected (A-757, June 7).

Enforcement Activities

There was no significant increase in June in the total number of prosecutions under the Wartime Prices and Trade Regulations. The number of prosecutions under price and rentals regulations increased while the number under rationing decreased after being relatively high in April and May. Number of prosecutions during the second quarter of 1943 have ranged from about 340 to 365 per month compared with an average of about 220 in the previous quarter.

Prices, Retail and Wholesale, in Canada, June, 1943

Cost of Living, Prices of Staple Articles and Index Numbers

NOTE: Owing to misunderstandings which have arisen regarding retail prices published in this section of the LABOUR GAZETTE, the following explanation has been thought necessary:—

1. *The Cost-of-Living Index* is calculated by the Dominion Bureau of Statistics and is used in the determination of the *Cost-of-Living Bonus*. This index is not calculated from the data as to prices, etc. shown in Tables 3 and 4 below.

2. Tables 3 and 4 include certain data collected by the Dominion Bureau of Statistics and certain other data gathered by official correspondents of the LABOUR GAZETTE, as indicated below.

3. Tables of prices have been printed in the LABOUR GAZETTE along the same lines as at present since 1910—long before the cost-of-living bonus system came into effect.

4. As to Tables 3 and 4, it should be pointed out that the prices of certain commodities, especially meats and food products, vary substantially even within a single locality. In

most cases the figures given are average figures for each locality.

5. In the current LABOUR GAZETTE no prices for bituminous coal are quoted for Ontario and Quebec in Table 4. Figures for the prices of bituminous coal published in the issues of the GAZETTE for April and May may have been interpreted as indicating that the average price of bituminous coal had increased appreciably. Such is not the case. The apparent changes in price were due to a changed basis of quotation, with respect to the different grades of coal included, rather than to a difference in price of the grades of coal previously included. This was pointed out in a footnote to the Table, but on account of the possible misinterpretation of the figures it has been considered necessary to make the above explanation. The prices for bituminous coal for the cities in the Maritimes, the Prairie Provinces and British Columbia in Table 4 are as supplied by the Dominion Bureau of Statistics. According to figures given by the Bureau these prices were for every city speci-

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

fied the same from January to May inclusive, showing no increase or decrease in prices.

The official index number of the cost of living calculated by the Dominion Bureau of Statistics was four tenths of a point higher at the beginning of June than one month earlier. The increase from 118.1 at May 1 to 118.5 at June 1 was due mainly to advances in the food group. Slight increases were recorded however in the fuel, clothing and miscellaneous groups. The index of the food group advanced one point from 129.9 at May 1 to 130.9 at June 1 due to advances in the prices of eggs, meats, potatoes, and oranges while the price of butter declined. In the clothing group scattered increases were recorded in prices of men's wear and in the miscellaneous group motor operating costs advanced.

At the beginning of June the index was 17.6 per cent higher than in August, 1939, the last prewar month. For the similar period during the last war, from July 1914 to June 1918 the advance was 49.3 per cent. Since the establishment of the prices ceiling the index has advanced 2.6 per cent that is between October 1, 1941, and June of the current year. For the comparable period during the last war between October, 1916, and June, 1918, the advance was 28.6 per cent.

Since August 1939 foods have advanced 31.9 per cent; clothing 20.3 per cent; home furnishings and services 16.7 per cent; fuel and light 14.2 per cent; rent 7.4 per cent; and the miscellaneous group 6.8 per cent.

In compliance with Order in Council P.C. 6219, as amended, the prices of cigarettes and tobacco used in calculating the index do not include the tax imposed on June 24, 1942, under the special War Revenue Act.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G. 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, except under the regulations of the Wartime Prices and Trade Board. In each issue of the LABOUR GAZETTE the activities of the Board in the operation of the price control policy are summarized. Prices of certain fresh fruits and vegetables and certain kinds of fresh, cured and canned fish were exempted by the Board from the provisions of the maximum prices regulations. The order does not apply to sales by farmers and fishermen to dealers or processors of live stock, poultry, eggs, milk, cream, farm-made cheese, and fish, but does not apply to sales by such dealers and processors and to sales by farmers and fishermen to consumers.

The index number of the cost of living was constructed on the basis of a survey of expenditure of 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,500 in 1938. The average expenditure was \$1,453.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index was \$40.

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. The figures at certain dates since August, 1939, are: August, 1939, 100.0; September, 100.0; October, 103.8; November, 104.3; December, 104.3; January, 1940, 104.2; February, 104.3; March, 105.5; April, 105.5; May, 105.3; June, 105.3; July, 106.4; August, 106.8; September, 107.9; October, 108.4; November, 109.7; December, 110.0; January, 1941, 110.4; February, 110.1; March, 110.2; April, 110.7; May, 110.9; June, 112.7; July, 114.9; August, 117.7; September, 119.4; October, 120.1; November, 121.4; December, 120.6; January, 1942, 119.9; February, 120.3; March, 120.6; April, 120.6; May, 120.9; June, 121.8; July, 123.9; August, 123.5; September, 123.0; October, 123.7; November, 125.0; December, 125.2; January, 1943, 122.5; February, 122.2; March, 122.7; April, 123.2; May, 124.0; June, 124.5.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Wholesale Prices

In wholesale prices the Dominion Bureau of Statistics index number on the base 1926 as 100, advanced from 99.2 for May to 99.5 for June. The largest advance was recorded in the vegetable products group from 90.4 in May to 91.3 in June due mainly to advances in the prices of lemons, bananas, wheat, barley, rye, onions and potatoes. In the animal products group the slight increase in the index was due to higher prices for furs, steers, lambs, certain fresh meats, eggs, canned lobster and mackerel. The advance in the index since August, 1939, was 37.6 per cent, as compared with an increase of 94.9 per cent

TABLE I—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

—	Adjusted to base 100-0 for August, 1939	On base of average prices in 1935-1939 as 100*

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.

The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

for the comparable period during the last war, that is between July, 1941, and June, 1918. The increase in consumers' goods between August, 1939, and June, 1943, was 34.1 per cent and in producers' goods 40.1.

Explanatory Note as to Retail Prices

Table IV on retail prices and rentals shows the prices at the beginning of June of seventy-six staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except the following, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers. The exceptions are milk, bread, shoulder of veal, leg roast of pork, unsliced bacon, dairy butter, evaporated apples, vinegar and coal oil. Information as to the prices of the foregoing, with the exception of milk and bread, is obtained by the correspondents of the *LABOUR GAZETTE*. The prices of milk, bread, fuel and the rates for rent are obtained by the Bureau of Statistics and by the correspondents of the *LABOUR GAZETTE*.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

By Order in Council P.C. 8965 (L.G., 1941, page 1462) the price ceiling established by P.C. 8527 (L.G., 1941, page 1371) was extended to rentals charged for all real property, the order to be administered by the Wartime Prices and Trade Board. Under authority conferred by Order in Council P.C. 5003 (L.G., 1940, page 995) the Board from time to time had fixed maximum rentals for housing accommodation in certain of the

cities in the list on page 1052. In these cities the maximum rentals already fixed continue unchanged, based in some cases on those in effect of January 2, 1940, and in the others on those in effect on January 2, 1941. The former are Halifax, New Glasgow, Sydney, Thetford Mines, Kingston, Ottawa, Windsor, Brandon, Calgary, Nanaimo, New Westminster, Prince Rupert, Vancouver and Victoria; the latter are Truro, Moncton, Brockville, Belleville, Fort William, Hamilton, Niagara Falls, Oshawa, Peterborough, Port Arthur, St. Catharines, Sault Ste. Marie, Regina, Edmonton, Medicine Hat and Lethbridge. In all other cases the maximum rental for any housing accommodation is the rental which was in effect on October 11, 1941. Provision is made under the orders of the Board for variation of the maximum rentals for any accommodation under certain special circumstances affecting the accommodation.

Retail Prices

Beef prices continued slightly upward at the beginning of June reflecting advances permitted in wholesale prices. Sirloin steak at 40.5 cents per pound averaged 0.5 cents higher than at May 1 and nearly 4 cents higher than at June 1, 1942. Increases were recorded also in other meats, lamb averaging 1 cent per pound higher at 40 cents and fresh loin of pork one-half cent per pound higher at 36 cents per pound. A seasonal increase was recorded in the price of eggs, grade A advancing from 40.6 cents per dozen to 41 cents. Stocks in cold storage at June 1 were considerably greater than at May 1 but were only about one fifth of the stocks in storage one year ago. The price of creamery butter at 39.1 cents per pound averaged nearly 1 cent per pound lower than at May 1. Production for the first five months of 1943 was 22.3 per cent greater than for the similar period of 1942 while the production of cheese declined 50 per cent in the same comparison. The average price of cheese at June 1, 34.5 cents per pound was little changed from the previous month. The price of onions increased in the average from 6.5 cents at May 1, to 7.1 cents at June 1. Higher prices for potatoes were reported from most cities, the Dominion average being up from 49.7 cents for 15 pounds to 52 cents. The price at June 1, 1942 was 42.9 cents.

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—monthly, Prices and Price Indexes (Canada); annually, Prices and Price Indexes (Canada and Other Countries).

* Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

Prices in Great Britain and Other Countries

THE tables on pages 1055 and 1056 which appear quarterly give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries.

As these tables are compiled from British and foreign sources, the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the LABOUR GAZETTE.

Since the outbreak of war, control of prices, production and trade has been extended in many countries, resulting in much less movement in prices than occurred in the inflationary period during the last war.

Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 163.3 for May, an increase of 0.3 per cent

for the month. Food and tobacco was 0.6 per cent higher due almost entirely to the increased duty on tobacco. Industrial materials and manufactures were practically unchanged, the only notable increase being one of 1.3 per cent in textiles, due chiefly to a substantial rise in the price of jute.

COST OF LIVING.—The *Ministry of Labour Gazette* index number, on the base July, 1914=100, was 199 at May 1, an increase of $\frac{1}{2}$ of one per cent for the month. Clothing prices were about $\frac{1}{2}$ of one per cent lower than the previous month due to the slight increase in the proportion of utility cloth and apparel on sale at lower prices than non-utility goods. The "other items" group was 7 per cent higher than the April 1, level, due chiefly to the increase of about 17 per cent in the price of tobacco and cigarettes with the increased duty.

(a) Average for year. (b) First of month. (c) 15th of month. (d) End of month. (e) New series. (f) Prior to 1926, the number of commodities was 236; from January 1926, to December, 1933, 502; and since January, 1934, the number is 567.

Newfoundland

COST OF LIVING.—The index number of the Department of Health and Welfare, of the cost of living at St. John's, on the base October 1, 1938=100, was 145.3 at May 1, an increase of 0.7 per cent for the month, due to higher prices for certain foods. Other groups remained unchanged.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 104.1 for May, an increase of 0.4 per cent

for the month. Farm products advanced 1.5 per cent, foods advanced two per cent due almost entirely to the sharp rise in fruits and vegetables; other groups registered little or no change.

COST OF LIVING.—The index number of the Bureau of Labour Statistics, of the cost of goods purchased by wage earners and lower-salaried workers in large cities, on the base 1935-1939=100, was 125.1 at May 15, an increase of 0.8 per cent for the month. An increase of 1.7 per cent in food prices was almost entirely responsible for this increase in the family budget.

*Canada's Cost of Living Index***Hon. J. L. Ilsley, Minister of Finance, Explains Factors Entering into Compilation**

IN the House of Commons on July 7, Hon. J. L. Ilsley, Minister of Finance, gave a comprehensive review of the factors entering into the compilation of Canada's cost of living index.

This statement is reproduced herewith as follows:

During last night's sitting of the committee, the hon. members for Winnipeg North Centre and Vancouver East dealt at some length with the official cost of living index prepared by the dominion bureau of statistics, suggesting that it did not provide an accurate measure of recent changes in costs of living in Canada. I pointed out during the course of discussion that the wartime prices and trade board has nothing whatever to do with the preparation of the index, either directly or indirectly, and that it is based on an independent and scientific analysis by competent statisticians in the bureau of statistics which is responsible to my colleague the Minister of Trade and Commerce.

In view of the importance of the index to the government's whole wage and price stabilization policy, I have come to the conclusion, however, that I should not leave these criticisms unanswered. I am afraid that if I do so, hesitation may be interpreted as an admission that there was some validity in the criticisms. This would be most unfortunate and I want to make it perfectly clear that the government as a whole realizes the importance of the index to all those Canadians whose cost-of-living bonus is determined by it and is very much concerned to see that the index is sound and accurate and has the confidence of the public at large.

For this reason I intend giving a fairly comprehensive statement dealing with the preparation of the index. Again may I repeat that the preparation of the index has nothing to do with the wartime prices and trade board or the Minister of Finance. In effect the committee may consider that in dealing with the index I am speaking on behalf of my colleague the Minister of Trade and Commerce who is unavoidably absent to-day.

First, with the consent of the committee I wish to place on *Hansard* a copy of a recent bulletin prepared by the bureau of statistics which deals with the technique employed in preparing the cost of living index and which includes a list of the items in the index. Have I that consent? This contains many figures, and it would take a long time to read it.....

I am making a statement supplementary to it. I take this trouble, because this is a very important matter, and there is wide public interest in it. The bulletin prepared by the bureau of statistics, which I shall now place on *Hansard* deals with the technique employed in preparing the cost of living index, and includes a list of the items in the index. It is as follows:

*Appendix***Prices and Price Indexes, February, 1943**

Revised explanation and description of the dominion bureau of statistics cost of living index.

Introductory Note:

This memorandum describing the official cost of living index replaces the original statement, the supply of which has been exhausted. The present memo gives more attention to interpretation, and notes several minor adjustments in weights which have been made in accordance

with the bureau's practice of keeping the index in line with major changes in consumption.

Purpose:

The dominion bureau of statistics cost of living index measures the influence of changes in retail prices of commodities and services upon the cost of a representative urban wage-earner family budget. The index is specified by order in council P.C. 5963 as the basis for cost of living bonus adjustments authorized under the terms of this order.

Interpretation:

It should be clearly understood that the index is a measurement of price change. Many people use the term "living costs" to indicate the total cost of things they buy. Used in this sense, "living costs" may include different things from month to month and year to year, and likewise different amounts and qualities of the same things. A cost of living index based upon this idea would simply reflect the value of total purchases made by everyone. In normal times it would move closely in line with estimates of national income. The bureau's index is based upon a quite different idea. It measures changes in the cost of a family budget which includes the same amounts of the same commodities and services for considerable periods of time; it is revised only to take account of important "long-run" changes in consumption. It is, therefore, essentially an index which measures changes in prices.

Each index is a percentage which shows the relationship between the dollar value of the index budget for a specified period, and the corresponding dollar value of the same budget in a reference period. The bureau's standard reference period includes the five years 1935-1939. The average value of the index budget for this period is represented by 100.0. The value of the same budget in August, 1939, was 100.8 per cent of the reference budget, and the corresponding value for December, 1942, was 118.8 per cent. These figures become the cost of living index numbers for August, 1939, and December, 1942.

Because August, 1939, the last pre-war month, provides the basis for cost of living bonus adjustments, it is frequently used as a reference period. The procedure in this case is essentially the same as that described above. The value of the index budget in August, 1939, is considered as 100.0, and budget values for other months are computed as percentages of the August, 1939, value. The December, 1942, index then becomes 117.9. Indexes related to the August, 1939, budget value have become widely known as the "adjusted" indexes. They may be computed by dividing the original August, 1939, index of 100.8 into the comparable index for any other period, e.g., the December, 1942, index of 118.8 divided by 100.8 gives 117.9.

The Index Budget:

A complete list of items in the cost of living budget, together with percentages indicating the relative importance of individual items and groups of items is listed below. The basis upon which this list was selected has been described in detail in an earlier release, "Living Costs in Canada, 1940". The index budget represents annual purchases reported by a group of 1,439 typical wage-earner families in the following cities: Charlottetown, Halifax, Saint John, Quebec, Montreal, Ottawa, Toronto, London, Winnipeg, Saskatoon, Edmonton and Vancouver. These expenditures covered the year ending September, 1938.

The survey families averaged 4.6 persons and the majority had two or three children. Family earnings in many cases were supplemented by minor sources of income; total incomes for these families were heavily concentrated between \$1,200 and \$1,600. They ranged, however, from as low as \$600 up to about \$2,800 per annum. There were approximately two tenant families to every one home-owning family, and about one family in three operated a motor car. The general distribution of living expenditures for these families which represented all the principal racial groups in Canada was as follows:

Urban Wage-Earner Family Annual Living Expenditures
(Year ending September 30, 1938)

Budget Group	Expenditure Averages	Percentage Distribution
Food	\$ 443.0	31.3
Shelter	269.5	19.1
Fuel and light	90.5	6.4
Clothing	165.8	11.7
Home furnishings	125.7	8.9
Miscellaneous	319.4	22.6
Health	60.8	4.3
Personal care	23.9	1.7
Transportation	79.3	5.6
Recreation	82.1	5.8
Life insurance	73.3	5.2
Total	\$1,413.9*	100.0

* Directly represented in the index. Other miscellaneous outlay brought the total family living expenditure to \$1,453.8.

Minor changes were made in the index budget in January, 1943, to take account of war-time changes in consumption, and adjustments were made in such a way that the index continues to reflect price changes only. The revised

budget measures percentage changes in prices from January, 1943, forward, but does not show increases or decreases reflecting weight differences. In other words, the value of the January, 1943, adjusted budget is exactly the same as the value of the budget it replaces.

The following items have been removed from the revised budget: coke, automobile tires and tubes, steel frying pans and bananas. These are all items which are not available in quantity to the general public. Downward weighting adjustments have been made for tea, sugar and motor operating costs. Weight removed from motor operating costs has been transferred to the recreation sub-group, since the reduction in motor operating costs represents mainly a reduction in recreational driving. The weights of deleted food items and reductions for tea and sugar have been prorated among other items in the food index. No change has been made in weights for coffee and butter. The present weight for butter provides a weekly per capita allowance of only 0.1 pound per week above the ration allowance, and the change involved in coffee would be even smaller. Such changes are not of sufficient importance to warrant weight adjustments. The steel frying pan weight has been added to the weight for cast-iron frying pans. The question of weight adjustments is under constant consideration and other changes may be made and announced from time to time to keep the index budget in line with changing consumption.

Commencing July, 1942, a change was made in the treatment of taxes on cigarettes and tobacco. Prior to that time changes in all indirect taxes affecting consumer prices had been reflected in the index. By order in council P.C. 6219 as amended, the tax imposed on June 24, 1942, on cigarettes and tobacco was excluded from indexes calculated for the purpose of reckoning cost of living bonuses.

The bureau continues to publish in the monthly bulletin "Prices and Price Indexes", a cost of living index which reflects all indirect taxation.

Comments on Group Index Numbers

The index budget is divided into six expenditure groups for which separate indexes are calculated: these are foods, fuel and light, rent, clothing, home furnishings and services, and miscellaneous items. Each group contains a list of items sufficiently large to make it representative of the merchandise field covered. It would be possible to add many more minor items without affecting the movements of the composite cost of living index by any significant amount. These additions would lengthen the time required to calculate the index and impose a greater burden upon firms making price reports, without making a corresponding improvement in the accuracy of the index. In many cases, accuracy might be reduced as comparisons on a quality, or specific quantity basis are not possible over a long period. This would be true of style merchandise such as women's hats, and also for fresh vegetables, which are frequently sold in bunches. The cost of all these omitted items is included in group weights, which represent all expenditures falling within the six groups noted above. The base period food weight of 31 per cent, for example, was reckoned from total food costs reported by survey families, although the food index includes only 45 items which represent about 75 per cent of a representative family's food expenditure.

Foods: Prices used in calculating food indexes are collected on the first business day of each month from approximately 1,600 stores including independent and chain grocers and butchers. Quotations for each of the 45 budget

items are averaged and then multiplied by the budget quantity for each individual item to find the cost for that item. These individual cost figures are added together to find the total cost of the food budget; this figure is then expressed as a percentage of the corresponding reference period cost to find the food index.

Fuel and Light: From January, 1943, the fuel and light index has been based upon changes in prices for coal and domestic rates for electricity and gas. Coke prices formerly were included for Quebec and Ontario cities. Separate indexes are calculated for coal, gas and electricity. The two last mentioned are reckoned from monthly bills for quantities which are typical of consumption in the cities represented. The bill for each city is weighted by the number of domestic consumers in order to calculate dominion indexes. The coal index also takes account of typical amounts consumed in different areas and of the population of each city represented in the index. Price changes for coal are related to kinds most used in each area.

Rents: There are two tenant wage-earner families for every home-owning wage-earner family in Canada, and the cost of living index is calculated on the assumption that housing costs generally are reflected in rental trends. Rental surveys are made by the bureau at the May and October leasing periods. Rental agents are asked to report upon the current position of rents relative to those at the preceding lease date, as indicated by their list of rental properties. In the workmen's group of dwellings, upon which the rental index is based, records are collected for houses, flats and apartments. Before reporting blanks are sent out, rent data and property descriptions reported by each agent for the last period are copied onto the new schedule in order to maintain continuity from period to period. The calculation of the rent index is similar to that for the fuel and light series, with two sub-group indexes being reckoned first for houses, and flats and apartments. Very complete weighting data have been used, recognizing the different numbers of each type of dwelling in various centres. Approximately 200 reports from 61 cities are used in making rental indexes.

Clothing: The clothing index has been based upon a carefully selected list of men's and women's apparel. It includes no children's clothing, and omits some items of adult clothing which are of considerable importance, such as women's dresses for afternoon and evening wear, women's hats, men's hats and gloves. Unusual difficulties in maintaining continuous price series on the same quality of goods occur in clothing due to style and seasonal changes which must be excluded from price comparisons based upon quality. The items in the clothing index have been selected to represent the basic materials entering into clothing in approximately the same proportions as they would be found in a complete clothing budget. Some of the items chosen to represent basic materials form a comparatively small portion of a complete budget, but are useful in measuring clothing price trends because of their standard construction. Women's woollen hose afford an example of such items. The index contains 31 items of clothing, piece goods and footwear, and price series for these have been examined individually over a period of years to test their reliability. Most apparel is composed of five basic materials, cotton, wool, artificial silk, leather, and rubber. The bureau has reduced its clothing list on the assumption that 31 accurate price series will measure the

trend of clothing prices better than a large list including items which fluctuate widely in price due to style and seasonal factors. Department stores are the source of bureau clothing prices. These distributors handle approximately one-third of the dominion's clothing trade, and make monthly price returns to the bureau, especially designed for the cost of living index.

Homefurnishings and Services: The home-furnishings and services index is a composite of eight sub-groups, including two sets of service costs in addition to actual furnishings. The eight sub-groups are: furniture, floor coverings, textile furnishings, hardware, dishes and glassware, cleaning supplies, laundry and telephone. The complete group accounted for 9 per cent of the base period index budget cost, placing it next to clothing in importance. It approximates clothing also in many details of construction. The data for furniture, floor coverings, textile furnishings, hardware, dishes and glassware are obtained from department stores and the same principle of the representation of basic materials by a comparatively small number of items is used. There are 7 items of furniture, 3 of floor coverings, 4 of textile furnishings, 4 of hardware, 2 of dishes and glassware, 4 of cleaning supplies, 3 laundry rates and one type of telephone service.

Miscellaneous: Five sub-groups, health maintenance, personal care, transportation, recreation and life insurance comprise the miscellaneous index. This list does not exhaust all remaining family living expenditures, but most of those which are left such as church contributions, the support of dependents, bank savings, etc., cannot be treated in the same way as items which are bought and sold. The index takes no account of these items which amounted to only 3 per cent of average wage-earner family living expenditures reported in the bureau's 1938 survey.

The health section is based upon prices for 6 items of household medical supplies, 2 kinds of hospital service, 3 types of doctors' fees, and rates for 6 types of dental service. In view of the stability of fees for doctors, dentists and hospitals, these records are collected only at annual intervals, while medical supplies are priced quarterly. Records for practically all

miscellaneous sub-indexes are collected from 23 of the larger cities, chosen to give adequate regional representation.

Personal care costs are represented by 7 items of toilet requirements plus fees for men's haircuts and shaves.

Three kinds of transportation are represented in the transportation sub-group: motor car, street car and railway. The two latter present no special problems, but motor car operating costs are more difficult to measure. The bureau's record is based upon service station prices of gasoline, licence fees, and wage rates for garage mechanics. It is assumed that depreciation is 37 per cent of operating costs, and that for car owners as a group it remains constant from year to year.

The recreation section includes records of motion picture theatre admissions, and newspaper, magazine and tobacco costs.

The life insurance index is based upon premiums for ordinary non-participating life policies, since these appear to give the closest possible approximation to the cost of pure risk. Averages of premiums for ages 20, 35 and 50 years have been used covering the records of 11 large companies.

The Cost of Living Index Weighting System

There are two stages in the calculation of each of the six principal group indexes from which the composite number is calculated. In the first stage, the general procedure is to multiply current price averages by budget quantities. These products are added together and the resultant aggregate divided by a corresponding base period aggregate. The resultant number is multiplied by 100.0 to secure a sub-group index for the current period. This index is then multiplied by a sub-group weight indicative of the cost of goods in this sub-group relative to all goods in the group. When all sub-groups have been weighted similarly, the group index is found by adding up this second set of products and dividing by 100.0. This routine is repeated to secure the final composite cost of living index. The second and third stages of weighting are made necessary by the fact that it is not feasible to include all items in the family budget.

The complete list of items and weights is shown following:

For the expert statistician this is perhaps sufficient, but I feel that the committee would appreciate some general comments of a less technical nature which may help to explain just how the index is prepared and what it means. These are based in the main on information supplied by the bureau of statistics.

The index is a measure of the month to month changes in the cost of living of the

average Canadian wage-earner's family. In 1937 and 1938 the bureau made a study of the living expenses of nearly 1,500 Canadian families. These families were specially picked as typical wage-earning families; each consisted of a husband and wife and one child or more. The average number of people in the family was 4.6, and the average family income was \$1,453 a year. Officials from the bureau

asked these families to keep a careful record of their expenditures during the twelve months from October, 1937, to September, 1938. It was on the basis of these records that the bureau knew how much importance to give to the various kinds of food, clothing, recreation and all other things that come into the family budget. They divided the cost of living up into the six main groups and found that they occupied the following proportions of the average living expenses of the families that were surveyed: food 31 per cent, fuel and light 6 per cent, housing 19 per cent, clothing 12 per cent, home furnishings and services 9 per cent, miscellaneous items 23 per cent.

It has been argued that conditions have changed a good deal since that budget was prepared in 1937 and 1938. There are some goods that cannot be bought to-day, and the purchase of other goods is limited by rationing. I want to make it clear that the bureau takes such changes as these into account. For example, automobile tires and tubes, steel frying pans, and bananas have been removed from the index since they are no longer regularly available. The weighting given to tea, sugar and motor operating costs has been reduced on account of rationing. Some changes in buying habits are so small as to have a negligible effect on the index, and in such cases, of course, there is no point in making adjustment. I should also point out that when the bureau takes an item from the index, that does not mean that the total living expenditures have been reduced. The amount of money that was formerly spent on these articles is regarded as being distributed among other items in the index.

It is important to realize that the index aims to record a fixed standard of living. During the war, and particularly during its early years, many families increased their family income, and as a result have bought better clothes, more expensive food, etc. The index does not and should not record higher living expenses due to better living. If it did it would indicate not a higher cost of living but a higher standard of living.

Now, let me revert for a moment to one of the most frequently expressed criticisms of the index. Many people want to know how it can possibly be maintained that the cost of living has only gone up 17 per cent during the war in view of the rise which has taken place in foods. They point to stewing beef which has risen by 78 per cent, lard which has risen by 73 per cent, round steak which has risen by 66 per cent during the war, and so on.

It is perfectly true that those particular foods have risen by that amount, but the committee should remember that they represent

only a small part of the cost of living. All foods put together represent less than a third of the cost of living index, and while some foods have risen substantially, other foods such as bread, sugar, etc., have remained steady, and milk has actually declined in price. These are important foods, and occupy a much larger part in the weekly family budget than many of those foods which have risen in price.

Foods in the cost of living index have risen by 31·8 per cent since the beginning of the war. This is a substantial rise, most of which occurred before the application of the price ceiling. It is also the part of the cost of living of which the housewife is particularly aware since she sees the effect of it upon her allowance for housekeeping expenses. The other items, which in many households are paid by the husband, have not risen by anything like this amount since the beginning of the war. Fuel and light have risen by 14·1 per cent, housing by 7·4 per cent, clothing by 20·3 per cent, home furnishings and services by 16·7 per cent, and miscellaneous items by 6·8 per cent. The total index has risen by 17·6 per cent since August, 1939, but of this only 2·2 per cent since the establishment of the ceiling.

The point I want to make here is that the cost of food has risen by more than the other groups in the index, and the cost of certain particular food items has risen by a good deal more than the cost of food as a whole. Now many people tend to regard the cost of living as just the cost of food. They forget that the cost of living also includes rent, and clothing, and electric light, and life insurance, and doctors' bills, and many other needs which have increased in price a great deal less than has food.

Another question which is frequently asked concerns the accuracy of the price reports made to the bureau.

The bureau does not rely entirely on reports from storekeepers. In addition to the reports which it receives from storekeepers, it has its own representatives in most of the principal regional centres, and it may appoint others before long. These representatives obtain the prices needed each month by personal visits to stores. It may interest the committee to know that these representatives periodically visit smaller towns so as to make a check on the trend of prices throughout the region.

I should now like to say a word on deterioration of quality, which is a live topic at the moment. For many years the bureau has asked firms reporting prices for clothing and home furnishings to make at the same time estimates of any changes of quality in the goods. When the bureau receives a report of a reduction in quality, this reduction is treated just as if it were a price increase of the same amount. The

bureau, furthermore, instructs its field representatives to be on the watch for quality deterioration when obtaining price reports.

It must be remembered that there are two types of quality deterioration: that which shortens the life of an article, and that which affects its appearance without shortening its life or reducing its serviceability. If a man finds that a suit now stands only three-quarters of the wear that a similar suit used to stand, the cost of his clothes over a period of years has risen, although the price remains the same. It is obviously reasonable to include deterioration of that type in the cost-of-living index. Suppose, on the other hand, the man finds that the suit he now buys is less attractive than it used to be, the material rougher perhaps or with less novelty in pattern but it still lasts every bit as long as it used to. He could not then claim that this quality deterioration had affected his cost of living.

There have been complaints that many cheap lines of goods are now off the market, and that it is necessary to buy more expensive brands. In such cases the bureau puts the price of the more expensive brands into the index. Stores have instructions not to report the price of any article which is not readily available, but instead to send in the price of the next more expensive article that is readily available.

A list of the items included in the index has been published, and comments have been made on the large number of items entering into an average family's normal budget which are not on this list. These omissions may be difficult to understand but the reason is that it is not practicable to get direct price quotations for every item in the family budget. The bureau instead obtains price reports on what are regarded as typical items, "weighting" those prices sufficiently highly to cover all the items that ought to be in the group. I would take as an instance, foods. Many foods have wide seasonal price changes, and as a result the consumption of them varies. People eat them in quantity when the price is low and eat less when the price is high. Shifts in consumption from season to season and year to year, as crops vary, are so great that it is extremely difficult to give these foods a correct degree of importance in the budget. There is also the problem of obtaining comparable prices. Many of the fresh vegetables in particular are not always sold upon a weight basis, so that price changes may actually reflect quantity differences as well. To include these items might well result in the index becoming less rather than more accurate.

The bureau of statistics, therefore, picks out those food items on which a representative price can be obtained from month to month.

The index includes forty-four food items which represent about seventy-five per cent of the total cost of foods in the budget on which the index is based. Those foods on which a price is not obtained are considered to have risen by the same proportion as those foods on which price reports are made.

The bureau has often been asked whether the restricted number of foods in the index makes it less reliable. In order to test this possibility a check was made. An experimental food index was computed on the basis of only fifteen items; round steak, blade roast, rolled rib roast, pork loins, bacon, milk, butter, eggs, flour, sugar, potatoes, corn syrup, marmalade, oranges and lard. This index, with one-third of the items in the official index, shows a wartime rise to May, 1943, of 30.3 per cent, which is only 0.5 per cent less than the increase for foods shown in the official index. I might mention, incidentally, that the number of food items included in the Canadian index compares favourably with those in the indexes of other countries.

Food, of course, is not the only group where difficulty is experienced in getting representative prices. Another difficult group is clothing, which also includes many items seasonal in character. A lady's hat may sell in season at \$4.95 and be cleared later at \$2.98 or less. The same is true of dresses, coats, and many other items. To include prices for these things in the index would cause erratic movements which would not follow the basic changes in clothing prices. Therefore, the bureau has selected a comparatively small list of twenty-nine clothing items which are of fairly standard construction and have no pronounced seasonal price movements. These items represent in proper proportion all the important materials used in making clothing, i.e., cotton, wool, rayon, rubber and leather. The bureau assumes and I think with reason, that the change in cost of these items gives a correct record of the rise or fall in all clothing prices.

Having dealt with the cost-of-living index itself I now wish to make a few remarks on related topics which are more strictly the concern of the Minister of Finance.

In the course of his remarks the hon. member for Winnipeg North Centre referred to the effect of direct taxes, such as income taxes, on the cost-of-living index. This is a question that is raised from time to time and I think merits a fairly full explanation. The hon. member said and I quote:

But the bureau apparently does not take into consideration any of the direct taxes paid by the people of Canada. Yet these taxes have increased tremendously, and add to the cost of living.

If the committee will consider the matter carefully I think they will agree that to include direct taxes in the cost-of-living index would be quite inappropriate and would indeed defeat the whole purpose of our wartime financial programme.

The cost-of-living index measures changes in the cost of living of the average wage-earner's family. It is an index of prices like an index of wholesale prices or an index of retail prices. If prices go up the index goes up; if prices go down the index goes down. To the extent that taxes such as excise and customs taxes which are indirect taxes enter into prices, they are, of course, reflected in the index. The only exception to this is the increased war taxes on cigarettes and tobacco which were excluded for a specific and, I think, obvious reason.

Direct taxes, on the other hand, do not affect prices. They are taxes on incomes, that is, they reduce the amount available for spending. If the hon. member's argument were sound that direct taxes affect the cost of living, it would follow that the cost of living of the rich man had risen many times more rapidly than that of the man with a low or moderate income. Equally absurd, it would mean that the cost of living of the man with a family had risen less sharply than the cost of living of a single man with the same income.

I would also point out that if an attempt were made to include income taxes in the cost-of-living index, there would have to be an individual cost-of-living index for each taxpayer as taxes vary enormously from individual to individual depending upon income, family responsibilities and personal circumstances. An average would mean absolutely nothing.

But there is a very much more important reason for not including direct taxes in the cost-of-living index. When, as acting Minister of Finance, I delivered the first Canadian war budget speech on September 12, 1939, I said:

We shall be guided by the belief that all our citizens will be ready to bear some share of the cost of the war, but we shall insist on the principle of equality of sacrifice on the basis of ability to pay.

If income taxes were included in the index, this principle would be nullified, for since the cost-of-living bonus is determined by the cost-of-living index the bonus would be increased by approximately the amount of the increase in the income tax. Thus people getting the bonus would pay little or no income tax. Furthermore, it is to be remembered that only certain groups are eligible for the bonus. To these, in effect, taxes paid

would be rebated, leaving more to be borne by those who are not eligible for the bonus.

The hon. member then went on to say, and I want to deal particularly with this phase of his argument, that "part of the money paid in taxes is being used to subsidize prices. Part of what we pay in taxes is actually part of the price which we pay for some of our food." The hon. member appears to be arguing that the policy of paying subsidies in order to stabilize the cost of living is a case of transferring money from one pocket into the other, of robbing Peter to pay Paul.

The truth is, of course, that subsidies designed to keep down the cost of living serve a very definite and useful purpose and that, used judiciously, they are essential to any general policy of price stabilization, serving the dual purpose of ensuring supply and of protecting the standards of life and of those receiving low or moderate incomes.

A rise in the cost of living produces unequal effects upon various sections of the population. It is true that some individuals might manage to cover the added costs of living by the increases in their incomes resulting from the higher prices. Perhaps the unmarried industrial worker drawing cost-of-living bonus would be in that fortunate position. But his fellow worker, married and with a family, is not so well placed. His cost-of-living bonus is exactly the same as that of the single man, yet he has not one but several mouths to feed. A stable cost of living is very much in his interest. It was not overlooked, also, that a rise in the cost of living affects everyone, whereas certain important groups—farmers, small proprietors, pensioners and all those whose incomes make them ineligible—do not receive the cost-of-living bonus.

As to the cost of subsidies, this is borne, not in proportion to benefits received—then it would be a meaningless transfer from one pocket to the other—but like any other war cost, in accordance with ability to pay. The family man who benefits most from stabilized living costs pays his share of subsidy costs not directly in proportion to the benefits received but, on the contrary, according to his taxes, which vary inversely in proportion to the number of his dependents. Rich and poor benefit in proportion to what they consume; they pay in accordance with their income. In other words, the payment of subsidies distributes the burden of rising costs according to ability to pay. Far from being a policy of robbing Peter to pay Paul, the payment of subsidies to stabilize the cost of living is sound and in the best interests of the very groups in the community on whose behalf my hon. friend so often speaks.

Deputy Minister—ARTHUR MACNAMARA

Assistant Deputy Minister—V. C. MACDONALD

Editor—HARRY J. WALKER

VOLUME XLIII]

AUGUST 1943

[NUMBER 8

Notes of Current Interest

Commission set up to carry out recommendations of United Nations Food Conference has been established in Washington for carrying out the recommendations of the United Nations Conference on Food and Agriculture held at Hot Springs, Virginia, from May 18 to June 3. The Commission contains representatives of the forty-four Allied countries which participated in the Conference, and will meet under the chairmanship of the Canadian representative, Mr. L. B. Pearson.

Mr. Pearson is Minister-Counsellor in the Canadian Legation at Washington, and was a leading member of the Canadian delegation to the Hot Springs Conference.

The Conference adopted important resolutions designed to assist in freeing the peoples of the world from want in the post-war period (L.G., July, 1943, p. 908). Among the problems discussed were the setting of objectives for food production, sufficiently high in quantity and quality to maintain the health of all peoples, and the better distribution of food products. The newly-appointed Commission will attempt to carry out the recommendations, and is also charged with the duty of formulating for consideration by each member Government a plan for a permanent international organization in the field of food and agriculture.

National Physical Fitness Act passed by Parliament

Legislation intended to promote the physical fitness of the people of Canada has been passed by the Dominion Government in the form of a National Physical Fitness Act. In explaining the bill in the House of Commons, the Minister of Pensions

and National Health, Honourable Ian MacKenzie, commented:

"In the last two or three years in particular we have had brought home to us the fact that the standard of physical fitness among our people has not been as high as we should have liked it to be. The figures with regard to enlistments have brought that fact strongly home to us."

The Act provides for the establishment of a National Council on Physical Fitness with the power to:

- (a) assist in the extension of physical education in primary and secondary schools and universities and in all educational and other establishments;
- (b) encourage, develop and correlate all activities relating to physical development of the people through sports, athletics and other similar pursuits;
- (c) train teachers, lecturers and instructors in the principles of physical education and physical fitness;
- (d) organize activities designed to promote physical fitness and to provide facilities therefor; and
- (e) co-operate in the amelioration of physical defects amenable to improvement through physical exercise.

The Council is to consist of from three to ten members, appointed by the Governor in Council. A grant of \$225,000 is made available to be divided among the provinces on a population basis, with an additional \$25,000 for national administration. Provinces which agree to take part in the scheme will contribute an amount equal to the grant they receive.

The Minister explained that: "It is proposed that each province shall have a member on the council of physical fitness, and the national director will be the only paid official. . . . The program is not one of compulsion or coercion in the slightest degree; it is one of co-operation. . . . with other departments of Government with the provincial governments and with voluntary agencies and individuals who are carrying out work along these lines."

In reply to a question, the Minister indicated that the amount of money to be expended on the scheme would be sufficient to set it in operation, so that its possible weaknesses and strengths might be tested before embarking upon a more comprehensive program.

**Increase in
maximum
pension payable
to aged and
blind persons**

An increase in the maximum pension payable to aged and blind persons was announced by the Minister of Finance, Honourable J. L. Ilsley, on July 24. The increase is from \$20 to \$25

a month. It is allowed under an Order in Council (P.C. 6367, August 10) which authorizes the Dominion to enter into supplementary agreements with the provinces enabling a special war supplement not exceeding \$5 per month to be paid, in addition to the regular pension payable under the Old Age Pension Act as it stands at present.

The Minister stated: "All the terms and conditions under which the present pensions are payable, including the present sharing of the amount of pensions paid in the ratio of 75 per cent and 25 per cent by the Dominion and the provinces respectively, and the provisions regarding maximum total income, will be continued, except for the appropriate adjustment in regard to the provisions of the act covering maximum pension and allowable outside income. In so far as the Dominion is concerned, the supplementary war pension need not disturb the supplementary pensions now being paid in several of the provinces; that is entirely a matter for the decision of the provincial governments concerned."

He said that all nine provinces had made representations to him that supplementary payments should be made, and that the Dominion should bear its share of the cost.

**C. H. Bland
named to
Selective Service
Advisory Board**

National Selective Service Advisory Board.

The Honourable Humphrey Mitchell, Minister of Labour, announced recently the appointment of C. H. Bland, B.A., chairman of the Civil Service Commission, as a member of the

The Board, authorized by Order in Council, advises the Director of National Selective Service on the utilization of manpower in the prosecution of the war, and on the administration and enforcement of National Selective Service Civilian Regulations (L.G., March, 1943, p. 314). The Board's membership consists of representatives of organized labour, of employers, of agriculture, of veterans and of Government departments. The Civil Service Commission had not previously been represented.

The appointment of Mr. Bland to the Board has been arranged, the Minister of Labour stated, with the object of broadening the scope of Selective Service, as it is expected that Mr. Bland's membership on the Board will make for closer working arrangements with regard to the availability of manpower, as between the Government service and industry. In addition the Board will gain the experience and advice of an outstanding official, the Minister added.

**Cost of
living index
rises
fractionally**

The Dominion Bureau of Statistics cost-of-living index advanced from 118.5 on June 1 to 118.8 on July 2, 1943. This index which has been specified as the basis for calculating cost-of-living bonus adjustments under Order in Council P.C. 5963 has increased 17.9 per cent between August, 1939 and July, 1943. Since February the index has risen steadily, with the total increase amounting to 1.9 points. It now stands exactly on a par with the December, 1942 index, and is 0.9 points above the July, 1942 index upon which the last cost-of-living bonus was authorized. Since the index number has not advanced by as much as one whole point since July, 1942, no change in the cost-of-living bonus was ordered by the National War Labour Board.

Foods continued to be mainly responsible for the further advance. The food index rose from 130.9 in June to 131.8 for July; the total increase in the food index since February has amounted to 5.1 points. Prices for eggs, lamb and potatoes showed the largest advances in July and there were fractional increases in other meats. Butter and oranges were moderately lower. Two other group indexes advanced in July, fuel and lighting from 113.0 to 113.4, and clothing from 120.4 to 120.5. Other groups remained unchanged, rents at 111.5, home furnishings and services at 117.8, and miscellaneous items at 108.2.

Employment and industrial Statistics

The latest statistics available reflecting industrial conditions in Canada are shown in the table below.

The index of employment calculated by the Dominion Bureau of Statistics advanced 1.6 per cent between May 1 and June 1 from 178.2 to 181.1. While this increase exceeded the contra-seasonal decline

recorded at May 1, it was stated to be substantially less than the increase usually recorded at June 1 in other years since 1920. At the beginning of June the index was 1.4 per cent lower than at the beginning of the year and this also was contrary to the usual experience as recorded since 1921. Factors in the decline were stated to be enlistments in the armed forces coupled with the difficulty

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended July 29, 1943.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public.

(7) Figures for four weeks ended July 31, 1943, and corresponding previous periods.

(8) MacLean's Building Review.

of securing replacements for industry; changes in the volume and kind of production in certain industries; and growing shortages of materials and labour for civilian production and services. The index of aggregate weekly pay rolls was 2.7 per cent higher at June 1 than at May 1, 14.5 per cent higher than June, 1942, and 43.6 per cent higher than at June 1, 1941. Per capita weekly earnings averaged \$30.91 at June 1; \$28.20 at June 1, 1942; and \$25.25 at June 1, 1941.

The index of the physical volume of business recorded a slight increase in June as compared with May but was lower than in April in which month the index was higher than at any time in the record. The increase in June as compared with June of last year was 16.2 per cent. Three of the five principal groups, namely, mineral production, output of electric power and distribution recorded advance in June as compared with the previous month while manufacturing and construction were lower.

For the first six months of 1943 the index of the physical volume of business averaged 18 per cent higher than for the corresponding period in 1942. Manufacturing production averaged 26.1 per cent higher in the same comparison, mineral production 14.4 per cent higher, consumption of electric power 8.9 per cent higher and the number of tons of railway freight 5.1 per cent greater. The general index of employment averaged 8.6 per cent higher. The receipt of gold at the mint declined 19.3 per cent, coal production 6 per cent, newsprint production 12.9 per cent, and steel ingot production 3.9 per cent in the six months' comparison.

Industrial Disputes Investigation Act

Ten applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of July. Seven boards submitted their reports; four boards were established, and the constitution of four boards was completed during the month. Fourteen disputes were referred to Industrial Disputes Inquiry Commissioners and reports were received from Commissioners in five cases. One dispute was referred to an Industrial Relations Officer. The settlement of six disputes was reported, agreement having been reached between the parties. Six applications were withdrawn during the month and one application rejected. A strike vote was conducted in one case.

Rates of pay for prisoners of war on labour projects

Wage scales have been established for prisoners of war employed on labour projects outside internment camps, by a recent Order in Council (P.C. 5550, July 29). The rates provide a minimum daily wage complying with the Prisoner of War Convention concluded at Geneva in 1929. With a view, however, to obtaining maximum production, the rates are to be calculated on an incentive basis where possible.

The Order authorizes the establishment of wage scales on either of the following bases, as is deemed advisable having regard for the nature of the work:

(1) A daily wage rate of not more than fifty cents per day for an eight-hour work day;

(2) Piece-work wage rates, appropriate to the nature of the work, which will permit of earning on a production basis equal to approximately fifty cents per day.

A summary of the procedure being followed in the employment of prisoners of war in agriculture and other projects was given in the June LABOUR GAZETTE (page 741).

There has been a substantial demand for such labour, in particular by farmers. Because of the expense, inconvenience and working time lost in the process of taking prisoners from labour camps to their place of employment and returning them daily, a second Order (P.C. 5864, July 24) has authorized that arrangements may be made where convenient for prisoners to reside upon the premises of persons employing their services.

Number of Government annuities sold in fiscal year 1943

A statement issued by the Department of Labour shows that the Annuities Branch of the Department sold annuities in respect of 9,608 persons during the fiscal year ended March 31, 1943: 5,437 contracts were sold to individuals, while 4,171 certificates were issued in favour of persons covered by group contracts. Annuities sold were for an average face value of \$304 per contract or certificate. The group contracts represent the purchase of Dominion Government Annuities under employee pension plans, for the most part.

At March 31, 1943, 81,627 annuity contracts or certificates sold by the Department were still in effect, with annuities presently payable in the case of 26,361, while benefits were still deferred in the case of 55,266. The balance to the credit of the annuities fund at March 31 was \$190,298,479.

A total of 1,343 immediate annuities were sold during the fiscal year, having been purchased chiefly by older people wishing to ensure a regular income in exchange for savings. Other annuities sold were deferred annuities, purchased as a means of savings.

The number of annuities sold during the year was larger than in any preceding fiscal year except 1940-41 when the total number of persons involved in contracts issued was 11,994. The total net receipts, although about \$800,000 in excess of the year before, were less than in two earlier fiscal years, 1935-36 and 1936-37: receipts in the latter year reached a peak of \$23,614,823.95.

Workmen's compensation rates raised for children on farms in Britain

Under a new arrangement just announced by the Government, boys of 12 and 13 years working on farms in Great Britain are to receive the same compensation under the Workmen's Compensation Act for injuries arising out of their employment as received by boys of 14 and over employed full-time in agriculture. In the past, employers of boys under 14 on farms have paid an insurance contribution of one penny per boy-hour to provide compensation in case of injury. These rates will not be changed but the Government will contribute the additional amount necessary to bring the compensation for boys under 14 up to the compensation paid to boys over 14.

Under wartime regulations children over 12 and under 14 may be exempted from attendance at school for 20 half-days in any year, or for such longer period as an inspector authorizes, to engage in farm work (L.G., 1942, p. 656). Hours of work both during the term and holidays must not exceed seven a day and 36 a week, and spells are limited to four hours with a full hour's break at the end of a spell. Wages must not be less than the statutory rates prescribed for agricultural workers. For children under 14 the minimum rate is 5d. per hour. Suitable arrangements must be made for supervision and transport, and local education authorities may require medical certificates of fitness. The employment of children under 12 is prohibited by the Children and Young Persons Act.

Membership of largest trade union increases

level of 1,133,165, of whom 274,219 are women, according to the report of the executive council for the year to December 31, 1942. Income

Membership of the Transport and General Workers' Union in Great Britain—reported to be the largest trade union in the world—now stands at a new high

during 1942 totalled £1,325,464, also a record. The union's total balance is now £2,399,491.

The report of the women's section shows that 205,407 women have joined during the past two years.

Millions served in industrial canteens in Great Britain

Some 3,500,000 people, or about a quarter of the total working population of Britain, eat their midday meals every day in industrial canteens, according to Mr. W. Mabane, Parliamentary Secretary to the Ministry of Food in Great Britain. At a canteen catering conference in London recently he declared that wherever the work was hard the rations allowed to industrial canteens were more than allowed to so-called luxury hotels. He said the Government is in favour of improving the nutritional quality of meals.

U.S. employers and workers urged to settle own disputes

The United States National War Labour Board recently issued a unanimous statement calling on employers and workers to implement their no-strike and no-lock-out pledges by developing grievance machinery for the prompt and peaceful settlement of disputes arising out of the interpretation and application of collective agreements. Such machinery should, in the Board's opinion, "provide for the final and binding settlement of all grievances not otherwise resolved...by an arbitrator, impartial chairman or umpire under terms and conditions agreed to by the parties."

The statement deplored the growing tendency to refer disputes over collective agreements to the Board which was not in a position to handle them. It pointed out that proper grievance procedure under collective agreements has in the past, "preserved collective bargaining as a basic democratic institution in the total war effort...prevented abuse of the no-strike—no-lockout agreement," and "removed obstacles to high morale and maximum production." In the words of William H. Davis, Chairman of the Board, "This problem of the adjustment of grievances that arise over the interpretation of a contract is at the grass roots of the whole relation between employers and employees."

The Board recommended that prompt initial attention should be given to all grievances by those in the plant who have intimate knowledge of the dispute. Grievance procedure should be worked out by employers and workers and adapted to the needs of the individual plant. If settlement by negotiation fails, arbitration should be applied to a dispute.

Union workers to help in reducing absenteeism

Representatives of the Mine, Mill and Smelter Workers' Union have been given authority in one of the plants of the Aluminum Company of America to apply their own methods in reducing absenteeism and labour turnover.

The plan, as outlined by the local director of the U.S. War Manpower Commission, is as follows:—

(1) Chronic truants will be interviewed by a Union committee in private offices provided by the plant management;

(2) Union representatives will visit homes of employees absent without explanation;

(3) Employees will collaborate with management in investigating possible incentive and competitive systems to combat absenteeism;

(4) No statement of availability will be issued to any employee desirous of quitting his job until such employee has discussed the question with a Union representative;

(5) All new employees will be interviewed by their co-workers, who will explain plant policies, practices and lines of promotion.

The plan is to be administered by an all-worker committee, which will use plant bulletin boards for publicizing its various features.

Good lighting standards recommended for efficient work

The American Illuminating Engineering Society's latest revision of its "Code of Lighting: Factories, Mills and Other Work Places", has recently been reprinted by the Division of Labour

Standards of the United States Department of Labour under the title "Industrial Hygiene and Plant Efficiency through Good Lighting." The Code was first issued in 1915 and has been revised several times. It was approved by the American Standards Association. The reprint contains many illustrations of modern lighting systems in various types of factory. The advantages of good lighting are emphasized and detailed standards recommended for both natural and artificial illumination. In both Britain and Australia somewhat similar standards of lighting have been made compulsory as a wartime measure to improve production and ensure adequate lighting for night workers. (L.G., 1942, pp. 678, 1299.)

"Good lighting speeds production. It is essential to the health, safety and efficiency of workers," declared the Director of the Division of Labour Standards in the letter of transmittal prefacing the publication. This statement is amplified in the pamphlet which lists as advantages of good lighting, greater accuracy

of workmanship resulting in less spoilage and improved quality, greater safety, better utilization of floor space, more easily maintained plant cleanliness and neatness and better supervision of employees. For the worker it means less eyestrain and consequently greater efficiency and improved morale which reduces labour turnover. These advantages result in increased production and decreased costs.

The lighting problems of each plant should be studied jointly by the electrical engineering, operating and safety departments. Both the quality and quantity of the light must be considered. Glare, contrasts, shadows, colour, diffusion and direction of light all affect the quality of light. It is pointed out that "many factors associated with poor illumination, such as glare, light reflected from the work, and dark shadows, hamper seeing and cause after-images and excessive visual fatigue which are important contributing causes of industrial accidents". As regards quantity, a detailed table of "recommended minimum standards for industrial interiors" is given in the pamphlet. For example, tasks which involve the discrimination of extremely fine detail for similar tasks where the degree of contrast is fair. Stenographic work requires 50 footcandles, switchboards in power plants or engine-rooms, 30 footcandles, assembly work in automobile plants, 20 footcandles, and leather tanning, 10 footcandles.

When natural lighting is used, it is recommended that automatic photoelectric controls should be installed to adjust lighting to changes in daylight. The proper types of windows, skylights and shades are discussed. Artificial lighting is divided into general and supplementary lighting. The latter provides additional illumination at special points such as places where gauges must be read. The different types of direct and indirect lighting and the advantages of each are described, and attention drawn to the importance of painting ceilings a light colour to reflect light where indirect illumination is used.

Maintenance of lighting equipment and adequate electrical wiring are also stressed. It is recommended that the minimum standards of illumination should be increased by 50 per cent where dirt collects rapidly and adequate maintenance is not provided. Attention is drawn to the fact that the National Electrical Code on which most electrical codes are based, is designed to reduce fire and accident hazards but is not a criterion of effective and economical wiring. The Handbook of Interior Wiring Design published by the Industry Committee on Interior Wiring, New York, is recommended for information on this subject.

**Improved
position of
trade unions
in Sweden**

The annual report of Sweden's National Trade Union Centre for 1942 (quoted in the July 1 *Bulletin* of the International Federation of Trade

Unions) shows that in 46 affiliated unions, 1,123,139 members are organized. As compared with the previous year, this is an increase of 31,854. The high degree of union organization in Sweden may be realized by comparing these figures with the total population, which at January 1, 1942, was 6,406,474. Some 16 per cent of the organized workers are women.

Corresponding with the conditions of war economy, the strongest growth in membership was among the metal workers (to 190,779), factory workers (to 90,463) and in the Railway Union (to 52,562). The sharpest drop in membership is seen in the workers in forestry, carpentry and road-making.

Unemployment fluctuated between 4 per cent in August and 13 per cent in January. It was lowest in the iron-works with 0.4 per cent in June, and highest in the building industry with 53 per cent in January. Various branches of industry are severely affected by the shortage of raw materials and fuel. For example, in the transport trade, in the food and luxuries industries, as well as in shoe, leather and textiles works an increase in continual short-time work has to be reckoned with. In these branches, this is the only way to secure at least a minimum existence to all the employees, it is declared.

Price control has for the first time become really effective, the *Bulletin* states. The trend during the last three years is seen as follows:

	1940	1941	1942
Standard of life...	+26	+23	+12 points
Wages	+ 6.3	+ 6.4	+ 8. per cent

This shows that the purchasing power of real wages has remained some $\frac{1}{3}$ behind the rise in prices.

Altogether, only 71 labour conflicts, with 312 members on strike, were supported. The disbursement for these remained under 18,000 crowns, the lowest figure so far.

Particularly lively activities were reported to be displayed by the propaganda and educational organization. Some 46,000 persons nearly 5 per cent of the membership, took part in study groups and educational courses, which increasingly dealt with economic and social questions for post-war time.

The development of the Agricultural Workers' Union is particularly noteworthy. It was able to increase its membership in the past year to 45,854. The contracts it has

made include a far greater number of daily workers. Already over 51 per cent get ordinary cash wages on an hourly basis, which is stated to allow an appreciable rise in their standard of living.

**International
Federation of
Trade Unions
reports increased
membership**

The International Federation of Trade Unions has issued its annual report covering the period from April, 1942, until the end of March, 1943. During that year there has been an increase of almost 2,000,000 in the membership, bringing the total to approximately 15,081,000 in 13 countries. A new central governing body was set up in July, 1942, for the whole international trade union movement, including both the National Confederations and the International Trade Secretariats. This Emergency International Trade Union Council is intended to act as the principal authoritative mouthpiece of international organized labour and to co-ordinate international trade union activities in all fields.

Under the auspices of the Emergency Council, two sub-committees were set up in September, 1942, for the study of post war problems in connection with the reconstruction of the international trade union movement and the social and economic demands of labour. These sub-committees are headed by Sir Walter Citrine and their membership includes representatives in England of several of the Nazi occupied countries. Both of these sub-committees have held meetings and have drafted reports of their proceedings. Consultations have also been held with the war emergency committee of the I.L.O.

The report refers to an expansion of the Federation's scope, so that whereas formerly it confined itself mainly to European labour movements it is now extending its interests abroad. National centres at present affiliated with the Federation include: Argentine, Canada, China, U.S.A., Great Britain, British India, Mexico, Norway, New Zealand, Palestine, Sweden, Switzerland, South Africa. In addition, trade union membership among refugees in England includes representatives of trade union centres in Belgium, France, Czechoslovakia, Germany, Austria, Poland and Spain. The Federation also reports that it is in touch with unions in other countries as follows: In Central and South America: Chile, Bolivia, Venezuela, Cuba, Uruguay, Brazil, Peru, Puerto Rico, Haiti, Republica Dominicana, Jamaica, Trinidad and Tobago, Nicaragua and Costa Rica. In Africa: French North Africa, Northern Rhodesia, Belgian Congo, Sierra Leone, the Cameroons, and the Lake Chad territory.

Manpower

Action to Meet Farm Labour Needs

Progress of Dominion-Provincial Farm Labour Program

THE Federal Government entered into agreements with each of the Provinces, early in the spring, for the purpose of more adequately determining and meeting farm labour needs. Under these Agreements a Dominion-Provincial Farm Labour Committee has been named and a Provincial Director appointed in all provinces. In most instances municipal, county or parish Committees have been established to help determine local needs and meet them as far as possible. These Local Committees working in close co-operation with district representatives of the Provincial Department of Agriculture and the Local Employment and Selective Service Offices, are responsible for placing labour available for farm work. Agriculture Employment Advisors attached to the Regional Selective Service Offices help to co-ordinate the work of the local Employment and Selective Service Offices with that of the Provincial and local organizations.

This Dominion-Provincial co-operation has resulted in the better use of existing farm labour as well as in organizing and placing large numbers of local workers, both experienced and inexperienced, on farms. Many of these workers have volunteered for temporary or seasonal work. Students and teachers are taking all or part of their summer holidays and store clerks, business and professional men and women are spending their vacations or spare time, helping hard pressed farmers with their haying and harvesting.

Ways by which greater use of existing farm labour is being obtained include:

- 1.—more co-operative use of farm equipment;
- 2.—pooling farm labour;
- 3.—encouraging men to move from less to more productive farms;
- 4.—making postponement of military service of farm workers, not now essential to agriculture, conditional either on increasing production of the farms where they are now located or moving to more productive farms.

In addition to the efforts of the Dominion-Provincial Committees in each province, National Selective Service has taken other steps to increase the farm labour force.

Since April, five Compulsory Labour Transfer Orders have been issued directing men, who are subject to call-up regulations, from less essential to more essential industries. Those with farming experience and physically fit for such work are being directed to farms.

This spring and again this summer compassionate leave has been granted to experienced farmers in the army to work on their home farms. In July an agreement was reached between the Department of National Defence and the Department of Labour for detaching soldiers on Farm Duty (see below). This agreement became effective on the 1st of August. It is anticipated that a substantial number of soldiers both on compassionate farm leave and on Farm Duty will be added to Canada's farm labour force for harvest work during the next few weeks.

Special plans have also been made to utilize the services of conscientious objectors, Canadian Japanese and prisoners of war. Many hundred conscientious objectors have been transferred from "Alternative Service" labour camps to assist farmers. Around 5,000 Japanese are now working on farms, mainly in Western Canada, and about 500 prisoners of war have been used over the past two months on the sugar-beet farms of Southern Alberta. Other prisoners of war have recently been released to work on individual farms.

Some assistance will again be available for the Prairie harvest this year through an arrangement made with the United States for the movement of harvesting units between the two countries. There is also being arranged another movement of farm workers from Ontario, and perhaps Quebec, to help with harvesting on the Prairies.

These transfers of labour between provinces help to distribute the farm labour supply on the basis of greatest need. The Federal Government bears most of the transportation costs but the Provincial authorities assist in recruiting and placing the workers. Besides the westward movement of harvest workers, around 700 men were brought from Saskatchewan between seeding and harvesting, to help with haying on Ontario farms this summer. Other workers have been transferred from Alberta to British Columbia for fruit picking.

Assignment of Soldiers to Farm Duty

Assistance to Farmers under Dominion-Provincial Program

THE Minister of Labour, Honourable Humphrey Mitchell, announced on July 26 that a plan had been worked out between the Departments of National Defence and Labour for the utilization of the services of soldiers on an extensive scale in agricultural employment.

The plan provides for the assignment to Farm Duty by the District Officer Commanding of certain soldiers from units in his area who can be made available for a period of thirty days when they are requested for work on farms. Soldiers so assigned remain subject to military discipline, but will receive extra pay in addition to their military pay on returning to their units.

In response to telegrams sent by the Minister of Labour to the provincial premiers, the governments of all the provinces agreed to participate in the plan (which is authorized by Order in Council P.C. 5931, July 24, 1943). The details are under the administration of the provinces with the Dominion sharing in the cost on the same basis as in the original Dominion-Provincial Farm Labour Agreements (L.G., May, 1943, p. 568).

It was expected that substantial numbers of army personnel would be readily available for farm work, and that the plan would meet the greater part of extra harvest requirements for 1943.

Administrative Procedure

Requests for help from the farmers and all of the necessary arrangements for placing the soldiers will be largely in the hands of the Provincial Director of the Dominion-Provincial Farm Labour Program in each province, who will work in close co-operation with the Agricultural Employment Advisor of National Selective Service.

The suggested procedure for carrying out the program, substantially as outlined in a memorandum from the Minister of Labour to the provincial premiers, is as follows:

1. The farmers are to make application for soldiers for Farm Duty on a prescribed form, to be made available through the office of the Local Representative of the Provincial Director.

(In most instances provincial or municipal field men or officers of the Local Employment and Selective Service Offices may serve as Local Representatives.)

2. The farmer will forward his application, duly completed, to the Local Representative. Applications from farmers whose farms do

not contribute substantially to agricultural production will not be considered.

3. The applications will be forwarded by the Local Representative to the Provincial Director, together with information relative to nearest station, the number of soldiers required at each point and the most convenient routes and times of arrival.

4. The Provincial Director will review all requests received, and verify that the train or bus schedules are correctly indicated. The Provincial Director will ascertain from the District Officer Commanding the total number of men available and pro-rate this number according to the labour requests submitted by his different Local Representatives.

5. In accordance with his pro-rating, the Provincial Director will notify the D.O.C. of the number of men to be sent to each point and the date and hour scheduled for their arrival. By arrangement between the Provincial Director and the D.O.C. the soldier will be provided with a route letter to report to either a specific farmer or a designated Local Representative of the Provincial Director.

6. The Provincial Director will notify each Local Representative of the number of soldiers assigned to his district, and the place, date and time where and when they will arrive, including those to be routed directly to farmer employers in his district.

7. The District Officer Commanding will arrange for the despatch and transportation of the soldiers to their respective destination points, advising the Provincial Director of such despatch. The Local Representative will arrange for soldiers to be met at the station by himself or by the farmer employer. The transportation of the soldier or soldiers from the station to the farm and return will be the responsibility of the farmer employer.

8. The Local Representative will make the distribution in accordance with the most urgent need. Those soldiers, routed directly to farms by the Military Authorities, will proceed to farmer employers as per instructions contained in a route letter provided by the Military Authorities carried by the soldier.

9. The Provincial Director will keep the D.O.C. informed at all times of the address of the soldier and with the name of the farmer with whom the soldier is performing Farm Duty. The Provincial Director will make the necessary arrangements to obtain this information.

10. The wage rate which the farmer employer will pay for the services of a soldier for every day he is available for work on the farm is \$3 in Quebec and the Maritime Provinces, \$3.50 in Ontario (Port Arthur and East) and \$4 in Western Canada (West of Port Arthur). These rates may, where local circumstances justify, be revised upwards with the prior approval of the Minister of Labour for Canada with the concurrence of the Provincial Government. In addition the farmer will provide board and lodging. "Available day for work" will be interpreted as any day excepting Sundays when the soldier is ready to undertake work for the farmer, irrespective of weather conditions. If the soldier is required to work on Sunday, a full day's wage is payable. The money will not be paid by the farmer to the soldier direct, but will be forwarded to the Provincial Director. The soldier will receive, after rejoining his unit, in addition to his Army pay an amount equal to the difference between that pay and the amount charged the farmer.

11. If the soldier is unable to work because of illness or accident, the farmer will not be required to pay for his services while the soldier is disabled, but must provide board and lodging. The farmer will immediately

notify the Provincial Director or his Local Representative of same, who in turn will advise the soldier's superior officer, who will arrange for the soldier's removal or care.

12. During their period of work, the soldiers will be subject to military discipline. Provision has been made whereby an Officer and two Non-Commissioned Officers will be detailed for each Military District to supervise and look after the welfare of these soldiers. The services of these military representatives may be called upon to handle difficulties arising in these respects.

13. In the event of any dispute arising between the farmer and the soldier, such dispute will be referred to the Provincial Director or his Local Representative in the area.

Compassionate Leave

In addition to soldiers assigned for Farm Duty, further facilities are being given this year in connection with compassionate farm leave to soldiers in Canada to go on their own farms or on those of relatives. Moreover, the Department of Labour will provide transportation up to 500 miles, and also overalls, to soldiers returning to the farm on compassionate leave.

Employment of Women in Agriculture

ON July 14 it was announced that Mr. Arthur MacNamara, Director of National Selective Service, had taken up with the Provincial Ministers of Agriculture the question of the more extensive employment of women in the agricultural industry, to overcome shortages of male workers.

The letter from Mr. MacNamara to the Provincial Ministers reads as follows:—

"The question of female help in agriculture has arisen on several occasions.

"As you know, in England and Australia, women have replaced men on many farms. The governments have given encouragement to this movement by providing leadership and supervision. I realize that in Canada our types of agriculture do not lend themselves, on the whole, too well to women working on farms. Nevertheless, I wonder if we should not explore more fully than we have the possibilities of using more women from cities, towns and villages, on our farms.

"We appreciate that in many parts of Canada women and girls are now being recruited for temporary work, mainly on fruit

and vegetable farms and in canneries. In view, however, of the increasing difficulty of supplying year 'round help for our dairy and livestock farms, it is imperative that this, as well as every other possible source of year 'round labour for agriculture, be canvassed.

"I would appreciate it if you would see that this question of female help, particularly for year 'round employment in agriculture, is raised at the next meeting of the Dominion-Provincial Committee on Farm Labour in your Province. At that time steps might be taken to explore first, the extent of the likely source of female help, and second, whether or not there would be a substantial number of farmers willing to employ such workers.

"We would be prepared to extend the War Emergency Training Program to provide suitable training facilities for these workers before they were asked to accept such employment, if you think such a preliminary training program would aid the recruitment and placement of women in agriculture.

"I would be pleased to hear from you regarding this matter at your earliest convenience."

Recruitment of Part-time Workers in Toronto

Immediate Response of Women Willing to Accept Essential Jobs on Part-time Basis

THE initial experiment of recruiting part-time workers in Toronto for vital services on the home front, has shown that there is available a secondary pool of women among housewives and other independent groups who are ready and willing to serve in time of need, it was announced recently, by Mrs. Rex Eaton, Administrator, Women's Division, National Selective Service.

The first step undertaken was to call a conference representing restaurants, laundries, dry cleaners and other services most desperately in need of help. Such employers were asked to co-operate fully in an initial drive for part-time help with the result that approximately 1,500 definite orders were placed with the Women's Division of Selective Service.

Following a declaration by Mrs. Rex Eaton to delegates to the annual meeting of the National Council of Women, representing 70 women's organizations, that "women must fill the breach in all such services vital to the maintenance of health, cleanliness and the preparation of food, such as restaurants, laundries, hospitals, etc.," the Local Council of Women in Toronto unanimously agreed to sponsor a drive for part-time workers.

The campaign was inaugurated with vigorous publicity, utilizing posters, newspaper space and leaflets. Local papers co-operated, with news items calling attention to the need and praising the women who were supporting the drive.

Members of the Local Council, co-operating with the Women's Division of Selective Service, were allowed to take applications at Bay Street. All orders from employers were filled in the usual way. The presence of Local Council members during registration hours gave vocal expression to their support.

The registration was based upon payment for all services at standard rates of pay and applicants were informed that up to 24 hours a week constitutes part-time service which could be given in 2 or 3 full days or through working 3 to 6 hours a day.

Patriotic incentive was added by the awarding to registrants of a simple badge with the words "I serve."

Immediate Response

Registration opened on Thursday, July 8, and during the first 24 hours over 1,000 women entered the Selective Service office in answer to the request for part-time help.

The results on July 26 after two weeks of activity were as follows:

Total of all applicants..... 2,267

1,518 were placed in essential services.

875 accepted full-time employment.

643 accepted part-time work and were placed as follows:

Hospitals 128

Restaurants 277

Hotels 82

Laundries and dry cleaning 156

599 were placed with war industries which are experimenting with part-time workers.

150 were yet to be placed.

It was indicated that interest in part-time employment was even greater than these records show, since many women were calling at the employment offices of plants and institutions direct.

Later at a meeting representing hospitals, hotels, restaurants, laundries, and dry-cleaning establishments, the view was expressed that Toronto women had successfully met a critical situation for all industries concerned, giving them the first relief help for many months. All employers unanimously expressed satisfaction with the arrangements and with the type of workers secured.

Featuring this drive for part-time workers was the high quality of applicant and the willingness to take whatever jobs were offered. There were some splendid discoveries including women who had had previous laundry, mending room or hospital experience, but many among the applicants were housewives with no previous experience.

Every age was represented from young married women to grandmothers and 9 out of 10 were willing to take any job where immediate service was more urgently needed, expressing themselves as registering for service rather than wishing to seek a job of their own choice.

Women lined up as early as 8.15 in the morning; so great was the rush it was necessary to put in extra seating accommodations, extra tables and to detail more workers to handle application blanks.

As a result of the success of this registration, some Toronto industries are exploring the possibility for utilizing more women on part-time work, and similar campaigns are being planned for other Canadian cities.

Commenting upon this recruitment, Mrs. Rex Eaton says:

"The methods of handling this registration demonstrated a co-operation hitherto unparalleled in Canadian placement work—its success is a striking tribute to the value of good teamwork—built out of the willingness of industry to co-operate, the splendid response and service of the Local Council of Women and the untiring tact and zeal of Miss Mary

Eadie, Superintendent of the Women's Division of Selective Service and her good staff at the Bay Street office.

"It is no easy matter for any organized public service to allow outsiders into its routine work. That this was done at the Women's Division of Selective Service over the first period of part-time registration with such excellent results, offers the finest tribute to all concerned."

War Plant Using Women Part Time

The following report describes an experiment in the part-time employment of women by one of Toronto's largest wartime plants, the General Engineering (Canada) Ltd.

Between June 29 and July 2, 367 part-time women workers registered for employment at the plant. The majority were married women between the ages of 30 and 49 years. More than 40 applicants now working are 50 years of age and over.

Twenty per cent were former employees forced to resign on account of domestic duties, who are now willing or better able to take work under the new part-time plan.

The working day for part-time women workers at the General Engineering plant is divided into three four-hour periods, morning, afternoon or early evening shifts.

One hundred and sixty-six of the married women in this group had not been working in outside jobs for five years previous to present

employment. Two hundred came to the plant from other less essential jobs. Over one hundred and fifty had had experience at some time or other in the operating of industrial or hand machinery. Twenty-one had been engaged in domestic work, 17 were sales clerks, 12 waitresses, 5 from professions, 4 hair-dressers, and 129 had no previous experience. Fourteen of the group had university standing, 42 commercial standing, 15 technical, 56 had gone through high school and 240 had gone as far as public school.

Officials of the General Engineering Company report the experiment is working out with such success that they anticipate increasing the number of women on part-time work. Many of the women working under the plan have husbands or sons in the forces overseas and they come to this work in the spirit of service, expressing their desire to get in and help the men overseas.

Fifth Compulsory Transfer Order

Men in Additional Group of Occupations made Subject to Transfer— Other Orders Relating to Manpower Control

THE fifth compulsory employment transfer Order under National Selective Service Civilian Regulations was announced by the Minister of Labour, Honourable Humphrey Mitchell, on July 31. The Order listed a further group of industries, in which male employees in designated age and marital categories became subject to transfer to jobs of a higher priority.

Men of the specified categories were covered by the Order if engaged in any of the following lines of employment:—

1. Any occupation in the following lines of manufacturing:—

(a) Candy, confectionery, soft drinks, flavouring extracts, syrups, and "essential" oils.

(b) Tobacco, tobacco pipes, and cigarette holders.

(c) Hats and caps, artificial leather, padding and upholstery filling for general use.

(d) Public building furniture, office and store fixtures; window shades; Venetian blinds; wall paper; rubber flooring; children's vehicles; lamp shades.

(e) Monuments and tombstones; cut-stone and stone products; ornamental metal work; signs and advertising displays.

(f) Pianos, organs and musical instrument parts and materials, games, toys and dolls.

(g) Pens, mechanical pencils and pen points; artists' materials; jewellery cases and instrument cases.

- (h) Soda fountain and beer dispensing equipment; vending, amusement and other coin-operated machines; household and service industry machines; store machines and devices; beauty and barber equipment; vacuum cleaners.

2. Any occupation in the following activities:—

- (a) Art, authors, museums; library operations, photography; lapidary work.
 (b) Costume renting; manufacture of wigs, toupees, braids and switches.
 (c) Fur dressing and dyeing; fur storage.

Men in the above occupations were affected by the Order if in the following age and marital categories:—

- (a) Every man born in any year from 1917 to 1927 (inclusive) who has reached 16 years of age.
 (b) Every man born from 1902 to 1916 (inclusive) who, at July 15, 1940, was:
 (i) unmarried; or (ii) divorced or judicially separated; or (iii) a widower without child or children.
 (c) Every man born from 1902 to 1916 (inclusive) who has, since July 15, 1940, become a widower without child or children now living.
 (d) Every man born from 1902 to 1916 (inclusive) who, since July 15, 1940, has been divorced or judicially separated.

As in the case of the previous orders the men affected were required to report to an Employment and Selective Service Office by a specified date; in person if possible, or by mail if living at a distance. It was made illegal for an employer to retain in his employment any of the men affected by the Order after the specified date (which in the case of the Fifth Order was August 9) unless a permit was obtained from a National Selective Service Officer.

Other provisions of the earlier Orders also applied to the Fifth Order: Men discharged after active service with the Armed Forces during the present war were not made subject to transfer though required to register; men with dependents were not required to accept transfers involving a change of residence; those transferred were protected in the matter of fair minimum earnings; men had the right of appeal to a Court of Referees.

Enlarged Enforcement for Regulations

The Minister of Labour announced on July 23 that the Civil Service Commission had approved of additional appointments to strengthen machinery in connection with National Selective Service Civilian Regulations.

Enforcement in the field had previously been largely the responsibility of officers of National Selective Service in the Local and Regional Offices. Authority has now been given for the appointment of special enforcement officers to the five Regional Offices across Canada in Moncton, Montreal, Toronto, Winnipeg and Vancouver; and also at several other points across the country.

The Minister explained that enforcement to date had been tempered by the consideration that it was necessary to give the public an opportunity to become familiar with the details of the Regulations, but that as a sufficient time had elapsed to serve this purpose the investigation of cases of reported non-compliance would now be increasingly rigid. Local Selective Service Offices would still investigate individual cases, but they would be assisted and supervised by the District and Regional Enforcement Officers.

New Regulation to Supply Manpower for Coal Mining

In view of the manpower shortage in coal mining, Selective Service Officers have been given added power in the direction of workers to this industry. The following measures were already in effect (LABOUR GAZETTE, June, 1943, p. 739):—

1. No coal mine workers can be dismissed, or leave mining voluntarily, except under Selective Service Permit.

2. Present and future coal mine workers have been granted postponement of military training to February 1, 1944, by virtue of their occupation.

3. No coal mine worker is to be accepted under voluntary enlistment for service with the armed forces, prior to February 1, 1944.

4. Provision has been made for the compulsory return to the mines of those in other industry who are former coal mine workers.

5. The minimum age of workers in coal mines has been reduced to sixteen years, regardless of any provincial regulation. At the same time authority has been given for the employment of women at the surface of mines.

Under a new Order in Council (P.C. 6077, July 29) a National Selective Service Officer may direct any male person under 65 and over 16 years of age to accept and enter specified employment in coal mining. If the person is employed the employer must be notified and the employment will be terminated at the end of seven days.

The Order amends Section 210B of National Selective Service Civilian Regulations, which

made similar provision for transfer of workers to fuelwood-cutting, fishing and fish-processing, by extending the coverage of the section to include coal mining.

Temporary Employment of Women in Canning

Order No. 6 under National Selective Service Civilian Regulations, dated June 30, relates to the employment of women in factories engaged in the canning of perishable fruits and vegetables. The Order states that sections 202-208 of the Regulations (prescribing that hiring must take place through Selective Service Offices and restricting the employment of persons employed in agriculture) shall not apply to the temporary seasonal employment of female persons in such factories if it is known that the employment will not exceed a period of ten weeks. The Order revokes Order No. 3 of February 27 (LABOUR GAZETTE,

April, 1943, p. 526) dealing with the same subject.

Restrictions on Advertising Eased

Section 208 of National Selective Service Civilian Regulations forbids employers with positions vacant and workers seeking employment to publish advertisements, without permission of a Selective Service Officer. This section has been modified in certain respects. Order No. 7, issued under the Regulations on July 29, declares that the section shall not apply to:

- (1) Advertising for domestic and kitchen employees for hospitals, asylums, nurseries, orphanages, institutions for the aged and infirm, or for any other type of institution similar in nature to the foregoing and approved by the Director of National Selective Service; or
- (2) a person advertising in reference to female persons sixty years of age or over; or
- (3) the Civil Service Commission.

Survey of Employment in the Construction Industry

TO facilitate proper distribution of Canada's manpower the Department of Labour (Manpower Statistics Unit), Ottawa, is co-operating with the Department of Munitions and Supply by making a survey of current employment on war and civilian construction projects.

Forms have been sent to 1,500 selected construction firms requesting a list of all jobs on which the companies were working during the last pay period in June, 1943. The forms

were returnable at the end of July. This information will furnish the necessary statistics from which to estimate future labour requirements in that industry.

Work to be reported includes all types of new construction, additions, alterations, demolitions and repairs, and the information secured will make possible a classification as to the labour priority of each job. Numbers of employees, including office and inspection staffs, and part-time workers, have been asked.

Great Britain Orders Compulsory Registration of All Nurses and Midwives

IN order to insure better distribution of the available nurses and midwives throughout Great Britain the British Minister of Labour and National Service has recently passed an act ordering compulsory registration of all nurses and midwives who are British subjects born after 31st March, 1883, and before 1st April, 1926, no matter how long their period of residence in Great Britain.

The act has a wide application in that it applies to:—

1. All nurses whose names appear on the general or supplementary State Register of the general Nursing Council for England and Wales and the general Nursing Council of Scotland, also

2. Nurses who hold a certificate for at least three years training prior to June, 1925, in an approved training school but may not have State registration.

3. State certified midwives whose names may be no longer on the official roll whether practising or not (except those whose names have been removed on the ground of infirmity or misconduct).

4. Student nurses and pupil midwives.

5. Persons who have been or who are members of nursing auxiliaries in the Civil Nursing Reserve or who have been V.A.D.'s or member of the British Red Cross, St. John Ambulance Brigade or St. Andrews Ambulance Association who have had not less than six months full time nursing experience.

6. Nursery nurses trained and qualified in children's work.

7. Other persons who have at least one full year of experience in nursing sick persons in the hospital or similar institution.

8. All persons who on March 30, 1943, were employed in or engaged for the purpose of nursing sick or injured persons.

Act has Wide Application

It is noted that women who at the time the Act went into effect, were in the process of entering the women's auxiliary service or the nursing service of the Crown but were not finally enrolled, were compelled to register if they had any of the qualifications listed. This compulsory registration applies equally to male nurses.

Administration

In order to assist and advise registrants under the Act an official possessing good nursing or midwifery qualifications has been appointed to each of the 31 appointments offices throughout Great Britain.

The initial registration of nurses was carried out at all local Employment Exchanges under the Ministry of Labour after which the local administration of the scheme is being handled through the Appointments Offices, as these deal mainly with placements of professional persons.

The purpose of the Order and all details was one of the initial questions which the Minister of Labour arranged to be discussed by his newly appointed National Advisory Council for the recruitment and distribution of nurses and midwives. This Council consists of representatives of hospitals and similar institutions and organizations, representing nurses and midwives, together with a representative from the joint war organization of the Red Cross and St. John's Ambulance Society.

While it is implicit in the scheme that the Ministry will, if necessary, use its powers of compulsion to direct nurses and midwives into particular posts, it is not proposed to use those powers until it can be seen how far the present difficulties can be overcome by voluntary means.

Campaign for New Recruits

Keeping pace with the registration and review of applications there has been an intensive widespread publicity campaign seeking new recruits for the nursing and midwifery profession. This campaign has utilized the radio, short films, leaflets and advertisements in newspapers and other periodicals.

Women are prompted and encouraged to volunteer for nursing almost entirely irrespective of their present occupation.

Wage Subsidies for Transferred Workers in New Zealand

IN April, 1943, New Zealand introduced a scheme of financial assistance for workers directed into jobs where the remuneration is lower than in their former position. Up to that date manpower officers had not used their power of compulsory direction into essential industries under the Industrial Manpower Regulations (LABOUR GAZETTE, 1942, pp. 935, 1373) in regard to persons who would suffer loss of income as a result of the direction. The new scheme will enlarge the supply of labour available for compulsory transfer. At present it is to be used chiefly to facilitate direction of women into hospitals, hotels, restaurants, laundries, woollen mills, some munitions work and canning factories, but manpower officers may recommend its application to other industries.

Individual applications for assistance must be made by each transferred worker and he must prove that there has been a reduction in earnings due to the direction. Grants up to £2 per week for men and £1 for women will be made provided that the assured remuneration from the job (exclusive of overtime pay) plus the grant does not exceed £8 a week for men and £5 for women. The amount of the grant is determined by an

estimate of the extent to which a worker's financial condition has been affected by the transfer. Such factors are considered as additional or decreased expense for transport and board and lodging, longer travelling time or unfavourable conditions of work such as humidity.

No assistance will be granted for any period before April 1, 1943, but persons who received direction before that date may apply for grants after April 1. Assistance will not be given to persons who are prevented by restrictions on transfer in essential industries from obtaining higher-paid jobs, to persons who voluntarily enter essential industries, to persons unemployed at the time of direction nor to seasonal workers who change their jobs in the normal seasonal rotation. Employers in essential industries will not be able to take advantage of the wage subsidy to pay low rates as they are required by the Industrial Manpower Regulations to pay prevailing rates to all directed persons.

Assistance grants will be paid for four-weekly periods. In computing the worker's former earnings, the average remuneration over the four weeks prior to direction will be taken.

Reconstruction and Social Security

Health Insurance Approved in Principle by Parliamentary Committee

House of Commons Committee on Social Security Presents Report— Recommends Dominion-Provincial Conference

THE Special Committee on Social Security of the House of Commons submitted a report on July 23 summarizing its activities during the past session and making certain recommendations.

In regard to health insurance the Committee expressed itself in approval of the general principle of the proposed Health Insurance Bill. It suggested that full information regarding the provisions of the bill be made available to all the provinces, and that a Dominion-provincial conference be held before the next session of Parliament to "discuss certain complex problems involved, especially financial and constitutional questions". Earlier in the session the Committee reported to the House an Act for the establishment of a National Council for Physical Fitness, which was passed on July 21 (see page 1067).

In regard to old age pensions, pensions for the blind, and war veterans' allowances, the Committee recommended that the Government consider the advisability of lowering the eligibility age and of increasing the amount of pension; also that greater co-ordination and equality be effected among the various provinces.

The Committee was originally set up on March 5, and instructed "to examine and report on a national plan of social insurance which will constitute a charter of social security for the whole of Canada." It was also asked to study existing Dominion and provincial legislation; and to determine the most practicable measures of social insurance for Canada and the steps that would be required to effect their inclusion in a national plan. Health insurance was specifically mentioned in the terms of reference. Necessary constitutional and financial adjustments also came within the purview of the Committee.

At the opening meeting Hon. Ian Mackenzie, Minister of Pensions and National Health, laid before the Committee the *Report on Social Security for Canada* prepared by Dr. Leonard C. Marsh, and the report, *Health Insurance*, containing a draft bill prepared by the Advisory Committee on Health Insurance under the

chairmanship of Dr. J. S. Heagerty (L.G., April, 1943, pp. 429 and 433).

Among the organizations submitting briefs to the Committee were various medical, dental, hospital and nursing bodies; organizations representing optometrists, chiropractors, osteopaths, chiropodists; national women's organizations; the Canadian Federation of the Blind; the Trades and Labour Congress of Canada; the Canadian and Catholic Confederation of Workers; the Canadian Federation of Agriculture; provincial Deputy Ministers of Health; and other interested groups.

The text of the report is as follows:

Text of Report

It was obviously impossible to consider, this session, all the problems involved in a program of Social Security. Only certain urgent phases could therefore be discussed. Recognizing that the primary basis of Social Security is health, the Committee considered first the Act to establish a national council for Physical Fitness, and the Health Insurance Bill prepared by the Advisory Committee on Health Insurance appointed by Order in Council, P.C. 836, of the 6th of February, 1942. All the organizations which desired to give evidence were permitted to do so, either in person or by submitting a brief for the record, and no applicant was refused a hearing. It was the opinion of the Committee that, because of the importance of the subjects under discussion, complete representations on the part of all concerned should be encouraged. The Committee held thirty-two meetings, examined one hundred and seventeen witnesses representing thirty-two organizations.

The Act for the establishment of a national council for Physical Fitness has already been approved by the Committee and has been reported to the House.

The Committee approves of the general principles of Health Insurance set forth in the Health Insurance Bill, respecting public health, health insurance, the prevention of disease, and other matters relative thereto.

The Committee recommends:—

1. That before the Bill is approved in detail or amended and finally reported, full information regarding its provisions be made available to all the provinces.

2. That to provide this information, officials of the various government departments concerned be instructed to visit the various provinces and to give full details of the proposed legislation to the provincial authorities.

3. That, if possible, before the next session of Parliament, a conference of representatives of the Governments of the various provinces and the Dominion be held to discuss certain complex problems involved, especially financial and constitutional questions.

4. That in the light of all the information meanwhile obtained, study of the Bill be continued by a committee of the House and by the Advisory Committee on Health Insurance.

5. That the Government review the existing regulations governing Old Age Pensions, Pensions for the Blind, and War Veterans' Allowance, and consider the advisability of adjusting

the eligibility age to a lower level and of increasing the amount of pension.

6. That an investigation be made into conditions and bases of grants of these pensions in the various provinces, cost of subsistence, inequalities, responsibility for and distribution of obligation, and all the matters relating to the problems involved, in order to effect greater co-ordination, equality and adequate adjustments.

7. That a study of a program of Social Security be continued during the next session of Parliament, with the object of making a co-ordinated framework of the various topics and problems.

8. That this Committee, or the Committee subsequently appointed to consider Social Security, be provided with necessary research assistance.

A copy of the evidence and proceedings is appended hereto.

All of which is respectfully submitted.

CYRUS MACMILLAN.

Chairman.

House of Commons Post-War Planning Committee Continues Hearings

AT the close of sittings of the House of Commons in July, permission was granted to the Special Committee on Reconstruction and Re-establishment to hold further hearings during the adjournment of the House.

The Committee held thirty meetings while Parliament was in session, and examined fifty-three witnesses. Submissions were presented by a variety of groups, including the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Chamber of Commerce, the Canadian Co-operative Union, the Canadian Legion, and representatives of agriculture and of various industries and government bodies. Sir William Beveridge, author of the report on Social Insurance and Allied Services in Great Britain, addressed a session of the Committee meeting jointly with the Committee on Social Security, and the Senate Committee on Economic Re-establishment and Social Security. A unanimous report was

submitted to Parliament on June 22 (LABOUR GAZETTE, July 1943, page 906) stressing the Government's responsibility for maintaining full employment immediately following the end of the war, and recommending an immediate survey of Canada's resources and an inventory of national, provincial and municipal projects in relation thereto.

Mr. J. G. Turgeon, Chairman of the Committee, stated that the Committee planned to have the premiers of the provinces give evidence before it during the summer, to provide details on the planning and the economic requirements of each province to deal with post-war reconstruction.

The Premier of Manitoba, Hon. Stuart Garson, appeared at an earlier sitting of the Committee when he listed the studies and projects which his government was investigating and gave evidence on the Dominion-provincial relationship.

Social Security Conference Convened by I. L. O.

A MEETING of social security experts from various countries, convened by the International Labour Office, was held in Montreal from July 9 to 12. The conference gave the participants, who attended in their personal capacities and not as official representatives of their governments, an opportunity for an exchange of views on new trends of social security policy. In the words of the Honourable Ian Mackenzie who presided as chairman, the conference was aimed to "give effect to the universal desire of all human beings for a good life, including health, education, decent living conditions, regular and suitable work, and freedom from want."

The drafting of an International Charter of Social Security was considered by the participants, among whom were Sir William Beveridge, author of the British social security report, Dr. L. C. Marsh, author of the Canadian plan, Dr. J. J. Heagerty, Director of Public Health Services in Canada, and experts from the United States, Brazil, Chile, Mexico, Peru, Cuba and Ecuador. The consultation was held in private.

In a statement at the conclusion of the conference, Mr. Mackenzie said: "When the notes of this consultation have been transcribed it will be possible for the staff of the I. L. O. to ascertain the ground that is common to us all and to draft a charter which at a later day—not too far distant we hope—can be laid before a representative International Conference for adoption."

Among the topics discussed, Mr. Mackenzie stated, was the question of the respective roles of the insurance method and the assistance method in a comprehensive system of social security. "The new trend in social security," he declared, "may very well be towards giving greater recognition to the contribution that working men and housewives have made towards the creation of the national wealth and the national income by their daily labours in the industrial and business world, and relying less upon their cash payments into an insurance fund."

"This seems to be implicit in the increasing recognition that is being given to the national and social importance of maintaining the family income and preserving the health of the individuals who make up the nation."

Reconstruction Planning in South Africa

A REPORT on post-war re-employment and reconstruction has been issued by the Social and Economic Council of the Union of South Africa. ¹According to the Council, South Africa's post-war re-employment problem will consist in finding work for a total of 230,000 persons, namely 80,000 European males, 30,000 European females, 90,000 Native males, and 30,000 coloured, Indian and Malay males and females.

The task of re-employing these persons within a limited time is one "with which the competitive system, unaided, cannot cope", the report states. It declares that planned public works are essential for re-employment after the war; and that the solution is not to be found in emergency unemployment relief works, but rather in a planned, long-term public works program including projects of high social and economic utility.

The Council suggests that any long-term public works program should (1) be quick to

start; (2) use the greatest possible proportion of local raw materials; (3) select diversified projects so as to use diversified skills; (4) be dispersed geographically; and (5) include projects with the highest social and economic utility.

In order to plan such a program, the Council recommends that regional surveys of the country be undertaken by the various universities to obtain basic facts concerning the country's development, population, and resources. It also recommends the appointment of a town planning committee, in order that housing schemes may be developed according to sound town planning practice.

Further recommendations deal with nutrition, farming reconstruction, improving the social and economic conditions of the Native people, and the setting up of a committee to prepare a comprehensive scheme of social services and social security.

¹ Data from *International Labour Review*, July, 1943.

Labour in the U.S.S.R.

Industrial Legislation in the Soviet Union—Mobilization of Labour and Resources

A PAMPHLET dealing with working conditions in the Soviet Union has been published by the British Association for Labour Legislation under the title *Labour in the U.S.S.R.* The author, Margaret Millar, describes briefly the course of industrial legislation in Tsarist times and since the revolution. She also outlines the position of trade unions in Russia, and discusses such topics as social services, labour incentives and women in industry.

The chapter on legislation reveals a trend to short hours and improved working conditions during the first years after the revolution, but shows how in more recent years certain standards had to be sacrificed as the country mobilized its resources for war. Nevertheless, the writer refers to an insistence on "the idea that labour is a matter of honour, that idleness in any sphere of life is disgraceful, that the good worker deserves the respect of the community and a fair reward for his toil" as counterbalancing factors which "create a healthy social atmosphere and dissolve dangerous discontents."

Russian workers, the pamphlet states, were originally serfs whose labour was at the disposal of the master in the field or in the factory. It was only in the last decade of the nineteenth century that industrial legislation in the modern sense came into being, by a series of laws limiting the working day for adults to 11½ hours, forbidding the employment of children under 12 years of age, and correcting certain abuses. In 1903 an Accident Compensation Act was passed, and in 1912 acts organizing National Health Insurance and Accident Insurance received Imperial sanction.

Labour Code

Following the revolution, a labour code was drawn up at the end of 1918, establishing generous terms for workers; but the catastrophic economic conditions brought about by the civil war made it impossible to implement these laws. The needs of the time made it necessary to put into immediate action universal labour conscription based on the principle: "He who does not work shall not eat." In 1920 "labour armies" were mobilized and sent to different parts of the country to rebuild railways, restore ruined coal mines to activity, and otherwise re-establish the productive resources of the country.

In 1922 a new labour code was drawn up along the lines of the code of 1918. Labour conscription was abandoned. An eight-hour day was introduced, later reduced to seven hours, and to six hours in the case of heavy or dangerous work. Limitations were imposed on overtime. In 1931 a five-day working week was established, with a free day for all workers on the sixth day. A minimum annual holiday of two weeks on full pay was laid down, and protective measures were established for women and young persons who were excluded from night work and from a specified list of heavy and dangerous occupations. Children under 16 could only be employed in industry by special permission of the inspector of labour, and were only permitted to work a four-hour day. A six-hour day was established for young persons aged 16 to 18, who were to get an annual vacation of one month. A social insurance scheme on generous lines was also drawn up.

Pre-War Legislation

During the period from 1932 until the Soviet Union's entry into the war in 1941, labour legislation was increasingly concerned with the problem of tightening up labour discipline and reducing the rate of labour turnover in industry. Internal passports were reintroduced for the first time since Tsarist days, so that no Soviet citizen was allowed to be away from home for more than twenty-four hours without having his passport visaed. Dismissal was designated as the penalty for one day's unauthorized absence from work and for repetition of such offences as arriving too late in the morning, knocking off before time, taking too long for meals, and idling during working hours. Social insurance was administered so as to distinguish between "honest conscientious workers" and "disorganizers of production." This was done by paying lower rates of benefit for temporary incapacity to workers who had been at continuous work in the same undertaking for less than a particular time.

Hours of work were lengthened in 1940, by a decree which was accompanied by a manifesto from the All-Union Central Council of Trade Unions, explaining the necessity of an all-round increase in production in order to strengthen the Army, Air Force and Navy, and meet the threat to the security of the U.S.S.R.

As from June 27 those working seven hours a day were to work eight hours, those working six hours were to work seven. All workers from the age of 16 onwards were to work full time. The working week was to be a six-day instead of a five-day week, and the rest day was to be Sunday.

The same decree forbade workers to change their employment without the permission of the head of the undertaking, which was only to be given in certain specified circumstances. Absenteeism and short time were to be punished by correctional labour at the offender's place of employment and by wage stoppages up to 25 per cent of the total.

A decree was passed on July 10, 1940, which endeavoured to lessen the proportion of rejects or sub-standard goods produced. It was laid down that the production of goods which failed to conform to established standards, should be looked upon as a crime equivalent to "vreditelstvo" or wrecking. For such crimes, directors, chief engineers, and heads of departments of technical control in industrial undertakings were to be brought before the courts and sentenced to terms of imprisonment ranging from five to eight years.

A scheme intended to provide industry with a steady annual flow of 800,000 to one million new recruits, was undertaken in October, 1940. Schools were formed to train workers for various industries. Another decree conferred upon Commissars the right to transfer workers and their families to new posts anywhere in the Union. Transfer orders were to be obligatory for engineers, technicians, skilled workers and office employees. Full salaries were to be paid during the transfer period, free transportation would be provided for the men and their families, and special bonuses were to be given, amounting to three or four months' extra pay.

Wartime Controls

By the end of 1940, therefore, labour in the Soviet Union was practically on a war footing, the pamphlet states, and wartime legislation only needed to put the finishing touches to the structure of government control. A decree was passed a few days after the outbreak of war (June 26, 1941) authorizing compulsory overtime, paid at time and a half, up to three hours a day for adult workers and up to two hours a day for young persons under 16. Pregnant women and nursing mothers were to be exempt. All holidays were stopped, money payments being given to the workers instead. Sick leave and pregnancy leave were not affected.

By a decree of December 27, 1941, the act of leaving war enterprises was to be regarded as desertion, and guilty persons were to be liable to sentences ranging from five to eight years' imprisonment.

Universal labour conscription was introduced by a decree of February 14, 1942. The whole of the able-bodied urban population, including men between the ages of 16 and 55 and women from 16 to 45, was to be mobilized for the duration of the war for work in production and construction.

Other sections of the pamphlet give information concerning various aspects of labour conditions. The functions and structure of trade unions are described, and it is stated that in 1941 there were 184 trade unions in the U.S.S.R. with 25½ million members out of a total labour force of 30 million workers. Education and training schemes are briefly described, as is the extensive system of social insurance. Under the heading "Labour Incentives" is included a short description of the Stakhanov Movement and its achievements in increasing production.

Types of Collective Agreements in United States

Handbook Issued by U.S. Department of Labour Analyses Sample Clauses from Union Contracts

"UNION Agreement Provisions" is the title of a handbook issued by the United States Bureau of Labour Statistics as Bulletin No. 686.* It is a comprehensive analysis of the provisions of collective agreements in the United States and is illustrated by 1,400 sample clauses and the full text of 15 representative agreements. Practically all subjects covered in collective agreements are included in the

samples though it was not found possible to include all the varieties of clauses bearing on each subject. Each set of clauses is preceded by a brief introduction indicating the significance of the actual examples.

The purpose of the bulletin is primarily to assist those directly concerned with the actual task of negotiating agreements. For many years the Bureau of Labour Statistics has provided such persons with sample clauses from its files and it has published earlier bulletins on collective agreements. The latest of these,

*May be obtained at 35 cents per copy on application to the Superintendent of Documents, Government Printing Office, Washington, D.C.

however, was issued in 1928, and the method of presentation was completely different from that now adopted in that the individual agreements were treated separately.

Methods of Negotiation

The present bulletin begins with a discussion of the methods of negotiating union agreements. The majority of agreements at present in effect, it is pointed out, cover only single plants, or particular groups (crafts) within plants, and were negotiated by local unions dealing with individual employers. The aim of a union which becomes well-established in an industry, however, is to broaden the coverage of an agreement so as to make the union conditions as far as possible standard within the industry. In practice, this result has been achieved in a variety of ways. In the case of large corporations with several plants, the local unions may sign jointly with the central office of the corporation with the result that a single agreement may cover plants in widely separated geographic areas. Where employers' associations exist for purposes of collective bargaining, agreements are normally concluded with the associations. In a few cases, notably anthracite and bituminous coal mining, entire industries are covered by single agreements. In other cases, all the plants in an industry in a given geographical area come under one agreement, e.g., a bargaining relationship of several years' standing exists between the American Federation of Hosiery Workers and an association representing most of the northern section of full-fashioned hosiery manufacture. Agreements covering all the employers in a metropolitan area are common particularly in the construction industry and needle trades. Where employers' associations do not exist, the unions often achieve standardization of wages and working conditions by negotiating nearly identical agreements with individual employers. A degree of uniformity is sometimes effected also by having the national office exercise control over local agreements either by requiring national office approval of local agreements or by issuing union-label or "shop-card" agreements.

Union negotiations, the bulletin states, are usually conducted by officers of a local union, joint board, district council or other similar body. National union representatives may be consulted and they usually have the major responsibility in regional or industry-wide negotiations. The membership of a union exercises control over negotiations by its general control over the election of officers and by the fact that the tentative agreement

reached with the employer may have to be submitted for ratification. Negotiating machinery on the employers' side depends on the size of the company and whether or not the employer is a member of an association.

Sample Clauses

The bulk of the handbook is devoted to the sample clauses taken from actual agreements. These clauses are classified under 28 main headings, including union status, general wage provisions, wage-adjustment plans, hours of work, overtime, shift operations, seniority, grievance adjustment, arbitration, apprentices and learners, and duration and renewal. The chapter on union status contains clauses illustrating the closed shop provision, under which all new employees must be hired through the union or must be union members at the time of engagement, the union shop provision, under which the employer has complete control over hiring but all new employees must within a specified period become union members as a condition of employment, the maintenance of membership clause under which existing union members must continue their membership during the currency of the agreement, recognition of the union as sole bargaining agency, union recognition for members only, etc. The chapter on general wage provisions illustrates the various types of clauses regarding period and form of payment, differentials based on type of business, sex, disablement and hazardous or unpleasant work, minimum "call pay," waiting time, deductions for poor work and uniforms and equipment. The chapter on grievance adjustment contains clauses dealing with shop committees, business agents, joint committees, negotiating procedure, grievance meetings, pay status of committee-men, etc. Other chapters are similarly comprehensive.

Agreements Quoted in Full

The 15 agreements which are quoted in full are designed to illustrate the general structure of union-employer agreements. They were chosen "for the purpose of presenting as wide a variety as possible according to type of industry and union, as well as kinds and completeness of provisions included." They apply to the following classes of workers or industries: carpenters, city transportation, department stores, electrical manufacturing, hotels, long-shoremen, men's clothing, newspaper publishing, railroads, shipbuilding, steel, typographical workers, government agencies (T.V.A.) and the automobile industry.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.

Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published month by month in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1942 appeared in the *LABOUR GAZETTE* for July, 1943.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Recent Proceedings Under the Industrial Disputes Investigation Act

IN the month of July seven Boards of Conciliation and Investigation submitted their reports in connection with the following disputes:—

(1) Between the Ford Motor Company of Canada, Limited, Windsor, Ont., and its employees, members of Local 240, United Automobile Workers of America, and employees, members of Formocan Employees' Association.

(2) Between the B. Greening Wire Company, Limited, Hamilton, Ont., and its employees, members of Local 2950, United Steelworkers of America.

(3) Between Sawyer-Massey, Limited, Hamilton, Ontario, and its employees, members of Local 520, United Electrical, Radio and Machine Workers of America.

(4) Between Canada Packers, Limited, St. Boniface, Manitoba, and its employees, members of Local 216, United Packinghouse Workers of America.

(5) Between the Sorel Industries, Limited, Sorel, P.Q., and its employees, members of the Metal Trades Council of Sorel (A.F. of L.).

(6) Between the J. Ford and Company, Limited, Portneuf Station, P.Q., and its employees, members of the National Catholic Union of Paper Workers of Portneuf Station.

(7) Between the Dominion Glass Company, Limited, Hamilton, Ont., and its employees, members of Local No. 3, Canadian Brotherhood of Glass Workers (C.C.L.).

Applications Received

During July ten applications* for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour as follows:—

1. From employees of the St. Lawrence Flour Mills Company, Limited, Montreal, P.Q., members of the Distillery, Rectifying, Brewery and Wine Workers International Union. The dispute, which concerns union recognition and the negotiation of a collective labour agreement, was said by applicants to affect 74 employees directly and 14 indirectly. On July 8, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

2. From employees of the Standard Steel Construction Company, Port Robinson, Ont., members of Local 2896, United Steelworkers of America. The dispute, which was said by the applicants to affect 123 employees directly and 30 indirectly, concerns the negotiation of a collective labour agreement. Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ontario, was authorized on July 21 as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

3. From employees of Knitters, Limited, Marieville, P.Q., members of Local 7, United Textile Workers of Canada (T. & L.C.). One hundred and fifty-four employees were said by the applicants to be directly affected in the dispute, which developed out of a request for union recognition and the negotiation of a collective labour agreement. On July 29, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

4. From employees of Ocean View Bus Service, Limited, Charles A. Pender Bus Service, Limited, Halifax, N.S., and Bell Busses, Limited, Dartmouth, N.S., and their employees, members of Division 235, Canadian Brotherhood of Railway Employees and Other Transport Workers. The dispute, which concerns union recognition, the negotiation of a collective labour agreement and the dismissal of an employee, was said by the applicants to affect 60 employees. A strike of the employees occurred on July 11, and Mr. R. H. Pettigrove,

Industrial Relations Officer, Dominion Department of Labour, Fredericton, N.B., who was in Halifax at the time, investigated the situation. He succeeded in having the parties reach an amicable settlement, whereby the men would return to work immediately, the companies agreeing to meet a committee of the union for the purpose of discussing the request for a collective labour agreement. In connection with the dismissal of an employee, allegedly for union activity, both parties agreed to accept the decision of an arbitrator, to be jointly named. Further negotiations between the Company and the union resulted in the dismissed employee being reinstated and arbitration proceedings were therefore discontinued. In view of the settlement reached, the union requested that the application for a Board be withdrawn.

5. From employees of the Dominion Rubber Company, Limited, St. Jerome, P.Q., members of Local 144, Federal Union (T. & L.C.). Eleven hundred employees were said by the applicants to be directly affected in the dispute, which developed out of a request for union recognition and the negotiation of a collective agreement. On July 21, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

6. From employees of the Paton Manufacturing Company Limited, Sherbrooke, P.Q., members of Local 101, Textile Workers Organizing Committee (C.C.L.). The dispute which was said by the applicants to affect 700 employees directly, concerns union recognition and the negotiation of a collective labour agreement. On July 20, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

7. From employees of Ayers, Limited, Lachute Mills, P.Q., members of Local 9, United Textile Workers of Canada (T. & L.C.). Three hundred and ninety-six employees were said by applicants to be involved in the dispute, which developed out of a request for union recognition and the negotiation of a collective labour agreement. On July 29, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

8. From employees of the Canadian Kellogg Company, Limited, Comstock Electric Company, Canada Electric Company, and Ontario Electric Company, Sarnia, Ontario, members of Local B530, International Brotherhood of Electrical Workers. One hundred and twenty-five employees were said by the applicants to be directly affected in the dispute, which developed out of a request for union recogni-

* By P.C. 5963, the National and Regional War Labour Boards are specifically charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

tion and the negotiation of a collective labour agreement. Toward the end of the month, the department was advised that all of the companies involved in the above dispute, with the exception of the Canadian Kellogg Company, Limited, had signed agreements with the International Brotherhood of Electrical Workers. On July 29, Mr. Harold Perkins, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was appointed an Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute insofar as it concerned the Canadian Kellogg Company, Limited, and the applicant union.

9. From employees of the Goodyear Tire and Rubber Company of Canada, Limited, New Toronto, Ont., members of Local 232, United Rubber Workers of America. The dispute, which was said by the applicants to affect 1,300 employees, concerned three points: (1) closed shop; (2) check-off; (3) an agreement with respect to eligibility of employment. On July 23, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute. In his report, received on July 30, the Commissioner stated that he had been unable to effect a settlement of the dispute and recommended that a Board of Conciliation and Investigation be established. Accordingly, a Board was established by the Minister of Labour on July 31 and Mr. Andrew F. Brewin, Toronto, Ont., was appointed a member of the Board on the nomination of the employees. At the end of the month the employing company had been requested to nominate a person to be appointed to the Board.

10. From employees of the Dominion Rubber Company, Limited, Montreal, P.Q., members of the Distillery, Rectifying, Brewery and Wine Workers International Union. The dispute, which concerns union recognition and wage adjustments, was said by the applicants to affect 700 employees directly and 100 indirectly. The application was returned for revision and at the end of the month had not been resubmitted.

Boards Established

On July 22, a Board of Conciliation and Investigation was established to deal with a dispute between the York Township Hydro System, Toronto, Ont., and its employees, members of Branch No. 1, Canadian Electrical Trades Union (L.G., May, 1943, p. 595). On July 20, Mr. J. D. McNish, K.C., Toronto, Ont., who had been appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that he had been

unsuccessful in his efforts to bring about a settlement of the dispute and recommended that a Board of Conciliation and Investigation be established. At the end of the month Messrs. Charles H. Spencer and Drummond Wren, both of Toronto, Ont., had been appointed on the nomination of the employer and employees respectively and were conferring with a view to making a joint recommendation of a person to act as third member and chairman of the board.

On July 19, a Board of Conciliation and Investigation was established to deal with a dispute between Peck Rolling Mills, Limited, Montreal, P.Q., and its employees, members of Local 2174, United Steelworkers of America (L.G., July, 1943, p. 921). Following receipt of the application for the establishment of a board, Mr. Bernard Wilson, Industrial Relations Officer, Dominion Department of Labour, Ottawa, Ont., was appointed an Industrial Disputes Inquiry Commissioner, to investigate the dispute. On July 17, the Commissioner reported that he had been unable to effect a mutually satisfactory settlement of the dispute and recommended that a board be established. Messrs. Robert T. Ferguson and Guy M. Desaulniers, both of Montreal, P.Q., were appointed members of the board on the nomination of the employer and employees respectively. In the absence of a joint recommendation from the two members, the Minister of Labour appointed Honourable Mr. Oscar L. Boulanger, Quebec, P.Q., as third member and chairman of the board.

A Board of Conciliation and Investigation was established on July 17 to deal with a dispute between Central Aircraft, Limited, London, Ont., and its employees, members of Central Aircraft Workers' Association, Unit 2, Canadian Aircraft Workers' Association (C.C.L.) (L.G., July, 1943, p. 921). Col. E. E. Reilly, London, Ont., and Mr. Bora Laskin, Toronto, Ont., were appointed members of the board on the nomination of the employer and employees respectively. At the end of the month the two members of the board had advised that they had been unable to agree on the recommendation of a person to act as chairman and requested the Minister of Labour to make an appointment.

Boards Fully Constituted

The Board of Conciliation and Investigation established on June 16, to deal with a dispute between the Canadian National Railways (Work Equipment Department), Winnipeg, Man., and its employees, members of Divisions 142 and 226, Canadian Brotherhood of Railway Employees and Other Transport

Workers (L.G., July, 1943, p. 921) was fully constituted on July 6. The personnel of the Board is as follows: His Honour Mr. Justice Alfred Savard, Montreal, P.Q., chairman appointed on the joint recommendation of Messrs. Frederick T. Collins, K.C., Montreal, P.Q., and John E. L. Graham, Winnipeg, Man., the employer's and employees' nominees on the Board.

The constitution of the Board of Conciliation and Investigation established on June 3, to deal with a dispute between the Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 2982, United Steelworkers of America (L.G., July, 1943, p. 922) was completed on July 5. The personnel of the Board is as follows: Honourable Mr. Oscar L. Boulanger, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of joint recommendation from the other two members; Messrs. Guy M. Desaulniers and D. A. Paterson, both of Montreal, appointed on the nomination of the employees and employer respectively.

The Board of Conciliation and Investigation established by the Minister of Labour to deal with a dispute between the West Coast Shipbuilders, Limited, and Hamilton Bridge (Western) Limited, Vancouver, B.C., and certain employees, members of eight various trades unions (L.G., July, 1943, p. 920) was fully constituted on July 12. The personnel of the board is as follows: His Honour Judge J. O. Wilson, Ashcroft, B.C., chairman, appointed on the joint recommendation of the other two members; Messrs. H. W. Herridge, M.L.A., Nakusp, B.C., and Fred W. Fearman, Vancouver, B.C., appointed on the nomination of the employees and employer respectively.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

On July 10, Mr. Bernard Wilson, Industrial Relations Officer, Dominion Department of Labour, Ottawa, Ont., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute between Machinery Services, Limited, Ville la Salle, P.Q., and its employees, members of Lodge 631, International Association of Machinists (L.G., May, 1943, p. 594).

An application for the establishment of a Board of Conciliation and Investigation was received in June from employees of Collingwood Shipyards, Limited, Collingwood, Ont., members of Local 4, Industrial Union of Marine and Shipbuilding Workers of Canada (L.G., July, 1943, p. 920). On July 5, Mr.

J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

On July 6, Mr. Raoul Trepanier, Industrial Relations Officer, Dominion Department of Labour, Montreal, P.Q., was appointed an Industrial Disputes Inquiry Commissioner to investigate a dispute between the Aluminum Company of Canada, Limited, La Tuque, P.Q., and its employees, members of Local 23435, International Union of Aluminum Workers (A.F. of L.) (L.G., July, 1943, p. 920). The Commissioner reported that he had obtained joint consent for the taking of a representation vote of the employees, to determine their choice of a bargaining agency. The vote, which was conducted on July 30, resulted in favour of the applicant union.

An application for the establishment of a Board of Conciliation and Investigation was received in June from the employees of Leavens Brothers Training, Limited, London, Ont., members of Leavens Aircraft Workers' Association, Unit 5, Canadian Aircraft Workers' Association (C.C.L.) (L.G., July, 1943, p. 920). On July 24, Dr. Alexander Brady, University of Toronto, Toronto, Ont., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute. In view of the fact that a Commissioner had been appointed to investigate the dismissal of an employee, the union requested the withdrawal of the application for the establishment of a Board of Conciliation and Investigation. Accordingly, the application was withdrawn.

On July 14, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute between the North American Cyanamid, Limited, Niagara Falls, Ont., and its employees, members of Local 175, United Gas, Coke and Chemical Workers of America (L.G., July, 1943, p. 920).

On June 29 an application for the establishment of a Board of Conciliation and Investigation was received from the employees of the Dominion Textile Company (General Machine Shop and Merchants Branches), Montreal, P.Q., members of Local 102, United Textile Workers of America (L.G., July, 1943, p. 921). On July 9, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

Other Reports of Industrial Disputes Inquiry Commissioners

In a dispute between the Universal Fur Dressers and Dyers, Limited, Toronto, Ont., and its employees, members of the International Fur and Leather Workers' Union of the United States and Canada (L.G., June, 1943, p. 763), a report was received from Mr. J. Douglas McNish, K.C., Toronto, Ont., who had been appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute, recommending that the matter be held in abeyance as the International Fur and Leather Workers' Union had applied to the Ontario Labour Court for certification as the bargaining agency of the employees concerned.

A report was received from Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute between the Anglo-Canadian Leather Company, Huntsville, Ont., and its employees, members of the International Fur and Leather Workers' Union of the United States and Canada (L.G., July, 1943, p. 923). The Commissioner recommended against the establishment of a Board of Conciliation and Investigation as the applicant union failed to obtain a majority of the ballots cast in a representation vote of the employees of the company. The interested parties were therefore advised that a board would not be established.

Settlements

On July 28, the Department was advised that an agreement had been signed between Metallic Roofing Company, Limited, Toronto, Ont., and its employees, members of Local 252, United Automobile Workers of America (L.G., April, 1943, p. 472). Following the receipt of the application for a Board of Conciliation and Investigation in this case, Mr. Harold Perkins, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., who had been appointed an Industrial Disputes Inquiry Commissioner, reported that he had been successful in having the parties to the dispute agree to the taking of a representation vote of the employees. The vote resulted in a substantial majority in favour of the applicant union, and in view of the agreement reached between the parties to the dispute, the application for the establishment of a board was withdrawn. The agreement between the company and the union is summarized in the article "Recent Collective Agreements" appearing elsewhere in this issue.

The Department was also advised during the month of July, that an agreement had been signed between the James Pender Company, Limited, Saint John, N.B., and its employees, members of Local 2957, United Steelworkers of America (L.G., May, 1943, p. 596). Mr. H. R. Pettigrove, Industrial Relations Officer, Dominion Department of Labour, Fredericton, N.B., who had been authorized as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute, following the receipt of the application, reported that as a result of negotiations an agreement between the company and the union had been signed. In view of the agreement reached the application for the establishment of a board was withdrawn. A summary of the agreement appears in the article "Recent Collective Agreements" appearing elsewhere in this issue.

Applications Withdrawn

On July 19, at the request of the applicant union, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Welland Chemical Works, Niagara Falls, Ont., and its employees, members of Local 165, United Gas, Coke and Chemical Workers of America (L.G., May, 1943, p. 598) was withdrawn. The union representative informed the Industrial Disputes Inquiry Commissioner who was authorized to investigate the dispute, that further conciliation by the Department of Labour was unnecessary as negotiations had commenced between the company and the union with a view to the signing of a collective agreement.

The Department was notified on July 22 that the application for the establishment of a Board of Conciliation and Investigation to deal with the dispute between the John Palmer Company, Limited, and Palmer McLellan Shoepack Company, Limited, Fredericton, N.B., and their respective employees, members of Local 23, Shoe and Leather Workers' Organizing Committee (C.C.L.) (L.G., May, 1943, p. 595) had been formally withdrawn.

The application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Canadian Automotive Trim, Limited, Windsor, Ont., and its employees, members of Local 195, United Automobile Workers of America (L.G., July, 1943, p. 920) was withdrawn, the union having applied to the Ontario Labour Court for certification as the bargaining agency of the employees of the company.

On July 5, the secretary of the union requested that the application for the estab-

lishment of a Board of Conciliation and Investigation to deal with the dispute between Maranda and Labrecque, Limited, Quebec, P.Q., and its employees, members of Local 170, International Union of Dyers and Finishers (L.G., July, 1943, p. 920), be withdrawn. As the company had neither war contracts or sub-war contracts, the dispute came within the purview of the Quebec Provincial Government.

Strike Vote

On April 24, the Department received the report of the Board of Conciliation and Investigation established to deal with a

dispute between the Levis Ferry, Limited, Quebec, P.Q., and its employees, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers. A minority report was also submitted. (L.G., May, 1943, p. 604.) The union having rejected the report of the Board, requested that a strike vote be taken under the provisions of Order in Council P.C. 7307. This strike vote was conducted on July 23, under the supervision of Mr. Frank LaFortune, Industrial Relations Officer, Dominion Department of Labour, Ottawa, Ont., and resulted in 46 voting in favour of going on strike and 53 against, with 3 spoiled ballots.

Report of Board in Dispute between the Ford Motor Company of Canada, Limited, Windsor, Ont., and its Employees

On July 1, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Ford Motor Company of Canada, Limited, Windsor, Ontario, and its employees, members of Local 240, United Automobile Workers of America, and employees, members of Formocan Employees' Association (LABOUR GAZETTE, July, 1943, p. 922).

The personnel of the Board was as follows: Honourable Mr. Justice John Keiller MacKay, Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Dr. H. A. Logan, University of Toronto, Toronto, Ont., appointed by the Minister of Labour in accordance with arrangements made with both of the applicant organizations; and Mr. W. H. Furlong, K.C., Windsor, Ont., appointed on the nomination of the employer.

The report of the Board follows:—

Report of Board

In the matter of a Dispute between Ford Motor Company of Canada, Limited (Employer), and Employees, members of Local 240, United Automobile Workers of America, and Employees, members of Formocan Employees' Association (Employees).

1. The Board sat in Windsor on the 23rd, 24th, 25th and 26th June, 1943, in the presence of representatives of Formocan, Local 240 U.A.W.-C.I.O. and the Company, and visited the Company's Windsor plants.

2. Representation before the Board.

For the Company—Mr. D. B. Greig, Treasurer and a Director; Mr. W. H.

Clark, Personnel Manager; Mr. Robert Allen, Assistant Personnel Manager (office).

For Local 240—Mr. George Burt, Regional Director; Mr. Thomas McLean, Assistant Regional Director; The President, Mr. Cassey, and members of the Committee of Local 240, namely, J. D. Leach, F. A. Berry, W. Cornell, M. H. Featherstone, J. A. Morrell and Mr. Howe.

For Formocan Employees' Association—The President, J. K. McKay, the Secretary, R. G. Mott; and Committee members, T. A. Williams and Harold Baker.

3. Mr. Burt, under Section 42 of the Act, took objection to Mr. Aylesworth's appearing as counsel for the Company and to Mr. Springsteen appearing as counsel for Formocan Employees' Association and the Board sustained this objection.

4. All parties covered the various matters in dispute exhaustively, both by the filing of written briefs and by oral representations.

5. The two contending organizations each claim to represent a majority of the office or clerical workers of the Company and each seeks recognition from the Company as the bargaining agent representing such employees.

6. The real questions to be determined are:—

- (1) Should there be a unit or subdivision to be composed of strictly office employees of the Company, treated or set aside as appropriate for bargaining collectively as distinct and separate from all other employees of the Company.
- (2) What employees of the Company should be included in said unit.

- (3) Which, if either of the contending organizations, represents a majority of the employees in such bargaining unit and is, therefore, entitled to be bargaining agent.
- (4) What is the proper method of ascertaining said bargaining agent, and
- (5) If a secret ballot is to be taken to ascertain said bargaining agent, who are entitled to vote on the taking of said ballot.

7. While the parties are not in complete agreement as to the classifications in the main office itself which should be included in an office bargaining unit, the ascertainment of the bargaining unit, so far as such office is concerned, presents no difficulty to the Board.

8. However, there is a vast difference between the parties with regard to the inclusion or exclusion from any such office bargaining unit of certain classifications of employees employed and physically located in one or other of the Company's factories. Two members feel that no such classification should be included in any said office bargaining unit for the following reasons, namely:—

There already exists an agreement in writing between Local 200 U.A.W.-C.I.O. and the Company pertaining to factory employees, which agreement, by Clause 1, excludes factory workers doing purely clerical work, but which agreement, by amendment agreed upon between the said Local 200 and the Company, as of the 31st of January, 1942, contains a note which reads as follows:—

NOTE

"The term 'factory workers doing purely clerical work' will be interpreted as not excluding from the provisions of the agreement hourly rated employees, who, although engaged on purely clerical work, were immediately prior to performing such clerical work, or since engaged on clerical work, from time to time liable to be called upon or called upon to do work in the plant other than purely clerical work."

The said agreement is in full force and effect until the 31st of December, 1943. By Section 23 of the said agreement there is a method for either party to cancel or amend the same.

Said two members of this Board are of the opinion that the said agreement applies to clerks in the factory (Dr. Logan dissenting to the extent indicated by his supplementary report), but all members of the Board agree that the parties, namely Local 200 and the Company, have proceeded and are still proceeding in a manner which indicates that they themselves are of the opinion that said agreement applies to all clerical workers in the factory. In the present circumstances we believe they should be encouraged to continue this attitude which only can be conducive to collective bargaining in good faith.

Other facts brought to our attention with regard to clerical workers located in the factory, which appeal in particular to said two members of the Board, are as follows:—

Those in the factory are paid by the hour and receive time and a half for overtime. Office employees do not. The regular work of the factory clerk is forty hours. The regular work of office employees is forty-four hours, or as many additional hours as their work will require, with no consideration for overtime. Office employees get vacations with pay. Factory clerks do not. In case of illness or justifiable absence, office employees get paid, where factory clerks do not. If office employees are justifiably late no pay deduction is made, while factory clerks are paid only for the time actually employed on the job. Factory clerks have regular rest periods morning and afternoon, during which time they are paid. Office employees do not. In case of strikes in the plant, of which there have been two since the agreement with Local 200 became effective, factory clerks do not get paid. Office employees do.

It seems to the Board that the inclusion or exclusion of factory classifications, whether they are of a clerical nature or not, is one for determination solely in connection with the factory collective bargaining agreement during its life, and is a matter of contract and one for negotiation pursuant to the contract between the Company and Local 200, which contract this Board cannot treat lightly.

The existing collective agreement between the Company and Local 200, pertaining to factory employees, came up for re-negotiation in December, 1942, and there has been filed with this Board a copy of the Union's own proposals to the Company in those re-negotiations for amendment to the agreement. Two members of the Board are of the opinion that among those proposals then made by the Union was the nullification of the exception or exclusion therefrom of factory workers doing purely clerical work. The Company, apparently as a result of these negotiations, agreed to the aforesaid amendment whereby at least a majority of these factory clerical workers were made subject to the provisions of the factory collective agreement.

It would appear that nearly all of the factory workers doing purely clerical work are now on the factory seniority list, posted in accordance with the terms of said collective bargaining agreement, and placed on such list with the approval of the stewards and committeemen of Local 200.

There seems to be no good reason why Local 200 and the Company should not be given a reasonable opportunity to continue

their negotiation under the terms of the said agreement, and, by amendment or otherwise, in good faith bring about the addition of the remainder of the classifications on the seniority lists from time to time, with the exception of confidential clerks to factory supervision and other legitimate exceptions.

After taking all these matters into consideration two members of the Board are of the opinion that all hourly-paid factory workers, whether doing clerical work or other work, should be excluded from the office bargaining unit, and that nothing should be done by this Board with regard to any hourly-paid factory workers to detract from the advantage which he or she may obtain by reason of the provisions of the said agreement with Local 200, or which would in any way limit the negotiations which can be carried on in good faith from time to time between the Company and the committee of said Local 200 with regard to any or all said hourly-paid factory workers.

We now come to the difference between the parties as to the inclusion or exclusion of certain classifications in the main office administration building itself, which, we understood, are all salaried employees.

The Board unanimously concludes that in all office departments in the main administration building, all supervision therein (that is employees of the rank of Assistant Supervisors and above that rank) should be excluded from the office bargaining unit for voting purposes. The Board, however, sees no reason for the exclusion of employees of the Audit Department below the rank of Assistant Supervisor, nor does the Board see any reason for the exclusion in the office bargaining unit of either Engineers or Draftsmen in the Automotive Engineering Department or in the Engineering Department. However, the Board does see some justifiable reason for excluding from the office bargaining unit office employees formerly branch executives of the Company.

The Board now turns to the consideration of the third and fourth questions to be determined, which (if either) of the contending organizations represent the majority of employees in such bargaining unit, and how can the same be ascertained. The Board agrees with all parties before it that this question should be determined by the taking of a properly supervised vote by secret ballot of the employees in the said office bargaining unit.

The Board accordingly reports as above, and recommends:—

1. That there be an office bargaining unit appropriate for collective bargaining purposes, to consist of the employees in the main

administration office or offices set forth in Schedule 1 hereto attached.

2. That those entitled to vote with respect to the rival claims of the two organizations represented before the Board be determined in accordance with the provisions of Schedule 1 hereto.

3. That the Department of Labour arrange for and supervise the taking of a vote of such employees by secret ballot to ascertain the organization entitled to be the bargaining agent.

4. That, subject to certification under the Collective Bargaining Act, 1943, of the Province of Ontario (if required by the Company) of the said bargaining agent so ascertained, the Company recognize such bargaining agent and negotiate with it with a view to the conclusion of a collective bargaining agreement.

5. That the objection of Mr. J. E. Aylesworth, K.C., on behalf of the Company, which may be briefly stated as follows: *the Board was appointed after the enactment and coming into force of the Collective Bargaining Act, 1943, Ontario, and was appointed over the protest of the Company. Proper reservation was made by the Company of all of its rights to protect the hearing of these matters and recommendation by the Board, be carefully considered by the Minister of Labour.*

Dated this twenty-sixth day of June, 1943.

(Sgd.) J. K. Mackay,
Chairman.

(Sgd.) W. H. Furlong.

(Sgd.) H. A. Logan.

SCHEDULE 1

*Board of Conciliation and Investigation Ford Motor Company of Canada Limited—
Formocan Employees' Association—Local
240 U.A.W.-C.I.O.*

Employees entitled to vote

Subject to the exceptions hereinafter named, all office and salaried employees employed in the following departments shall be entitled to vote:—

Secretary's Office

Printing Division.

Mailing Division.

Communications Division.

Stock Transfer Division.

Accounting Department

Accounting and General Ledger Division.

Cashier Division.

Cost Division.

Customs Division.

Disbursements Division.

Pay-roll Division.

Traffic Division.

Audit Department.
 Automotive Engineering Department.
 Correspondence Department.
 Engineering Department.
 Export Sales Department.
 Laboratory.
 Purchasing Department.
 Sales Department.
 Service Department.
 Inspection Department.
 Production Department.
 Restaurant Employees.

Exceptions

The following employees—in whatever of the above departments they may be employed—are not entitled to vote:—

- I. Assistant supervisors and all other supervisory employees above that rank.
- II. The senior telephone operator.
- III. The senior telegraph operator.
- IV. Confidential clerks to office supervision.
- V. Matrons.
- VI. Overseas employees.
- VII. Employees who formerly were branch executives.
- VIII. Chemists, metallurgists and laboratory workers employed in the foundry laboratory.

Supplementary Report

Concerning factory workers doing purely clerical work I disagree with the majority members of the Board that these people are ineligible for the proposed vote through being bound under the standing contract between U.A.W. Local 200 and the Company by virtue of any wording in that instrument itself. I find them on this score free, with the exception of certain marginal cases named in the interpretatory note. Whether their acceptance of seniority privileges as accorded by

the Company along with others in the plant is of itself to be regarded as binding them as party to the contract I am not competent to say, but I entertain serious doubts.

Concerning the *later* disposal of these clerical workers in the plant (assuming the position of the majority in the above matter is to prevail) and of chemical, metallurgical and laboratory workers in the foundry—whether they should be associated for collective bargaining purposes with the administration building office workers or with plant production workers.—I do not feel that the Board in its present state of knowledge should offer any opinion or recommendation to prejudice the decision of that matter. This should be determined primarily by the wishes of the majority of these workers themselves and secondarily by considerations of smoothness and efficiency of administration of the collective agreement resulting and of least possible disruption to plant operation through such administration. This would suggest taking a separate vote of these people by themselves, if they so desire, at some further date when they shall have become free from the expectations of the present agreement between Local 200 and the Company. Such vote should be taken only after adequate discussion and appreciation of all the advantages and difficulties associated with either choice that may be made. If on the other hand their recent attitudes change and they become reconciled to their present developing associations with plant manual workers and to dealing with the Company through the medium of the social machinery of Local 200 the difficulty will happily resolve itself and the principle of delay will have proven its worth. The problem I consider an important one because of its wide application in many industries.

(Sgd.) H. A. Logan.

Report of Board in Dispute between The B. Greening Wire Company, Limited, Hamilton, Ont., and its Employees

On July 2, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the B. Greening Wire Company, Limited, Hamilton, Ont., and its employees, members of Local 2950, United Steelworkers of America (LABOUR GAZETTE, June, 1943, p. 764). The personnel of the Board was as follows: Dr. Alexander Brady, Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommenda-

tion from the other two members: Messrs. Henry S. Robinson, K.C., and John J. Sullivan, both of Hamilton, Ont., appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the Chairman and Mr. Sullivan. Mr. Robinson submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

June 24, 1943

Re: Industrial Disputes Investigation Act and re dispute between the B. Greening Wire Company, Limited, Hamilton, Ontario, and the employees, members of Local 2950, United Steelworkers of America.

To the Hon. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

SIR:—

This dispute concerns the issue of recognizing a union as the sole bargaining agent for the employees in the factory of the B. Greening Wire Company. The dispute had its origin in February of this year when discontent expressed itself in the rope shop of the plant over a reduction in the rest period, resulting in a walk-out of some employees. After this even a committee of fifteen employees from the various departments of the plant not representatives of the management, and, on the recommendation of Mr. George Fenwick, Conciliation Officer of the Ontario Department of Labour, agreed to canvass the employees as to whether they preferred a shop committee or a genuine trade union as their bargaining agent. A week later the Committee reported to the management that a majority of the employees wished to be represented by the United Steelworkers of America. Organization of the local union number 2950, Steelworkers of America, duly took place, and efforts were made to have the B. Greening Wire Company negotiate a collective agreement. The management of the company, however, took the position that it would not negotiate with an outside union, but would meet a grievance committee of employees within the shop. At a general meeting (110 voted) the union executive was authorized to apply for a Board of Conciliation and Investigation, and such application it made on March 22.

The present Board, duly appointed as a consequence of the application of the union, held several meetings, including a public session, when it obtained evidence from both parties, and private meetings with each party in turn, when it attempted to effect conciliation. It carefully checked the union membership cards with the payroll of the company, and found that the claim of the union that it had a majority among the employees was

substantiated. The Board also received evidence from the Workers' Independent Union, which came into existence after the events in February and represents only employees in the plant. Its witness placed its membership at 150, which is approximately half that of local 2950, United Steelworkers of America. The Board did not check the membership cards of the Workers' Independent Union.

RECOMMENDATION

The majority of the Board recommends that the B. Greening Wire Company recognize local 2950, United Steelworkers of America, and negotiate with it to achieve a collective agreement. It is common experience that the interests of industrial peace in the plant are likely to be served best by recognizing the union which a majority of employees in the plant choose, and on the evidence examined local 2950 is that union. The general manager of the company expressed to the Board his objection to recognizing any union as the sole bargaining agent for the employees because it really would not represent all the employees, and the minority would be unprotected. But in such an industrial plant as that of the B. Greening Wire Company there is little alternative to that of recognizing the majority union as the sole bargaining agent because if it is not the sole bargaining agent there may result two or more such agents, with the consequence that there will be much industrial friction, injurious to both employer and employees. More than one union in a plant where there are no old and already organized crafts must ordinarily lead to confusion and contention, and the employer, like the employees, will be ill served.

The general manager also objects to negotiating with union officials other than employees of the company. But if he accepted the principle of negotiating with the union in order to obtain a collective agreement, it would not be difficult, if necessary, to arrive at a formula concerning the methods of negotiation and the individuals who should participate. The cardinal issue is that of recognizing or not recognizing a union, and a union is not adequately recognized unless it is permitted to negotiate a collective agreement affecting the employees in the plant.

All of which is respectfully submitted.

(Sgd.) ALEXANDER BRADY,
Chairman,
(Sgd.) JOHN J. SULLIVAN,
Member.

Minority Report

In the matter of the Industrial Disputes Investigation Act and of a dispute between the B. Greening Wire Company, Limited (Employer), and its employees, members of Local 2950, United Steelworkers of America (Employees).

To the Honourable the Minister of Labour,
Ottawa, Ontario:

The Board of Conciliation and Investigation in the above matter composed of Dr. Alexander Brady, nominated by the Honourable the Minister of Labour, Mr. John J. Sullivan, nominated by the employees and the undersigned, Henry S. Robinson, K.C., has terminated its investigation, concluded its sittings and submitted a majority report with which, on the evidence submitted, the undersigned finds it impossible to concur.

Written briefs were submitted to the Board by Local Union 2950 United Steelworkers of America and by The B. Greening Wire Company, Limited. In addition thereto, the Workers' Independent Union comprised of employees of the said Company, requested permission to submit a brief and were permitted to do so. All parties who wished to give evidence under oath were requested to do so and, in addition, the Board examined under oath the representatives of the three organizations filing briefs.

The Board also spent considerable time in examining membership cards of Local Union 2950 and comparing them with the Company's index of employees. A short examination was made of the ledger cards of the said Union, which purported to show the payment of membership dues by members of the Union. It was stated, however, by representatives of the said Union that the cards had not been posted to date. It appeared also that in almost all cases the initiation fee of the Union, which included the membership fee for the first month of membership, had been paid in the month of March, 1943 and that the constitution of the said Union provides that a member shall not be suspended for non-payment of fees until he is three months in arrears. Accordingly, any person who paid one dollar initiation fee in the month of March is, under the constitution, a member in good standing notwithstanding non-payment of monthly payments falling due in subsequent months. As a result, this phase of the investigation was unsatisfactory and inconclusive.

The Board considered its primary function to be conciliation and with that end in view after the taking of evidence, interviewed sep-

arately and apart from each other the representatives of Local Union 2950 and the representatives of the Company. The results were unsatisfactory as will subsequently appear hereunder.

Upon the evidence contained in the briefs submitted by the B. Greening Wire Company, Limited, Local Union 2950 Steelworkers of America and the Workers' Independent Union and upon the evidence of witnesses and upon the documentary evidence submitted, I find the following to be the situation:

1. The principle of collective bargaining is entirely acceptable to all parties concerned and is not in issue. The present issue is confined to the appointment of a sole collective bargaining agency.

2. There are in The B. Greening Company's plant twenty-four departments in which, at the present time, 542 employees both male and female are employed.

3. The members of Local Union 2950 at present employed in the B. Greening plant number 300 of which it would appear a large number are at present in arrears in payment of their dues but for the reasons explained above are not disqualified from membership in the Union.

4. The members of the Workers' Independent Union at present employed in the said plant number approximately 150. There was no evidence submitted that this Union has any support, either active or otherwise from the Company. This Union was not requested to produce its records and did not do so.

5. In addition to the members of the said unions there is an unascertainable number of employees of the Company who do not belong to either Union and who were not represented at the sittings of the Board.

6. The Company has never had any serious labour trouble until February, 1943, when the length of rest periods during hours of employment was reduced. According to the Company, this had to be done to prevent interruption to work schedules as a considerable number of employees were prolonging the existing fifteen-minute rest period and causing disorganization. This difficulty was adjusted and, apparently, no further serious difficulty with employees occurred until March 21, 1943, when, according to the application filed by the Union, a meeting of employees was held at which 97 per cent of those attending the meeting are said to have voted for a strike if the Company refused to enter into negotiations with a view to an agreement with Local Union 2950 as sole bargaining agent for all the employees of the Company. According to the

sworn testimony of members of the Union there were 110 employees at this meeting. No documentary evidence was produced in support of the above figures and, in any event, it will be noted that only about one-fifth of the employees of the Company were interested in the strike vote.

7. Although the application for a Board of Conciliation and Investigation was made by Local Union 2950 the real applicant for sole bargaining rights would, upon the evidence, appear to be The United Steelworkers of America. The application for a sole bargaining agreement is made on the ground that the members of Local 2950 represent the largest organized body of employees within the plant.

8. The Workers' Independent Union are bitterly opposed to the United Steelworkers of America and to Local Union 2950 as appears by their brief filed with the reports of the Board. They oppose the granting of sole bargaining rights to the United Steelworkers of America or the local union thereof on the grounds (amongst others) that Local Union 2950 represents an outside agency which intends to dominate all workers and that the Union management are trouble makers and promote dissension. The Workers' Independent Union maintain that it is the right of every worker to choose his own bargaining agency, that such right should not be interfered with or terminated and that each union in the plant should be given bargaining rights only as regards its own members.

9. The Company takes the ground that in view of the strong opposition and the distrust borne by a large body of its workers toward Local Union 2950 and its parent union the granting of sole bargaining rights to that Union would promote internal dissension and disorganization in the plant and give very serious offence to a large body of workmen with the probability of very grave results to the Company's output. The Company takes the further ground that no union or group should be given sole bargaining rights but that each union should be given bargaining rights on behalf of its own members (provided that the persons doing the actual bargaining are employees of the Company) and that employees who choose not to join either union should similarly have the right of collective bargaining either as individuals or groups. On the above grounds the Company has declined to enter into any sole bargaining agreement with any union or any group of workers.

My colleagues on the Board propose to recommend that Local 2950 should be the sole

bargaining agent for all employees of the Company. I am unable to follow or subscribe to my colleagues' reasons for this recommendation. Their recommendation would, however, appear to be based mainly on a theory that custom and democratic practice demand that the will of the majority should govern and on the fact that Local Union 2950 is the largest organized body of employees within the plant.

It is, of course, quite true that one of the several methods adopted by democracy for settling disputes or issues is by a majority vote but I would point out that where a majority vote is used for such purposes, as in the case of parliamentary elections and as in the case of duly constituted societies and other organizations, there are strong constitutional safeguards to protect the rights of minorities. Such safeguards are entirely lacking in the present instance. In my view, the granting of sole bargaining rights to the applicant union or any other organized body of workers within this plant would, in the result, be equivalent to compelling the non-members of such union or other organized body to grant an irrevocable, compulsory power of attorney to an organization to which none of them wish to belong and which many of them, according to the evidence in the present case, bitterly oppose and distrust. Under the above circumstances to compel a large number of workers to employ the applicant organization as their sole bargaining agency would be to ignore the principles of democracy and common justice. My view is, perhaps, better explained by a purely theoretical example. For instance, if a majority vote were taken for the purpose of deciding whether persons of certain religious beliefs should be denied all civil rights and fifty-one per cent of the people voted in favour of the proposal, there is no doubt that such a vote would be in accordance with one of the incidents of democracy, namely, the will of the majority, but it would ignore completely another very vital incident of democracy, namely the protection of the rights of the minority. Moreover, in my view, public policy should not and does not permit the majority of members of a class to impose their will without consent or agreement on an opposing or hostile minority where only private rights are involved and no public rights are affected.

I would, therefore, report that in my view the proposal that the United Steelworkers of America or Local Union 2950 be granted sole bargaining rights on behalf of all employees of The B. Greening Wire Company is neither democratic nor just and is contrary to public policy and that such proposal should be rejected.

I would further respectfully point out that notwithstanding that the main purpose of the Industrial Disputes Investigation Act is conciliation, experience of similar situations in the past has demonstrated that the action recommended by the majority vote of this Board would tend to perpetuate two militant groups of employees in violent opposition to one another with a neutral group of non-members who would ultimately be compelled to join one side or the other, resulting in disunity, violent group struggles and disturbed and diminished production.

MINORITY RECOMMENDATION

I would respectfully recommend as follows:

1. That the right of Local 2950 United Steelworkers of America to be the bargaining agent for such employees of The B. Greening Wire Company, Limited, as are members of such Union, be established and declared.

2. That the right of the Workers' Independent Union to be the bargaining agent for such employees of The B. Greening Wire Company, Limited, as are members of such Union, be established and declared.

3. That the right of employees of the Company who are not members of either Union to bargain with the Company, either individually or in groups by their elected representatives, be established and declared.

4. That in default of the above recommendations being acceptable to the applicant Union, or to any other group of employees, that such group be recommended to pursue the remedies created by The Collective Bargaining Act (1943) 7 Geo. VI (Ontario), chap. 4 which provides a procedure for dealing with the present situation.

Respectfully submitted,

(Sgd.) H. S. ROBINSON,
Member.

Dated at Hamilton this 29th day of June, 1943.

Report of Board in Dispute between Sawyer-Massey, Limited, Hamilton, Ont., and its Employees

On July 8, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between Sawyer-Massey, Limited, Hamilton, Ont., and its employees, members of Local 520, United Electrical, Radio and Machine Workers of America, (LABOUR GAZETTE, July, 1943, p. 922).

The personnel of the Board was as follows: His Honour Judge Ian M. Macdonell, Toronto, Ont., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. Gordon R. Munnoch, K.C., Toronto, Ont., and Dr. Christian Sivertz, London, Ontario., appointed on the nomination of the employer and employees respectively.

The report of the Board follows:—

Report of Board

To the Honourable Humphrey Mitchell, M.P.,
Minister of Labour,
Ottawa, Ont.

Re: Industrial Disputes Investigation Act and a dispute between Sawyer-Massey Limited, Hamilton, Ont., and its employees, members of Local 520, United Electrical, Radio and Machine Workers of America.

Sir,—The Board of Conciliation and Investigation appointed by you to deal with the

above dispute has now the honour to submit its report.

During the proceedings before the Board it was clearly evident that mutual respect and confidence have existed, and still exist, between the employer and its employees. Negotiations had taken place between them during which commendable restraint has been shown on both sides. In fact, the cause of the breakdown of those negotiations is not entirely clear. However, the Board does not think it useful or necessary to render a decision on this point as the Board is confident, in consequence of what occurred at the hearing, that if it renders its decision on a few salient points the parties should have no difficulty in reaching an amicable arrangement.

A vote was taken on the Company's premises on December 4th, 1942, on the following question:

"Do you want to bargain collectively with your employer through a Hamilton Local Union of the U.E. (C.I.O.-C.C.L.)?"

Out of a total of 389 ballots cast, 250 voted YES, 131 voted NO, and 8 ballots were spoiled. Thus the local union was given a substantial majority. Following this vote, the union presented to the employer a draft collective bargaining agreement and subsequently the employer submitted an alternate draft agreement to the local union.

The basic difference between the employer and those representing the local union was the extent of the authority to be granted to the collective bargaining agency, and the Board is of the opinion that if it deals with this matter and certain other related features of the proposed agreement the parties should have no difficulty in agreeing upon the terms of a collective bargaining agreement between them. The employer stated its willingness to execute a collective bargaining agreement if these differences in viewpoint could be reconciled. To this end, the Board will deal with certain salient features of the proposed collective bargaining agreement.

The provision with regard to recognition of the local union was contained in paragraph 14 of the local union's draft agreement and in Part VII of the employer's draft agreement. After careful consideration, the Board rejects both of these provisions and unanimously recommends that the following provision as to "Bargaining Rights" should be accepted by the parties:

BARGAINING RIGHTS

"The Company agrees to recognize the Local Union as the bargaining agency on behalf of its members and on behalf of any other employees who choose to be represented by the Local Union in respect of the matters contained in this agreement and with respect to wage rates and working conditions."

The Board is of the opinion that it is not in the best interests of an employer or any collective bargaining agency that the period during which any collective bargaining agreement should remain in force should depend upon any proportionate representation of the employees by the local union and that it is preferable that collective bargaining agreements be entered into for a specific period of time. The Board, therefore, unanimously recommends that the proposal contained in the Local Union's draft agreement in this regard should be adopted in principle and that the term of the collective bargaining agreement should be for a period of not less than one year.

The only important objection of the employer to the provisions contained in paragraph 7 of the local union's draft agreement dealing with grievance machinery and procedure was that the employer desired to preserve the right of an employee, who wished to do so, to take up any grievance with a foreman or with the management in lieu of the local union steward. The Board is unanimously of the opinion that a provision to this effect should be included in the collective bargaining agreement.

The draft agreement submitted by the local union contained a provision in paragraph 6 thereof relating to Seniority, as follows:

"The Company agrees to give preference to Employees in promotion to positions of foremen, superintendents and executive places."

It is obvious that a strict literal interpretation of this clause might deprive the Company of control of its business and it seemed to the Board, when the matter was discussed before it, that it was not the intention of those representing the local union to seek to interfere unreasonably with the functions of management. The Board unanimously recommends that the following provision be inserted in the collective bargaining agreement in lieu of the provision quoted above:

"The Company declares that, during the currency of this agreement, its policy shall be to give preference to its Employees, whenever it is practicable to do so, in appointing foremen and superintendents and in filling other executive positions of a like nature, having regard, however, to the requirements of the position to be filled and to the ability, experience and technical knowledge necessary in the interests of efficiency."

Certain other matters were brought to the attention of the Board by the employer which had apparently been mentioned during the negotiations between the employer and the representatives of the local union and which may well have contributed to the breakdown of the negotiations. The Board is unanimously of the opinion that misunderstandings arose in this connection. These matters were not, however, included in the draft agreement submitted by the local union and were not pressed before the Board by the representatives of the local union. Accordingly, it is not necessary to deal with them.

In formulating a collective bargaining agreement, the Board strongly recommends to the parties, and particularly to the employer, that unnecessary recitals of circumstances and intentions should be excluded and that the agreement should be strictly limited to operative provisions.

If the foregoing recommendations of the Board are adopted by the parties together with the principles involved in these recommendations, other provisions contained in the respective draft agreements should, of course, be brought into conformity. If the parties concerned resume negotiations in the spirit of mutual confidence evidenced at the hearing before the Board, it is hoped that they will now be able to settle a collective bargaining agreement to their mutual satisfaction. If, for any reason now unforeseen, this should not be accomplished, the Board will be glad to reconvene and deal with any further difficulties if requested to do so by the Honourable the Minister of Labour.

The Board is grateful for the co-operation of both parties, which enabled the proceedings to be expedited, and desires to commend particularly the spirit and the temperate manner in which both parties approached their difficulties.

All of which is respectfully submitted.

Dated at Toronto this 5th day of July, 1943.

(Sgd.) I. M. MACDONELL,
Chairman.
(Sgd.) CHRISTIAN SIVERTZ,
Employees' Nominee.
(Sgd.) GORDON R. MUNNOCH,
Company's Nominee.

Report of Board in Dispute between The Canada Packers, Limited, St. Boniface, Man., and its Employees

On July 12, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between Canada Packers, Limited, St. Boniface, Manitoba, and its employees, members of Local 216, United Packinghouse Workers of America (LABOUR GAZETTE, May, 1943, p. 596).

The personnel of the Board was as follows: Professor William Loughheed, chairman, appointed on the joint recommendation of the other two members; Messrs. E. K. Williams, K.C., appointed on the nomination of the employer, and George Brown, appointed on the nomination of the employees. All three members of the Board reside in Winnipeg, Manitoba.

The report of the Board follows:—

Report of Board

The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between Canada Packers, Limited, St. Boniface, Manitoba, and its employees, members of Local 216, United Packinghouse Workers of America.

SIR,—Your Board of Conciliation and Investigation composed of Mr. E. K. Williams, K.C., nominated by the employer, Mr. G. A. Brown, nominated by the employees, and Mr. W. F. Loughheed, Chairman, appointed on the joint recommendation of the above members, has adjourned its sittings and has the honour respectfully to submit the following report.

The dispute referred to the board and indicated in the application for the establishment of a board filed with you March 16, 1943, and revised March 30, is as follows:—

"The employees have requested that their Union be recognized and adequate machinery set up to dispose of their grievances. The Employer has refused to recognize the said Union and states that it will settle grievances through its Plant Relations Committee only."

Efforts made to adjust the dispute are outlined in the application:—

"A letter was addressed to Mr. Harris, General Manager, under the date of March 3 requesting an audience for the purpose of negotiating an agreement of wages, hours, and other working conditions. Mr. Harris was out of the City and we received a letter from Mr. Sinclair stating that nothing could be done on this matter until the return of Mr. Harris. The Company refused to adjust any grievances concerning Union Members except through the Plant Relations Committee. (An organization set up by the Company.) On March 29 a stoppage of work occurred at the Plant on account of a Union Member was told to take two weeks off without pay as a disciplinary matter. A sympathy walk-out then occurred. This employee was also a member of the Plant Relations Committee which acted as an Arbitration Board. Representative Borsk of the P.W.O.C. endeavoured to contact the management in order that the employees should go back to work immediately but was unable to accomplish this."

An outline of efforts made by the parties to adjust the dispute is included in the amended application as follows:—

"It was then necessary to call in the Dominion Department of Labour Officers, Mr. Johnston and Mr. Hooper, who arranged a meeting between the Plant Relations and the Company and a recommendation was made that the employees report to work at 7 a.m., March 30, and that the case of the employee would be reviewed at 9 a.m."

"At a special meeting held in Winnipeg Local Union 216 agreed on the recommendations of Representative Borsk and the Executive Officers to start to work at 7 a.m. under certain conditions.

"First: the employee be reinstated to his former position without loss of time and the Foreman reprimanded.

"Second: that all employees be compensated for loss of time.

"Third: the Company establish adequate arbitration board to dispose of grievances affecting Union members (not Plant Relations Committee).

"Fourth: that the Company immediately start negotiations in regard to a vote for Union recognition.

"The negotiations were broken off by Union members of the Plant Relations Committee as they felt that the Company was intimidating a grieved employee who the stoppage of work occurred over, therefore discontent and friction are still prevalent in the Plant and

the Union feels that any stoppage of work now rests with the full responsibility of the Management.

"March 30, Representative Borsk contacted by telephone Mr. Joseph Harris in regard to a conference re present grievances and Union recognition. Mr. Harris did not feel a conference was necessary and stated that Union recognition would have to be instructions from the Toronto Main Office, that he had no authority to deal with this subject.

"The report from the Toronto Office of the Packinghouse Workers Organizing Committee, who contacted the Canada Packers Management in Toronto, was that the St. Boniface Management had full authority to deal with Union recognition or any other question and did not want to interfere in this matter.

A copy of the application duly filed with the management of Canada Packers elicited the following reply:—

"In further reply to your letter of April 2, 1943, we would advise that, as several of the statements in the amended application of March 30, 1943, are inaccurate, it appears to us desirable that a Board be set up to ascertain the facts for the information of the Department of Labour. We desire, therefore, to join with the applicants in requesting the establishment of a Board."

Procedure

In the light of the information submitted both in the request by Local 216 for a board and in the letter of concurrence from Canada Packers it was decided by your board that both parties to the dispute be required to present written submissions outlining their respective positions, and upon presentation each party would be given an opportunity to submit rebuttal. Following this step the board then would decide upon its future course of action.

Sittings

Two meetings were held at which representatives, both of the employees and the company were present. Representing the employees were Mr. Adam Borsk, Field Representative, P.W.O.C., Mr. J. Shewchuck, President of Local 216, and Miss A. Clover, representative of the female employees. Representing the employers were Mr. J. Harris, Plant Manager, Mr. H. T. Sinclair, Office Manager, and Mr. D. Clement, Plant Superintendent. Mr. Adam Borsk presented the submission for the employees and Mr. J. Harris presented the submission for the employers.

Upon presentation of submissions, they were exchanged and both sides to the dispute were given to understand that rebuttals could be presented to the board at the following meeting. At the second meeting the following were present: employees' representatives—Mr. Adam Borsk, Mr. Shewchuck, Mr. Stapleton and Miss Clover; representatives of the company—Mr. Clement and Mr. Innes. Mr.

Borsk presented the rebuttal for the employees, following which Mr. Clement read the submission for Canada Packers.

Following the two general meetings six employees and ten representatives of the company were examined individually as indicated in the evidence accompanying this report.

FINDINGS OF THE BOARD

In the light of the evidence obtained (copy of which together with important Exhibits are hereto attached) the Board considered all matters raised in the submissions, and certain of these are not dealt with in our report as they were deemed irrelevant to the issues in dispute. In view of the issues as seen by the board it was considered advisable to outline a chronological statement of relevant facts down to date.

The General Picture

In 1942 the A.F. of L. and the P.W.O.C. made attempts to organize the employees of the packing plants in Winnipeg and St. Boniface. Mr. Park of the latter organization was in the district for about four months, and Mr. Dowling of the same organization for a short time. These efforts appear to have been unavailing.

The P.W.O.C. sent one Adam Borsk to Winnipeg in January of 1943 as field representative to see whether he could organize the packing plants, and Borsk states that when he began his work there was no (union) nucleus of packinghouse workers and he had to start from scratch.

Borsk began to organize at once upon his arrival, first getting in touch with certain employees of Canada Packers, St. Boniface plant, whose names had been given to him in Toronto by employees of Canada Packers working there but who had formerly worked in the St. Boniface plant.

Borsk held his first meeting with some of these men who eventually became officers of the Union on February 4, 1943. At the same time the first broadside sheet (Exhibit 3, sheet 1) was distributed at the gates of the plant. Exhibit 3 contains ten broadsides prepared and distributed by Borsk from time to time.

On the 10th of February Borsk held a second meeting and at that time 88 employees had signed application cards. The next meeting was held on the 17th of February when an additional 297 employees had signed cards. Another meeting was held on the 25th of February when a total of 562 employees had signed cards.

During the period under consideration Borsk was the only field representative of the P.W.O.C. attempting to organize the employees of the packing plants in the Winnipeg area.

On or about the 22nd or 23rd of February, Borsk arranged by telephone an appointment with Joseph Harris, plant manager of Canada Packers, St. Boniface plant, to discuss with Harris an alleged grievance of one Haegeman. Pursuant to this appointment Borsk went to the plant, interviewed Harris and had a discussion with him. Harris promised Borsk that Haegeman's case would be looked into and that Hill, one of the superintendents, would attend Borsk and give him a report. This Hill did on February 27, calling on Borsk at Borsk's office, on Marion street, near Canada Packers plant. The facts of Haegeman's case are set out in Appendix A. This was the only interview that Borsk ever had with Harris.

By broadside (Exhibit 3, sheet 5) Borsk called a meeting for the purpose of electing officers for a local union to be composed of employees of Canada Packers and applying for a charter. This meeting was held on March 3. Officers were elected and a charter applied for which was subsequently granted, creating Local Union 216, the charter bearing the date of March 6.

The men who were elected officers of the Union were the following:—

Jack Shewchuck... President.
 Jack Coutts..... Vice-President.
 Emily King..... Recording Secretary.
 George Stapleton... Financial Secretary.
 Hubert Bibeau.... Treasurer.
 Tony Ostapchuk... Corresponding Secretary.
 Michael Kitter... Guard.
 Michael Cornick... Guide.
 Fred Billows..... Guide.
 John Kulba..... Guide.

The minutes of the meeting of March 3 have not been made available to the board but Borsk states that at the same meeting a resolution was passed giving the executive officers of the union full authority to act in any emergency "to take a strike vote, strike action, or anything like that".

Borsk states that at the same meeting he was authorized to address the following letter to Harris:—

"I am directed by instructions from a meeting of your employees held to-night, to request that you arrange to meet a committee of your employees and a representative of the Union for the purpose of arriving at a mutual agreement *re* wages, hours, working conditions, etc.

"Trusting to receive your co-operation in this matter so that the closest and most amicable relations possible may continue between your company and its employees and looking forward to an early and favourable reply, I have, Sir, the honour to be"

This letter was dated the 3rd of March, and was mailed the same evening. In the same mail the application for a charter was mailed to the International Headquarters in Chicago.

The letter was received at Canada Packers Office on the 4th of March, and was answered by Sinclair, office manager, as follows:—

"Your letter of March 3 to Mr. Harris has just reached us this morning.

"However, as Mr. Harris left the city this morning for the Pacific Coast a definite reply will have to await his return.

"We expect him back in the office on the 29th."

Borsk received Sinclair's letter on March 5, and at once telephoned Sinclair arranging an appointment for March 6 when he went over to see Sinclair, and, according to Borsk's evidence, he "explained to Sinclair that the Union question, if Mr. Harris felt he would like to handle it personally, would naturally have to wait", but he asked what Sinclair was going to do in the meantime with cases of discrimination. At the meeting of March 6, Borsk also raised the question of an alleged complaint or grievance of one Ayres and discussed it with Sinclair and Clement, the plant superintendent. Ayres' case is dealt with in Appendix B.

On March 6, Sinclair stated that he would communicate with Head Office in Toronto "to see what Toronto would suggest" should be done in Harris' absence.

Borsk states that on March 6 he also suggested to Sinclair that during Harris' absence he would advise that the Union select a committee to work with the management and deal with any complaints that should come up and report them to the Company. Sinclair denies that there was any discussion or suggestion of this kind. The next communication between Borsk and the Company was on March 13 when he telephoned Sinclair. Sinclair in the meantime had communicated with Head Office and when Borsk called him he advised Borsk that Union questions would have to stand until Harris' return on the 29th and that grievances must be dealt with through the Plant Relations Committee only and not with the Union or with Borsk. Following this telephone conversation Borsk says that he was of the opinion that he could not "settle the Union question or any grievance arising in the meantime" and reported so to the executive officers of the Union and it was thought that "the best thing was to apply for a Board of Conciliation".

An application for a board was prepared and signed by Shewchuck, as president, and Ostapchuk, as secretary, the nature and cause of the dispute being stated as follows:—

"The employees have requested that their Union be recognized and adequate machinery set up to dispose of their grievances. The employer has refused to recognize the said Union and states that it will settle grievances through its Plant Relations Committee only. Failure to adjust the grievances presented by the employees may result in stoppage of work."

The application stated that it was "authorized at a general meeting of the Local held March 3, 1943, by unanimous vote".

The application was forwarded to the Department of Labour on the 16th of March.

On the 22nd of March Mr. M. M. Maclean returned the application to the Union officials in a letter bearing that date, pointing out that the application was incomplete and asking that it should be revised and resubmitted. This letter and application were received in Winnipeg on March 23 or 24.

Borsk states that he thereupon got in touch with the Canadian Head Office in Toronto in regard to further steps and "to get a clear picture of the strike situation". At the same time he issued a broadside (Exhibit 3, sheet 6) calling a special meeting of female Union members "to discuss grievances and the present standard of wearing apparel in each respective department".

This meeting was duly held as called on Sunday, March 28. Reporters were present, and reports of the meeting appeared in the *Winnipeg Free Press* and the *Winnipeg Tribune* on Monday, March 29. Borsk and Shewchuck, the president of the Union, were present at the meeting. Borsk says the newspaper accounts give a fair picture of what took place at the meeting. Shewchuck did not address the meeting. On the morning of March 29, Harris returned to the plant. He was accompanied by his brother, the senior Vice-President of the Company, whose office is in Toronto, and the two Harrises and Clement, the superintendent, spent practically the whole morning making an inspection of the plant. The Ross incident occurred between 8 and 9 a.m. It is dealt with as to its special facts in Appendix "C".

It is necessary to deal with the happenings on the 29th in some detail, and it will be clearer to deal with each of the parties or groups separately. It is proposed first of all to consider the movements of Borsk on the 29th. Borsk's story is that he was in the Cadomin Block in Winnipeg when he got a phone message, about noon, from someone he cannot identify to "go down to the St.

Boniface office immediately". This he proceeded to do, arriving at his Marion street office at 12.30 where he was met by a group of five or six employees who told him Angus Ross had been sent home for two weeks. Borsk swears he did not know who any of these men were. The name of each member of the executive was put to him but he says that none of them was in the group. He says this group told him they had been going to walk off at 9.30. He says he told them "to try to keep things under control" and he would try to get in touch with the management and that they left saying that "if Ross did not start at 1.00 neither would they".

The conversation with the group lasted fifteen minutes according to Borsk and then at 12.45 p.m. he telephoned the plant and tried to speak to Harris but was advised that Harris was busy out in the plant. Borsk did nothing further until 1.20 when he says he got a phone message from one of the Union members from within the plant that they were all walking out. He then tried to get the Department of Labour but could not reach Mr. Johnston or Mr. Hooper, both of whom were out. He then did nothing until 2.30 p.m. At this time he again attempted to get in touch with Johnston or Hooper but was still unable to make contact. At the same time Shewchuck, the president of the Union, phoned Borsk from the plant, told him what had happened, and Shewchuck says that Borsk told him he would see what he could do and that he was going to try to get in touch with the Company. Borsk did nothing further until 3 o'clock when Johnson and Hooper got in touch with him, and after some discussion over the telephone they went to his Marion street office, arriving there at 3.30. After some discussion, lasting from one-half to three-quarters of an hour, Johnston and Hooper called the plant, spoke to Harris and arranged to go over to the plant and meet the management and the Plant Relations Committee which they asked to have called together in special meeting.

Stapleton, an executive officer of the Union, says that he phoned from the plant to Borsk at 3.30, told him what was going on and Borsk told him he was trying to get in touch with the Department of Labour. Borsk spent the time from 4.00 or 4.15 until 6.00 o'clock waiting for the return of Johnson and Hooper. At 6 o'clock they returned to Borsk's office and what Borsk refers to as very heated talk ensued. What had happened at the meeting of the Plant Relations Committee is set out in the minutes of the meeting (Exhibit 20). Shewchuck also went to Borsk's office and Borsk was advised that Angus Ross had

admitted that he was partly to blame for the happening which had resulted in his being penalized. About this time John Coutts, vice-president of the Union who had not been at work that day as he was working nights, saw Borsk at his office to ask whether he should go to work that night and was told to do so.

From the minutes of the special meeting of the Plant Relations Committee held at 5.15 on Monday, March 29 (Exhibit 20) it appears that Shewchuck, the president of the Union, stated that the employees would not start work on Tuesday morning unless Ross was also allowed to work. Harris told the members that a meeting would be held at 9.00 Tuesday morning, that Hazell would attend if requested, and that the matter then would be thoroughly discussed and in the meantime Ross would punch the clock before 7 a.m. and wait in the dressingroom until 9.00 o'clock. There is no record before the Board of what transpired after the Company officials left the meeting and no further communication was made to the Company officials that evening or next morning.

Borsk left his Marion street office about 7.00 o'clock and by that time word had got around to the employees that there was to be a mass meeting in the O.B.U. Hall that night.

A meeting did take place that night but it has been impossible to find out who was in the chair, who was secretary or what actually happened. No minutes are available.

Some time during the afternoon of March 29 statements were given to the two newspapers (Exhibit 16). Borsk told the *Tribune* that what happened was "a spontaneous walk-out demonstration against the Company's refusal to take action on long standing grievances at the plant" and that the workers were protesting against the refusal of the Company to meet with Union representatives to discuss alleged discrimination on the part of the management and other grievances.

The Board had also before it the following amongst other Union officials:—

Jack Shewchuck, president of the Union, member of the Plant Relations Committee, worker on the loading dock and Union steward of the department;

George Perkins, chairman of the Stewards' Council, employed in the hog-kill of which department he was Union steward;

George Stapleton, financial secretary of the Union, chairman of one of the Union committees, employed in the sweet pickle department, Union steward of that department, and member of the Plant Relations Committee;

Tony Ostapchuk, corresponding secretary of the Union, employed in the casings depart-

ment, Union steward of that department, and working in the beef-kill.

These four men were working on March 29 and attended the meeting that evening. Shewchuck's evidence is that he was at work in his proper department when shortly after 1.00 o'clock he saw men from another department walking through his department and after a number had gone through one of them said to him "Come on up to the dressingroom, Jack, aren't you coming with us?" As a result he went up to the dressingroom to see what was wrong and was then told something about the Ross case.

Perkins says that he was marking hogs and two men from another department, whom he cannot identify, came to him, asked him if he was a steward and on his replying in the affirmative said "there is a stoppage of work". Upon his asking the cause they told him that Angus Ross had been laid off work. After a short time he went to the dressingroom, had a short conversation with Ross, and sat down like the rest of the employees.

Stapleton says that he was at work and a group of men came through the pickle cellar and told the men working there, including Stapleton, that they were going to the dressingroom so they just followed and that it was about ten or fifteen minutes afterwards that they heard about the Ross incident.

Ostapchuk says some men from another department came through where he was working and told him that there was a meeting in the dressingroom and he and the men in his department went up to the dressingroom and after some time heard about the Ross episode.

None of the above officers of the Union attempted to persuade the men to go back to work except that Shewchuck says that he did try to get a few of them to go back. The evidence of James Forsythe, the foreman in the smokehouse, and D. C. Clement, the plant superintendent, is to the effect that Shewchuck and Stapleton endeavoured to persuade men who had remained at work to leave their jobs.

No meeting of the Union executive was held in the plant that afternoon. Shewchuck phoned Borsk on two occasions, once at 2.30 and once at 6.00 o'clock, and Stapleton phoned Borsk at 3.30. Neither of these men did anything else.

Each of the four men was present at the meeting of employees that night, the 29th. The employees' submission says in paragraph 10 that "On the evening of the 29th of March a general meeting of the members of the Union was held to consider the Angus Ross affair. At the meeting it was agreed, on the recommendation of the said Borsk and the

executive officers of the Union, that all members of the Union should report back to work the following morning at 7.00 subject to certain conditions." The conditions are set out in the second application for the Board and are four in number (*see* page 2 of the Board's Report). From the confused testimony of these four men and Borsk the facts seem to be that the resolution was drafted by Borsk, Stapleton, and Shewchuck while the meeting was assembling. It was then presented to the meeting; statements were made by Shewchuck, Ross and Borsk; and the resolution was carried. The majority of the executive had nothing to do with the preparation of the resolution and it is impossible to say who was to present the resolution to the Company. To indicate the confusion in the minds of all of these witnesses, neither Ostapchuk nor Perkins knows who was in the chair. Stapleton says Shewchuck was and Shewchuck denies that he was.

Stapleton tells of the drawing up of the resolution and its presentation from the chair. Shewchuck knows nothing about this and Ostapchuk and Perkins say that the motions were made from the floor of the house and no resolution was read to the meeting. Neither Ostapchuk nor Perkins knows who was to present it to the Company. Shewchuck says that Borsk was to do it and Stapleton says that he and Shewchuck were to do it. The resolution was never presented to the Company.

So far as the Company is concerned, none of the officials of the Company, except, perhaps, one of the foremen, ascertained, until the Plant Relations Committee met after 5 o'clock, the cause of the stoppage of work, or that it was in any way connected with the Ross incident. When Ross appealed to Clement, the superintendent, Clement arranged for Ross to report to his office at 12.45, and told him that in the meantime his wages would continue. Ross did not keep the appointment. When the employees commenced leaving their jobs and gathering in the dressingrooms, Clement went to the dressingrooms, told those who wished to return to work to do so and stated that those who did not wish to work should go home. From then on, the officials of the Company were concerned with seeing that as little harm as possible was done to the products being handled in the various departments. The conditions prevailing in each of the departments on the afternoon of the 29th are set out in Appendix D. The following statement gives the number of employees working on Monday and the number that went on strike at 1 o'clock and remained on strike until 6 o'clock:

Office (inside)	138
Office (outside)	216
Foremen	35
Superintendents	6
Plant Clerks	12
Production workers (male)	699
Production workers (female)	209
Number on shift from 1.00 p.m. to 6.00 p.m. March 29th (male)	610
(female)	159
Number on strike from 1.00 p.m. to 6.00 p.m. March 29th (male)	457
(female)	135

We now come to the happenings on Tuesday, March 30th. That morning all of the employees returned to work at 7 o'clock although their resolution had not been presented and although they had voted the evening before not to return to work unless their conditions were met.

Early that morning Ross and Clement had a talk in Clement's office and Clement told Ross that some day he might be in a similar position to Clement, and asked him what he would do under such circumstances. Ross replied that he thought that if he was laid off until Friday, that would be punishment enough and Clement said that he would make that Ross' sentence. Ross and Clement then went to see Harris and told him what had happened, and they all proceeded to the meeting of the Plant Relations Committee. What transpired at that meeting is set out in the minutes (Exhibit 21).

From Exhibit 21 it appears that the meeting was adjourned at the request of some of the Union members and the evidence is that a meeting of some of the Union stewards was then held about noon. What transpired when the meeting was resumed appears in the minutes (Exhibit 21). Four of the Union members withdrew—the other Union members of the Committee remaining—and the incident was disposed of by Mr. Harris fixing Ross' suspension from work at one afternoon (five hours), a decision which, as the minutes show, Ross stated was quite favourable as far as he was concerned.

No meeting of the employees was subsequently held and no report was made to the body of the employees as to the disposition of the Ross matter. The minutes, however, were bulletined in the usual way and were available to all employees. The application for the Board was completed on the night of the 30th and was stated to have been authorized at the meeting of the 29th, although there is no record of such authorization, or any evidence of any authorization.

Following the 30th, work continued in the plant as usual and the efficiency was even better than before the happenings of the 29th. The Plant Relations Committee continued to function as is shown by the minutes (Exhibit 23) and Shewchuck, Stapleton and the other Union members of the Plant Relations Committee continued to carry on their duties as members of such Committee.

On the 27th of May the Union members of the Plant Relations Committee, who were in a majority, introduced a resolution set out in the minutes of the meeting of that day (Exhibit 19). The resolution reads as follows:—

"We, the Plant Relations Committee strongly protest to the Management of Canada Packers Limited, St. Boniface, Manitoba, the alleged action of certain Superintendents and Foremen.

"Employees have complained recently that they have been discharged without proper investigation or an opportunity of presenting their case.

"We also object to certain Superintendents and Foremen supposedly dealing in personalities in discharging employees such as calling them Germans and threatening to have the employee put in jail.

"It is our desire that Mr. Joseph Harris personally, with a sub-committee of the Plant Relations, investigate the dismissal of the following persons:

Nick Perehinic
Henry Pennette
Ann Skasko
Bill Wichnenko"

It was passed unanimously, and when the nominations for members of the sub-committee were made, although non-Union as well as Union members were nominated, three Union members were elected.

This sub-committee met on the 27th of May in the afternoon and again on the 28th of May, and the report of its proceedings appears in Exhibit 22.

Although the sub-committee was appointed to deal with the four named cases and a fifth one that was added, Harris advised the Plant Relations Committee that so far as the management was concerned it would welcome a continuation of the sub-committee, or that a permanent sub-committee be set up to deal with matters of this kind.

Since the 28th of May the Plant Relations Committee has continued to function and affairs in the plant have been running along entirely satisfactorily.

Plant Relations Committee

An organization within Canada Packers known as the Plant Relations Committee was set up in 1933. As stated in "The Rights and Privileges of Canada Packers Winnipeg Employees" (Appendix E) the committee is

delegated with the responsibility of considering complaints and grievances submitted to it by employees. In 1941 the Committee consisted of 8 members, 6 elected by the employees and 2 appointed by the Company. Due to expanding business activity resulting in increased operations in the plant the Committee recently was expanded to 10 elected employee members, the number appointed by the Company remaining at 2, in order to provide more adequate plant representation.

With respect to grievances mentioned from time to time in this report, the Board examined very carefully the minutes taken at meetings of the Plant Relations Committee (Exhibit 23). It was interesting to note the efficient manner in which the Plant Committee handled grievances and the speed with which they were considered and adjusted. To notify employees of the activities of the Committee copies of the minutes are posted on bulletin boards strategically located throughout the plant.

A number of witnesses expressed the belief that it was futile to bring major grievances before the Plant Relations Committee. Another comment was to the effect that the employees lacked confidence in the Committee. It is worthy of note here that while employees expressed general comments concerning the existence of grievances which were not taken up with the Plant Relations Committee, no specific grievances could be ascertained upon examination.

At the present time the Plant Relations Committee is virtually controlled by members of Local 216. Eight of the ten present members of the Plant Relations Committee are members of the Union. The extent of their domination is indicated in the creation on May 28th, 1943 of a sub-committee to handle specific grievances (see Exhibit 22 and 19, and pages 15 and 16 of the Board's report).

The Stoppage of Work

The situation that developed on the 29th of March when Ross was disciplined reveals a desire on the part of the Union members to demonstrate to the Company the strength of their Union, first with a view to forcing immediate investigation and adjustment of Ross' complaint, and second, the recognition of their Union as the responsible body through which grievances would be handled rather than the Plant Relations Committee. The rapid growth of the Union, officered by new inexperienced Union men who had up until the 29th of March depended upon their field representative to advise and educate them in all matters relating to Union activities

coupled with the fact that they had not received that education, meant that they were not qualified to deal with the situation that arose on Monday, March 29th. The demonstration on behalf of Ross placed the officers of the Union in a difficult position with a responsibility new to them and without the benefit of advice from their field representative. They did not undertake to seek a settlement of the disturbance but appear to have expected adjustment to come automatically as a result of the demonstration. Not being well acquainted with the constitution, by-laws and procedure of their Union, as they should have been, they were hesitant about taking any positive action and yet were impatient to have their Union recognized without further delay.

The Position of the Union

The Board found that the Union was established in accordance with the rules and regulations adopted by the Packinghouse Workers Organizing Committee. However, it might be pointed out that there was some confusion in the minds of the Union officials who gave evidence, concerning the position of the Union before a charter was granted.

According to Mr. Borsk's statements approximately 385 members had signed application forms for membership in the Union by the middle of February, 1943. By the end of March the report to the International Head Office indicated 680 people had signed applications; and at the present time the Board believes from financial statements shown that approximately 900 members have signed applications for membership in the Union. This figure indicates a large percentage of those eligible in the plant had signed applications.

GENERAL OBSERVATIONS AND CONCLUSIONS

With reference to Federal legislation designed to guide and direct labour-management relations, two points of interest merit examination. In the first place the wording of the Industrial Disputes Investigation Act (section 16. 2) calls attention to the need for strike action (or to thoughts of strike activity) before an application for a Board of Conciliation may be considered by the Minister of Labour. While this procedure was undoubtedly not considered in the framing of the Act it nevertheless appeared, in this instance, as a factor in the precipitation of the dispute. For example, in reply to the first application for a Board, submitted by Local 216 on March 16th, which was returned for revision, the Director of Industrial Relations states that the Act "requires that the applicants not only

state that to the best of their knowledge and belief a strike will be declared but also that the necessary authority to declare a strike will be obtained".

It was stated to the Board that at an organizational meeting on March 3rd the necessary authority had been given to the Executive to take what action they saw fit in order to obtain Union recognition—including the authority to call a strike without further discussions—although no minutes were obtainable to substantiate this statement. However, this fact, together with the reply with respect to the revision of the application appeared to the Board to raise in the minds of the members of the Union the possibility of strike action to gain the ends sought. The impatience for recognition of their Union indicated by certain of the employees examined coupled with the fortuitous Ross incident (referred to above) in a large measure were responsible for the situation which developed on Monday afternoon, March 29th and served to bring the matter within the scope of the Industrial Disputes Investigation Act.

The second point centres on Order in Council P.C. 2685, (sections 6 and 7). It was found by the Board that the Company in no way made any attempt to handicap or obstruct the employees in their Union activities. In fact the attitude of the Company appears to be one of agreement throughout with the principles enunciated in the above Order in Council. In view of this it was deemed unnecessary to deal with certain charges outlined in the submissions with respect to collective bargaining. Moreover, in this connection no formal application for a vote had been submitted to the Company.

While it is recognized that broadsides were used to a great extent in the initial stages of Union organization their format and wording in this instance, (Exhibit 3) together with the strike authorization, referred to above, appeared to create an impatient, excited, and even militant frame of mind on the part of many of the employees. The psychological pattern which appeared to have been developed in the minds of the employees, in the process of unionization, and the lack of a carefully formulated plan of internal organization and education resulted in a situation on March 29th with which Borsk showed he was incompetent to deal. (Mr. Brown does not concur entirely on the point). The situation, with respect to Ross, served to precipitate a state of hopeless confusion which need not have developed at all, had the Union been organized for a sufficient length of time to

receive the necessary training and education which they needed and which they were entitled to expect.

While it is stated in the submissions that the broadsides were written "in the colloquial language understood by those to whom they were addressed and not in literary language which they would not understand" the Board questions the interpretation of "colloquial" to include distortions of fact. No useful purpose is served in expanding this point for the broadsides speak for themselves in the light of the evidence.

The Board was unimpressed with the attitude of certain of the Union's witnesses. In this connection it is strongly suggested that great care be taken by the members of the Union in selecting competent negotiating committees.

The Board finds:

1. That the Company did not refuse to recognize the Union but postponed the question, with the consent of the field representative, until it could be dealt with by Harris after his return to the City on March 29th.

2. That the Company did not refuse to discuss grievances of the Union members with Borsk until after the 16th of March

(the date of the first submission for a Board of Conciliation) and no grievances arose for discussion after that date.

3. That the issue in question is not the right to bargain collectively but the manner in which the Union approached the management.

4. That no demand was ever made for the taking of a vote to ascertain bargaining representatives.

5. That the Company and its officials made no attempt, direct or indirect, to stop or control Union activities.

The Board recommends, therefore, in the light of the above findings that a proper approach be made to the officials of the Company by persons competent to conduct negotiations.

All of which is respectfully submitted.

Report of Board in Dispute between Sorel Industries Limited, Sorel, P.Q., and its Employees

On July 2, the Minister of Labour received the unanimous report from the Board of Conciliation and Investigation established to deal with a dispute between Sorel Industries, Limited, Sorel, P.Q., and its employees, members of the Metal Trades Council of Sorel (A.F. of L.) (L.G., July, 1943, p. 923).

The personnel of the Board was as follows: Honourable Mr. Justice Wilfrid Lazure, Montreal, P.Q., chairman, appointed on the joint recommendation of the other two members; Messrs. J. A. L'Heureux, Sorel, P.Q., and Paul Fournier, Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

The report of the Board follows.

Report of Board

(TRANSLATION)

The Honourable

HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

In the matter of the Industrial Disputes Investigation Act and of the dispute between The Sorel Industries, Limited, of Sorel, Que., and its workers, members of the Council of the Metal Trades of Sorel.

Mr. Minister,

On May 22 and June 17 last, we were all three appointed to act as a Board of Conciliation and Investigation, in conformity with Chapter 112 of the Revised Statutes.

Following a preliminary meeting that we attended alone, and after having taken the oath of office, we held our first and only session of inquiry at Sorel, June 29 last.

We called no witnesses, but all the parties concerned, namely the International Union, the National Catholic Syndicates and the Sorel Industries were represented and heard.

The whole day of June 29 was used up in proceedings, and an understanding, apparently acceptable to all the parties concerned, was finally arrived at. The point, after all, was to know who should represent the employees of Sorel Industries, Limited, in dealings with their employers, and how such employees could express their wishes and decision in the matter.

It was claimed at the proceedings that a large majority of the employees favoured the *status quo*, while others insisted that the majority of the employees wanted their requests set forth by a labour union.

Therefore, we felt that it should be determined first of all by a YES or NO answer whether or not the employees wanted to be represented by an organization in dealings with their employers. Should the employees thus decide in favour of representation by an organization, it should then be determined which of the two competing organizations was to be accepted as the employees' bargaining agent.

At the conclusion of the sitting we had all come to the following findings, which appeared to us to have been accepted by all the parties concerned:

(a) that a vote be held among the employees, and that the following ballot be delivered to every voter—

.....

Do you wish to be represented by a
labour union in dealings with the YES ☐
Company? NO ☐

IN THE AFFIRMATIVE, by what organization do you wish to be represented—

The International Union ☐
or

"Le Syndicat National de l'industrie
metallurgique de Sorel" (National
Syndicate of the Metal Trades of
Sorel) ☐

.....
(b) that the said ballot be held on Friday,
July 16 next.

Such a double voting system on the same ballot may seem new and unusual to you at first, but we can assure you, Mr. Minister, that it was decided upon by us only following very extended discussions between the parties concerned, and we recommend such a procedure as representing the only method of voting acceptable under the circumstances.

The parties were represented as follows:

The International Union, by Mr. Adrien Villeneuve, representing the Grand Lodge of the International Association of Machinists and also Organizer of the Councils of the Metal Trades of Sorel; "*Les Syndicats Nationaux Catholiques*" (National Catholic Syndicates), by Mr. R. R. Bignell, President of "Le Syndicat National de l'industrie metallurgique de Sorel" (National Syndicate of the Metal Trades of Sorel), and also by Mr. Alfred Charpentier, General President of the National Catholic Syndicates; *The Sorel Industries, Limited*, by Mr. J. Edouard Simard, Vice-President, and Mr. Louis D. Hudon, Controller.

This unanimous Report of the Board's three members is respectfully submitted to you.

(signed) WILFRID LAZURE,
Chairman.

(signed) J. A. L'HEUREUX,
Member.

(signed) PAUL FOURNIER,
Member.

Sorel, Que., June 29, 1943.

Report of Board in Dispute between the J. Ford Company, Limited, Portneuf Station, P.Q., and its Employees

On July 29, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the J. Ford Company, Limited, Portneuf Station, P.Q., and its employees, members of the National Catholic Union of Paper Workers of Portneuf Station (LABOUR GAZETTE, April, 1943, p. 469). The personnel of the Board was as follows: The Honourable Mr. Emile Moreau, Quebec, P.Q., chairman, appointed by the Minister of Labour in the

absence of a joint recommendation from the other two members; Messrs. Gerald Almond, Montreal, P.Q., and Laureat Morency, Quebec, P.Q., appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the chairman and Mr. Morency. Mr. Almond submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

Re dispute between the J. Ford & Co., of Portneuf, Que., and its employees, members of the National Catholic Syndicate of the Paper Industry, Portneuf, P.Q.

The Hon. Humphrey Mitchell,
Minister of Labour,
Ottawa, Ont.

Mr. Minister,

On application from the National Catholic Syndicate of the Paper Industry of Portneuf, Que. ("Syndicat national catholique de l'industrie du papier de Portneuf, Que."), a Board of Conciliation and Investigation was established by you on April 15, 1943, the members of which were: the Honourable Emile Moreau, chairman, and Messrs. Gerald Almond, of Montreal, representing the employer, and Laurent Morency, of Quebec City, representing the Syndicate.

The Board was established to deal with a dispute between the J. Ford Co. Ltd., of Portneuf, Que., and its employees, members of the National Catholic Syndicate of the Paper Industry of Portneuf, Que. Mr. John Crankshaw, K.C., of Montreal, represented the Company before the Board, and Mr. Gerald Picard, of Quebec, General Organizer of the C. & C.C. of L., represented the Syndicate.

The Board's sittings opened April 19, 1943. A number of sittings were held, some at Quebec, others at Portneuf, and a few at Montreal. A detailed report of said meetings was prepared and will be addressed to the Department.

During the Board's proceedings, a number of witnesses were heard, some at the Company's request, others at the request of the Syndicate.

In agreement with the parties to the dispute, the Board adjourned its formal sittings on May 20, 1943, to enable, if possible, the Company and the Syndicate to come to a satisfactory settlement of the matter. The Board co-operated with the parties' representatives to this end, but the negotiations gave no definite results.

This is a majority report signed by the Board's chairman and the Syndicate's nominee on the Board. The other Board member, the Company's nominee, is submitting a minority report.

On May 29, 1943, the Company through its counsel, Mr. Crankshaw, K.C., submitted in writing a proposal providing as follows:

1. The employees are free to join the union of their own choice;

2. The Company is in favour of the principle of a collective labour agreement with its employees;

3. The Company wishes that the employees' bargaining agency be a committee representative of the plant's various departments;

4. The Company is opposed to the official recognition of the National Catholic Syndicate of the Paper Industry of Portneuf, P.Q.

It may be recalled here that in its application the Syndicate requested:

1. Official recognition of the Syndicate;

2. Negotiation of a collective labour agreement between the Company and the Syndicate;

3. Investigation of a certain number of dismissals of employees by the Company previous to the Syndicate's application.

The wage question having been settled by the Regional War Labour Board for the Province of Quebec, said question, therefore, was not raised before this Board.

On the other hand, the dismissals were investigated by a special Commissioner, Mr. Bernard Rose, a copy of whose report in the matter was referred to our Board.

The Syndicate, to whom the Company's proposal—the main features of which are given above—was submitted, turned it down, expressing its wish to discuss in the first place certain cases of dismissal, especially that of Mr. Joseph Bouchard, President of the Syndicate and Chairman of the employees' committee which operated in the plant.

As the Company stood by its offer and refused to discuss the matter of dismissals, basing its stand on Mr. Rose's report in which he stated that he found no evidence of the dismissals having been made on grounds of union activities, the Board, consequently, resumed its proceedings.

The majority report wishes to call the attention of the Department of Labour to a resolution adopted by the board of directors and the shareholders of the Ford Co., of Portneuf, the text of which follows and a duly signed copy of which is attached to this report:

"Extract from the minutes of the special meeting of the shareholders held April 29, 1943—all shareholders being present.

"The present labour situation was discussed at length. The officers of the Company explained the position they had adopted, and following this explanation, there was moved and unanimously carried, the following resolution: That the policies of the officers of the Company in regard to labour matters be approved, it being understood that as a part of these policies, the Company made no objection of any kind to membership in any legal organization whatever by any of their employees, nor

has the Company any objection to a collective agreement, either oral or written, with a committee of its own employees, but rather than recognize as a bargaining agent the group known to them as the National Catholic Syndicate, that the officers of the Company may, if they see fit, shut down the mills and close up the business."

* The undersigned wish to express their regret to the Minister of Labour that nothing in the labour legislation prevents such an attitude on the part of an employer. Employees are asked to support to the utmost Canada's war effort, and we witness here an employer who, notwithstanding that he has certain war contracts to carry out, declares his readiness to close his plant rather than recognize a labour organization.

Having examined the evidence, the Board finds (such is the opinion of the undersigned) that the main point on which the parties are unable to agree is that of the bargaining agent to act as the employees' representative. The Syndicate wishes to represent the employees, and the Company suggests the establishment of an employees' committee, that is to say a plant committee, acting as representatives of all the employees with the Company.

The Company and the Syndicate are both in agreement on the principle of a collective labour agreement.

The undersigned make the following recommendations in this majority report:

1. That the Honourable the Minister of Labour proceeds with the holding of a secret ballot to determine whether the employees wish to be represented by the Syndicate or by a plant committee;

2. That the Ford Company and the Syndicate be requested to accept the results of the ballot thus conducted;

3. That the Ford Company negotiate a collective labour agreement with the bargaining agency—the Syndicate or the employees' committee—receiving a majority of the employees' votes.

We feel the above recommendations are in conformity with the Dominion Government's policy in connection with industrial relations, as expressed by P.C. 2685.

The undersigned are happy to report on the parties' co-operation in facilitating the Board's work, and to mention that the public sittings and the negotiations were conducted in an atmosphere of harmony.

All of which is respectfully submitted.

(Sgd.) E. MOREAU,

Chairman.

(Sgd.) LAUREAT MORENCY,

Member.

Quebec City, July 21, 1943.

Minority Report

M. M. MACLEAN, Esquire,
Director of Industrial Relations,
Department of Labour,
Ottawa, Ontario.

Re: Industrial Disputes Investigation Act and re dispute between the J. Ford & Co., Ltd., Portneuf Station, P.Q., and its employees, members of the National Catholic Union of Paper Workers of Portneuf Station.

The undersigned nominated by the Company on the said Board herewith submits his minority report as follows:

The Board has been called upon to investigate the dispute that has arisen between the J. Ford & Co. Ltd., Portneuf Station and its employees, members of the National Catholic Union of Paper-Workers of Portneuf Station and to report thereon its findings to the Honourable Minister of Labour.

At the outset so as to clarify the situation it is not amiss to point out that the application of the said Union (Syndicate) through the intermediary of its President, Jos. Bouchard et al, speaks of three alleged grievances which for the purpose of this report I shall refer to as questions in dispute.

Briefly the three questions to be considered by the Board are as follows:

1. The alleged unfair dismissal by the Company of some dozen employees.

2. The recognition of the Syndicate as the bargaining agent.

3. The right to negotiate a collective agreement.

In view of the fact that the matter of alleged discriminatory dismissal had already been adjudicated upon by a competent and duly constituted tribunal prior to the sitting of the Board by way of enquete, which matter is therefore chose jugée (res judicata); it is the opinion of the writer that this Board had no jurisdiction to re-open the proceedings which is the view expressed in a letter dated May 5, 1943, addressed to Hon. Moreau, President of the Board and signed by C. W. Rump on behalf of the Minister of Labour.

The question of collective bargaining does not appear to be in issue as the parties to the dispute are quite willing to recognize the principle of collective bargaining and the benefits to be derived therefrom. The one and only question therefore which appears to be of a controversial nature is whether the said Syndicate should be officially recognized as the bargaining agent. The Company through its President, T. B. B. Ford testified at the hearing that a large number of em-

ployees do not want to be represented by the Union as the bargaining agent and prefer to be represented by an Employees Committee which has been functioning satisfactorily during the past two years and which as yet has not been officially dissolved.

Mr. Ford further testified in his capacity as President of the said Company that under no circumstances would the Company recognize the Syndicate as the bargaining agent and in support thereof produced and filed as an exhibit a copy of a resolution of the shareholders of the Company, which was held on the 29th day of April, 1943, which gave Mr. Ford the necessary power, *inter alia*, to close the plant if the Company was called upon to recognize the Syndicate as the bargaining agent.

Mr. Ford added that upon such authorization he was firmly determined to close the plant accordingly rather than have the Company recognize the Syndicate officially.

The attitude of the Company in refusing to give official recognition to the Syndicate can be well understood from the fact, as shown by the testimony of Mr. Ford, that during the course of an illegal strike at the Company's plant in the year 1942, acts of violence were committed by Syndicate members including the prevention of the Company's trucks delivering essential materials of war. In this connection, Mr. Ford testified that mobs gathered with piles of stones ready to heave at any worker who attempted to deliver such materials; that even after the Provincial Police were called and after three police officers had arrived, the mob threatened them with stoning should they attempt to assist in having the trucks proceed.

The attorney for the Company asked the chairman to subpoena the three said police officers in order that they might testify to the above effect. However, when the said attorney attempted to adduce evidence through other witnesses of violence during the said strike, he was precluded from doing so by the majority ruling of the other two members of the Board upon the objection of Mr. Picard representing the Syndicate—I dissenting from such ruling.

However, some evidence apart from that of Mr. Ford found its way into the record.

Question: "Est-ce vrai si oui ou non que le syndicat vous autorise de résister physiquement durant une grève légale ou non légale?"

Réponse: "Pas de réponse."

Question: "Est-ce vrai que vous avez empêché de livrer de la marchandise au Canadien National?"

Réponse: "Oui."

Question: "Vous avez empêché un camion?"

Objection de monsieur Picard à cette question.

Question: "Cette question est importante en raison de savoir si oui ou non le syndicat doit être reconnu."

Monsieur Picard: "Notre demande d'enquête n'est pas sur la grève."

Monsieur Moreau, président: "Nous n'avons pas à enquêter sur les causes de la grève."

So, while according to counsel for the Company other evidence was available through several other witnesses, the attitude of the majority of the Board prevented such evidence from being adduced.

However, there is enough in the evidence of Mr. Ford and in the evidence above quoted to bring me to the conclusion that the Syndicate officers encouraged an illegal strike. And there is sufficient to bring me to the further conclusion that either they counselled violence during that strike or took no steps to prevent their members from acting with violence. The Company, to my mind, is therefore quite justified in adopting a definite attitude against giving official recognition to a Syndicate, the officers of which have acted as above, and/or who have omitted or been unable to prevent their members from committing such acts of violence.

Further, Mr. Ford has stated that there are many employees of the Company who do not approve of the Syndicate and are not members thereof and the officers of the Company wish such employees to have the right along with employees who are Syndicate members to choose their own bargaining agency.

A fair proposal in regard to the election of a bargaining agency was made by the Company to the Syndicate, which proposal is hereto attached.

However, the Syndicate rejected the said proposal admittedly for the sole reason that the Company refused to further discuss the question of the dismissal from the Company of Jos. Bouchard, President of the Syndicate, although, as above set forth, the question of Bouchard's dismissal—as well as the dismissal of several other employees—had been previously inquired into by Commissioner Rose who reported to the Department that such dismissals, including that of Bouchard were justified.

The last mentioned admission of the Syndicate is contained in a letter addressed by Mr. Gérard Picard, representing the Syndicate to the Hon. Emile Moreau, President of this Board, namely, the 4th paragraph of this letter, which reads as follows:—

"La proposition a été étudiée par le Syndicat. L'assemblée des employés membres du Syndicat n'a pas accepté la proposition de la compagnie, et le Syndicat désirait, au préalable, discuter l'un des congédiements effectués par la Compagnie, celui de M. Jos.

Bouchard, président du Syndicat et président du comité des employés. Le Syndicat a insisté sur la réinstallation de M. Bouchard, mais sans succès."

In other words, because the Company has refused and properly refused to discuss the case of Bouchard, the Syndicate is unwilling to accept the attached proposal.

Such autocratic attitude and decision of the Syndicate in response to a reasonable proposal for the solving of difficulties provides further reason for the Company's determination to refuse to deal with the Syndicate officially.

Incidentally, the officers of the Company are further showing their fair-mindedness by their willingness to deal with a Committee elected in the manner set forth in the attached proposal even if on a vote every member of the Committee happens to be at the same time a member of the Syndicate.

Moreover, any strength which the Syndicate averred it had when the present Board was constituted has probably been very materially lessened by the voluntary resignation of several active members and officers of the Syndicate from the employ of the Company, as evidenced by a letter written to the Board by Mr. J. Grant Macdonald, dated Friday, July 2, 1943, and filed as an exhibit with the Board.

Under all the circumstances and after careful inquiry into the facts and lengthy deliberation, I have arrived at the following conclusions and decisions:—

1. I disagree and dissent from the conclusions and opinions set forth and expressed in the report of the Chairman and the member of the Board nominated by the Syndicate.

2. I approve of the attached proposal made by the Company and I consider such proposal to be a fair and reasonable means of solving any existing difficulties.

The whole respectfully submitted.

(Sgd.) Gerald M. Almond.

Quebec, July 21, 1943.

On July 30 subsequent to the receipt of Mr. Almond's minority report, the following telegram, addressed to Mr. M. M. Maclean, Director of Industrial Relations, was received:—

"Newcarlisle, Que.

M. Maclean, Director of Industrial Relations, Dept. of Labour, Ottawa, Ont.

Re Ford Co. Portneuf dispute amended copy of majority report reached me after my dissenting report submitted to Chairman Stop. Contrary to majority report there is nothing whatever to indicate companies attitude is against war effort Stop. On contrary conclusive uncontradicted evidence definitely shows companies officers have further war effort generally and particularly in machine shop production Stop. Contents of this com-

munication supplements and forms part of my minority report and accordingly I respectfully request you to add it thereto.

Gerald Almond."

Proposal

Re Industrial Disputes Investigation Act and re dispute between the J. Ford Co., Limited, Portneuf Station, P.Q., and its employees, members of the National Catholic Union of Paper Workers of Portneuf Station.

The Company proposes a formation of an employees' committee to be the bargaining agency between the employees and the Officers of the Company, such Committee to consist of five members as follows:

One member representing No. 1 Mill operations crew;

One member representing No. 2 Mill operations crew;

One member representing non-shift workers No. 1 Mill;

One member representing non-shift workers No. 2 Mill;

One member to represent the yard gang.

Such members to be elected respectively by the vote of their co-employees in their own respective groups above referred to.

There to be no nominations each employee to be entitled on secret ballot to vote for whichever fellow-employee in his particular group he wishes to represent him and his group on said Committee.

The employee in each respective group receiving the greatest number of votes to be the elected member of the Committee; and the employee in each group receiving the second highest number of votes of his group to be a non-voting member of the Committee whose duties would be to attend Committee meetings with the Company and to participate in discussions thereat and to report and discuss the mutual interests of his group privately with the other employees of his group.

If any or all of the employees elected to the Committee happen to be Syndicate officers or Syndicate members, the Company would not object.

However, any cessation of any such Syndicate Officer or Syndicate member as a Syndicate officer or Syndicate member shall not deprive him of the right to continue to be a Committee member, on the contrary he shall continue to be a Committee member, should he so desire.

The election to take place under the supervision of an officer of the Department of

Labour selected by that Department. Upon such election by secret ballot as aforesaid, the Company to be represented by one scrutineer and the employees by one scrutineer. The duties of the scrutineer would correspond to those in an ordinary public election.

In the event of any of the employees being illiterate and unable to write the name of their respective selections on the ballot, they shall respectively declare their choices to the said Officer of the Department of Labour in the presence of the respective scrutineers of the employees and of the Company, and the said Government Officer shall thereupon write the name of each such respective choices on the voter's ballot in the presence of the two scrutineers.

Upon election the Committee and the officers of the Company will decide upon the procedure to be adopted for the replacement of any members of the Committee resigning from the Committee or ceasing to be in the employ of the Company.

The Committee when elected will negotiate with the officers of the Company for a collective agreement which the Company declares it is ready to enter into on fair, just and reasonable terms and conditions.

Upon the election of the Committee aforesaid the men's Committee elected under the supervision of an Officer of the Department of Labour on September 2, 1942, shall cease to exist.

The tenure of office of the Committee to be elected will be one year from the date of election; and the election of a new Committee will take place annually within one week from the date upon which the previous Committee ceases to be in office, the procedure in each subsequent election to be decided upon, within one month before the term of the Committee then in office expires, by that Committee with Company officers.

As conveyed to the members of the Conciliation Board during several sittings, the Company, its Officers, Directors and shareholders are unwilling for the various reasons then and there detailed, to give official recognition to the National Catholic Syndicate; and it is reiterated that the reasons are so serious and well-founded that the Company's two mills will be shut down rather than give such recognition.

The foregoing proposition, made without prejudice, is a gesture of good-will by the Company to bring about a working understanding on a fair and reasonable basis; the officers give their assurance that if an employees' Committee be formed on the lines above set forth, such Committee will receive every co-operation from the Company's officers to solve any difficulties in the mutual interests of the employees as a whole and of the Company.

Montreal, May 29, 1943.

Report of Board in Dispute between the Dominion Glass Company, Limited, Hamilton, Ont., and Its Employees

On July 16, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Glass Company, Limited, Hamilton, Ont., and its employees, members of Local No. 3, Canadian Brotherhood of Glass Workers (C.C.L.) (L.G., July, 1943, p. 922).

The personnel of the Board was as follows: Dr. Cecil A. Wright, K.C., Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. R. R. Evans, K.C., Hamilton, Ont., and Bora Laskin, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The report of the Board follows:—

Report of Board

Re *Industrial Disputes Investigation Act and re Dispute between the Dominion Glass Company, Limited, Hamilton, Ontario, and its Employees, Members of Local No. 3, Canadian Brotherhood of Glass Workers.*

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation and Investigation appointed by you, and consisting of Dr. Cecil A. Wright, K.C., as Chairman, appointed by yourself on the failure of the other two members of the Board to recommend a Chairman, and Mr. R. R. Evans, K.C., nominee of the employers, and Mr. Bora Laskin, nominee of the employees, begs to submit the following Interim Report.

Public hearings before the Board were held at the Court House in Hamilton, Ontario, on June 29, 30 and July 7. The applicant union was represented by Mr. Elroy Robson, Regional Director of the Canadian Congress of Labour, on the day of the first hearing, and by Mr. Robson and Mr. T. MacLachlan, General Organizer for the Canadian Congress of Labour, at the subsequent hearings. The Company was represented by Mr. T. W. Bassett, Vice-President and General Manager of the Company, Mr. M. Offer, Secretary and Comptroller of the Company, and Mr. James H. Sephton, Manager of the Hamilton factory. At the beginning of the first day's hearing, a request by Mr. H. A. F. Boyde, K.C., asking for permission to appear before the Board and present the case of his client, Local 140 of the Glass Bottle Blowers' Association of the United States and Canada, was considered. From statements made by representatives of the applicant union and representatives of the Company, it became apparent that Local 140 of the Glass Bottle Blowers' Association (hereinafter referred to, for convenience, as G.B.B.A.) claimed to have a collective bargaining agreement on behalf of the hourly and piece rate employees in the Hamilton plant of the Company, and while the employees of the Company, being members of Local 140 were not parties to the dispute, the Board felt that it would be helpful to have their assistance in determining the questions at issue. Since approval of the parties to the dispute could not be obtained to their appearing by counsel, they were represented throughout by Mr. Dale Clutter, Executive Board member of the Glass Bottle Blowers' Association of the United States and Canada, and were given permission to adduce evidence, question witnesses and present argument.

The Application for the Board recited three causes of dispute. At the opening of the first hearing Mr. Robson, on behalf of the applicants, withdrew the request for the reinstatement of W. Barnick (Warnick). This left the issue of recognition of the applicant union as the collective bargaining agency for employees and the request by the applicant that the Company cease the practice of intimidation for the purpose of forcing employees to become members of the G.B.B.A. Since the present report is in the nature of an interim one only, and as the Board at this stage does not feel that it is expedient or desirable to make any findings of fact concerning any questions on which there might be a difference of opinion, this report will not deal with the question of intimidation save to state that on the evidence adduced by the applicant union there would seem to be little

or nothing to support such a charge, and it would appear that in using the term, intimidation, the applicants were referring only to the manner in which an alleged collective bargaining agreement with the G.B.B.A. was negotiated, and which may, according to the contention of the applicants, have influenced employees of the Hamilton plant to become members of the G.B.B.A. Whether such influence operated or not is a question which, in this report, the Board feels unnecessary to discuss save as inferences may be drawn from the following recital of undisputed facts. In any event, it became apparent, at an early stage of the proceedings, that the only real issue in dispute was that of union recognition and of determining whether an existing collective bargaining agreement should be considered as representing the wishes of the employees of the Hamilton plant.

On the third day of the hearings in Hamilton, the Company's representatives objected to the jurisdiction of the Board on the ground that the dispute did not involve a company which was carrying on a war industry within the meaning of P.C. 3495. After hearing the Company's argument on this question, the Board was of opinion that the provisions of section 7 of the Industrial Disputes Investigation Act, which provides that the decision of the Minister as to the granting or refusing of the Board should be final and that when a Board is granted by the Minister it should be conclusively deemed to be authorized in accordance with the Act, prevented the Board from considering the merits of the issue of jurisdiction on the facts.

To understand the action taken to date by the Board, the following statement of facts, as to which there is little or no dispute, may be helpful. On November 2, 1942, an agreement was entered into between the Dominion Glass Company, at its head office in Montreal, and the Glass Bottle Blowers' Association of the United States and Canada whereby it was provided that

The Association is hereby recognized by the Company as the representative of hourly and piece rate employees in all the Company's factories and both the parties hereto agree to establish the necessary procedure for the adjustment of all matters relating to seniority, wages, hours, employment and working conditions.

Pursuant to this agreement notices were posted by the Company in the Hamilton plant of the Dominion Glass Company reciting that as a number of employees had expressed the desire to be represented by a trade union, "The Company... has made formal the recognition of the Glass Bottle Blowers' Association of the United States and Canada

as a union representing employees in all Factories." The notice further stated that Mr. W. W. Campbell, vice-president of the union, and Mr. Charles Brookes, treasurer and acting head of the union in Canada, would start within the week to visit the factories at Montreal, Hamilton, Wallaceburg and Redcliff (Alta.) to discuss and arrange organizational matters. Following upon this, Mr. Brookes came to Hamilton and as a result of his organizational activities a number of application forms for admission to the G.B.B.A. were signed by employees. Without indicating any final conclusion regarding these applications, evidence of several employees, as well as statements by the G.B.B.A. itself, showed that such application forms were really for the purpose of holding general employee meetings in order to obtain information rather than as serious applications for membership in the G.B.B.A. During the time that the G.B.B.A. was conducting these organizational activities organizers for the Canadian Congress of Labour were active in the Hamilton plant during November and December, and on December 9 and 10, 1942, the employees in the Hamilton plant conducted a vote by ballot in which they were asked to express their preference for the Glass Bottle Blowers' Association, stated on the ballot to be an affiliation of the A.F. of L., or the Canadian Congress of Labour, stated on the ballot to be an affiliation of the C.I.O. The voting lasted for two days and without considering whether there was a premature termination of the voting as was suggested by the evidence of some employees, there seems little dispute that the result of the voting was as follows:—

C.C.L.	376
G.B.B.A.	185
Not voting.....	122

Without checking these figures against the actual list of employees which fluctuated around the 700 mark, it is clear and admitted by all parties that a substantial majority voted in favour of the C.C.L. Some evidence was given that the employees were mistaken in this vote since they believed that the C.C.L. was in reality the C.I.O. Whether this is so or not is unnecessary to determine for the purpose of this report.

Following this vote the employees' committee, which had been arranging the vote, split up. On December 19 a meeting of employees was called by members of the committee who had been favouring the G.B.B.A. Nineteen employees attended that meeting. As a result of this meeting a committee of four approached Mr. Sephton, the local manager of the Company at Hamilton,

on December 21 along with Mr. Charles Brookes, the Canadian organizer for the G.B.B.A. and on that date a short document was signed by Mr. Sephton on behalf of the Company and by Mr. Brookes on behalf of the G.B.B.A. in which it was stated that it had been jointly agreed that "the 'Glass Bottle Blowers' Association of the U.S.A. and Canada' be recognized the bargaining agent for the hourly and piece rate employees at the Dominion Glass Company's Plant located at Hamilton."

The charter for Local 140 of the G.B.B.A. was produced before the Board and was dated January 16, 1943. The charter of Local 3 Canadian Brotherhood of Glass Workers, being a chartered union of the Canadian Congress of Labour, was produced to the Board and was dated January 2, 1943.

Pursuant to the recognition given December 21, the G.B.B.A. continued to negotiate as the collective bargaining agency for employees at the Hamilton plant and on June 24, 1943, concluded an agreement with the Dominion Glass Company, which agreement recognized Local 140 of the G.B.B.A. as the "collective bargaining agency of the hourly and piece rate employees in the Hamilton plant, with the exception of assistant foremen and office and clerical staff".

On these facts it appeared to the Board that it would be helpful, if indeed not essential, for the purpose of conciliating the present dispute, to have evidence of the authority of Local 140, G.B.B.A. to conclude such an agreement, made on behalf of all the employees of the Hamilton plant. Particularly did this seem to be called for since the Agreement of June 24, 1943, also contained a clause, Art. 2 (b), providing that "It is agreed that employees be members of the Local in good standing, and the management agrees to pursue a policy of co-operation towards this end." Since the only evidence which had been given by witnesses for the Applicant Union and by one witness called by the G.B.B.A. attested to the fact that on the vote of December 9 and 10, 1942, there was a majority against the G.B.B.A. as a bargaining agency, the Board asked the Company and the G.B.B.A. if they could adduce evidence to show authority either on December 21, 1942, when the G.B.B.A. was confirmed as the bargaining agency at Hamilton or on June 24, 1943, when this recognition came to fruition in the concluded collective bargaining agreement. The G.B.B.A. did produce as an exhibit a number of applications from employees of the Hamilton plant for membership in the G.B.B.A. made after the vote on December 10

which totalled in all some 384. Of these applications, only 12 were signed before December 21, 1942, the date on which the Hamilton plant recognized the G.B.B.A. as a collective bargaining agency.

In view of the fact that the Applicant Union claimed the support of the majority of employees in the Hamilton plant, and insisted that by the preference shown by the Company for the G.B.B.A. in face of the contrary expression of opinion by the employees' vote on December 10, the G.B.B.A. could not be considered as the free choice of the employees as their bargaining agency, the Board did not feel that the production of membership cards of both unions would be a satisfactory solution of the question of union recognition, and it became evident that a vote to indicate the preference of the employees would be extremely helpful to the Board in making its ultimate recommendation. Whether such a vote would have been decisive of the issue need not here be considered. There is undoubtedly in existence at the Hamilton plant a fairly large proportion of employees who have been on the pay roll less than a year and whose employment may be of a fluctuating or temporary nature. The Board would, naturally, before making any final recommendation, bear this in mind after hearing full argument and evidence of all parties.

At the outset of the hearing Mr. Robson, on behalf of the applicant union, had requested that a vote of the employees be taken under the supervision of the Department of Labour. The Company and the G.B.B.A. had taken the position that such a vote was unnecessary. In the course of the proceedings, however, the G.B.B.A. had indicated their intention of applying to the Labour Court of Ontario for certification as the collective bargaining agency for the Hamilton plant. In the light of all these facts as to which there was little or no dispute, and in view of the fact that the Board felt that the validity of any collective bargaining agreement depended on proof of the authority of the bargaining agency to bind the persons on whose behalf such agreement was made—in this case all the employees of the Hamilton plant—and with a view to obviating the possibility of two votes of the employees being taken at the Hamilton plant, one for the purpose of procuring evidence for this Board and possibly another for the purpose of some future application before the Labour Court of Ontario, the Board, on July 7, adjourned for a short time, to consider ways and means by which duplication of ascertaining the authority of a collective bargaining agency might be avoided

and how the present dispute might, in light of the admitted facts, be conciliated. After such adjournment it was indicated to the parties to the dispute that the Board felt, on the evidence before it, which was admittedly incomplete, that a vote of the employees would, at some stage of the proceedings before the Board, become necessary. In view of the fact that any final recommendation which the Board might make, would not, of necessity, have any binding effect, the Board felt that it was desirable either to obtain the consent of the parties to the dispute to abide by the result of a vote or, in the event that such consent was not forthcoming, to avoid, if possible, a duplication of obtaining evidence of authority by this Board and the Labour Court of Ontario. This attitude of the Board was explained to the parties as well as the desire of the Board to obtain by a vote evidence as to the employees' preference for the competing unions, but before the Board adjourned for the purpose of having such a vote taken, it placed the following two questions before the two parties to the dispute as well as the G.B.B.A.

(1) Will the Company, the Applicant Union, and the G.B.B.A. agree in writing to abide by the result of the vote of the employees of the Hamilton plant, regarding union recognition and the authority of such union to make a collective bargaining agreement?

(2) Will the Company, the applicant union, and the G.B.B.A. agree to an adjournment of the proceedings before this Board on the undertaking in writing of both unions proceeding within seven days to the Labour Court of Ontario for certification as a collective bargaining agency for the Hamilton plant; the question of which union is to apply and which to intervene, to be a matter of agreement between the unions?

To the first question, the applicant union answered in the affirmative; the G.B.B.A. in the negative, and the Company in the negative, with the qualification that it did not believe a vote necessary as there was a collective bargaining agreement in existence.

The Company, the Applicant Union and the G.B.B.A. all answered the second question in the affirmative, and as a result an agreement was signed by representatives of the Company, of the applicant union and of the G.B.B.A. agreeing to an adjournment of the proceedings before this Board on the undertaking given by the two unions to proceed within seven days to the Labour Court of Ontario for certification. It was further provided in the Agreement, which is annexed to this report, that the applicant union would

forward to the Chairman of this Board a copy of an application for certification by Local 3 Canadian Brotherhood of Glass Workers within seven days, and that failing the production of such application, Local 140, Glass Bottle Blowers Association, might, within another five days, make application for certification before such Court.

It was indicated at the meeting of July 7, and understood by all parties, that on an application being made by either union, proceedings before this Board would be adjourned *sine die*, pending the determination of the certification proceedings in the Labour Court of Ontario, and that after the determination of the proceedings before such Court, this Board might reconvene on notice to all parties, or that further proceedings before this Board might, with the consent of all parties at that time, become unnecessary.

As a copy of an application for certification made to the Labour Court of Ontario by Local No. 3 Canadian Brotherhood of Glass Workers was received by the Chairman of this Board on July 13, which copy is annexed to this report, in accordance with the agreement of all parties and the intention of the Board stated to the parties on July 7, all further proceedings before the present Board are adjourned *sine die* pending the determination of the certification proceedings in the Labour Court of Ontario.

All of which is respectfully submitted.

Dated in Toronto, this 15th day of July, 1943.

Conciliation Work of the Department of Labour During July, 1943

DURING July, 41 new industrial disputes came to the attention of the Industrial Relations Branch, while 39 others which were already known to the Department received further attention. These disputes were dealt with under the Conciliation and Labour Act and were distinct from those handled under the Industrial Disputes Investigation Act, which are described elsewhere in this issue.

The disputes of chief interest or importance which were dealt with by Industrial Relations Officers or, in Ontario, by the additional services of the Provincial Conciliation Officers, are summarized in the statement below. It will be noted that a settlement was secured by the investigating officer in almost every instance.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal and Fredericton. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and North Western Ontario; three officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the Province of Quebec and one officer resident in Fredericton, N.B., represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

FOUNDRY WORKERS, NEW GLASGOW, N.S.—On July 7, the Department was advised that 15 foundry workers of Maritime Sheet and Foundry Company, New Glasgow, N.S., had gone on strike for an increase in wages of five cents per hour in connection with which an application had been made to the Nova Scotia Regional War Labour Board. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., was requested to intervene and on July 9 he advised that work had been resumed pending the decision of the Regional War Labour Board. On July 12 another strike occurred and after further conferences with Mr. Pettigrove, the strikers agreed to return to work on July 15. Again on July 19 another strike took place, the employees refusing to accept the Finding and Direction of the Regional War Labour Board on the request for increased wages. Mr. H. R. Pettigrove was successful in having the employees return to work on July 22, the Regional War Labour Board having agreed to reconsider its decision on the application for increased wages.

COAL MINERS, SYDNEY, N.S.—On July 6, ten employees of the Florence Colliery of Old Sydney Collieries Limited went on strike because of the Company's refusal to grant them wage increases. Their action was supported by 590 fellow employees who ceased work on the same day. Mr. Allan Macdonald, Industrial Relations Officer, interviewed representatives of the United Mine Workers of

America and on July 19 he advised that the employees had returned to work, agreeing to refer their demand for wage increases to the National War Labour Board.

STEELWORKERS, SYDNEY, N.S.—On June 30 the Department was notified of a stoppage of work by five battery men employed at the coke ovens of the Dominion Steel and Coal Corporation, Sydney, N.S. The stoppage was said to have occurred in protest against the employment of one member of the crew. Mr. H. R. Pettigrove, Industrial Relations Officer of the Department at Fredericton, notified the president of the union concerned that the action of the employees was in contravention of a signed agreement with the corporation and suggested that the matter should be dealt with in accordance with the established grievance procedure upon which the employees resumed work on June 30.

GAS AND OIL FIELD WORKERS, HILLSBORO, N.B.—The assistance of the Industrial Relations Branch of the Department was requested on July 16 to investigate a dispute between the New Brunswick Gas and Oil Fields Ltd., and its employees who were said to be unable to reach an agreement with the company concerning wages, working hours, etc. The discharge of a member of the Committee was also the subject of dispute. Mr. H. R. Pettigrove of the Fredericton office of the Department conferred with both parties on July 19 as a result of which arrangements were made for a further conference, the employees agreeing in the meantime to continue at work without interruption.

LOCOMOTIVE WORKS EMPLOYEES, MONTREAL, P.Q.—The Department was notified of a stoppage of work on July 16 by approximately 400 employees of the Montreal Locomotive Works, Ltd., Montreal, P.Q. The strike was said to be based on the desires of the employees for payment of the full cost-of-living bonus. They returned to work on July 17 on the understanding that application would be made by the company to the R.W.L.B. for permission to pay the bonus as requested.

PAPER MILL WORKERS, TEMISKAMING, QUE.—The employees of the Canadian International Paper Company, Temiskaming, Que., threatened on July 19 to stay away from work on Tuesday, July 20, unless a better understanding was reached between the management and the union, Local 233, International Brotherhood of Pulp, Sulphite and Paper Mill Workers and until the National War Labour Board gave a favourable date for the hearing of the union's request for wage adjustments. Officials of the union were advised that the

National War Labour Board had already given the union leave to appeal against a decision of the Regional War Labour Board and that steps should be taken to follow up this appeal without stoppage of work. The union later advised that they had agreed to maintain productive operations to permit the hearing of the appeal by the National War Labour Board.

NEEDLEWORKERS, BEDFORD, P.Q.—The Department was advised on July 16 of situation affecting the employees of the Torrington Co., Bedford, P.Q., said to be due to the failure of these employees to secure adjustments in the cost-of-living bonus and the refusal of the company to discuss the terms of a proposed collective agreement. The union, being the National Union of Needle Trades, was advised of the proper procedure to be followed regarding demands for wage, cost-of-living bonus adjustments, and the obtaining of a collective agreement.

SHIPYARD WORKERS, LAUZON, P.Q.—A stoppage of work occurred in the plant of the Davie Shipbuilding & Repairing Company, Lauzon, P.Q., on July 24 over the action of the company in dismissing an employee allegedly without justification. After conferences with the company and officials of the union, Local No. 3, Boilermakers & Iron Shipbuilders of Canada (C.C.L.), both parties agreed to accept the decision of an arbitrator to be appointed by the Minister of Labour. Accordingly Mr. Bernard Devlin, K.C., of the city of Quebec, was appointed arbitrator and at the close of the month his report had not been received.

RAILWAY SHOP EMPLOYEES, MONTREAL, P.Q.—The Department was notified on July 20 of a strike of some 800 shop labourers employed at the C.P.R. Angus Shops, Montreal. The strike was said to be because of dissatisfaction with the existing rates of pay and working conditions of this classification of employees. Although there was some doubt as to whether or not the employees were organized, the International Brotherhood of Firemen and Oilers was said to be acting on their behalf. The following day some 700 helpers and an additional number of shop labourers joined the strike which then involved approximately 1,600 employees. Although the strike was unauthorized by the union, the officers of the union and of Division No. 4 Railway Employees Department, A.F.L., held discussions with the Company, but as there appeared to be some danger of the strike spreading, the Company decided to close the plant for one week, an arrangement which had formerly been made for a later period.

After the week's closure and as the result of discussions held in the meantime, work was resumed and it was understood that an application would be made to the National War Labour Board for wage adjustments. Normal operations were resumed on July 30.

COAL MINERS, MINTO, N.B.—Approximately 15 men employed by the Minto Coal Company, Minto, N.B., declined to work on the longwall in this company's mine, alleging dangerous conditions. The matter was investigated by Mr. H. R. Pettigrove, Industrial Relations Officer of the Department at Fredericton, N.B., who held a joint conference on July 23. A report from the Deputy Mines Inspector of the province indicated that the longwall conditions did not warrant stoppage in the operations and one shift of miners resumed work on July 30, the balance resuming the following day.

FOUNDRY WORKERS, SHERBROOKE, P.Q.—A strike of the employees of the Canadian Brake Shoe Company, Sherbrooke, P.Q., occurred on July 26 in consequence of the demands of the employees for a cost-of-living bonus adjustment from 60 cents per week to \$4.25 per week. The conciliation service of the Provincial Department of Labour was requested to intervene in this dispute and as a result of its efforts, work was resumed on July 29.

FERTILIZER WORKERS, QUEBEC, P.Q.—The employees of the International Fertilizer Ltd., Quebec, P.Q., ceased work on July 28 for an increase in basic wage rates. The employees are members of the Federal Workers Local 21869 (A.F.L.), and the strike was said to be in protest of the refusal of the Quebec Regional War Labour Board to increase wages. The Provincial Department of Labour was requested to assign an officer to this dispute and as a result of his efforts, work was resumed on August 4, the company having agreed to make a joint application to the Regional War Labour Board for incentive wage adjustments.

STEEL PLANT WORKERS, SAULT STE. MARIE, ONT.—All labour in two mills of the Algoma Steel Corporation, Sault Ste. Marie, Ont., ceased work on July 18 to enforce demands for wage adjustments for the purpose of maintaining differentials following the institution of a higher minimum earnings rate. The employees concerned were members of a local union of the United Steelworkers of America. The union advised the employees to resume work pending the preparation of a submission to the National War Labour Board and normal operations were resumed on the night of July 20. On July 23, 102 bricklayers' helpers employed by this company, also

ceased work demanding adjustments in their rates of pay. Some of these employees returned to work on July 27 pending negotiations. On July 26, however, 21 cranemen employed in the Merchant Mills, ceased work, resulting in all operations in the mill having to close down. These cranemen returned to work on July 27 at which time the Department was advised that all bricklayers' helpers were back at work and that further negotiations would be conducted on wage matters.

SHIPYARD WORKERS, SOREL, P.Q.—Six thousand employees of Marine Industries Ltd., Sorel, P.Q., ceased work on July 17 for adjustments of wages and cost-of-living bonus. Mr. F. LaFortune, Industrial Relations Officer, Ottawa, was at Sorel at the time and he was able to induce the employees to return to work on Monday morning, July 19, but only partial operations were resumed at that time and later in the morning those who had reported for work again ceased operations. After conferences between the Departmental representative and representatives of the company and the employees, work was resumed at 1 p.m. on July 20. Some adjustments in classifications were effected and in addition, shortly afterwards, the National War Labour Board approved an increase of 5 cents per hour for improvers, a classification which had been omitted from a previous application to the National War Labour Board.

SHIPYARD WORKERS, MONTREAL, P.Q.—On July 14 the Department was advised that the employees of Vickers Boiler Shop had ceased work in protest against not having received the full cost-of-living bonus which was then the subject of a joint application by the company and the unions to the National War Labour Board. Some 300 boilermakers were said to be involved. Later word was received that the welders employed in the shipyard had ceased work in sympathy and an investigation was made by Mr. Raoul Trepanier, Senior Industrial Relations Officer of the Department at Montreal, but by July 17 the strike had spread to all sections of the yard and operations ceased entirely. The employees were said to be organized in a number of craft unions affiliated with the American Federation of Labour and one large group was affiliated with an organization charted by the Canadian Congress of Labour. On the morning of July 20 a delegation representing the former groups visited the Department and conferred with the Director of Industrial Relations and the Chief Executive Officer of the National War Labour Board at which time it was made clear that the National War Labour Board was giving active consideration to the request for cost-of-living bonus adjust-

ments but that the Board would not render a decision while the men were on strike. During the same afternoon, a delegation representing the Canadian Congress of Labour Union also discussed the matter with the Director of Industrial Relations and other officers of the Department, to which delegation the same reply was made. Both delegations requested the services of an Industrial Relations Officer to proceed to Montreal to endeavour to bring about a resumption of work and Mr. Bernard Wilson of Ottawa left for Montreal the same night.

As the unions affiliated with the A.F. of L. had already indicated the willingness of their members to return to work and await the decision of the National War Labour Board, Mr. Wilson undertook to arrange a conference in Montreal between representatives of the company and of the Canadian Congress of Labour union with respect to getting a similar commitment. Work was resumed in all Departments on July 23. Subsequently, the National War Labour Board issued a directive authorizing payment in all shipyards in Eastern Canada of the full cost-of-living bonus and of a plan to inaugurate vacations with pay in all shipyards in Canada.

Representation Votes

By joint consent of the three parties concerned, and under the supervision of Mr. H. S. Johnstone, Industrial Relations Officer,

Dominion Department of Labour, Winnipeg, Man., a representation vote was conducted on July 7 among the employees of Burns and Company, Ltd., Regina, Sask., to determine the bargaining agency through which they wished to be represented in negotiations with the Company. The result of the ballot was as follows: number of eligible voters, 265; number of votes cast, 224; number of votes in favour of the Employees' Relations Committee, 34; number in favour of Local 226, United Packinghouse Workers of America, 187; spoiled ballots, 2. Previous to the taking of the vote, the Company had agreed to recognize the agency favoured by a majority of the employees.

On July 14, Mr. H. S. Johnstone, Industrial Relations Officer, Dominion Department of Labour, Winnipeg, Man., supervised the taking of a representation vote at the plant of Burns & Company, Ltd., Winnipeg, to determine the employees' bargaining agency. The result of the ballot was as follows: number of eligible voters, 518; number of votes cast, 380; number of votes cast in favour of the Plant Employees' Relations Committee, 41; number in favour of Local 224, United Packinghouse Workers of America, 334; spoiled ballots, 5. In a circular issued by the Company prior to the taking of the vote, employees were advised that the Company was prepared to recognize the agency desired by the majority of the employees.

Strikes and Lockouts in Canada During July, 1943

THE number of strikes and lockouts reported for the month was thirteen less than for the previous month, and showed a decrease of 28 per cent in the number of workers involved and 50 per cent in the time loss in man working days. During July, 42 strikes, involving 15,984 workers with a time loss of 66,971 days, were recorded as in progress, while in June there were 55 strikes, with 22,331 workers involved and a time loss of 140,885 days. The figures recorded for July, 1942, show that there were 68 strikes, involving 21,736 workers, with a time loss of 53,498 days.

Two strikes, one involving metal factory workers at Galt, which has been in progress since May, and one involving shipyard workers at Montreal, accounted for 45 per cent of the time loss. These two strikes, along with three others, namely, coal miners at Florence,

N.S., metal factory workers at Montreal, and shipyard workers at Sorel, caused about 75 per cent of the time loss.

Nine strikes, involving 1,693 workers, were carried over from June and 33 commenced during July. Of these 42 disputes, 36 were terminated during the month. Four resulted in favour of the workers, ten in favour of the employers, four were compromise settlements, and seventeen were indefinite in result, work being resumed pending final settlement of each dispute. At the end of the month seven strikes were recorded as unterminated: disputes involving fur factory workers at Toronto, at Quebec, and at Pointe-aux-Trembles, P.Q., metal factory workers at Galt, clothing factory workers at Farnham, P.Q., chemical plant workers at Quebec, and glass factory workers at Montreal.

In addition to the strikes listed in the table below, there were three strikes commencing in July with respect to which few details have as yet been received. These three disputes involved coal miners at Alexo, Alta., packinghouse workers at Moose Jaw, Sask., and waitresses at Moncton, N.B.

The record does not include minor strikes such as are defined in another paragraph, nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Such strikes are listed in this paragraph for a period up to one year after their removal from the table of current strikes.

The following table gives information for July and June, 1943, and July, 1942:—

Date	Number of strikes	Number of workers involved	Time loss in man working days
*July, 1943.....	42	15,984	66,971
*June, 1943.....	55	22,331	140,885
July, 1942.....	68	21,736	53,498

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1943*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to July, 1943				
MANUFACTURING—				
<i>Fur and Leather Products—</i>				
Fur factory workers, Toronto, Ont.	1	20	300	Commenced April 19, 1943; against agreement signed with another union; un-terminated.
Fur factory workers, Quebec, P.Q.	1	33	450	Commenced May 12, 1943; for union recognition and agreement with increased wages and against dismissal of two workers; un-terminated.
Fur factory workers, Pointe-aux-Trembles, P.Q.	1	20	300	Commenced May 13, 1943; against an agreement signed with another union; un-terminated.
<i>Metal Products—</i>				
Motor vehicles factory workers, Hamilton, Ont.	1	225	5,200	Commenced May 10, 1943; for union recognition; terminated July 29; conciliation (federal); return of workers pending decision of Ontario Labour Court re certification of union as bargaining agency; indefinite.
Metal factory workers, Galt, Ont.	8	625	12,000	Commenced May 21, 1943; for union recognition; un-terminated.
Foundry workers, Hull, P.Q.	1	(a) 409	1,200	Commenced June 29, 1943; for greater increase in cost of living bonus than approved by Regional War Labour Board; terminated July 3; conciliation (federal); return of workers pending appeal to National War Labour Board; indefinite.
<i>Miscellaneous—</i>				
Upholsterers, Montreal, P.Q.	4	(b) 344	1,410	Commenced June 4, 1943; for two weeks' vacation with pay; terminated July 13; negotiations; return of workers; in favour of employers.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the July issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1942". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in May was 139 and 10 were still in progress from the previous month, making a total of 149

disputes in progress during the month; 63,500 workers were involved in the disputes in progress during the month and the time loss was 178,000 working days.

Of the 139 disputes beginning in May, 24 arose out of demands for increased wages and 54 over other wage questions; 10 on questions as to hours; 19 over questions as to employment of particular classes or persons; 31 over other questions as to working arrangements; one on a question of trade union principle. Final settlements were reached in 115 disputes, of which 27 were settled in favour of the workers, 71 in favour of employers and 17 resulted in compromises; in 25 other disputes, work was resumed pending negotiations.

United States

The number of strikes beginning in June was 400, involving 950,000 workers in these new strikes. The time loss for all disputes in progress during the month was 4,750,000 man working days. About 85 per cent of the workers involved and about 90 per cent of the time loss in June was due to the two general coal mining strikes.

Disciplinary Action of Union Against Strikers

Action taken by a union in fining some of its members for participating in an unauthorized strike was commended by the United States War Labour Board in a recent decision. The assumption of responsibility by American labour in enforcing its no-strike pledge deserves support, the Board asserted, in denying the request of the employer that the Board withdraw the maintenance of membership clause from the union's contract with the company.

The Board had directed, in December, 1942, that the union and company should include in their contract a standard maintenance of membership clause (which provides that no union members may terminate their employment for the duration of the contract). However, because of the fact that a number of strikes had taken place at the plant in the year 1942 which the local union had taken no effective steps to prevent, the Board had made the award conditional.

In March, 1943, another brief work stoppage occurred, affecting 179 employees. A hearing took place before the Regional War Labour Board, which ordered the company to reinstate two discharged employees "after a 4-weeks' disciplinary lay-off without pay" and directed

the union, which had not authorized the stoppage, to discipline the strikers. The union complied by fining the 179 workers concerned \$5 each, the fines to be turned over to a war relief agency or other charity.

The company appealed the Regional Board's decision to the National Board, and also asked that the maintenance of membership clause be withdrawn because of the strike.

The National Board unanimously upheld the Regional Board's decision and refused to rescind the union security clause. The Board found that "the company was partially responsible for provoking the strike" but declared that this "does not alter the fact that a strike took place."

"Two wrongs do not make a right", the Board continued " . . . It is precisely when provocation exists that the pledge to refrain from work stoppages is tested. It is only then that the pledge not to strike has any real significance."

Commenting on the difficult position in which the union found itself in fining its members, the Board commended the action, and stated that it was indication of the union's responsibility and of its right to have the maintenance of membership clause continued.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining: Non-Ferrous Smelting and Quarrying

KILMAR, QUEBEC.—CANADIAN REFRACTORIES LIMITED AND MAGNESITE WORKERS FEDERAL UNION, LOCAL 145.

See below under "Manufacturing: Non-Metallic Minerals, Chemicals, etc."

Manufacturing: Metal Products

SAINT JOHN, NEW BRUNSWICK.—JAMES PENDER & CO. LTD. AND UNITED STEELWORKERS OF AMERICA (LOCAL 2957).

Agreement reached following an application for a board under the Industrial Disputes Investigation Act, which application was withdrawn when this agreement was reached with the assistance of an Industrial Disputes Inquiry Commissioner (see p. 1092).

Agreement to be in effect from July 10, 1943, to July 10, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the collective bargaining agency for the employees who are members of the union; the company agrees to bargain with no other organization as long as this union represents a majority of employees covered by this agreement. No discrimination against any employee by the company or the union on account of his union membership or the lack of it.

Hours: 8 per day, 48 per week. Overtime is payable at time and one-half; double time for work on Sundays and holidays. Provision is made for seniority rights and for the settlement of grievances.

BEAUHARNOIS, QUEBEC.—ST. LAWRENCE ALLOYS AND METALS LTD. AND EMPLOYEES, REPRESENTED BY ALLOYS AND METAL WORKERS' UNION.

Agreement made May 8, 1943, with provisions retroactive to April 18, 1943, is to be in effect

for one year and also for the following year if no notice given. The company recognizes the union as the bargaining agency for all hourly paid employees. No discrimination against any employee because of his union membership.

Hours: 8 per day, 48 per week. Overtime is payable at time and one-half. Work on nine specified holidays is payable at time and one-half, subject to the approval of the Regional War Labour Board. Vacation: for employees with 16 months' service at May 1, of any year, one week's vacation with pay for 56 hours; for employees with one year but less than 16 months at May 1, one week's vacation with pay for 48 hours. Hourly wage rates for some classes: firemen and tappers 70 cents, assistant tappers 60 cents, mix car operators 70 cents, mixmen 55 cents, mixmen on charcoal 65 cents, cranemen 70 cents, furnace repairmen 65 to 75 cents, slippermen 65 to 70 cents, pipefitters 75 cents, welders 65 to 75 cents, electricians 70 to 90 cents, electrician's helper 60 to 65 cents, machinists 75 to 80 cents, machinists' helpers 50 to 55 cents, locomotive crane operator 85 cents, locomotive crane fireman 55 to 65 cents, gas shovel operator 75 cents, blacksmiths 70 to 75 cents, oilerman 70 cents, brakeman 65 cents, truck driver 60 cents, scrap crusher men 55 cents, yard labour 50 to 55 cents, carpenters 70 and 75 cents, clerks 50 to 65 cents, labourers (ball mill) 60 to 65 cents. The cost of living bonus to be paid as provided by law. Provision is made for seniority rights and the settlement of grievances.

BELLEVILLE, ONTARIO.—RELIANCE AIRCRAFT AND TOOL CO. LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS.

Agreement reached with the assistance of an officer of the Department of Labour. Agreement to be in effect from June 29, 1943, to June 28, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the bargaining agency for all employees except the classes excluded. The company agrees to deduct monthly dues from pay cheques of union members so authorizing them. No coercion to be used by the company or by the union against any employee on account of union membership or non-membership. Schedules of hours, wage rates and vacations with pay are to form part of this agreement as soon as the decision of the Regional War Labour Board is reached. Provisions for seniority rights and for the settlement of grievances are included.

TORONTO, ONTARIO.—METALLIC ROOFING CO. LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA.

Agreement reached following an application for a board under the Industrial Disputes Investigation Act, after which an Industrial

Disputes Inquiry Commissioner assisted in bringing about this agreement (see p. 1092). Agreement to be in effect from July 15, 1943, to July 14, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the exclusive collective bargaining agency for all employees. No discrimination against employees by the company or the union by reason of their membership or non-membership in the union. The company to give preference in employment to dependents of enlisted employees, if suitable. Hours and wages are not stipulated, but it is provided that there be a 10-minute rest period in each shift. Provision is made for a joint plant safety committee, for seniority rights and for the settlement of grievances.

HAMILTON, ONTARIO.—INTERNATIONAL HARVESTER CO. OF CANADA LTD., HAMILTON HARVESTER WORKS, AND UNITED STEEL WORKERS OF AMERICA, LOCAL 2868.

Agreement to be in effect from June 28, 1943, to June 28, 1944, and thereafter subject to 30 days' notice. The company recognizes the union as the sole representative of the employees. No discrimination or coercion by the company or the union against employees for being or not being union members.

Hours: 9 per day, a 45-hour week; employees will not regularly be scheduled to work more than 10 hours in any day or 60 in any week. Overtime is payable at time and one-half; work on Sundays and holidays also at time and one-half.

Wage rates prevailing when agreement made to remain in effect until either party proposes an increase or decrease. The company to continue to pay a cost of living bonus in accordance with federal government orders in council. Vacation: one week's vacation with pay for employees of one year and less than five years' service and regular attendance during the preceding year; two weeks to employees of five or more years' service. Apprentices limited to 10 per cent of the total number of employees in any one of the skilled trades. Provision is made for seniority rights and for the settlement of grievances.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

KILMAR, QUEBEC.—CANADIAN REFRACTORIES LIMITED AND MAGNESITE WORKERS FEDERAL UNION, LOCAL 145 OF THE TRADES AND LABOUR CONGRESS OF CANADA.

Agreement reached with the assistance of an Industrial Relations Officer of the Department of Labour. Agreement to be in effect from July 1, 1943, to June 30, 1944, and thereafter subject to notice. The Company recognizes the union as the collective bargaining agency for employees of the Company who are members of the union. The Company will not recognize any other bargaining agency during the life of this agreement. Neither the Company nor the union will discriminate against any employee on account of his union membership or non-membership or union activity.

Hours: for day workers, 10 per day, 5 on Saturdays, a 55-hour week; for shift workers at the plant, 8 per day, 48 per week; for shift workers at the mine, 8 per day (collar to collar), 48 per week, except cage tenders and hoistmen who work $8\frac{1}{2}$ hours per shift and 51 per week. Overtime is payable at time and one half; work on an employee's regular day of rest, double time; work on legal holidays at time and one half. Wages: the union will apply to the War Labour Board for wage increases, and both parties will abide by the findings. Vacation: subject to the approval of the National War Labour Board, one week's vacation with pay to employees with at least one year's continuous service. The Company has the right to deduct one day from this vacation for each day the employee is absent from work during the previous year without written leave or medical certificate, provided that there will be no such penalty for absenteeism occurring before the signing of this agreement.

A joint production committee to be formed. The Company agrees to maintain safety and health measures, and undertakes to make certain improvements in the working premises and living quarters of the workers. Provision is also made for seniority rights and for the settlement of grievances.

Collective Agreement Act, Quebec

Recent Proceedings under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the applica-

tion, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of two new agreements, the amendment of five agreements and the extension of the period of three agreements, all of which are noted below. A request for the extension of a new agreement for retail stores

at Chicoutimi was published in the *Quebec Official Gazette*, July 10. Requests for the amendment of the agreements for barbers and hairdressers at St. Hyacinthe, the sheet metal industry at Montreal, barbers and hairdressers at Quebec were published in the issue of July 3; for the amendment of the agreement for the cloak and suit industry throughout the Province, in the issue of July 10; for the amendment of the agreement for dairy employees at Quebec, the paper box (corrugated paper) manufacturing industry throughout the Province, and garages and service stations at Montreal, in the issue of July 17; for the amendment of the agreement for the passenger car and bus industry, Montreal, municipal employees (permanent) at Sherbrooke, and bakers at Montreal, in the issue of July 31.

In addition, Orders in Council were published in the *Quebec Official Gazette* during July, approving or amending the constitution and by-laws of certain joint committees, and others approving the levy of assessment on the parties, or amending previous Orders in Council in this connection by certain other joint committees.

Manufacturing: Printing and Publishing

PRINTING TRADES, QUEBEC CITY AND DISTRICT.—An Order in Council, dated July 22, and gazetted July 31 extends the term of this agreement (L.G., April, 1940, p. 388; Oct., 1941, p. 183; April, 1943, p. 490, July, p. 989) to September 1, 1943.

PRINTING TRADES, MONTREAL.—An Order in Council, dated June 23, and gazetted July 3, extends the term of this agreement (L.G., Jan., 1943, p. 88, and previous issues as noted therein; and April, 1943, p. 490) to September 30, 1943.

Construction: Buildings and Structures

BUILDING TRADES, SHERBROOKE.—An Order in Council, dated July 10, and gazetted July 17, amends the previous Orders in Council for these trades (L.G., Oct., 1942, p. 1209, and Feb., 1943, p. 220) by providing that the cost of living bonus of 5 cents per hour be continued without change to January 16, 1944.

BUILDING TRADES, MONTREAL.—An order in Council, dated July 22, and gazetted July 31, extends the term of this agreement (L.G., Nov., 1942, p. 1348, Dec., p. 1490; April, 1943, p. 490; May, p. 639) to March 31, 1944.

Trade

RETAIL STORES, BAKERIES, HOTELS, ETC., MAGOG.—An Order in Council, dated July 22, and gazetted July 24, amends the agreement for these establishments (L.G., Nov., 1940, p. 1203; March, 1941, p. 335; Aug., 1942, p. 978) by providing for the closing of clothing stores, novelty shops, shoe, furniture, jewellery and department stores at noon on Wednesday except in those weeks in which a holiday occurs. In commercial establishments, other than grocery and butcher shops, weekly hours are reduced from 65 to 59½ hours. In department stores, the weekly hours for female employees is reduced from 54 to 48½ hours.

Service: Public Administration

POLICE DEPARTMENT EMPLOYEES, QUEBEC CITY.—An Order in Council, dated June 23, and gazetted July 3, amends the previous Orders in Council for these employees (L.G., Aug., 1940, p. 869; July, 1941, p. 854; July, 1942, p. 857). The class of cadet at \$18 per week is struck off; constables to receive \$23 per week the 1st of May following the date of their employment. Detectives at \$1,800 to \$2,100 per year and sergeant detectives at \$2,100 to \$2,500 are added to the wage scale.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, THREE RIVERS.—An Order in Council, dated June 23, and gazetted July 3, amends the previous Orders in Council for these trades (L.G., March, 1942, p. 353, Sept., p. 1098, and April, 1943, p. 490). Closing hours in Shawinigan Falls are made one hour earlier on four days and one hour later on Friday.

FUNERAL UNDERTAKERS, MONTREAL.—An Order in Council, dated July 10, and gazetted July 17, extends the term of the 1942 agreement (L.G., March, 1942, p. 354; March, 1943, p. 353, May, p. 639, and July, p. 990) to July 24, 1943.

Another Order in Council, also dated July 10, and gazetted July 17, makes obligatory the terms of a new agreement between La Section des Directeurs de Funérailles du district de Montréal de l'Association des Marchands détaillants du Canada (The Montreal District Funeral Directors' Section of the Retail Merchants Association) and Le Syndicat des Employés des Pompes funèbres de Montréal, inc. (The Union of Funeral Undertakers' Employees of Montreal, Inc.). Agreement to be in effect from July 17, 1943, to July 16, 1944, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect (L.G., March, 1942, p. 354) with the exception of the cost of living bonus which is fixed at \$1.50 per week or 6 per cent of basic wages as the case may be, this bonus to be variable with changes in the cost of living index number, as provided by the National War Labour Board. Apprenticeship is for two years.

BARBERS AND HAIRDRESSERS, VALLEYFIELD AND BEAUHARNOIS.—An Order in Council, dated July 10, and gazetted July 17, makes obligatory the terms of a new agreement between Le Syndicat des Maîtres-Barbiers et Coiffeurs de Salaberry de Valleyfield (The Union of Master Barbers and Hairdressers of Salaberry de Valleyfield) and Le Syndicat des Employés Barbiers et Coiffeurs de Salaberry de Valleyfield (The Union of Employed Barbers and Hairdressers of Salaberry de Valleyfield). Agreement to be in effect from July 17, 1943, to July 16, 1944, and thereafter from year to year subject to notice.

Hours for both barbers and hairdressers: 57 per week. Weekly wage rates: at Valleyfield, for journeymen barbers and hairdressers, \$15 per week plus 50 per cent commission on all gross receipts in excess of \$25 made by them during a week; at Beauharnois, \$17 per week plus 50 per cent commission on all gross receipts in excess of \$27 made by them during a week. A cost of living bonus is provided for. Apprenticeship is for three years, and apprentices to be paid from \$6 per week during second six months to \$12 after third six months. A scale of minimum prices to be charged customers is also included.

Wages

Incentive Wage Plans in the United States

Study Indicates Higher Earnings Received by Workers Under Incentive Plans—Guiding Principles Established by U.S. War Production Board

HIGHER earnings were found to be received by workers paid under an incentive plan than by workers in identical occupations paid straight-time, according to a survey of three important industries conducted by the United States Bureau of Labour Statistics, described in the *Monthly Labour Review* for May. The survey covered several hundred plants in the machinery manufacture, cotton-textile manufacture, and primary fabrication of non-ferrous metals industries. The data on median earnings showed an advantage to incentive workers ranging from 12.1 per cent in non-ferrous metals to 18.2 per cent in machinery manufacture. In roughly half of the occupations in which comparisons were made, incentive workers were earning, per hour, between 10 and 20 per cent more than the time workers. Differences of less than 5 per cent or more than 30 per cent were rarely encountered. The incentive-wage advantage occurred in both union and non-union establishments.

"These findings..." the report states, "imply the maintenance of substantially higher levels of production under incentive systems than under systems of time payment. The higher earnings may result from more intensive effort by the workers themselves, or from greater efficiency on the part of management, or from both of these influences."

Many kinds of incentive plans were found to be in effect, ranging from simple piece-rate systems to complicated base-rate and bonus systems. The object of the plans generally was to increase the productivity of workers by establishing a relationship between output and earnings, so that the application of greater energy, dexterity or skill would be rewarded by an increase in pay.

Principles Recommended by War Production Board

A new interest in the possibilities of wage incentive plans, both on the part of unions and management has been enhanced in the United States by President Roosevelt's "hold-the-line" order of April 8, aimed at stabilizing wages and prices, which specifically mentioned the payment of incentive wages as one of the circumstances under which wage adjustments might be authorized.

On April 30 a statement was issued by the U.S. War Production Board under the heading "Essential Features of an Effective Wage Incentive Plan." The statement stressed the following principles:

1. Production Standards

For the purpose of this presentation the term "Production Standard" means the amount of work which should be produced in one hour by a qualified operator working at a normal rate of speed under normal operating conditions. It should represent the amount of work which could reasonably be expected from a qualified operator who is paid for his services on a straight-time basis without any financial incentive for attaining maximum production. . . .

Before undertaking the installation of an incentive plan, the authorized representatives of the workers to which it will apply should be fully informed regarding the methods, procedures and objectives involved, and their aid and counsel should be continuously solicited in carrying the plan through to a successful completion.

2. Guaranteed Standards

To ensure full and unrestricted production and complete confidence in the plan, the management should formally guarantee the workers that the standards as originally established will not be increased unless technological developments in the materials or methods employed justify such action, and even in those instances the concurrence of the workers or their representatives should be secured before the change is made effective.

3. Equitable Base Rates

The term "base rate" has reference to the worker's hourly rate of pay, which is ordinarily the going-market or prevailing-rate for the type of work in which engaged. It is the rate that would ordinarily be paid to the worker regardless of whether or not he is given an opportunity to earn an additional amount under an incentive plan.

4. Guaranteed Earnings

Management should guarantee each worker that he will be paid at his base rate for all authorized time spent on the company premises regardless of whether or not he attains the production standards established for a particular job.

5. Lost Time

A careful and accurate record should be kept of all time lost by the worker due to no fault of his own. Not only should the worker be paid for this time at his regular base rate, but also this time should be eliminated in determining whether or not the worker met or exceeded the production standards for the jobs on which engaged.

6. Full Value of Time Saved

If the worker produces in excess of the established standards, he should receive the full value of the time represented by this excess production. For example, if the production standard is one piece per hour and the worker in an eight-hour day produced ten good pieces, he has in effect saved two hours for which he should be paid at his regular base rate.

7. Maximum Coverage

It is to the best interest of all parties concerned to cover as much of the work with standards as is practical or possible in order that the maximum amount of the worker's time is spent on rated jobs.

8. Substantial Bonuses for Exceeding Standards

Assuming the worker receives the full value of all time saved, the production standard should be set so that a qualified worker working at his best skill and effort could produce

an average up to 25 per cent of his base rate for each hour on rated jobs. Experience has demonstrated that the worker will put forth his best efforts if in so doing he is given an opportunity to increase his earnings by 25 per cent.

9. Readily Understandable

It is conceded that the most readily understood and the most simple wage-incentive plan from all standpoints is the straight piecework system under which money values are established for each unit of production and that any deviation from that plan inevitably adds complications. It is desirable to maintain the utmost simplicity in connection with any procedure or technique that involves an individual's earnings.

10. Flexibility

The basic principles of the plan should be applicable to either group or individual standards.

Wages and Hours of Seamen in Four Countries

AN article appearing in the July issue of the *International Labour Review* deals with the "Rates of Pay and Working Hours of Seafarers" in the merchant navies of Belgium, Great Britain, the Netherlands and Norway. It was prepared as a preliminary answer to a request by the Joint Maritime Commission for "a statement on the present position, specifying the wartime changes, concerning the conditions of service of seafarers of the principal maritime countries, with special reference to hours of work at sea and ashore, manning, holidays with pay, security of employment, accommodation, pensions, training and recruitment". It is pointed out that "the preparation of so comprehensive a statement is obviously an undertaking of considerable magnitude, but a modest survey of part of the field may have an interim value". Other countries, and conditions of service other than wages and hours in the four countries here dealt with, will be covered in later articles.

It is impossible to make an entirely satisfactory comparison of rates of pay on an international basis because rates vary greatly according to the size and type of ship, etc., and the special factors in an individual country. The authors of the article have made a selection of data in the interests of simplicity but they point out that no selection can be regarded as really typical. They go on to state, however, that

while it is necessary to emphasize the difficulties in the way of making international comparisons, it would seem possible to recognize also a definite tendency towards uniformity in conditions of service. This is a natural consequence of the conditions created by the war. But since shipping is at all times the most international of all industries, the wartime experience may suggest consid-

eration of the possibility of establishing after the war at any rate a greater degree of uniformity than prevailed before it.

Wages

Representative rates are as follows. Chief engineers are paid £27 monthly on Belgian ships, £32-17-6 on ships of Great Britain, £41-11-7 or £45-18-5 depending on their certificate on Dutch ships and £38-0-5 on Norwegian ships (of 3,000 to 4,000 I.H.P.). In all cases increments are paid on the completion of specified periods of service. Boatswains on Belgian ships receive £13-15-0 per month, on ships of Great Britain £16 to £18-5-0 depending on the tonnage of the vessel, on Dutch ships a minimum of £16-14-3 and on Norwegian ships £15-9-7. The monthly rate for able seamen is £12-10-0 on Belgian ships, £14 on British ships, £15-11-11 on Dutch ships and £14-9-3 on Norwegian ships. All Belgian officers and ratings are eligible for continuous service premiums which are deposited to their account at the end of each year and may be withdrawn after the liberation of the country, and the Netherlands Government has set up a committee to study a system of deferred pay. Certain other supplements, notably war risk bonuses, are paid in all four countries, and deductions are made for various purposes, chiefly pension schemes.

Hours

The standard hours for ratings in the deck department and the stokehold or engine room are 56 per week on the ships of Belgium and Great Britain and 8 hours per day on vessels of the Netherlands and Norway. Longer hours

are permitted on sailing and arrival days and under certain other circumstances. In the catering department, the standard hours are 10 per day in Belgian, Dutch and Norwegian ships and 70 per week and 10 per day on ships of Great Britain, and they must fall within a

specified period of the day. In port the standard hours in the catering department are shorter than these. Hours in excess of the standard hours must be paid at special rates which vary from country to country and according to the rank of the seaman.

Fair Wage Schedule for Public and Private Construction in Manitoba

THE 1943-44 schedule of minimum hourly rates and maximum hours prescribed each year for public and certain private construction works in Manitoba under the Fair Wage Act was gazetted July 17 and is to be in effect from July 15, 1943, to April 30, 1944. The Fair Wage Act applies to "any public work or public works authorized by the Minister of Public Works for the execution of which a contract has or contracts have been entered into between the Minister of Public Works and an employer." Private works to which the Act applies include the building, construction, remodelling, demolition or repairing of any building or construction work within the Greater Winnipeg Water District; or any such work in a city or town over 2,000 in population or in any portion of the province to which the Lieutenant-Governor in Council may extend the provisions of the Act, provided that the total cost of such work, irrespective of the number of contracts made, exceeds \$100. Not covered is repair or maintenance work done by a regular maintenance staff on any property by or under the immediate direction or control of the owner, occupant or tenant of the property as long as such work is not

undertaken with a view to the sale or rental of the property.

In the 1942-43 schedule most of the hourly rates were increased by five cents. This was to be regarded as a cost-of-living bonus. In the present schedule the five-cent bonus has been extended to all the classifications which did not receive the increase or received one of less than 5 cents, except that no bonus has been added to the 55-cent basic rate fixed for the hire of trucks used on construction work. A bonus of 60 cents a week has been prescribed for watchmen for whom weekly rates are fixed in the schedule. The cost-of-living bonus is now listed separately and overtime is, in future, to be paid for at one and one-half times or twice the basic rate exclusive of bonus. One or two other changes have been made in the new schedule. The minimum rate for unskilled labourers is to be the maximum of the range of rates prescribed for them last year. After November 1, 1943, the basic rates for painters, decorators, paper-hangers and glaziers are to be raised by five cents in addition to the five-cent cost-of-living bonus. The schedule which appears below was approved by the Manitoba Regional War Labour Board on July 8.

FAIR WAGE SCHEDULE

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Gov't. Work, Winnipeg and Radius of 30 Miles.		B—Other Than Area Described in "A" (applies to private work when pop. exceeds 2,000).		Cost of Living Bonus Per Hour
	Basic Wage Rate	Hours	Basic Wage Rate	Hours	
	Minimum Per Hour	Maximum Per Week	Minimum Per Hour	Maximum Per Week	
1. Asbestos workers—					
(a) Journeymen.....	\$.80	44	\$.80	50	\$.05
(b) Improvers.....	.65	44	.65	50	.05
2. Asphalters—					
(a) Finishers.....	.63	44	.58	50	.05
(b) Rakers.....	.58½	44	.54	50	.05
(c) Tampers.....	.50	44	.45	50	.05
3. Blacksmiths.....	.70	44	.65	50	.05
4. Boiler-makers on construction or erection work.....	.85	44	.85	50	.05
(a) Helpers.....	.55	44	.55	50	.05

FAIR WAGE SCHEDULE—Continued

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Gov't. Work, Winnipeg and Radius of 30 Miles.		B—Other Than Area Described in "A" (applies to private work when pop. exceeds 2,000).		Cost of Living Bonus Per Hour
	Basic Wage Rate	Hours	Basic Wage Rate	Hours	
	Minimum Per Hour	Maximum Per Week	Minimum Per Hour	Maximum Per Week	
5. Bricklayers.....	1.15	44	1.00	50	.05
(a) Helpers (continuously employed at mixing and tempering mortar).....	.52½	48	.45	54	.05
6. Bridge and structural steel and iron workers.....	.90	44	.90	50	.05
7. Carpenters and millwrights¹.....	.95	44	.80	50	.05
8. Cement finishers (in warehouses or large floor area jobs).....	.65	48	.60	54	.05
9. Electrical workers² (inside wiremen, licensed journey-men).....	.95	44	.80	50	.05
10. Elevator constructors.....	1.00	44	1.00	50	.05
(a) Helpers.....	.70	44	.70	50	.05
11. Labourers—					
(a) Skilled—comprising the following: placing or assisting mechanics in the placing of cut stone, architectural terra cotta, marble (real or imitation), roofing slate and shingles, plaster castings, ornamental bronze and iron, interior joinery, laying drain tiles, attending concrete mixer, bending and placing reinforcing material, movable scaffolding and runways.....	.50	48	.45	54	.05
(b) Labourers.....	.45	48	.40	54	.05
12. Lathers (metal, wood)—					
(a) Metal lathers.....	.80	44	.75	50	.05
(b) Wood lathers.....	.70	44	.65	50	.05
13. Linoleum floor layers.....	.60	48	.55	50	.05
14. Marble setters.....	1.10	44	.95	50	.05
(a) Helpers³.....	.52½	48	.45	50	.05
15. Mastic floor kettlemen.....	.45	48	.45	50	.05
16. Mastic floor rubbers and finishers.....	.55	48	.55	50	.05
17. Mastic floor spreaders and layers.....	.85	48	.85	50	.05
18. Operating engineers and firemen on construction—					
Class A: Engineers in charge of hoisting engines of three drums or more operating any type of machine, or operating trenching machines, clamshells or orange peels, regardless of capacity; or operating steam shovels or draglines of one yard capacity or over; or operating drop hammer pile drivers; in all cases irrespective of motive power.....	1.00	48	.80	50	.05
Class B: Engineers in charge of hoisting engines having only two drums or of single drum, used in handling building material; or steam shovels and draglines not specified in "A" hereof; irrespective of motive power.....	.95	48	.75	50	.05
Class C: Engineers in charge of any steam operated machine not specified in "A" or "B" hereof; or in charge of a steam boiler if the operation of same necessitates a licensed engineer under the provision of "The Steam Boiler Act"; or air compressor delivering air for the operation of rivetting guns on steel erection work, or pumps in caissons, or concrete mixers of over ½ yard capacity; irrespective of motive power.....	.85	48	.70	50	.05
Class D: Men firing boilers of machines classified in "A", "B" or "C" hereof or assisting engineers in charge of same.....	.60	48	.50	50	.05
Class E: Operators of gas or electric engines for machines not otherwise specified in "A", "B" or "C" hereof, of a type usually operated by skilled labourers.....	.50	48	.40	50	.05
19. Painters, decorators, paperhangers and glaziers.....	.75	44	.70	50	.05
Note.—On and after November 1st, 1943, the basic wage rates for painters, decorators, paperhangers and glaziers will be 80c. per hour for "A" area and 75c. per hour for "B" area, plus 5c. per hour cost of living bonus.					
20. Plasterers.....	1.15	44	1.00	50	.05
(a) Helpers (continuously employed at mixing and tempering material, including the making of putty and operation of machinery).....	.52½	48	.45	54	.05
21. Plumbers.....	1.05	44	.95	50	.05
(a) Helpers³.....	.52½	48	.45	54	.05
22. Roofers (felt and gravel).....	.60	48	.55	50	.05
(a) Mop handlers.....	.45	48	.40	50	.05
23. Sheet metal workers.....	.75	44	.70	50	.05
24. Shinglers.....	.80	44	.70	50	.05
25. Steamfitters.....	1.05	44	.95	50	.05
(a) Helpers³.....	.52½	48	.45	54	.05
26. Stonecutters.....	.95	44	.85	50	.05

FAIR WAGE SCHEDULE—*Concluded*

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Gov't. Work, Winnipeg and Radius of 30 Miles.		B—Other Than Area Described in "A" (applies to private work when pop. exceeds 2,000).		Cost of Living Bonus Per Hour
	Basic Wage Rate	Hours	Basic Wage Rate	Hours	
	Minimum Per Hour	Maximum Per Week	Minimum Per Hour	Maximum Per Week	
27. Stonemasons.....	1.15	44	1.00	50	.05
(a) Helpers (continuously employed at mixing and tempering mortar).....	.52½	48	.45	54	.05
28. (a) Teamsters.....	.45	48	.40	54	.05
(b) Teamsters with teams (if employed on construction or demolition of the building by the owner, contractor or sub-contractor).....	.90	48	.8505
29. Terrazo Workers—					
(a) Layers.....	.75	44	.72½	50	.05
(b) Machine rubbers (dry).....	.60	48	.52½	50	.05
(c) Machine rubbers (wet) and helpers.....	.55	48	.50	50	.05
30. Tile setters (including all clay product tile and vitrolite glass).....	1.10	44	.95	50	.05
(a) Helpers.....	.52½	48	.45	54	.05
31. Tile setters (asphalt and other composition tile).....	.85	44	.70	50	.05
32. Timber and crib men working on grain elevators or bridges doing the "crib work" on grain elevators, or rough timber work on bridges.....	.65	48	.55	54	.05
33. Truck drivers (while in charge of trucks).....	.50	48	.45	54	.05
34. Trucks only (when used on construction work and paid at an hourly rate) when truck is hauling not more than 1 cubic yard.....	.55				
For each additional 1/10 cubic yard.....	.04½				
35. Watchmen.....	22.50 per week				.60 per week
36. Welders and burners (acetylene or electric).....	.75				.05
37. Welders and burners on steel erection.....	.85				.05

Overtime:

Time worked in excess of the maximum hours as stipulated in the schedule shall be paid at the rate of time and one-half, including Saturday afternoon. All hours worked on Sunday to be paid at the rate of double time, except in cases of emergency when time and one-half shall be paid.

All overtime to be paid for in accordance with the basic wage rates only.

Rule:

All men hired in Winnipeg to go into the country to work on buildings shall be paid the City schedule rate, except where other definite agreements are made.

This Schedule was approved by the Regional War Labour Board for Manitoba on the 8th day of July, A.D. 1943.

¹ Subject to existing agreements between Builders' Exchange and Bricklayers' Union or Carpenters' Union, Local 343.

² Carpenters' and electrical apprentices between ages of 17 and 24 indentured for 4-year period: 35 and 30 cents per hour respectively for first 6 months with 5-cent increase every 6 months up to and including seventh period, totalling 3½ years, and 10-cent increase for last 6 months, making the rate 70 cents per hour.

³ All men assigned to help tradesmen.

PUBLIC ROAD AND BRIDGE WORKS

The following schedule shall apply from and after July 15th, A.D. 1943, on "public works" outside of the Greater Winnipeg Water District Area in all parts of Manitoba for highway, road, bridge or drainage construction work where a contract has been entered into by the Honourable Minister of Public Works:

Occupation	Basic Wage Rate	Hours	Cost of Living Bonus Per Hour
	Minimum Per Hour	Maximum Per Week	
Teamsters.....	\$.35	54	\$.05
Labourers.....	.35	54	.05
Teamsters and two horse team.....	.60	54	.05
Teamsters and four horse team.....	.85	54	.05
Grader and tractor operators (excepting permanent municipal employees).....	.60	54	.05
Truck drivers (regardless of basis for payment of truck).....	.45	54	.05
Truck only—			
When truck is hauling not more than 1 cubic yard.....	.55		
For each additional 1/10 cubic yard load.....	.04½		
Timber men (timber work where use of hammers, saws, axes and augers only are required).....	.55	48	.05

National War Labour Board Announces Bonus in Shipyards and Vacations with Pay

The National War Labour Board announced on July 30 that effective on that date the cost-of-living bonus being paid in all shipyards under its jurisdiction which were paying less than the full cost-of-living bonus of \$4.25 weekly was increased to \$4.25 per week.

The Board also announced that the general wage structure in all of the eastern shipyards was under survey and careful consideration and that it was expected that in a reasonable time the question of wage adjustments would be worked out.

The National War Labour Board announced on August 6 that in all shipyards under its

jurisdiction where conditions of work do not include vacation with pay the same was hereby instituted effective as of that date.

Formal directives would be issued when vacation with pay schemes had been worked out by the various shipyards in consultation with the unions and approved by the Board, the Board announced. It was stated that vacation with pay schemes should be planned with a reasonable degree of uniformity and submitted to the Board for its approval, it being imperative that all such plans should be devised with a view to the least possible interference with production.

War Emergency Training

Statistical Summary for the Month of June, 1943—Training in Industry— Rehabilitation Training

THE gross enrolment in all types of classes in War Emergency Training showed a slight drop from 17,491 enrolled on the 1st of June, to 17,378 enrolled on June 30. The biggest decline was in the full-time pre-employment classes which reached a new low. During the month of June, the enrolment in all types of industrial classes declined from 7,165 at the beginning of the month to 5,868 at the end of the month. The enrolment in classes for the armed forces showed an increase of approximately 1,200. Decreases in the Army and Navy classes were more than made up by a substantial increase in the classes for pre-aircrew personnel for the R.C.A.F. Several more pre-employment training centres were closed through inability to recruit classes of trainees.

Training in Industry

There was a slight increase in the enrolment of plant schools. Approval was given to three new ones during the month. Quite a number of others suspended operations as they had trained the required number of workers in their respective industries. The number of employed persons attending part-time classes showed a further decline as quite a number of these classes have been suspended for the summer months. The training of foremen and supervisors still continues to progress satisfactorily, and Job Instruction, Job Relations

and Job Methods. Reports received from many companies testify to the benefits they have received from this type of training.

A special class for Women's Welfare Supervisors in industry was held in the City of Montreal early in June for one week. Many of the industries co-operated in this class and selected women from their supervisory staff to attend. The instructional staff was drawn from persons already engaged in industry and in the Government Service. Each session was devoted to a specific topic and the preliminary lecture was followed by discussion.

Rehabilitation Training

There was a slight increase in the number of discharged persons from the forces seeking rehabilitation training. Increased facilities are being provided as the demand for this type of training is expected to show a very substantial increase in the near future. Arrangements have been completed to provide training not only in vocational schools, but in private business colleges and in industrial establishments. Representatives of War Emergency Training are making enquiries to ascertain what training opportunities are available in industrial and commercial establishments in the different provinces. Steps have also been taken looking forward to the acquisition of additional training facilities outside the regular vocational schools after the end of the war.

Activities of Unemployment Insurance Commission

Coverage of the Act Raised to Include Persons Earning \$2,400 a Year— Civilian Equivalents of Trades in the Armed Forces—Reciprocal Arrangements with the United States—Contributions When Sunday is a Work Day

THE Unemployment Insurance Act, 1940, was amended* in several particulars at the 1943 session of the Parliament of Canada. Many of the amendments are designed to improve administrative features of the Act. Aside from these, however, there were important changes of more general interest.

As explained by the Minister of Labour in the House of Commons on July 16, "... this bill contains only one fundamental change in the operation of the Act, namely to increase from \$2,000 to \$2,400 per annum the earnings of those persons who may come within its orbit. . . . The figure \$2,400 was decided upon after representations had been made by employers and employees who appeared before the Committee."

Another of the amendments provides for the coverage of employees of public utilities, such as gas, electric, heat, light or power works, telephone lines, transportation systems. This latter amendment determines questions which had been variously interpreted by authorities administering the Act.

Civilian Equivalents of Trades in the Armed Services

In to-day's highly mechanized Army, Navy and Air Force, many of the men and women in uniform are acquiring technical skills of a high order as part of their regular training. In May of this year a committee was formed to prepare Manuals of Army, Navy and Air Force trades with their civilian equivalents, primarily for the use of those responsible for furnishing training to discharged men and women, and for the use of the Employment and Selective Service Offices in placing discharged members of the Forces in employment. It is proposed that the department responsible for post discharge training will use the Manuals as a guide in determining what additional trade training may be necessary upon discharge, and employment service placement officers can, by reference to the Manuals, determine where veterans may best be fitted into civilian jobs on the basis of their rating in the Armed Forces.

* A more detailed analysis of the amendments to the Act will appear in the September issue of the *LABOUR GAZETTE*.

Ministers of National Defence, National Defence for Naval Services, National Defence for Air, and Pensions and National Health, responded to an appeal made by the Minister of Labour to nominate qualified persons to represent each of the Departments concerned on the Committee. Dean Vincent MacDonald, Assistant Deputy Minister of Labour, acted as Chairman of the first meeting, which was held at the Head Office of the Unemployment Insurance Commission on May 10, 1943. At this meeting Mr. H. C. Hudson, Supervisor of Special Placements, became permanent Chairman of the Committee.

The Committee's report will be issued in the form of loose leaf Manuals, the first of which—that covering trades in the Royal Canadian Air Force—has now been completed. Volumes of the Manual, covering the Army and the Navy, are in the final stages of preparation, and it is anticipated that the series will prove most helpful in connection with the re-establishment of discharged persons.

Reciprocal Arrangement re Unemployment Insurance Benefit

Recently the States of New York and Washington enacted legislation to implement the agreement entered into between the Federal Governments of Canada and the United States in April, 1942, for reciprocal arrangements with respect to unemployment insurance claims and benefit.

As unemployment compensation is a state prerogative in the United States, the Federal agreement was subject to the legislative ratification of the various states and territories. So far some 26 States have passed the necessary legislation, with New York and Washington the latest to participate. The reciprocal arrangement was similar to that already in effect between the several States of the United States.

Under the arrangement insurance offices in the participating states will accept claims for benefit from insured Canadian workers resident in those states who become unemployed; similarly Canadian offices will accept claims from insured American workers who come from any of the states that have ratified the arrangement. Offices in both

countries will see that claimants for benefit observe all eligibility requirements, such as reporting regularly to prove their availability for work and certifying that they have not found employment. All payments of benefit will be made by the system originally liable for them.

Up to the end of July, 1943, only 20 claims for benefit had been adjusted between Canada and the states that have accepted the reciprocal arrangement.

Insurance Registration

Reports from Local Offices of the Unemployment Insurance Commission showed that at August 1, 1943, 133,008 employers with insured employees were registered, and 2,488,364 persons had been issued with Unemployment Insurance books (See Table 1). Persons previously registered in respect of whom insurance books were not renewed in the fiscal year commencing April 1, 1943, are not included in the latter total.

TABLE 1—PROGRESS OF REGISTRATION AT AUGUST 1, 1943

Region	Employers' Establishments Registered	Persons Issued Insurance Books

Pacific.....	13,315	217,758
Total.....	133,008	2,488,364

Progress in Staff Training

Staff training activities of the Unemployment Insurance Commission, which are expected to secure increased efficiency of operation in the local offices through scientific methods of instruction (L.G., June, 1943, p. 820) have included two training conferences held recently at the Head Office of the Commission in Ottawa.

The first training conference was for the purpose of training field staff to handle the payment of certain accounts which were formerly paid from Head Office. This is in accordance with arrangements recently completed which provide for a decentralization of the accounting work of the Unemployment Insurance Commission. The following people who have been appointed to do this work in the respective regions attended the conference, which lasted from August 10 to 16, inclusive: Mr. A. J. Bowles from the Pacific Region; Mr. J. E. Woods from the Prairie Region; Mr. J. E. Langevin from the Quebec Region and Miss G. W. Anderson from the

Maritime Region. Mr. C. L. Hall, Head Office Accountant, was Chairman of this conference.

The other conference was for the purpose of giving an induction course on management to the managers of the following 10 local offices: Arnprior, Brockville, Carleton Place, Gananoque, Hawkesbury, Pembroke, Perth, Prescott, Renfrew and Smiths Falls. Mr. C. S. Raper, Staff Training Advisor for the Ontario Region, was chairman of this conference which lasted from August 12 to 14, inclusive. Mr. B. G. Sullivan, Ontario Regional Superintendent, at Toronto, opened the conference. Head Office officials who assisted were: Mr. T. R. Walsh, Chief of Instructions and Enforcement of National Selective Service; Mr. E. Stangroom, Chief Insurance Officer; and Mr. F. R. Rene de Cotret, in charge of Planning, as well as Mr. H. C. Hudson, Supervisor of Special Placements.

Similar conferences are planned for the managers of the other local offices in the Ontario Region at points conveniently situated.

Mr. T. Parkinson, Head Office Staff Training Adviser supervised programs and arrangements for both conferences.

In the field, the newly instituted program of plant visiting as a means of staff training, is showing markedly good results. By this plan various local office Interviewing and Placement officers visit firms in their respective districts for the purpose of familiarizing themselves with industrial occupations and operations. These visits are planned well in advance by local office officials and an evaluation is made following the visits, with a view to establishing the results obtained.

Placement officers have benefited immeasurably from these contacts with a consequent improvement in placements.

Claims for Benefit

The amount paid for unemployment insurance benefits for the month of June, 1943, was \$64,999.84, bringing the total for the first quarter of the fiscal year to \$335,110.68. (See Table 4). In this period 8,953 claims were received for adjudication at the nine offices of the Commission, of which 6,764 were allowed, 1,755 not allowed and 434 claims pending. (See Table 2).

An analysis of the claims not allowed by insurance officers reveals the following reasons for non-allowance: 526 claims under Section 28 (i) in which claimants had insufficient contributions; 97 claims under Section 28 (ii) in which 62 were not made in

the prescribed manner and 35 not unemployed; 35 claims under Section 28 (iii) of which 29 were not capable of work and five were not available for work; seven claims under Section 43 (a) for loss of work due to labour dispute; 17 claims under Section 43 (b) (i) for refusal of an offer of work; six claims under Section 43 (b) (ii) for

neglect of opportunity to work; 1,049 claims under Section 43 (c), of which 111 were discharged because of misconduct and 938 for voluntarily leaving without cause; one claim under Section 43 (d) the applicant being under 16 years of age; 17 claims under Section 43 (f) of which 11 were in class "O" contributions and 6 for other reasons.

¹ Cumulative figures of claims received for adjudication for the period February 1, 1942, to March 31, 1943, were published on page 653 of the May issue of the Labour Gazette. In this and succeeding issues the figures will be cumulative for the current fiscal year only.

Appeals and References

During the quarter ending June 30, there were 258 references and 37 appeals made by claimants to Courts of Referees. There were also nine references by Insurance Officers to Courts of Referees. In addition to the

quarterly total there were 110 claims made prior to March 31, which had not been heard before the close of the fiscal year. Of the total of 414 claims, 339 had been heard, 25 had been withdrawn and 50 had not been heard. The Courts of Referees allowed 86 claims and disallowed 253. (See Table 3).

Appeals to Umpire

Five claimants sought permission from the chairman of the Courts of Referees to appeal to the Umpire under Section 58 (c) (ii); two by claimant of association under Section 58 (b) and one by an insurance officer under Section 58 (a).

Contributions When Sunday is a Work Day

Mr. Louis J. Trottier, Chairman of the Unemployment Insurance Commission, has announced a decision of the Commission clarifying the question of contributions by employers and employees to be made under the Unemployment Insurance Act, when Sunday is a day of work.

TABLE 4—UNEMPLOYMENT INSURANCE COMMISSION INSURANCE FUND

The Interest column represents the interest received on the due dates of the various Government bonds and includes accrued interest at the time of purchase. This figure does not include the accrued interest earned to June 30.

The Miscellaneous column includes the following:

Penalties.....	\$ 722 04
Contributions in respect of service in the Armed Forces.....	5,858 61
Miscellaneous.....	1,599 86
	<u>\$ 8,180 51</u>

In future contributions will be required on the following basis:—

- (a) Where an employee works 7 days in a week, a full weekly stamp will be required to be based upon the 7 days' earnings.
- (b) Where an employee works 6 days in a week, whether Sunday is one of the working days or not, a full weekly stamp will be required.
- (c) Where an employee works 5 days in a week, and where the full week's work is considered to be 5 days, a full weekly stamp will be required whether Sunday is one of the working days or not.
- (d) Where 5 days are worked in the week, but where the established working week is really 6 days, 5 daily stamps will be required, regardless of whether Sunday is one of the days worked.

- (e) Wherever fewer than 5 days are worked in a week, one daily stamp will be required for each day, with Sunday to be treated the same as any other day of work if Sunday is actually a working day.

Contributions for Sundays are to be recorded in the first space provided in the Unemployment Insurance books for the week in question. This is usually the space marked for Monday. When Sunday has been worked, therefore, stamps for other days in the week will have to be fitted into the next available space, which may often be the space following that for the day in respect of which the stamp is paid. However, in all cases the maximum for a week will be 6 daily stamps, or one weekly stamp.

Farm Wages and Hours in United States

“VICTORY BULLETIN”, official weekly publication of the Office of the War Information at Washington, in its issue of June 30, stated that—“Farm employment rose seasonally to 11,659,000 workers on June 1, a decrease of about two per cent from June 1, 1942, and about five per cent less than the June average of 12,204,000 workers for the period 1937-1941.”

Farm wage rates had reached the highest level on record on June 1, 1943, the index being 251 (based on the period 1910-1914). On the first of June, 1942, the rate index was 183.

The decrease in total employment came primarily from a decline of about six per cent in the number of hired workers. Employment of members of farm families remained practically the same as in June, 1942. It was estimated that there were 2,697,000 hired farm workers on June 1, this year as compared with 2,880,000 for the same date last year and 2,975,000 for the June average 1937-1941. Total farm employment was lower in all geographic areas than in June, 1942, except in the East South Central States, where an increase in family workers more than offset a decline in hired help.

Wages in the New England, Middle Atlantic and East North Central States rose 25 per

cent during the year and 35 per cent in the Southern States. Monthly wage rates without board have recently shown the sharpest gain, accounting for most of the overall wage increase in the middle Atlantic and southern states.

Farm operators were working an average of 12.8 hours per day, about three quarters of an hour longer than in June, 1942. On June 1, about 13 per cent of the farm workers of the United States were under 14 years of age as compared with about four per cent in April, 1942. This trend served to indicate the stringency in the farm labour situation.

Farm operations in New England were about a week later than usual and in the middle Atlantic states they were reported to be “far behind schedule”. To help relieve the situation large numbers of boys, women and old men were being employed, as well as workers imported from the West Indies and the Bahamas. In Georgia, Italian prisoners of war were being employed on fruit farms.

In addition to the shortage of labour, weather conditions were unfavourable during May, but had improved toward the end of the month and farm work was being rushed as much as possible. It was claimed that it would be necessary for Government agencies to aid in providing adequate labour for the harvest season.

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of June, as reported by employers.

—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

This month's article showed a general advance in industrial employment, according to reports submitted by 13,689 establishments employing a total of 1,818,240 persons at the beginning of June—29,057 more than at the beginning of May. The increase took place largely in the non-manufacturing industries—logging, services, transportation, communications and construction and maintenance, while further curtailment was indicated in mining and a falling-off in employment in retail trade.

The index number of employment (based on the average for the calendar year as 100) was 181.1, as compared with 178.2 in the preceding month, and was $5\frac{1}{2}$ per cent higher than at June 1, 1942.

Each month the same employers furnish information concerning payrolls which is incorporated in this article. The per capita average weekly wage in the industries submitting returns rose from \$30.59 at May 1, to \$30.91 at the beginning of June, as compared with \$28.20 at June 1, 1942.

Employment conditions at the end of July as reported by Employment and Selective Service Offices.—Reports from the

Employment and Selective Service Offices of the Unemployment Insurance Commission give a brief survey of the employment situation in various industries at the end of June. These reports describe employment conditions in the Maritimes, Quebec, Ontario, the Prairie Provinces, and British Columbia.

Applications for employment; vacancies, and placements; June.—From the Employ-

ment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

During the five-week period May 28 to July 1, 1943, Employment and Selective Service Offices reported an increase in the daily average of placements in employment, both when compared with the preceding four weeks and with the month of June, 1942. During the period under review there were 336,388 vacancies reported, 293,597 applications for employment and 208,032 placements effected in regular and casual employment.

The marked increase over last year was due to National Selective Service Regulations under which employers seeking workers, and persons desiring employment, must notify Employment and Selective Service Offices.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of July, 1943, the percentage of unemployment among trade union members was .6, as compared with percentages of .7 in June and 2.5 in July, 1942. The July percentage was based on returns compiled from 2,288 labour organizations, with a total membership of 452,309 persons.

The Employment Situation at the Beginning of June, 1943 as Reported by Employers

INDUSTRIAL employment at the beginning of June showed a general advance; although this exceeded the contra-seasonal decline which had been indicated at the first of May, it was substantially less than the expansion normally recorded at June 1 in the experience of other years since 1920. The 13,689 firms co-operating in the latest survey reported a combined working force of 1,818,240 men and women. As compared with 1,789,183 in their last return, there was a gain of 29,057 workers, or 1·6 per cent, accompanied by a rise of 2·7 per cent in the weekly payrolls disbursed.

The increase in the number in recorded employment raised the index from 178·2 at May 1, to 181·1 at the beginning of June; these two, with that at April 1, were slightly lower than in earlier months of 1943; the level of employment at June 1 was approximately that of February 1. From the opening of the present year to the latest date, there was a decline of 1·4 per cent, which, though slight, is interesting because it is contrary to the usual trend from January 1 to June 1; thus, employment between those two dates in the period 1921-1939, showed an average advance of 6·8 per cent, while in the first three years of the war, the general increase at June 1 as compared with January 1 was 7·1 per cent. This slowing-down in industrial activity results to some extent from the transfer of men from industry to the armed forces, attended by increasing difficulty in securing replacements; it also reflects the effect of changes in the volume and kind of production brought about by the present stage of the war, and likewise arises in part from growing shortages of materials and labour in the field of civilian production and services.

The spread between June 1, 1942, and June 1, 1943, was the smallest in the 12 months' comparison since the outbreak of war, the latter index being only 5½ per cent higher than the former. The June 1, 1942, index had been higher by 12·3 per cent than that at June 1, 1941, which in turn, had exceeded by 26·5 per cent the June 1, 1940, index.

The trend of employment in manufacturing was favourable at the date under review, but the increase of 6,558 in the reported staffs was somewhat less than the contra-seasonal decline of 7,600 workers which had been noted at May 1. The gain was decidedly below-average, according to the experience of earlier years; it was the smallest indicated at June 1 in any year since 1936. The advance at the

date under review took place largely in plants producing durable goods, the improvement recorded in the light manufacturing industries as a whole being relatively slight. In a few cases, employment in manufacturing establishments was reduced as a result of industrial disputes.

The non-manufacturing industries as a whole accounted for most of the expansion at the beginning of June. Logging afforded considerably more employment, partly as a result of river-driving operations. Services, transportation, communications and construction and maintenance reported heightened activity of a seasonal character. The increases in the last two divisions were largest, but were of less-than-normal proportions; those in services and transportation approximated the average. On the other hand, further curtailment was indicated in mining, and there was a falling-off in employment in retail trade.

Payrolls

The firms furnishing statistics at the beginning of June disbursed the sum of \$56,203,507 in salaries and wages for services rendered in the week preceding. This sum was 2·7 per cent higher than that of \$54,722,413 reported in the eight leading industries at the beginning of May, when the total had been lowered by the loss of working time over the Easter holidays. The per capita average rose from \$30·59 at May 1, to \$30·91 at the beginning of June, as compared with \$28·20 at June 1, 1942; the figure had then been affected by the Dominion-wide observance of the Victoria Day holiday. This factor also had some effect upon the latest average, since the holiday was celebrated in some areas. The per capita was also lowered by industrial disputes in certain industries in various parts of the Dominion. The June 1 average was smaller than that of \$31·14 at April 1, but was otherwise the highest in the record of 25 months. Between June 1, 1942, and June 1, 1943, the index number of payrolls has risen by 14·6 per cent, while that of employment has gained by 5·5 per cent.

When the figures of employment and payrolls in financial institutions are included, the survey shows that the total number in recorded employment in the nine leading industries at June 1, was 1,881,565, as compared with 1,852,365 at the beginning of May. The weekly payroll rose from \$56,682,343 at that date, to \$58,171,023 at the beginning of June. The per capita average in the nine industries stood at \$30·92, as compared with \$30·60 at May 1, and \$28·27 at June 1, 1942.

Table 1 summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the eight leading industrial cities, and gives comparisons as at May 1, 1943, and June 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The report indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of

18.4 per cent, while the aggregate weekly earnings of those workers are higher by 43.6 per cent. Including finance, the gain in employment from June 1, 1941, to June 1, 1943, amounted to 17.9 per cent, and that in payrolls, to 42.3 per cent. The explanation previously given for the much greater rise in the salaries and wages than in the numbers employed may again be stated—(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the payment of a cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been increased on more than one occasion since

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

its institution, and (3) the progressive upgrading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been granted. In spite of these main factors reacting favourably upon the earnings of the typical wage-earner, the average weekly pay envelope, as a result of the continued dilution of labour and other factors, has not shown advances commensurate with those in the index of aggregate payrolls. Thus, the latter has risen by 43.6 per cent from June 1, 1941, while the index of per capita earnings has increased by 22.4 per cent in the 25 months.

The influence of the war has resulted in particularly marked expansion in employment and payrolls in factories, in which the rate of acceleration in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 33.4 per cent from June 1, 1941, and that of payrolls has advanced by 63.5 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater influence in the case of manufacturing.

The growth in employment and payrolls in the production of durable goods has been outstandingly large in the months for which data are available; in this class, the index of employment shows a gain of 53.7 per cent, accompanied by an increase of 91.4 per cent

in the salaries and wages distributed between June 1, 1941, and June 1, 1943. Although there has more recently been a slackening in some of the non-durable goods, the index number of employment in this group at the date under review was higher by 15.4 per cent than that indicated at June 1, 1941, since when there has been an increase of 34.5 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Employment and Payrolls by Industries

Manufacturing.—Partial recovery from the contra-seasonal loss indicated in the beginning of May was noted in manufacturing at June 1. The gain was seasonal, but was below-average in extent, being the smallest recorded at that

¹ Revised.

date in any year since 1936; it was not sufficiently large to restore employment to its level at April 1. With that exception, however, activity was at its maximum in the record of over 23 years. The 7,661 co-operating manufacturers reported a personnel of 1,170,295 at June 1, as compared with 1,163,737 at the beginning of May. The increase of 6,558 men and women, or 0.6 per cent, raised the index from 222.9 in the preceding report, to 224.1 at the first of June, as compared with 205.9 at the same date in 1942. Since the advance was not equal to that usually indi-

cated from May 1 to June 1, the seasonally-adjusted index declined, falling from 221.2 at May 1, to 219.8 at June 1; this is the fifth successive reduction in the seasonally-corrected index.

From the opening of the present year, the expansion reported by the firms furnishing data has provided employment for some 23,700 additional workers, a number which constituted rather less than a quarter of those taken on by the co-operating manufacturers in the same period of 1942. The general increase from January 1 to June 1, 1943, was also of less-

¹ This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, with the exception of electric light and power.

² Preliminary.

* Revised.

than-normal proportions, according to the experience of pre-war years. The slowing down in the rate of acceleration recently indicated is no doubt largely due to the following main factors: (1) the further absorption of the younger men in the armed forces; (2) changes in production requirements which have developed as the war progresses, and (3) increasing shortages of materials and labour for civilian production. In the latest period of observation, industrial disputes in certain centres had an adverse effect upon employment in manufacturing.

The moderate gain indicated at the date under review took place very largely in the durable goods division, in which the reporting establishments added some 5,400 employees. Most of this increase was in the lumber group. There were smaller advances in the manufacture of electrical apparatus and iron and steel products. The index in the durable goods division reached a new all-time high, standing at 279.7 per cent of the 1926 average. This was 17½ per cent higher than the June 1, 1942, index.

In the non-durable group, the trends were mixed, resulting in a relatively small increase on the whole as compared with May 1. Food and pulp and paper plants reported fairly marked expansion; in the food groups, this

was generally below-average for June 1. On the other hand, leather, rubber, textile, tobacco and chemical plants released employees. The decline in chemicals was substantial. The curtailment in textiles was seasonal in character, approximating the average at the beginning of June in earlier years of the record. In the remaining manufacturing industries, the changes in employment were relatively small. The index in the non-durable goods division as a whole stood at 181.0, as compared with 180.7 at May 1, 1943, and 181.6 at June 1, 1942. This is the second successive month in which the index in the light manufacturing industries has been slightly below its level at the same date a year earlier. As at May 1, the small falling-off in the 12 months' comparison took place mainly in the textile, beverage, footwear and pulp and paper industries. Activity in these industries, however, was generally at a higher level than in earlier years of the record.

The firms furnishing information at the beginning of June reported the disbursement of \$36,997,965 in weekly payrolls; this was higher by \$817,286, or 2.3 per cent, than the salaries and wages they had paid at May 1. The per capita average rose from \$31.09 at May 1, to \$31.61 at the beginning of June. The gain was partly due to the resumption of

NOTE.—The "Relative Weight" as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

a more normal scale of operations following the loss of time over the Easter holidays, which had lowered the averages in the preceding period of observation to \$31.09 from \$31.81 at April 1. The latest figure was affected by strikes in some industries, and also by the observance of the Victoria Day holiday in certain centres, although its celebration as a

Dominion statutory holiday has been discontinued for the duration of the war. In 1942, the June 1 average had stood at \$28.73, and that in 1941, at \$25.57; these figures had been affected to a much greater extent by the suspension of work over Victoria Day, then generally observed throughout the Dominion.

TABLE IV—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

All Industries	100.0	181.1	178.2	171.7

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

The index of payrolls, based on the disbursements at June 1, 1941, as 100, was 163.5, as compared with 159.9 at May 1; the maximum in the two-year record was that of 164.7 at April 1, 1943. The latest figure was 19.2 per cent higher than that of 137.2 at June 1, 1942. In the twelve months, the index of employment has risen by 8.8 per cent. The reasons for the disparity in the rates of gain have already been given. In the manufacturing industries, the upgrading of employees as they acquire experience is of especial and increasing importance, tending to offset the effect of the large scale dilution of labour resulting from the shortage of workers which has become acute with the development of the war effort. Another factor of particularly great influence in manufacturing is the changing industrial distribution of the wage-earners in recorded employment, with the increase in the proportion of workers in the more highly-paid heavy industries. Thus, at June 1, 1943, this group provided employment for 56.7 per cent of all those engaged in manufacturing, exclusive of electric light and power, while at the same date in 1942, the proportion was 52.5 per cent. In view of the fact that the June 1 per capita average in the durable goods was \$34.77, and that in the non-durable was \$27.34, the effect of the change in distribution upon the current payrolls is very evident.

From the institution of the payroll statistics early in 1941, there have been extremely marked advances in the payrolls distributed to persons employed in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured products, electrical apparatus and tobacco industries. The advances in those industries have been accompanied by noteworthy though relatively smaller gains in employment. In practically every case, and notably in the industries just mentioned, the per capita averages in the various branches of manufacturing were considerably higher at the date under review than at June 1, 1942.

Many factors contribute to the differences found in the average weekly earnings in the various industries. Prominent among these is the sex distribution of workers in the various industries, a factor which is associated with that of age, the women workers, in general, tending to belong in the younger age groups, where earnings normally are less than among more experienced employees. The presence or absence of overtime work also substantially affects the per capita average earnings.

Logging.—This industry afforded more employment, partly as a result of river-driving operations. A combined working force of

43,970 persons was reported by the 502 firms whose returns were tabulated; at May 1, they had 39,456 employees. This increase of 4,514 workers, or 11.4 per cent, which approximated the average at June 1 in the period, 1921-1942, was accompanied by a rise of 7.1 per cent in the weekly payrolls disbursed at the date under review. The per capita average stood at \$24.51, as compared with \$25.51 at May 1, and \$20.65 at June 1, 1942. As stated in previous press letters, the figures of aggregate and per capita earnings in logging do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings.

The June 1 index of employment stood at 146.9; as compared with 169.0 at June 1, 1942, there was a falling-off of 13.1 per cent, accompanied by a decline of only 0.7 per cent in the index of payrolls in the same comparison.

Mining.—For the third consecutive month, there was a contraction in employment in mining. The shrinkage, unlike that at April 1 and May 1, was contra-seasonal; curtailment, but on a smaller scale, had also been indicated at June 1 of last year. Quarrying and the mining of other non-metallic minerals continued to show improvement, but coal-mining, and metallic ores mining again employed fewer workers. Data were tabulated from 449 operators with a staff of 73,056, a reduction of 721 from their last return. The index in the mining group stood at 156.2, as compared with 157.8 at May 1, 1943, and 173.1 at June 1, 1942. The reduction of 9.8 per cent in the latter comparison was accompanied by that of 6.3 per cent in the reported payrolls. These aggregated \$2,643,395 at the beginning of June, when they were affected by industrial disputes in some areas. The May 1, 1943, total of \$2,617,471 had represented earnings which were lowered by loss of working time over the Easter holidays. The latest per capita average was \$36.18, as compared with \$35.48 in the preceding period of observation, and \$34.47 at June 1, 1942.

Communications.—Heightened activity of a seasonal character was indicated in communications at the first of June, but the gain was rather below-average. Information was furnished by 59 employers with a personnel of 27,677, as compared with 27,387 at May 1. The salaries and wages disbursed at June 1 totalled \$812,821, as compared with \$796,575 in the preceding report. The per capita average advanced from \$29.09 at May 1, to \$29.37 at the first of June, while at the same date of

last year, the figure was \$28.01. The latest index of employment, at 103·6, was fractionally lower than that of 103·9 at June 1, 1942, while the index of aggregate payrolls showed a gain of 4·6 per cent in the year.

Transportation.—There was a further advance in employment in transportation at June 1, when moderate gains were noted in all three branches—steam railway, local transportation and shipping and stevedoring. The employees of the 593 companies and branches furnishing data numbered 145,005, as compared with 141,039 at the beginning of May. The index rose from 111·7 in the preceding report, to 114·8 at June 1, as compared with 106·4 at the same date in 1942. There was thus a gain of 7·9 per cent in the latter comparison; this was accompanied by that of 12·1 per cent in the index of payrolls in the 12 months. The weekly payrolls reported at June 1, 1943, amounted to \$5,228,716, as compared with \$5,034,879 at the beginning of May. The latest per capita average was \$36.06, as against \$35.70 at May 1, and \$34.64 at June 1, 1942.

Construction and Maintenance.—Seasonal improvement was recorded in this group as a whole at the date under review, but the expansion was considerably smaller than usual in the late spring, and was also less than at June 1 in any other year since 1936. Further curtailment was indicated in building, the generally upward movement being confined to highway and railway construction and maintenance work. Returns were received from 1,533 employers whose staffs included 159,472 persons, 13,408 more than at May 1. The reported payrolls aggregated \$4,711,380, as compared with \$4,393,906 in the preceding period of observation. The rise in the salaries and wages was relatively less than that in the number of employees, partly because most of those added to the working forces were taken on at the lower rates of pay, many being more or less casual workers, while differences in the amount of overtime also had an effect. As a result, the per capita average declined from \$30.08 at May 1, to \$29.54 at the date under review. The June 1, 1942, figure was \$25.33. The latest index of employment stood at 126·4; this was 2·5 per cent higher than at the same date of last year, since when the index of payrolls has risen by 15·8 per cent.

Services.—There was a considerable, seasonal advance in employment in services at June 1, according to 634 firms with a working force of 42,875 men and women, as compared with

40,770 at May 1. Most of the increase took place in hotels and restaurants, but laundries and dry cleaning plants were also busier; to some extent, the gain in the former represented extension of cafeteria services in large industrial establishments. The weekly payrolls disbursed at June 1 totalled \$794,675, as compared with \$752,601 at May 1. The index of employment was 192·1; this exceeded that of 180·6 at the beginning of June, 1942, by 6·4 per cent. The index of payrolls shows a gain of 14·5 per cent over the year. The latest per capita average was \$18.53, a few cents higher than the May 1 figure of \$18.46. The average at June 1, 1942, had been \$17.17. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted over 62 per cent of the total personnel reported in the service division as a whole at the date under review.

Trade.—Employment in trade showed a contra-seasonal reduction at the beginning of June; this took place largely in the retail division, and was no doubt partly due to the application of Selective Service regulations to the younger men in the industry. The curtailment of the tourist trade due to wartime conditions may also have prevented the increases in the staffs ordinarily indicated at the beginning of June. The 2,258 retail and wholesale establishments whose data were compiled had a personnel of 155,890, as compared with 156,953 at May 1. The weekly payrolls reported at the date under review aggregated \$3,936,858; this was slightly lower than the total of \$3,939,817 reported at May 1. The per capita average, however, advanced from \$25.10 in the preceding survey, to \$25.25 at June 1, as compared with \$24.05 at the same date in 1942. In the 12 months, the index of employment has fallen by two per cent, while that of payrolls has risen by 2·2 per cent.

Financial Institutions.—Statistics furnished by 753 financial institutions indicated an increase of 143 in their staffs, which included 63,325 persons at June 1. The salaries and wages received by these workers aggregated \$1,967,516, as compared with \$1,959,930 disbursed on or about May 1. The per capita average was \$31.07 at June 1, compared with \$31.02 at May 1, 1943, and \$30.19 at June 1, 1942. The index of employment in financial institutions, at 122·6, was fractionally below that of 122·8 at June 1, 1942, while the index number of payrolls was higher by 2·8 per cent.

Employment Conditions at the End of July as Reported by Employment and Selective Service Offices

THE following abstract of regional summaries of reports from Employment and Selective Service Offices of the Unemployment Insurance Commission indicates that employment conditions across Canada at the end of July were as follows:

Maritime Region

The weather and shortage of farm help had delayed haying to some extent. The assistance given by service men on leave, boy scouts and students had, however, been of great help to the farmers. At Moncton the early vegetables were being brought to market. Grain and feed crops were promising.

Fishing gave good returns; the catches were fine and the prices satisfactory. Salmon, mackerel, cod and sardines were the main takes. Fishermen who own small farms switched to agricultural pursuits. The peak of the fishing season had passed. Processing plants were very busy and some plants were short of help.

The marked shortage of men to cut fuel-wood and pulpwood continued. Nearly all bush work was curtailed to some extent. Some sawmills operated at capacity and others were forced to curtail output owing to shortage of labour. Generally the industry was very short of men.

At Bathurst, N.B., the iron mines needed a few labourers. There was little prospect of securing them until farmers were through harvesting. The return of ex-miners to the coal mines was encouraging. All coal mines were working full time and the output steadily increased. More skilled miners and labourers were required to bring the coal mines up to capacity output.

There were few large construction programs in progress, but at the Maitland and Charlottetown airports the contractors required both skilled and unskilled men. Where minor projects were under way or being completed local labour was generally able to meet the demand.

The steel plant at Sydney was operating at top capacity. Steel fabricating plants and foundries were very busy, but in almost all cases required both skilled mechanics and labourers. Aircraft building plants had many vacancies for skilled mechanics, but were fairly well supplied with unskilled labour.

All transportation facilities were utilized to capacity. Much lumber and pulpwood was transported by trucks.

Wholesale and retail trades were somewhat short of help, but men taken from them on compulsory orders were replaced by women.

The demands from hotels, restaurants and private homes for help did not abate.

Quebec Region

Haying was either well along or nearly finished. The demands for farm help fell steadily except in a few districts. In the Montreal area farm help was still in heavy demand. Students were transferred-in to Montreal and St. Hyacinthe, and to the tobacco farms at Joliette. At some points farmers and applicants had failed to agree on wages.

Small groups of men were required in several districts for logging. The main shortages of men were at Campbell's Bay, Quebec and in the Lake St. John area; Chicoutimi listed 900 vacancies. One hundred men left Levis for Maine to cut wood needed for processing in Canada.

Mining operations were steady in the central and southern districts; requirements were largely met locally, except at Asbestos. In northwestern Quebec, base metal mines were pretty well supplied, but the gold mines were much curtailed through lack of men.

Fruit and vegetable canning had begun. Crop results were disappointing at St. Hyacinthe. Pulpmills, wood products mills and sawmills were operating smoothly, although at Campbell's Bay and Megantic more men were required. Montreal's packing houses and flour warehouses were short of husky labourers. Arvida required more potmen. Montreal had many vacancies for women in war plants, and for machinists, toolmakers, and lathe operators. To the north of Montreal three war plants were unable to secure the women required to complete large orders. One hundred and fifty trainees were referred to War Emergency Training schools at Montreal. Sherbrooke reported the successful introduction of the short evening work shift for married women.

Specialists were required at Quebec, and riveters and welders at Montreal for shipbuilding. This industry was making steady progress. The large construction projects at Beauharnois, Quebec, Drummondville, Montreal and Arvida all sought labour.

Locomotive firemen and railway maintenance men were required at several points; farmers were being recruited for the latter work. Shipping was very active.

Almost everywhere women were leaving employment in hotels and restaurants, and as domestics, for more attractive work.

In Montreal, many vacancies were listed for draughtsmen and stenographers. There were marked shortages of washmen and extractors in laundries, and of labourers and delivery men for ice companies. Bakers and cooks were urgently needed.

Ontario Region

Wheat cutting was fairly general and, at some points, oats cutting had started. Where wheat was threshed it was of good quality. In Oxford, soldiers and commando labour have been of great assistance in harvesting work. In Norfolk, tobacco harvesters arrived two weeks ahead of time and turned to ordinary harvesting.

The shortage of sawmill hands at Arnprior increased, and at Kapuskasing 2,000 pulpwood cutters were required. With cooler weather men returned to the bush, but not in sufficient numbers to meet the needs of lumbermen for logging. Belleville and Timmins had difficulty in getting enough men to cut fuelwood, although good wages were paid.

The gypsum mines and limestone quarries needed machine men; a few men were supplied from Kirkland Lake and Timmins. A small group of miners was sent from Kirkland Lake to International Nickel, Sudbury. The Kirkland Lake gold mines required both beginners and experienced miners.

Large orders for the armed forces came to the rubber industry; as a result, men, women and girls were required. Tanneries sought strong men for the beam houses. Men and women were required by the textiles for weaving, carding, and dyeing. Aircraft plants required women to make wing spars. Kingston Locomotive Company sought labourers and boilermakers' helpers, and Victory Aircraft and Small Arms, New Toronto, placed orders for tool and die makers. The sugar refinery at Wallaceburg required 40 labourers, and the order was given prompt attention. Border Cities Industries, Windsor, laid off 175 girls, but they were placed almost immediately.

At Brockville training centre, the contractor obtained the services of 25 soldiers; they gave splendid assistance on construction work. There was a fairly general shortage of bricklayers, painters and labourers. A demand for carpenters and labourers at Chatham training centre was indicated.

Transportation facilities were used to capacity. Good mechanics were in demand throughout the region to service transports

and buses. Railways required labourers for maintenance and extra gangs.

Toronto reported that employers had become interested in taking handicapped men and women. Bakeries were in urgent need of help, and hospitals, restaurants and offices continued their demands for workers.

Prairie Region

The crops in Northwestern Ontario had improved wonderfully and haying was about over. Manitoba was in the midst of haying and wheat cutting was to begin August 4. Day labourers for harvesting were in demand, but scarce. It was thought that men who usually help at harvesting and threshing would return to this work if possible, since good wages were being offered. Many farmers were unwilling to take boys or inexperienced men. Moose Jaw reported an active committee at work on farm labour distribution following the plans of the provincial Farm Labour Board.

In some districts grain was maturing too rapidly owing to dry weather. Alberta's grain cutting was to commence around August 7.

Kenora required over 500 men for logging; an acute shortage of bushmen was general and few men were placed. Pulpwood cutting was greatly restricted owing to the scarcity of men. Some sawmills were operating only one shift, and orders for lumber increased.

The few miners who applied for work were directed to base metal mines. Some northern Ontario mines had placed Indians underground, and there were vacancies for machinists and electricians. Skilled mechanics and husky labourers were wanted at Steep Rock. Edson, Alberta, reported over 200 vacancies in local coal mines; 47 miners had returned from the armed forces through compulsory orders. A fair number of students had entered coal mining for the vacation period.

An urgent request for labourers came from Turner Valley's new refinery; there were few applicants. Authority to commence drilling for 10 new wells brought inquiries for drillers and derrick men. Carpenters were required at Steep Rock. At Saskatoon finishing carpenters and plasterers were on order. The Coast Construction Co. sublet contracts for the buildings on the new U.S. Airport, and on the Edmonton airport, to the Poole Construction and orders for carpenters and labourers totalling 1,000 men were placed in clearance. Three new contracts were awarded for army and air force buildings in Calgary. There was a shortage of skilled and common labour at Dawson Creek.

Flour mills were running three shifts; their orders for strong labourers for the shipping

gangs were not being met. Pulp and paper mills placed high school boys, and in that way released men for higher priority work. Although special attention was given to grain elevator manpower needs, grain cars still arrived in numbers which could not be unloaded, without delay. It had been thought that Prairie War Emergency Training classes would furnish Fort William several hundred trainees for aircraft work; the supply may not be available. It was indicated that 1,300 workers would be required by September 30. Requests for power sewing machine operators in Winnipeg exceeded the supply, but War Emergency Training increased the enrollment of trainees for this work, and the demand will be met. Packing houses required more men. Canning factories were in the middle of the season's run. Women and students were placed where possible.

Movement of railway passengers and freight was very heavy. Women were placed with railway extra gangs as labourers. A few women were accepted to train for street car conductors. Railways faced a further loss of labour through farm hands being recalled.

Hotel and restaurant help was very short, and there was a heavy demand for male clerks and bookkeepers. Experienced stenographers were required. Hospitals and laundries needed women helpers. Regina reported a number of school districts had, up to date, failed to secure teachers.

Pacific Region

Seasonal requirements for agricultural workers were met satisfactorily, except in the Prince George area where haying had just commenced. It was thought the shortage of casual labour there would be overcome by assistance from local army units. Earlier fruit crops had been harvested except in Kootenay district. An increase in wages offered for permanent farm help, resulted in several placements, but generally there was little response to the demands for this class of labour.

The acute shortage of men for logging remained except in Vernon area, where a number of Japanese were given employment. One logging company ceased operating temporarily owing to lack of labour in its sawmill. The demand for workers in sawmills, shingle mills and pulp and paper mills continued to far exceed the available supply; this with the shortage of logs caused a continued loss of

production of lumber at the mills. New Westminster office reported that the freezing order as applied to the lumbering industry scared men, who were not previously employed in the industry, away from it.

A slight numerical gain was reported in mining placements and some benefit accrued from the referral to the military medical board of persons seeking to leave the coal mining industry on medical grounds. Princeton reported increased man-power in the coal mines of that area resulted in increased production and a steady flow of coal from Granby Collieries to the domestic market in Vancouver. In other areas, however, production at both coal and base metal mines was still impeded by acute man-power shortage.

Although men were still being received from the Prairies on clearance, there was no overall reduction in the heavy demand for all types of mechanics and helpers in the shipyards and engineering plants. A number of men who came from the prairies through clearance demanded a return to the prairies. Owing to the extreme shortage of labour in the Vancouver shipyards it was necessary to arrange for an inter-yard transfer of workers to cope with the urgency of a special naval construction program. An urgent demand for electricians had arisen, and orders were at once placed in clearance. Transfers of mechanics from non-essential industries were made to industries of high priority.

New construction projects at Vancouver were expected to absorb all available carpenters. Heavier demands came for painters and bricklayers, and there was a definite shortage of millwrights. Woodworking plants engaged on detail for shipyards were desperately in need of help, with low wages acting as a deterrent.

At Prince Rupert the urgent need of labourers for building, ditching and road construction continued. At Prince George all defence projects required ordinary labour.

Practically no progress was made in supplying extra gang labour for essential maintenance on railways. There was a shortage of deckhands.

The usual shortage of hotel and restaurant help, also of cooks, bakers, laundry workers and domestics, was again reported throughout the region. Some areas reported a shortage of competent office help. Butchers and packing-house workers were required in Vancouver.

Report of Employment and Selective Service Offices for the Period April to June, 1943

EMPLOYMENT conditions, as indicated by the reports from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the quarter, April to June, 1943, showed gains of 432.4 per cent in vacancies and 386 per cent in placements, when compared with those reported by the Offices in the corresponding quarter of 1942.

From the chart which accompanies the article on the work of the Employment and Selective Service Offices for the five-week period ending July 1, it will be seen that the curve of vacancies showed a pronounced upward trend during April and May, but during June the course followed was downward, while the curve of placements remained about the same. During the period April to June, 1943, there was a ratio of 118.9 vacancies and 140.7 placements for each 100 applications for employment, as compared with 66.9 vacancies and 43.8 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 11,312; of applicants registered 9,513; and of

placements effected 6,759 in contrast with a daily average of 2,153 vacancies, 3,220 applications and 1,410 placements in regular and casual employment during the same quarter of 1942.

During the three months April to June, 1943, the offices reported that they had referred 708,136 persons to positions and had effected a total of 513,650 placements, of which 499,993 were in regular employment and 13,657 in casual work. Of the placements in regular employment, 334,182 were of men and 165,811 of women. A comparison with the corresponding period of 1942 shows that 105,710 placements were then made, of which 78,366 were in regular employment and 27,344 in casual work. Applications for employment during the period under review were received from 464,722 men and 258,909 women, a total of 722,931, in contrast with the registration of 241,461 during the same period of 1942. Employers notified the Commission during the quarter April to June, 1943, of 859,660 vacancies, of which 583,812 were for men and 275,848 for women, as compared with 161,459 opportunities for work offered during the corresponding period a year ago.

Applications for Employment; Vacancies and Placements; June, 1943

RECORDS of the Employment and Selective Service Offices of the Unemployment Insurance Commission for the five-week period, May 28 to July 1, 1943, showed a gain of nearly 7 per cent in the average daily placements when compared with those of the preceding four weeks and of 348 per cent in comparison with the month of June last year.

The accompanying chart shows the trend of employment since January, 1941, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the trends of the curves of vacancies and placements in relation to applications took downward courses. The ratio of vacancies to each 100 applications was 114.6 during the five weeks ending July 1,

in contrast with 126.8 during the previous four weeks, and 49.9 during the month of June, 1942. The ratio of placements to each 100 applications during the period under review was 70.9 compared with 72.2 during the four weeks April 30 to May 27, and 30.6 during June last year.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the five weeks May 28 to July 1, 1943, was 11,600 in comparison with 11,801 in the preceding four weeks and with 2,607 during the month of June, 1942. The average number of applications for employment received daily during the period under review was 10,124 compared with 9,304 in the previous period and with 5,228 during June a year ago. The average number of placements made daily by the offices during

the five weeks ending July 1, was 7,174, of which 7,005 were in regular employment and 169 in work of one week's duration or less, in comparison with a daily average of 6,718 during the previous four weeks. Placements during the month of June, 1942, averaged

Reports for the four weeks ending May 27, 1943, showed 283,247 positions offered, 223,312 applications for employment and 161,245 placements effected, while in June, 1942, there were reported 65,166 vacancies, 130,689 applications and 39,981 placements in regular and casual

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

1,600 daily, consisting of 1,285 in regular employment and 315 in casual work.

During the period May 28 to July 1, 1943, the offices referred 282,820 persons to employment and effected a total of 208,032 placements. Of these, the placements in regular employment numbered 203,131, of which 136,846 were of males and 66,285 females, while placements in casual work totalled 4,901. The number of vacancies reported by employers was 227,085 for males and 109,303 for females, a total of 336,388, while applications for work numbered 293,597, of which 184,641 were from males and 108,956 from females.

employment. The following table gives the placements effected by the offices each year from January, 1933, to date:—

Year	Placements		
	Regular	Casual	Totals
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763

Unemployment in Trade Unions at the close of June, 1943

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are sick or engaged at work outside their own trades are not counted as unemployed, while reports from unions making returns vary from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Reports were tabulated at the end of June from 2,288 labour organizations in which the aggregate membership was 452,309 persons. Of these 2,696, or a percentage of 0.6, were unemployed, to a large extent temporarily, in

gains were more than sufficient to offset minor declines in work available for building and construction workers and coal miners, although the employment levels remained very high, also, for union members in both of these occupations.

In table I the unemployment percentages are shown by provinces. At the close of June these figures ranged from 0.1 per cent in British Columbia to 1.1 per cent in both New Brunswick and Alberta. In comparison with the previous month, a slightly higher employment level was observed in Quebec, where the percentage declined from 1.3 to 1.0. Minor improvements were noted, likewise, in provinces having smaller memberships, such

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

comparison with percentages of 0.7 in May and 2.5 in June, a year ago. The Dominion unemployment percentage of 0.6 was the lowest attained for any month in the trade union records since the report was prepared for the first time on a monthly basis for January, 1919; from December, 1915, to December, 1918, it was compiled for every quarter. The very slight employment increase indicated over the preceding month was due principally to the slightly better conditions which prevailed for union members in both the manufacturing and transportation industries; in these groups the percentages of those without work were 0.3 and 0.6, respectively, as compared with percentages of 0.4 and 0.7 in May. These slight

as New Brunswick, Manitoba and British Columbia, while in Ontario and Saskatchewan the unemployment percentages remained unchanged at 0.4 and 0.6, respectively; in Nova Scotia and Alberta, there were minor declines in available work. As compared with conditions in June a year ago, pronounced expansion was reflected in Quebec reports, while with the exceptions of Manitoba and Saskatchewan, in which there were small increases only, in work available, each of the other provinces, likewise, manifested rather marked employment expansion.

A separate compilation is made each month of unemployment among trade unions in the largest city in each province, with the excep-

tion of Prince Edward Island. At the close of June these percentages ranged from 0.1 in Halifax, Regina and Vancouver to 1.3 in Edmonton. With the exception of the latter, every city during this period registered less than one per cent of unemployment. In comparison with May conditions a fair expansion took place in Montreal, where the percentage of those without work declined from 1.2 to 0.9. A slightly higher employment level prevailed in Winnipeg, while in Toronto the percentage remained unchanged at 0.3. In each of the other cities, Halifax, Saint John, Regina, Edmonton and Vancouver, very slight employment increases were in evidence. In comparison with the situation in June, a year ago, very much better conditions were apparent in Montreal where the percentage declined from 5.7 to 0.9, while in Toronto there was a noteworthy increase, likewise, although it was not quite so pronounced, as the percentage in this case was down from 1.8 to 0.3. In Halifax, Saint John, Winnipeg and Regina, employment levels were appreciably higher, while in Edmonton the percentage of those without work remained unchanged at 1.3.

The accompanying chart shows the trend of unemployment from January, 1939, to date. The level of the curve in June continued in the downward direction, which it has followed since the end of March, although in the month under review conditions were but very slightly improved. In comparison with June, a year ago, the point of the curve was at a much lower level, thus indicating noteworthy employment expansion.

For the manufacturing industries 817 returns were tabulated having a combined membership of 255,357 persons, of whom 775, or a percentage of 0.3 were without work, in comparison with percentages of 0.4 in May and 2.8 in June, 1942. As compared with the preceding month employment levels for paper-makers and woodworkers were much higher, as the unemployment percentages for these members were reduced from 1.8 to 0.2 and from 1.3 to 0.4, respectively. Minor employment increases were in evidence also among soft drink workers, bakers and confectioners, electric current employees, etc., fur and clay, glass and stone workers. Among the organizations, in which the members were reported as fully employed at both dates were cigar and tobacco, textile and carpet workers, butchers, meat and fish packers, rubber, jewellery and mineral products workers. The percentage of unemployed members among garment workers, which group includes both men's and women's clothing workers, remained unchanged at 0.3, while among hat, cap and glove workers, mem-

bers in the iron and steel trades and metal polishers, etc., the percentage of those without work in each case was 0.1, which was identical with May conditions. Among union members in the printing and publishing organizations, the percentage of those without work was up slightly from 0.5 to 0.6, while among leather, aluminum and chemical products workers there were minor recessions also. A noteworthy decline in activity was reflected in reports received from unions in the unclassified manufacturing group, as the unemployment percentage for these workers advanced from 3.2 to 6.1. As compared with conditions in June, a year ago, garment workers manifested a marked increase in available work, while the employment level for union members in the iron and steel trades was substantially higher, also, as the percentage of those without work in that group declined from 1.1 to 0.1. Although a comparatively small number of members were involved in the change, unemployment among unclassified manufacturing workers was much reduced, as the unemployment percentage among these members declined from 23.1 to 6.1. Among the trades in which no unemployment was reported at either date, were cigar and tobacco workers, electric current employees, etc., textile and carpet workers, butchers, meat and fish packers, rubber and mineral products workers.

Returns were tabulated from 57 unions of coal miners having a combined membership of 19,498 persons, of whom 64, or a percentage of 0.3 were unemployed, in comparison with percentages of 0.1 in May and 1.8 in June, 1942. As in the previous month union members in New Brunswick and British Columbia did not report any unemployment, while in Nova Scotia and Alberta there were slight recessions only in available work. In comparison with the situation in June, a year ago, decided employment expansion was noted in Alberta, where the percentage of members without work was down from 4.0 to 1.0. Moderate betterment was manifested in Nova Scotia, while in British Columbia the percentage declined slightly from 0.1 to full employment. New Brunswick union members were reported as fully employed at both dates.

For the metallic ores group reports from 4 unions were received. These had a total membership of 10,229 persons, of whom 28, or a percentage of 0.3 were without work, as compared with a percentage of 0.1 in May; no unemployment was reported in June, a year ago.

Returns were tabulated from 8 unions of non-metallic mineral workers, having a com-

bined membership of 3,585 persons, of whom 100, or a percentage of 2.8 were unemployed. This percentage was identical with that recorded in May; in June, 1942, the percentage of idle members was 5.2.

Unions in the building and construction trades returned 201 reports showing an aggregate membership of 34,490 persons. Of these, 960, or a percentage of 2.8 were without work, in comparison with percentages of 2.6 in May and 5.8 in June, 1942. As compared with conditions in the previous month, employment for bricklayers, masons and plasterers was substantially improved, as the unemployment percentage in these trades was down from 8.9 to 3.7. Although not many were involved, the percentage of unemployed members among steam shovel men was reduced from 4.0 to 1.9 and for painters, decorators and paperhangers from 0.3 to 0.1. The percentage of those without work among plumbers and steamfitters remained unchanged at 1.8, while among wood, wire and metal lathers no unemployment was recorded at either date. Carpenters and joiners indicated an unemployment percentage of 2.8, which was slightly higher, thus reflecting a minor contraction in work. Among smaller memberships, such as bridge and structural iron workers and electrical workers there were very slight employment recessions, while for unclassified building workers the unemployment percentage of 5.1 was substantially higher, thus reflecting a rather marked decline in activity. Although comparatively few workers were involved, as the membership is small, the percentage of unemployment among granite and stonecutters showed a pronounced increase, as it advanced from 4.8 to 18.7. In comparison with the situation in June, a year ago, employment levels were much higher for bricklayers, masons and plasterers and carpenters and joiners. The percentages of members without work among smaller groups such as steam shovelmen and wood, wire and metal lathers were 1.9 and 0, or full employment, which were compared with percentages of 10.8 and 12.6, respectively, in June, 1942. On the other hand as noted in the previous comparison, employment among the small group of granite and stonecutters declined substantially, as the percentage of those without work in June, 1942, was 5.7.

In the transportation industries 876 reports were tabulated having a total membership of 85,256 persons, of whom 503, or a percentage of 0.6 were without work, in comparison with percentages of 0.7 in May and 1.4 in June, a year ago. Steam railway employees, whose

returns constituted over 79 per cent of the entire group membership were slightly better employed than in the previous month; among navigation workers a minor employment increase was recorded also. The percentages of unemployment were 1.1 and under 0.1 for teamsters and chauffeurs and street and electric railway employees, respectively; these were identical with those shown in May. In comparison with the situation in June, 1942, navigation workers indicated pronounced expansion in available work, while the employment level for steam railway employees was considerably higher, also. Street and electric railway members reflected a very slight increase in activity, while among teamsters and chauffeurs the percentage of those without work remained unchanged.

For the retail and wholesale trades, returns were received from 12 unions having a total membership of 2,423. As in the preceding month no unemployment was reported; in June a year ago, the percentage of those without work was 0.1.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1932.....	9.6	14.4	26.4	23.7	20.0	15.8	22.6	21.6	22.0
Average 1933.....	15.0	13.0	25.2	24.4	20.3	17.2	21.7	20.8	22.3
Average 1934.....	8.7	7.9	22.8	18.1	17.7	13.2	17.8	20.2	18.3
Average 1935.....	6.9	8.6	20.9	14.3	12.6	9.8	15.4	16.4	15.4
Average 1936.....	6.8	7.4	18.9	12.0	10.1	9.6	12.0	11.9	13.2
Average 1937.....	5.5	5.2	15.6	8.3	9.0	9.0	12.0	10.6	10.7
Average 1938.....	4.9	10.0	17.4	12.1	11.9	9.1	12.3	14.0	13.1
Average 1939.....	7.1	9.0	16.0	11.1	9.6	8.9	12.3	12.0	12.2
Average 1940.....	3.1	3.7	11.0	6.0	7.3	6.9	9.7	7.6	7.8

For unions of civic employees 107 returns were tabulated, with a total membership of 11,314 persons of whom 6, or a percentage of 0.1 were without work, in comparison with less than 0.1 per cent in May and 0.1 in June, 1942.

In the miscellaneous group of occupations returns were received from 143 unions, in which the combined membership was 12,950 persons, of whom 100, or a percentage of 0.8 were without work, as compared with percentages of 1.2 in May and 0.7 in June, a year ago. The employment level was somewhat higher than that of the previous month for hotel and restaurant, theatre and stage employees and unclassified workers. Among barbers the percentage of unemployment was 0.3 which was a very slight decrease, thus reflecting a very minor improvement. The percentage of those without work among stationary engineers and firemen remained unchanged at 0.5. In comparison with conditions in June, 1942, theatre and stage employees and stationary engineers and firemen registered slightly more employment. The percentages of those without work among barbers and unclassified workers

were 0.3 and 0, or full employment; these were identical with the percentages recorded for these members in June, a year ago. Employment among hotel and restaurant employees was moderately contracted, as the percentage advanced from 0.6 to 2.2.

Returns were tabulated from 2 unions of fishermen, in which the combined membership was 2,775 persons, all of whom were employed, in comparison with unemployment percentages of 0.1 in May and 6.2 in June, 1942.

Reports were received from 5 unions of lumber workers and loggers. The total membership was 4,518 all of whom were employed. The unemployment percentages for these workers in May was 0.9 and in June a year ago, it was 3.7.

Table I shows by provinces the average percentage of union members who were unemployed each year from 1932 to 1942, inclusive, and also the percentage of unemployment for June of each year from 1932 to 1941, inclusive, and from June, 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in Table I.

Shortage of Teachers in the United States

IT is pointed out by *Education for Victory*, official biweekly of the United States Office of Education, that "among the serious threats to the present 'school generation' is that involved in the growing shortage of personally qualified and professionally prepared teachers. The schools most affected are, by and large, those in greatest need of highgrade services, such as rural and village schools, where for all too many years less prepared and inexperienced teachers have frequently been employed. But included also are teachers in many special-subject fields in which war and defence demands for service have been heavy."

State and local school officials, members of legislatures, boards of education, teacher-education associations and interested citizens are seeking means of mitigating the seriousness of the present situation and of the immediate future.

The Superintendent of Schools for North Carolina is quoted as saying: "If the war should last two or three years during which time only a few people attended college to prepare to teach, there would be a period of some ten years before we could again expect an adequate supply of teachers."

The genesis of the difficulty appears to be the attraction of the armed forces for women teachers as well as men and the high wage scales in wartime industries. The latter are held to be "quite beyond the possibilities of most school budgets." Nevertheless, the educational authorities in more than half of the States have taken definite action to increase teachers' salaries, through outright grants to local districts. These State appropriations are usually definitely earmarked for the payment of bonuses to teachers, although in some instances other school employees and certain administrative costs may receive percentages of the benefit.

In addition to the raising of salaries, other factors are also being given attention, in efforts to increase public appreciation of the importance and value of the teaching profession, not only in wartime, but in times of peace as well. This implies the need for maintaining high standards of instruction and in disabusing the public mind of the conception that certain occupations in wartime industries contribute more to the war effort than teaching.

Labour Law

Recent Regulations Under Dominion and Provincial Legislation Seamen—Public Service—Manpower—Minimum Wages in British Columbia, Quebec and Nova Scotia—Saskatchewan Hospital Employees

BECAUSE of a wartime shortage of certificated officers, boats occupied in gill-net collecting on the British Columbia coast have been exempted from the obligation under the Canada Shipping Act to carry certificated Masters. The authority of the Minister of Transport to dispose of the wages of deceased seamen has been extended to cases involving amounts up to \$500. A consolidation and revision of the Orders in Council regarding leave of absence for employees of the Public Service who become members of the Armed Forces has been issued. Recent Orders in Council relating to labour supply, which are

listed below, are summarized elsewhere in the LABOUR GAZETTE.

In the provincial field, British Columbia has made provision for the payment of overtime in the minimum wage orders relating to the logging, sawmill, wood-working and box-manufacturing industries. Nova Scotia has revised four minimum wage orders governing the textile and needle trades, factories, shops and stores and beauty parlours. Superintendents of Mental Hospitals in Saskatchewan have been authorized to curtail the holidays of the attendant staff because of difficulties in obtaining substitutes. Quebec has renewed four minimum wage orders.

Dominion

Masters on Fishing Boats.—Due to the shortage of certificated Masters, gill-net collecting boats of over 10 tons gross tonnage operating in the vicinity of canneries on the British Columbia coast have been exempted for the duration of the war from the obligation under the Canada Shipping Act to carry a certificated Master. The Order in Council (P.C. 5494), which was passed July 9 under the War Measures Act, stipulates that operators of such boats may only take advantage of the exemption if a properly certificated Master is not available and if they see that a competent person is employed as Master.

Seamen's Wages.—The Order in Council authorizing the Minister of Transport to dispose of the wages owing to a deceased seaman by paying them to the seaman's next of kin without court proceedings in cases where the wages are the seaman's only assets and the amount involved is less than \$100 (LABOUR GAZETTE, June, 1943, p. 860) has been amended by Order in Council P.C. 5495 passed July 9 under the War Measures Act. The amendment extends this provision to cases involving amounts up to \$500.

Public Service of Canada.—The Orders in Council relating to employees of the Public Service of Canada who become members of the Armed Forces or of certain other forces of a similar nature have been consolidated

and revised by P.C. 18/5610 passed July 15 under the War Measures Act. Provision is made for protecting the positions, seniority and superannuation rights of such employees. Different arrangements apply to permanent and temporary employees.

Manpower.—The following Orders in Council relating to labour supply are summarized in the Manpower section of this month's LABOUR GAZETTE, p. 1074. Compulsory Employment Order No. 5, July 31, withdrawing designated age-groups of men from further non-essential occupations; National Selective Service Order No. 6, June 30, governing the temporary seasonal employment of women in canneries and replacing an earlier Order on this subject (LABOUR GAZETTE, April, 1943, p. 526); National Selective Service Order No. 7, July 29, allowing certain exemptions from the restrictions on advertising; P.C. 6077, July 29, amending the National Selective Service Civilian Regulations (LABOUR GAZETTE, January, 1943, p. 19) in regard to labour for coal mining; P.C. 5864, July 24, permitting the use of prisoners of war as resident labourers on farms or in other suitable employment; P.C. 5931, July 24, authorizing the use of members of the Military Forces in farming operations; and P.C. 5550, July 29, fixing wage scales for prisoners of war employed on labour projects outside internment camps.

Provincial

British Columbia Male Minimum Wage Act

Revisions of minimum wage Orders applying to the logging, wood-working, sawmill and box-manufacturing industries were gazetted July 2 and 15. New provisions relating to the payment of overtime have been added with the approval of the Regional War Labour Board, but the rates and most of the other provisions have not been altered. Order 1 (1943) relating to the logging industry supersedes a 1940 Order (LABOUR GAZETTE, 1940, p. 1147). Order 49 (1943) governing the wood-working industry replaces a 1937 Order (LABOUR GAZETTE, 1937, p. 984). Order 50 (1943) applying to sawmills and planing-mills also supersedes a 1937 Order and an amendment (LABOUR GAZETTE, 1937, p. 984; 1939, p. 908). Order 55 (1943) for the box-manufacturing industry rescinds a 1938 Order (LABOUR GAZETTE, 1938, p. 406).

The provisions relating to overtime pay are similar in most respects in the four new Orders. They apply to all workers in the wood-working industry and to workers in the logging, sawmill and box-manufacturing industries west of the Cascade Mountains; and include workers in these four industries covered by other minimum wage Orders. They stipulate that one and one-half times the regular wage rate must be paid for all hours in excess of eight a day and 48 a week. These are the maximum hours permitted in industrial undertakings under the British Columbia Hours of Work Act and they may only be exceeded in cases of emergency or in establishments receiving special permission from the Board of Industrial Relations.

Special arrangements in regard to overtime pay for three groups of workers are made under the revised Orders. (1) In the sawmill, wood-working and box-manufacturing industries, stationary engineers, pumpmen, operating millwrights, firemen, turbine operators and oilers are to be paid time and a half only after nine hours a day and 50 hours a week. (2) The Hours of Work Act permits workers and employers to arrange special systems of hours under which daily hours up to nine are permitted on certain days if less than eight hours are worked on other days, provided that weekly hours do not exceed 48. In addition a regulation under the Hours of Work Act authorizes night-shift workers in sawmills, planing-mills and shingle mills to work a 48-hour week in five nights instead of six, provided that no turn lasts more than 10 hours (LABOUR GAZETTE, 1934, p. 641). Workers in the four industries to which the revised

Orders apply who are covered by arrangements under these provisions are not to be paid at overtime rates until they have completed the daily hours fixed by arrangement or agreement for the establishment. (3) The following occupations in the industries are exempt from the provisions relating to the payment of overtime: watchmen, caretakers, storekeepers, cook- and bunk-house employees, persons holding positions of management or supervision, first-aid attendants covered by Order 39 (LABOUR GAZETTE, 1940, p. 1147) and workers in the transport industry governed by Orders 26 and 26A (LABOUR GAZETTE, 1940, pp. 1147, 1258). In the logging industry, time-keepers, office workers employed on a monthly basis and all workers engaged exclusively in the transport of men or supplies are also exempt.

No overtime rates have been set for workers in the logging, sawmill and wood-working industries east of the Cascade Mountains. A regulation under the Hours of Work Act permits workers in sawmills, planing-mills and shingle-mills east of the Cascade Mountains to work a nine-hour day and a 54-hour week or a 10-hour day for five days to permit a half-holiday on the sixth day provided that their total hours do not exceed 54 (LABOUR GAZETTE, 1934, p. 641).

There has been no change in the other provisions of the Orders governing logging, sawmills and the wood-working industry except that the manufacture of plywood has been added to the list of operations covered by the wood-working Order and operations incidental to hauling by truck or rail are now covered by the logging Order. A number of provisions in the earlier Order applying to the box-manufacturing industry are not included in the revised Order but they relate chiefly to such matters as the semi-monthly payment of wages, the keeping of records and the posting of the minimum wage Order which are all provided for in other legislation of the Province. Employers in the industry are no longer required to post a schedule setting out the daily shifts and intervals free from duty arranged for each employee.

Nova Scotia Minimum Wage for Women Act

Revisions of Orders 4, 6, 7 and 8 as amended by Order 10 were gazetted June 30 and July 14. Order 10 (LABOUR GAZETTE, 1941, p. 1110) raised by \$1 the rates fixed by all orders in effect at the time it was passed, and in certain orders, including Orders 4 and 6, it reduced from 50 to 48 the maximum hours for which

the minimum weekly rates were to be paid. These changes have been incorporated in the revised Orders and certain additional changes have been made. The revisions are to be effective from July 1, 1943, and are subject to annual revision. They apply only to cities and incorporated towns in the Province.

Order 4 (LABOUR GAZETTE, 1939, p. 1111) governs women workers in the textile and needle trades including weaving, knitting, spinning, the making of wearing apparel, and the working in and on leather goods, boots, shoes and furs. In the revised Order the regular hourly rates and the overtime rates fixed by the 1939 revision of the Order have been eliminated. Part-time work and hours in excess of 48 a week are now to be paid on a pro rata basis. The starting rate for girls under 18 in towns with a population of less than 17,000 has been increased from \$7 to \$7.50 a week for the first six months. A clause has been added providing that the weekly minimum rates are to apply to a work-week of less than 44 hours if the normal working hours of the establishment are less than 44. All other provisions and rates are unchanged. Experienced workers must receive at least \$12 a week in cities and \$11 in towns. Inexperienced workers over 18 must be paid \$10 in cities and \$9 in towns for the first six months, \$11 and \$10 for the second six months, and thereafter at full rates. Girls under 18 are to be paid \$8, \$9.50 and \$11 in cities and \$7.50, \$8.50 and \$10 in towns during successive six months' periods. At least 80 per cent of the workers on piece-rates in any establishment must be paid the full minimum rates; the remainder may consist of handicapped and inexperienced workers.

Order 6 (LABOUR GAZETTE, 1931, page 1192) applies to women working in all factories not covered by other Orders and in the paper trades which include printing, bookbinding, paper-box and paper-bag making, stationery manufacture and other trades making paper or paper products. The only new provision in the revised Order additional to the changes made by Order 10 is one stipulating that the weekly minimum rates are to apply to a work-week of less than 44 hours if the normal working hours of the establishment are less than 44. Otherwise they apply to a week of from 44 to 48 hours. All other provisions and rates are unchanged. Experienced workers must receive \$12 a week in cities and \$11 in towns. Inexperienced women over 18 years of age are to be paid \$10 in cities and \$9 in towns for the first six months, \$11 and \$10 respectively for the second six months and thereafter they receive the full rates. Inex-

perienced girls under 18 must be paid \$8, \$9.50 and \$11 in cities and \$7, \$8.50 and \$10 in towns for successive six months' periods.

Order 7 (LABOUR GAZETTE, 1940, page 691) governs women workers in shops and stores and includes those engaged in millinery, dress-making, tailoring or fur sewing in connection with any shop or store. The changes made by Order 10 have been incorporated in the revised Order and in addition the learning period has been reduced and the hours provisions have been altered. For inexperienced adults over 18 years of age the learning period has been reduced from 18 to 6 months and for girls under 18 it was cut from 18 to 9 months. The rates may now apply to a work-week of from 44 to 48 hours or to the usual number of hours worked in the establishment if less than 44. Formerly they applied to a 48-hour week or to the usual working hours if less than 48. Hours in excess of 48 are still regarded as overtime and are to be paid on a pro rata basis. A work-week of less than 44 hours, instead of 48 as before, is to be considered part-time work and paid at a proportionate rate. The weekly rates in effect under the revised Order are as follows: experienced workers in cities, \$12; in towns, \$11; inexperienced workers over 18, two three-month periods at \$10 and \$11 in cities and \$9 and \$10 in towns; girls under 18, three periods of three months each at \$8, \$9.50 and \$11 in cities and \$7, \$8.50 and \$10 in towns. Under the former Order these rates applied to periods of six months each.

Order 8 (LABOUR GAZETTE, 1936, page 38) covers women working in beauty parlours or any establishment where hairdressing, manicuring, permanent waving and similar occupations connected with beauty culture are carried on. The revised Order contains the changes made by Order 10 and in addition the hours provisions have been altered in the same way as was done in Order 7. The minimum rates may now apply to a work-week of from 44 to 48 or to the usual number of hours worked in the establishment if less than 44. Overtime is to be paid on a pro rata basis after 48 hours and hours of less than 44 a week are to be regarded as part-time work and paid at proportionate rates. A new provision requires employers to allow one hour for supper if workers are called on to work in the evening. The other provisions are the same as in the former version as amended. Rates are as follows: experienced workers in cities, \$12; in towns \$11; inexperienced workers, three periods of six months each at \$8, \$9 and \$11 in cities and \$7, \$8 and \$10 in towns.

Quebec Minimum Wage Act

Four minimum wage Orders were renewed by notices gazetted July 24. Order 23 applying to tavern employees in the district of Montreal (LABOUR GAZETTE, 1941, page 959) is to remain in effect until August 1, 1944. The others were renewed to September 1, 1944. They are: Order 14 governing maintenance men working in office buildings, apartment houses and other public buildings in the District of Montreal (LABOUR GAZETTE, 1938, pages 1099, 1236; 1940, page 124) Order 28 relating to dyeworks and laundries in the city of Quebec and town of Quebec-West (LABOUR GAZETTE, 1939, page 1003; 1940, page 447) and Order 29 concerning taxicabs and automobiles for hire in the cities of Quebec and Levis (LABOUR GAZETTE, 1939, page 1002).

Public Service of Saskatchewan

Superintendents of Mental Hospitals have been authorized by an Order in Council gazetted July 15 to reduce from three weeks to one the annual holiday with pay granted to members of the Public Service of Saskatchewan. An earlier Order (LABOUR GAZETTE, July, 1943, page 1034) authorized a one-week reduction for Public Service employees in departments or hospitals where acute shortages of staff existed. The latest Order only applies to "attendant staff." Compensatory pay is to be granted to the employees concerned at the end of the fiscal year, computed on the basis of the employee's salary at the time he would ordinarily have received his three weeks' holiday. Recommendations for curtailment must be approved by the Minister of Public Health and due consideration given to the health of the workers in making such recommendations.

Recent Legal Decisions Affecting Labour

Alberta Appeal Court Affirms Judgment Holding Owner of Railway Car Responsible for Injury to Railway Employee

An appeal against a judgment of the Alberta Supreme Court awarding damages to a railway worker who had been injured as a result of a defective handhold on a railway car (LABOUR GAZETTE, April, 1943, p. 528) was dismissed with costs by the Appellate Division of the same Court on July 17. The midway-show company owning the railway car brought the appeal on the ground that it was not responsible for the accident because it was the duty of the railway company on whose lines the car was being operated to inspect it for defects. Two cases were cited in which the principle had been stated that when A passes a chattel to the control of B and B has an opportunity to inspect the chattel, A is not responsible for accidents caused by defects in the chattel.

The Court pointed out, however, that in both these cases it was held that A is not responsible for accidents caused by a defect "which is not secret", but in the present case the evidence showed that the defect was not evident to the worker and was therefore a "trap". In such a case A was responsible and ought to have known of the hidden danger in a handhold which had been in use for 12 years and was subject to considerable vibration and exposure which would rot the wood and rust the screws. The Court held, moreover, that even if the worker was merely considered as an "invitee" on the appellant

company's property it was that company's duty to take reasonable care by proper inspection to prevent injury to him from hidden dangers, and its "careless reliance upon the railway companies may well be likened to the lack of care in the choice of a servant or agent". *Smith v. Conklin and Garret Limited (No. 2)* (1943) 2 Western Weekly Reports 622.

Ontario Appeal Court Upholds Validity of Industrial Standards Act and Schedule

The Ontario Court of Appeal on June 30 dismissed with costs the appeal of a number of manufacturers of men's and boys' clothing against the decision of a lower court which had found that the Ontario Industrial Standards Act was *intra vires* and that a schedule of wages and hours established by Order in Council under the Act for the appellants' industry was valid (LABOUR GAZETTE, 1942, p. 1504).

The appellants had attacked the constitutional validity of the Act on three grounds: (1) that the assessment of employers and workers provided for in certain schedules to cover administrative costs was a form of indirect taxation; (2) that the provision of penalties for non-compliance with the Act invaded the Dominion's power over criminal law; and (3) that the Act conflicted with the Dominion Combines Investigation Act and the latter occupied the field. The lower court had held: (1) that the assessment was not a tax but a payment for services rendered; (2) that the Act, while affecting criminal law, was

not legislation relating to criminal law, but was legislation within the province's power over property and civil rights; and (3) that since the Combines Investigation Act dealt with commodities and the Industrial Standards Act dealt with wages and hours of workpeople, they could not be said to conflict or occupy the same field of legislation.

The Appeal Court agreed with the reasoning of the lower court on the question of constitutional validity. Mr. Justice Kellock pointed out that the formulation of legislation by persons familiar with the conditions of an industry, as was done under the Act by representatives of employees and employers in an industry, was not the act of a "combine" within the meaning of the Combines Investigation Act, which stipulates that a "combine" must be detrimental to the public. He held further that the provincial legislature had full power to enact everything provided for in the schedule. Chief Justice Robertson, while not accepting the contentions of the appellants in regard to the question of constitutionality, questioned the validity of one clause in the schedule which stipulated that the minimum rates for all parts of the province other than five named counties might be 12½ per cent lower than the rates set in the schedule. Since the whole province had been created a zone he doubted whether, under the Act, different rates could be set for different areas within the zone. He considered that the clause in question did not establish any minimum rate, and the Act specifies that a schedule may only "establish the minimum rates of wages".

The appellants attacked the validity of the schedule on the ground that certain of the statutory requirements for the promulgation of a schedule were not complied with. In particular, they objected to the procedure adopted in calling the conference of representatives of employers and workers to draw up a schedule.

In the lower court it was found that the procedure was proper and, moreover, that since the methods of convening and conducting a conference were not prescribed in the statute, they were matters of administrative discretion with which a Court should not interfere. It was held, too, that before the Order in Council was passed making the schedule binding, the appellants might have asked the Court to interfere on grounds of irregularity of procedure, but that after the schedule was law, the Court had no power to interfere if the Lieutenant-Governor in Council, in promulgating the schedule, had acted on the recommendation of the Minister and so in conformity with the Act.

Chief Justice Robertson in the Appeal Court, disagreed with this latter view. He considered that the power of the Minister to recommend a schedule and of the Lieutenant-Governor in Council to declare it binding could only be exercised validly in regard to a schedule the origin of which was in accordance with the statute. If any of the statutory requirements had not been fulfilled, the Court could declare a schedule invalid. In the present case the burden of proof that the statutory requirements had not been complied with rested with the appellants who had attacked its validity. In the Court's opinion the appellants had failed to prove their allegations and the fact that the respondents might not have proved the validity of the schedule was immaterial.

Chief Justice Robertson agreed with the trial judge that the Court should not, in general, interfere with matters left to the discretion of the Minister such as determining whether the schedule was agreed to by a sufficient representation of employers and workers. However, if the Minister used his discretion in a way which would constitute a fraud on the statutory provisions, the Court should interfere. For example, the Minister might give insufficient notice of a conference or declare any gathering of persons a conference of employers and workers. In the present case, however, the evidence had not shown that the method of convening the conference was insufficient nor that the Minister's discretion was improperly used, so the Court should not interfere.

The other members of the Court concurred in this opinion. Mr. Justice Gillanders was of the opinion that the Court could decide if there had been a conference and if a schedule had been submitted by the conference, but it should not interfere with the administrative procedure for calling and conducting the conference, provided that no one was deprived of a right or suffered injury as a result of the procedure adopted. While he considered that the procedure in the present case was open to technical criticism, he believed that it was adopted in good faith and that the results would not have been materially different if the most proper procedure had been used. Mr. Justice Kellock declared that the fact that the notice convening the conference did not come to the attention of all employers and workers was not sufficient ground for declaring that no conference had been held. Moreover, the evidence had not shown that the statutory requirements were not fulfilled. Therefore in his opinion the schedule was valid. *Tolton Manufacturing Co. Limited et al v. Advisory Committee for the Men's and Boys' Clothing Industry for the Province of Ontario* (1943) Ontario Weekly Notes 443.

*Company Official Convicted of Violating
Quebec Collective Agreement Act by
Submitting False Return*

An accountant employed by a printing firm was found guilty by the Montreal Superior Court on April 12 of submitting a false return to the Joint Committee of the Printing Trades for Montreal and district in violation of the Quebec Collective Agreement Act. Section 43 of the Act makes it an offence to transmit knowingly any false or inexact information or report required in connection with the administration of a decree established by Order in Council under the Act. In interpreting this section Chief Justice Perrault held that such an offence could be committed by anyone—employer, worker or other person.

The printing trades on the island of Montreal and within a 100-mile radius are governed by a decree which was passed in April, 1941, and is administered by a Joint Committee of employers and workers. The firm concerned in the case was situated in Zone 1 (Island of Montreal and 10-mile radius) where regular working hours are fixed by the decree at nine a day and 44 a week. Time and one-half must be paid for the first three hours' overtime and double time thereafter. A premium of 15 per cent on all rates must be paid to night-shift workers.

It was established by the evidence that an employee named Bolduc had worked three and four hours' overtime on several evenings in August, 1942, after completing his nine-hour day-shift. He had been paid the day rate plus 15 per cent for the overtime instead of time and one-half or double time. The report submitted to the printing trades' Joint Committee for the month of August by the accountant, Lescarbeau, who kept the books and time-sheets of the firm, stated that Bolduc had worked not more than 44 hours in any of the four weeks. Lescarbeau admitted that this was a false statement but said that mention of the overtime had been omitted because the firm was to be reimbursed by a third party for the cost of Bolduc's overtime. Chief Justice Perrault refused to accept this as justification for the submission of a false return and found Lescarbeau guilty of violating Section 43. He referred to a recent decision of Mr. Justice Archambault, who in a similar case, had upheld the acquittal of a company official charged with submitting a false return on the ground that the official had merely prepared the false return and the company had submitted it (LABOUR GAZETTE, June, 1943, page 865). In the present case, however, the Court held that Lescarbeau had both prepared and sub-

mitted the return himself and knew it was false. Lescarbeau was ordered to pay the minimum fine of \$200 and cost or in default of payment to spend one month in jail. *Comité Paritaire de l'Industrie de l'Imprimerie de Montreal v. Lescarbeau* (1943) *Rapports Judiciaires de Quebec*, Cour Supérieure 160.

*Quebec Court Holds that Improperly Discharged Seaman had Claim for Wages until
Contract Legally Terminated*

Holding that a seaman had a claim for wages until properly discharged in accordance with the requirements of the Canada Shipping Act, Chief Justice Bond in the Montreal Superior Court on May 1 quashed with costs two writs of certiorari granted by Mr. Justice Tyndale on March 8 to a shipping company. The company had been ordered by the Recorder of the City of Montreal to pay two discharged seamen amounts representing wages from the date of their discharge to the time of their return to the port at which they had been articulated. On the ground that the seamen's claims were for damages for breach of contract rather than for wages, and therefore outside the jurisdiction of the Recorder's Court, the company had obtained writs of certiorari to halt execution of the judgments of the Recorder's Court. The Superior Court in quashing the writs delivered two identical judgments.

In the case of Thomas Young, a ship's cook, the evidence established that he had been articulated at Montreal and was to be paid off in a Canadian port. The Canada Shipping Act stipulates that a discharged seaman must be given a certificate of discharge, and that his passage home and maintenance while en route must be paid by his former employer.

Young was put ashore at a port in England and paid all but \$44.70 of the wages earned by him. His passage and maintenance back to Montreal were also paid by the shipping company, but he was not given a certificate of discharge. He sued for the unpaid wages and for wages from the time he was put ashore in England until his return to Montreal on the ground that he was articulated to be paid off in a Canadian port. The case was heard by the Recorder of the City of Montreal under sec. 206 of the Canada Shipping Act which permits seamen's actions for wages amounting to not more than \$250 to be dealt with in a summary manner. The Recorder awarded the seaman his claim in full.

The shipping company, in applying for a writ of certiorari, to halt execution of the judgment contended that the action was not

for wages and therefore outside the jurisdiction of the Recorder's Court. It claimed that the Shipping Master at the English port had undersigned the seaman's discharge and thus terminated the contract, so that the seaman could not claim wages but might sue for damages resulting from the company's failure to give him a certificate of discharge. Such an action, however, would have to be dealt with in the common law courts.

Chief Justice Bond agreed that most definitions of seamen's wages limited them to compensation for services on board ship, but cited various authorities and related cases in which the opinion was expressed that a seaman's lien for wages was not limited to the wages earned by him whilst actually on board the ship but extended to wages due after a wrongful termination of the contract. He also referred to an English case in which it was stated that "where there has been merely a breach of contract by the employer the contract subsists and can be made the subject of a simple claim for wages unless the seaman has accepted the repudiation of the contract, in which case, his claim becomes one for damages." On this principle, the present case was a simple claim for wages since "it is common ground between the parties that the agreement was not terminated by mutual consent." Therefore, "the contract continued to subsist until it was established that Young had been properly discharged or until his return to Canada," and the dispute was within the jurisdiction of the Recorder as a claim for wages up to a definite date. *Furness Withy & Company Limited v. Recorder E. J. McManamy*, Montreal Superior Court, May 1, 1943.

*English Court Interprets "Trade Dispute" in
Conditions of Employment and National
Arbitration Order*

A Divisional Court in England was recently called upon to decide if a dispute between a trade union and a printing company over the reinstatement of certain employees of the company was a "trade dispute" within the meaning of the definition in the Conditions of Employment and National Arbitration Order of July 18, 1940 (LABOUR GAZETTE, 1940, p. 760). The Order provides for the settling of disputes which cannot otherwise be resolved by a National Arbitration Tribunal appointed from panels representing employers, workers and the general public. Either party to a dispute may report it to the Minister of Labour and National Service. The Minister then directs that the matter be dealt with by any existing machin-

ery for settling disputes established by a collective agreement in the industry, or in the absence of such machinery, he takes other steps to promote a settlement. If a settlement is not reached within a reasonable time the Minister refers the matter to the National Arbitration Tribunal.

The case, which was reported in the British *Ministry of Labour Gazette* for May, 1943, arose when the ban on the publication of the *Daily Worker* was lifted in the summer of 1942. The National Society of Operative Printers and Assistants applied to the Keable Press Ltd., which publishes the newspaper, for the reinstatement of the members of the Society who had been employed by the Company when publication ceased in January, 1941. The Company agreed to reinstate all the workers who were available except one named Howard, but when some of the others refused to commence work on the day before the first issue was due to appear (September 7) the Company reinstated Howard on a provisional basis pending further negotiations. Subsequent negotiations failed to settle the issue and on October 26, the Company dismissed Howard. The Union then reported to the Minister of Labour and National Service that a dispute existed between the Company and those of its employees who were members of the Union, and the Minister referred the question to the National Arbitration Tribunal for settlement.

Before the Tribunal, the Company contended that the dispute was not between the Company and its employees but between the Company and the Union, and that this did not constitute a "trade dispute" within the meaning of the definition in the Conditions of Employment and National Arbitration Order. The definition stated that "trade dispute means any dispute or difference between employers and workmen, or between workmen and workmen connected with the employment or non-employment or the terms of the employment or with the conditions of labour of any person."

The Tribunal declared that it had no power to decide if a "trade dispute" existed and adjourned the proceedings so that the Company might apply to the Court for an Order of Prohibition restraining the Tribunal from acting in the matter. The Court heard the case on April 16 and 19 and ruled that there was the most ample evidence that a trade dispute within the meaning of the definition existed between the Company and workmen in its employ. The Minister had, therefore, correctly referred the matter to the National Arbitration Tribunal which had jur-

isdiction to deal with the issue. *The King v. the National Arbitration Tribunal ex parte the Keable Press Ltd.*, Divisional Court, April 16 and 19, 1943.

A second legal case, reported in the *Ministry of Labour Gazette* for June, arose out of the matter when six members of the London Machine Branch of the National Society of Operative Printers and Assistants applied in the High Court for an injunction restraining the Society from expelling them or for a declaration that they were still entitled to be regarded as members. They charged that the Society had attempted to expel them for "conduct detrimental to the interests of the Society" because they had refused to take part in a strike called by the secretary to protest at the failure of the Keable Press Ltd., to reinstate Howard. The Society in its defence claimed that the instructions given by the secretary to the plaintiffs did not amount to the calling of a strike. The High Court considered, however, that the instructions were definitely intended to bring about a cessation of work which would constitute a breach of the workers' contract with the Keable Press Ltd. Moreover, as the dispute had not been reported to the Ministry of Labour in accordance with the conditions of Employment and National Arbitration Order, it was illegal for the workers to strike in connection with such a dispute. Mr. Justice Hallett held that the workers could not be validly expelled for failure to obey instructions to do something illegal. The Court granted the injunction and a declaration that each of the six workers was entitled to be regarded as a member of the Society. *Ward and Others v. Isaacs and Others*, High Court of Justice, May 20, 1943.

English Court Upholds Right of National Arbitration Tribunal to deal with Dispute in Industry where Trade Board in Existence

The King's Bench of the High Court of Justice in Great Britain recently dismissed four applications for an Order of Prohibition preventing the National Arbitration Tribunal from hearing certain trade disputes which had been referred to it by the Minister of Labour and National Service. The applicants were the Imperial Tobacco Company Ltd. and others. The dispute in which the Imperial

Tobacco Company was involved was a claim by youths doing work formerly done by adults to be paid adult rates, and the other companies were concerned with claims for an increase in rates up to those paid by Imperial.

The National Arbitration Tribunal was established in July, 1940, under the Conditions of Employment and National Arbitration Order (LABOUR GAZETTE, 1940, p. 760). This Order provided that the Tribunal was set up "for the purpose of settling trade disputes which cannot otherwise be determined." A dispute may be reported to the Minister by either party and the Minister may either refer it to any existing machinery which he considers suitable, or, if no suitable machinery exists, he may refer it to the Tribunal.

It was argued that the National Arbitration Tribunal had no jurisdiction in the matter as a Trade Board had been established for the industry under the provisions of the Trade Board Acts, 1909-18, and that this Board should deal with the disputes. In the argument emphasis was laid on the phrase, "which cannot otherwise be determined," in the Conditions of Employment and National Arbitration Order.

The Court held that the only duty of a Trade Board was to fix minimum wages and that its jurisdiction differed from that of the National Arbitration Tribunal which was authorized to deal with such disputes as those in which the applicants were involved. In any case, even if the Trade Board did have the right to deal with the disputes in question that would not justify the issue of the prohibition asked for. The Court could not prevent one body from functioning merely because there might be some alternative method of dealing with the question and there appeared to be no threat by the National Arbitration Tribunal to usurp powers which it did not legally possess. In regard to the words "which cannot otherwise be determined", the Court was of the opinion that the Order had to be construed as a whole to see what its purpose really was. *Re v. National Arbitration Tribunal, ex parte Imperial Tobacco Company Ltd., British Tobacco Company Ltd., Godfrey Phillips Ltd., and Andrath Tobacco Company Ltd.*, High Court of Justice, King's Bench Division, May 21, 1943.

Labour and Industry in Manitoba, Nova Scotia and Saskatchewan

Review of Annual Reports of Provincial Departments of Labour

RECENTLY the annual reports of the Manitoba and Nova Scotia Departments of Labour, and the Bureau of Labour and Public Welfare of Saskatchewan, were received in the Department. A summary of each report appears below.

Manitoba

The annual report of the Manitoba Department of Labour for the period, May 1, 1941, to April 30, 1942, reviews the administration of the various Acts coming within the purview of that department:

Inspections—During the fiscal period 1941-42, a total of 26,563 inspections were made and 12,624 orders were issued under the Acts administered by the department. In Winnipeg and district 3,379 inspections were made under the Factories Act resulting in 1,973 orders for improvement of safety conditions and 123 for the amelioration of health and sanitary facilities. In the remainder of the province, Factories Act inspections during the fiscal year numbered 341 and resulted in 272 safety orders and 13 orders dealt with conditions of health and sanitation.

Accidents and Accident Prevention—The total number of fatal accidents reported during the fiscal year was 396, classified as follows: industrial, 33; traffic, 65; home fatalities, 107; general fatalities, 191. Of the home fatalities 54 were caused by falls and 27 by asphyxiation. Under the heading of general fatalities, 53 were due to drowning and 35 resulted from aeroplane accidents.

The report states that a very extensive safety campaign was conducted at the end of May, 1941. All organizations interested in safety, such as insurance companies, safety committees, motor league, police departments, etc., had their safety work co-ordinated through the Accident-Prevention Branch of the Department of Labour, which became the recognized clearing-house for safety information.

Building Trades—During the fiscal year there were approximately 940 residences erected in Greater Winnipeg, the cost of which amounted to \$3,655,050. Under contracts let by the Department of Munitions and Supply additions were made to ten air stations within the province. Several large industrial and commercial projects were also carried to completion. In all 645 inspections were made and 189 orders issued under the Building Trades Protection Act during the fiscal year.

Fair Wages—During the fiscal year, the Fair Wage Board held 13 meetings and one Public Hearing in connection with the Revision of the Fair Wage Schedule. The provincial Department of Labour was authorized by the federal government to administer the fair wages as specified in all contracts issued by the Department of Munitions and Supply.

There were 137 wage claims adjusted and the amount of \$6,727.41 collected and paid out to claimants. There were 16 informations laid against two contractors for non-payment of wages. Thirteen convictions were obtained and in three instances the contractor pleaded guilty and was ordered to pay all the costs of the court and the wages due. Inspections to the number of 1,397 were made and 301 orders issued during the fiscal year.

Strikes and Lockouts—At the 1941-42 session of the legislature the Strikes and Lockouts Prevention Act was amended to provide that if the majority of the employees who are members of the union affected grant the necessary authority at a duly called meeting, a Board may be requested. Previously, the Act required that before union members could request a Board, there must be authorization signed by a majority of the union members affected. Following the introduction of the Dominion Government's wage control policy late in 1941, conciliation boards under the Strikes and Lockouts Prevention Act could not arbitrate on questions regarding wages, all such being referred to the Regional War Labour Board.

During the fiscal year ten applications for boards of conciliation were filed with the registrar, as compared with six the previous year.

Fire Losses—Fires to the number of 1,923 occurred in Manitoba during the year causing an insured property loss of \$1,102,561.97. The uninsured loss was estimated at \$110,256.20, making a total loss of \$1,212,818.17 (per capita loss \$1.67 as compared with \$1.42 for the previous year). Seventy-seven per cent of the fires occurred in dwellings with an insured property loss of \$360,623. Eleven persons lost their lives by fire, seven of whom were children, two women and two men.

Nova Scotia

The annual report of the Department of Labour of Nova Scotia for the fiscal year ended November 30, 1942, states that there was an over all increase in industrial employment in that province of 32.5 per cent over 1941. The most notable expansion was in the Halifax zone. Employment of members of trade unions at the end of October, 1942, however—with reference only to organizations reporting—showed a very slight employment contraction as compared with October, 1941. For coal miners in Nova Scotia, the unemployment percentage of 0.7 per cent remained unchanged.

The report discusses in some detail the war emergency training methods being applied in the province, in co-operation with the Federal Government. These include apprenticeship projects, youth training, training for women in industry and courses for men and women enlisted in the armed forces. Details are given of the work of the factory inspector, the Minimum Wage Board and the Fishermen's Loan Board.

Youth Training.—Youth training projects were continued throughout the year with assistance from the Federal Treasury. "There were three distinct projects of a single nature maintained by the Provincial Department of Labour and administered by the Technical Education Branch of the Department of Education. There were the apprenticeship training centres in North Sydney, Sydney and Glace Bay. These were supported jointly by the Dominion, Province and Municipalities and the expense divided among them in the proportions of forty, forty and twenty per cent respectively. They had been established in the depression period before the war to help solve the problems of unemployed youth. A modified form of apprenticeship had been established in these communities whereby young men were taken into business and industrial establishments and attached as assistants to skilled workers to learn trades. . . ."

Training for Women.—By the spring of 1942 the shortage of manpower was becoming evident and attention was directed to the employment of women in industry. The training centres were thrown open to women, and considerable progress was made. To meet the rapidly increasing demand for clerical workers two of the training centres devoted their attention almost entirely to training students in commercial work. Courses extending over periods of from seven to eight

months were provided. Several hundred girls were transferred to Ontario for employment in wartime industries.

War Emergency Training.—Trade training to meet various needs arising from the war emergency, however, constituted the main effort in vocational education. In the main it was given to two distinct types of students: (1) Those who are prepared for employment in war industries and (2) members who have already enlisted in the armed services. Practically all of the instruction consists of specialized intensive trade, technical, and clerical courses of two to six months' duration. The aim is to give enough knowledge and skill to the student, so that he may function usefully in a definite occupation.

Both personal interviews and psychological tests were used in selecting trainees. In all, 648 men and 51 women were given the war emergency training courses during the year and of these 471 men and 16 women were placed in employment. In the army trade training courses, 589 men and 43 women completed the prescribed work.

Labour Disputes.—During 1942 there was a drop of 40.43 per cent in the number of workers involved in strikes as compared with 1941. There was a corresponding drop in the loss of man-days of 41.33 per cent. The Joint Adjustment Board gave decision in 32 industrial disputes, an increase of fourteen over 1941.

Accident Prevention.—Owing to the rapid development of industry to meet wartime requirements and the consequent employment of many untrained or partly trained workers—both men and women—much attention was given to accident prevention and the maintenance of as suitable working conditions as the use of many old and improvised buildings would permit.

Minimum Wage Board.—The Minimum Wage Board worked in close co-operation with the Dominion Government through the National War Labour Board, the Regional War Labour Board and the Selective Service. It is noteworthy that coincident with the great increase in the employment of women there were increases in the average weekly wages paid them in every industry, the most notable being in small factories and in the paper trades. The 1941 average weekly wage in these lines was \$13.29. In 1942 it was \$17.77.

Saskatchewan

Covering the year ending December 31, 1942, the eighth report since the present Bureau of Labour and Public Welfare of Saskatchewan was formed in 1934 also constitutes the twenty-second report since the Bureau of Labour and Industries was organized in 1920.

Strikes and Lockouts—There were two strikes in Saskatchewan during the calendar year 1942. The first was in a Moose Jaw steam laundry and was caused by a demand for union recognition and also to decide which specific union should act as bargaining agent. The strike lasted three days and the union requested by the workers was recognized by the management. The second strike occurred in a steam laundry at Saskatoon. It too, was due to a demand for union recognition. Although the strike began in mid-September, it was not terminated when the annual report was issued, the management of the laundry being able to obtain a sufficient number of workers to carry on the work of the plant.

One Day's Rest in Seven Act—This Act was amended in 1942, so that, when the mayor of a city to which this act applies proclaims any day to be a Civic holiday, the provisions of this act should not apply to the shops in that city in respect to the week which includes such holiday. During the year 1942 it was found necessary to give numerous warnings and order back wages to the amount of \$23 affecting two firms and three employees; but no action was taken in the courts to enforce compliance with the provisions of the Act.

Freedom of Trade Union Association Act. As required under the Freedom of Trade Union Association Act, 127 associations filed a copy of their constitution and by-laws with the Minister of Labour as well as lists of the names and addresses of their officers and the number of their members for 1941. The 127 Associations filing returns reported a membership of 10,138 as compared with 128 organizations with a total of 8,873 members in 1940.

Minimum Wages—During the period January 1, 1942 to December 31, 1942, a total of 2,799 inspections were made. Of these, 2,773 were general inspections and 26 were special inspections. As formerly, a wage sheet return form was sent to each firm for completion. In 1942, for the first time, wage sheet returns were required also from logging and lumbering mills. The total number of employees reported on wage sheet returns was 25,597 of whom 17,871 were males and 7,726 were females. These workers received \$41,817.01 in overtime pay for time worked in excess of 48 hours in any week, during the four-week or one month pay period

in 1942, as compared with \$54,894.27 paid for similar overtime work in 1941. Of the total number of employees, 23,052 were employed full time, while, 2,545 were employed on a part time basis.

During the calendar year 1942, arrears of wages to the amount of \$7,532.81 were collected from 243 firms and were apportioned amongst 153 males and 189 females, or a total of 342 employees. The amount collected for cost-of-living bonus by the Bureau's inspectors was \$1,129.15. Court proceedings were taken to enforce the Minimum Wage Act and orders of the Board. Three charges were laid against two Regina firms and fines were imposed. Recovery of \$18.80 in wages constituted part of the penalties.

Apprenticeship Agreements—At December 1942, there were 46 apprentices indentured to 34 firms covering 16 trades or industries. As in 1941, pharmacy was the trade of the largest number of apprentices, 18 being indentured in that group. This was followed by "pressman" with five.

Industrial Standards Act—According to the report, during the calendar year, 1942, a total of 579 employers and 1,243 employees were governed by agreements drawn up under the terms of the Industrial Standards Act. At the end of the year there were 40 schedules in 15 industries in effect under the legislation, 13 being in barbering and seven in beauty culture. The number in each of the 15 industries was the same as in 1941. The amount of back wages collected during the calendar year, 1942, was \$1,165.24 for 17 employees, as compared with \$2,830.55 for 103 employees in 1941.

Co-operation with E. and S.S. Offices.—During the autumn of 1942 the Bureau of Labour and Public Welfare co-operated with the Employment and Selective Service offices in trying to interest farmers in coal mining during the winter months. A number of miners were obtained, with the result that the threatened shortage of Saskatchewan coal was alleviated to an appreciable extent.

Factories Act—By authority of the federal government, the inspectors of the Bureau of Labour made a number of inspections and investigations in connection with federal contracts, chiefly airports, during 1942. Back wages were collected for employees totalling \$3,336.94. These collections were forwarded to the Receiver General of Canada at Ottawa from which source the individuals received the additional wages to which they were entitled.

Eight accidents were investigated by inspectors of the Bureau during 1942. Three of these were fatal.

Prices and Price Control

Price Control in Canada During July, 1943

Orders of Wartime Prices and Trade Board Affecting Foods, Agricultural Machinery, Wood Products, Textile Products and Consumer Rationing

IN July the Wartime Prices and Trade Board issued orders placing ceiling prices on the sale of spring lamb, revising the price structure with respect to eggs, and setting standard prices for certain foods packed in standard glass containers. On July 30 the Board announced that it was taking steps to place ceilings on some fresh fruits (peaches, pears, plums) and on storable root crops later in the year. In the field of wood products, orders were passed establishing a new price schedule for pulpwood sold in New Brunswick (other Provinces being covered in orders issued in May and June), and for various types of lumber sold in the Maritimes. During the month the Board announced a further increase in newsprint prices.

Foods

Fruits and Vegetables.—Faced with an acute shortage of fresh fruits, which might result in prices getting completely out of hand, the Board announced on July 30 that it proposed to place peaches, plums and pears, and possibly apples, under ceiling prices when they come on the market. In the statement the Board made it clear that prices would be considerably higher than last year in view of the greatly reduced crops. Although controlling the prices of peaches, plums and pears is considered a major administrative problem, "it is more manageable", the statement added, "than putting effective maximum prices on the berry crop".

In order to prevent unduly high prices of vegetables during periods of less adequate supplies, the Board is also planning to put ceilings on storable root crops at an appropriate time (carrots, beets, turnips, parsnips, cabbage). The supply of fresh vegetables is expected to be more ample this summer and fall and prices have been dropping fairly rapidly with Canadian grown vegetables coming on the market and Victory Gardens being harvested.

Canned Fruits and Vegetables.—To conserve stocks of canned fruits and vegetables during

the period when supplies of fresh products are more readily available, the Board issued an order withholding from the retail market the current pack and also the remainder of the 1942 pack. The order affected all canned fruits and vegetables except canned soups, baby foods, jams, jellies and marmalades (B-301, July 26, effective July 27). In announcing its plan to place ceilings on certain fresh fruits, the Board also stated that steps would be taken to ensure that a portion of the crop is canned.

Eggs.—The price structure for eggs has been changed as a result of an order establishing maximum wholesale prices for 25 cities and a number of rural areas covering most of Canada. Under previous orders maximum prices were established in key cities with prices in other places being based on prices in those cities plus transportation charges. Price differentials have been adjusted so as to facilitate the movement of eggs from areas of production to areas of heavy consumption. Seasonal variations in prices are to take place below the established ceiling. (B-299, July 21.)

The Board also announced that no permits for the storage of eggs will be granted until the current supply situation has improved. In taking this action it was pointed out that the present consumer demand is heavy and existing prices, while still under the maximum price established by the Board, are already considerably higher than the seasonal price current at this time last year, and "in such circumstances, some storers and handlers of eggs could take advantage of the situation to reap speculative profits through egg storage operations".

Lamb.—Because prices for spring lamb have not followed last year's pattern, under which the seasonal decline commenced about the middle of July, the Board considered it advisable to place carcass prices under specific ceilings for each of the zones in Canada during the balance of the season for sales of spring lamb (July 27 to August 31). Prices were reduced as a result of the order, but

were sufficiently high under the new ceiling to enable buyers to pay a price for live lambs at least as high as that obtaining last year (B-300 July 26).

Food Containers.—Glass containers for certain foods and alcoholic beverages are to be made in standard sizes, and prices for food products packed in the new glass containers are to be determined on the basis of changes in food content. Under the simplification program, arranged by the glass, metal containers and foods administrations, specifications were fixed for 28 standard containers (A-815, July 17), and some of the specified containers were assigned for packaging particular foods (A-816, July 17). Similar regulations were issued with respect to bottling alcoholic beverages for domestic use (A-817, July 17). It is expected that these orders will result in reduced inventories carried by wholesalers and retailers and also enable consumers to identify standard prices with standard sizes.

Simplification measures were also applied to the manufacture of pottery ware used in restaurants, hotels, hospitals, etc. (A-826, July 26), to stoneware, commonly used for the preparation and storage of foods (A-827), and to semi-porcelain potteryware, commonly sold for household use (A-829). In the case of pottery ware, the new types, sizes and designs are to be sold by manufacturers at specified maximum prices, and by wholesalers and retailers at basic period markups provided that these markups do not exceed a certain percentage.

Agricultural Machinery

To help farmers to meet the increased food production goals, increased quotas were arranged for manufacturers and importers of farm machinery for the new production season, July 1, 1943 to June 30, 1944. The new order permits the production of farm equipment equal in tonnage to approximately 77 per cent of the average of 1940-41 output, an increase of roughly 130 per cent over the quota set for 1942-43. Provisions for attachments and repair parts are established on the basis of 156 per cent of 1940 and 1941 average output. Production and imports under the previous quota (A-749) will be continued until October 31, 1943, but farmers will not feel the benefit of the new quotas until the crop year of 1944, since a substantial quantity of the new machines will not be available until next year (A-810, July 12).

Rationing of new farm machinery, which was introduced last October, will be continued as a means of ensuring fair distribution and the maximum use of new equipment. Under

the simplification program adopted, only the most essential units will be produced or imported.

Wood Products

Pulpwood.—New price schedules were established in May and June for pulpwood sold in the Provinces of Ontario, Quebec, Nova Scotia, Manitoba and Saskatchewan, and in July, for pulpwood sold in New Brunswick. Prices under the new schedule are similar, and in some cases actually lower, than those prevailing during the 1942-43 production season, but the basis for determining the new prices has been changed with a view to making prices more uniform in each area.

Under previous orders there were several sets of prices, one to producers (farmers or settlers who produce pulpwood from a woodlot), another to operators (persons who carry on pulpwood operations under a timber license, lease, etc.), while brokers or dealers were allowed to add to these prices "the usual brokerage or fees established by trade practice in the various districts". Under this arrangement it proved difficult to determine in some cases what the lawful maximum price should be, particularly with respect to determining the source of supply or, in the case of brokers, the customary trade practice. The new regulations eliminated the different sets of prices by establishing a schedule of maximum buying prices for consumers in each area, including brokerage or fees (a consumer being a manufacturer of pulp and paper or other wood products using pulpwood) (A-733, May 13; A-747, A-748, May 28; A-762, A-763, June 11; A-789, A-790, June 28; and A-824, July 26).

Newsprint.—The Board announced on July 21 that the ceiling on newsprint in Canada will be raised by a further \$4 per ton, beginning September 1, 1943; this conforms with an increase of the same amount announced concurrently in the United States, and brings the price to \$58 per ton, delivered in New York. The first increase of \$4 per ton was announced on February 28, 1943 in a joint statement released in Washington by the Office of Price Administration and in Ottawa by the Wartime Prices and Trade Board. At that time it was stated by the Board that the increase was too small to cover increased costs so as to allow the Canadian newsprint industry to continue production at present levels, and that negotiations between the two price control authorities were continuing. In the intervening months further available cost figures were examined which led the Board to conclude that an additional price increase was inescapable if the industry was to continue in production. On the basis of available figures the Board is of the opinion that

the latest increase is not adequate to meet the situation and has declared that "the whole field of pulp and paper production in Canada is now under active consideration by the Board".

Print Paper.—Conservation measures which have already been applied to newspapers, magazines and periodicals have been extended to all other publications. Under the new order, every publication having the style or format of a newspaper, magazine or other periodical is subject to a quota for its supply of print paper, and a permit is required covering the use of any print paper by publications affected by the provisions of the order. The order applies regardless of the number of issues printed or the frequency or regularity of issue.

Exemptions identical with those applying to certain types of newspapers or other periodicals were provided for in the new order. Hence, it does not apply to government publications or those of any agency of government, any publications which in the opinion of the administrator are published by any religious, charitable, philanthropic, educational, scientific, professional, political, labour or other non-profit organization, or any publication not being or containing advertising of goods or services and not published for profit (B-295, July 20).

Lumber.—In July the Board issued an order regulating the manufacturers' and wholesalers' prices for certain types of lumber (Spruce, Jack Pine, etc.) sold in the Maritime Provinces (A-804, July 9). The order was issued to ensure more effective control of selling prices in these areas. In the previous month an order was issued covering prices of lumber produced in the Prairie Provinces and the interior regions of B.C.

Textile Products

Cotton Fabric Imports.—In line with the policy adopted by the United Kingdom, the United States and Canada to use the resources of all three countries to the best advantage of the war effort, arrangements have been made to import into Canada from the United Kingdom only those types of fabrics which cannot be supplied on this continent. Under this arrangement it was announced early in July that imports of cotton textile fabrics from Great Britain into Canada would be restricted, beginning with the quarter, July to September, to those necessary for war requirements and special industrial uses. The import of cotton yarns from the United Kingdom will be maintained as in past months.

Wool Clips.—In July the Board issued an order lifting the restrictions on the civilian use of wool clips (new wool clips from the cutting of garments from military fabrics). The restrictions which had been imposed in

May, 1942, were considered no longer necessary in view of the improved supply situation and the need to meet essential civilian demands.

Consumer Rationing

Meats.—The Board issued a new order outlining the conditions under which all carcasses of beef, pork, veal, lamb and mutton slaughtered on and after July 12 are to be stamped in accordance with instructions issued by the Board. In addition, during June, July and August, holders of slaughtering permits are not allowed to kill lambs weighing less than 75 pounds live weight, or at any time to slaughter hogs weighing less than 100 pounds live weight. This provision is designed to increase Canada's meat supplies later in the season by having young animals kept longer on pasturage. The Board also passed regulations prohibiting the sale of any carcass of veal obtained from a calf less than three weeks old.

Butter.—Following an order issued in June regulating the purchase of whey butter by a customer who supplies whole milk or cream to a manufacturer of cheese (B-287, June 18), an order was passed setting maximum prices for the sale of whey butter by manufacturers, wholesalers and retailers (A-806, July 10). The order also establishes trading regulations designed to eliminate irregularities and uncertainties which have developed in the buying and selling of whey butter.

Early in July the Board repeated the statement made several times during the past few months that increases in storage stocks of creamery butter, as shown by the figures released by the Dominion Bureau of Statistics, does not mean that there will be any increase in the butter ration allowance. Even under rationing, the total consumption has been running at a higher rate than in pre-war years. By maintaining the present ration level, and by building up storage stocks during the full production season (May, June, July and August) it may be feasible to carry us through the year without any change in the ration.

Sugar.—Because of changes in shipping schedules resulting in a greater proportion of the supply of sugar being delivered in the early part of the year, the Board allowed the canning sugar coupons for both August and September to become valid on July 26. It was pointed out that "there is no present prospect of the canning sugar allowance being increased", but that "the move is made for the convenience of women who want to can the fruit that is available now, instead of spreading their canning activities throughout the whole summer".

NOTE:—Price and simplification orders not reviewed in detail are listed below.

Price Orders

Maximum Prices of Canned Pacific Coast Salmon. (A-807, July 12) Cancels schedule of prices to fishermen established in the previous order, A-723. Retains the same schedule of prices to canners. Makes certain minor changes.

Maximum Prices of Shelled and Unshelled Peanuts. Sets maximum prices and markups in order to eliminate wide variations in prices of peanuts imported from Mexico. (A-825, July 26).

Maximum Prices for Ice in the Ottawa-Hull District. Amplifies A-709, and sets lower prices for deliveries to doorstep than for deliveries to refrigerators. (A-793, June 30).

Price of Dehydrated Alfalfa Meal. Extends A-221, which set maximum prices for 1942 crop, for an indefinite period. (A-802, July 6).

Dogfish Liver Oil and Mudshark Liver Oil. Sets maximum prices in order to simplify and standardize the price structure for these oils (A-803, July 9).

Sphagnum Peat Moss in B.C. Amplifies A-418 with respect to prices and permits use of peat moss for horticultural purposes, as well as for poultry litter as provided in A-418. (A-830, July 26).

Prices of Footwear Leather. Provides for 4 per cent discount on maximum price of leather sold to manufacturers or dealers for manufacture of civilian footwear as part of a squeeze adjustment designed to eliminate subsidy to manufacturers. (B-292, July 15).

Taxi-cab Fares in Lake St. John Area, Quebec. Amends A-391, by providing new schedule of increased fares. (A-813, July 15).

Diamonds and Diamond-Mounted Jewellery. Amplifies provisions relating to diamonds in A-210. (A-811, July 12).

Simplification and Conservation Orders

No. 1933B—Gabardine Cloth for Army Officers' Uniforms. Prohibits use of this cloth for purposes other than manufacture of army officers' uniforms and fixes prices of uniforms. (A-805, July 9).

Cartons for Packing Beer Bottles. States dimensions and designs for the manufacture of cartons; regulates the number of bottles per carton and other details. (A-799, July 2).

Cake Cartons. Limits cartons to sizes specified, except for orders of 25,000 or more. (A-801, July 3).

Septic Tanks. Prohibits use of metal in manufacture of septic tanks. (A-831, July 26).

Electric Fans. Replaces Controller of Supplies Orders CS-32A and CS-32A1 with respect to electric fans and prohibits their manufacture except by permit. (A-808, July 10).

Electric Generators, Motors, and Control Equipment. Replaces A-569 and changes its provisions in view of changes in priorities. (A-832, July 26).

Transformers. Replaces A-434 and changes its provisions in view of changes in priorities. (A-833, July 26).

Generators, Switchgear, etc. Replaces A-568 and changes its provisions in view of changes in priorities. (A-834, July 26).

Shot Guns. Revokes A-603 which had prohibited sale, except by permit, of certain types of new shot guns. (A-814, July 17).

Wholesale Deliveries and Use of Automotive Vehicles. Amends A-292, by exempting Department of Transport, and National Research Council from restrictions on wholesale deliveries. (A-821, July 26).

Prices, Retail and Wholesale, in Canada, July, 1943

Cost of Living, Prices of Staple Articles and Index Numbers

COMMENCING with the current issue the two tables on retail prices of certain staple foods, fuel and rent which have appeared hitherto in each issue of the LABOUR GAZETTE are being presented in a different way.

These tables formerly included certain data collected by the Dominion Bureau of Statistics and certain other data collected by correspondents of the LABOUR GAZETTE. The latter have been discontinued, so that the prices included in the current issue are entirely those collected by the Dominion Bureau of Statistics.

The prices of the staple food items included in Tables II and III are all used in the calculation of the index of the food group in the official index of the cost of living and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of delivered goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain

store prices is almost identical with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

Rental figures currently published in Table III are typical of rents being paid by tenant households in each city. In some cities flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these

reports, and the printed figures show a \$4 spread centred around each city average.

These rental figures are not comparable with the figures published hitherto because they show the usual or most common rates actually being paid in each of the various cities regardless of the size of the dwellings or of the number of rooms or the type of conveniences whereas the previous figures were for six-roomed workingmen's dwellings with modern conveniences. In many of the cities dwellings of four and five rooms are much more numerous than those of six rooms and the rent for the smaller dwellings would, other things being equal, be lower than for the larger.

A description of the cost-of-living index, how it is calculated and the list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was given in the *LABOUR GAZETTE* for July, 1943, page 1057.

Cost of Living Index

The Dominion Bureau of Statistics cost-of-living index number advanced further from 118.5 to 118.8 between June 1 and July 2

(1935-1939=100). There has been an unbroken rise in the index from its February, 1943 level of 116.9. The July index of 118.8 was exactly the same as for December, 1942, and 0.9 points above the figure for July, 1942.

The rise shown by the July, 1943, cost-of-living index was due almost entirely to higher food prices. The food index mounted from 130.9 to 131.8 as increases occurred in prices for eggs, lamb and potatoes. Butter and oranges recorded the only appreciable declines. Two other group indexes gained fractionally, fuel and light from 113.0 to 113.4 and clothing from 120.4 to 120.5. Other group indexes remained the same, rents at 111.5, home furnishings and services at 117.8, and miscellaneous items at 108.2.

The wartime rise in the cost-of-living index from August, 1939, to July, 1943, was 17.9 per cent. Corresponding increases in constituent group indexes during this period have been as follows: food 32.7 p.c., clothing 20.4 p.c., home furnishings and services 16.7 p.c., fuel and light 14.5 p.c., rent 7.4 p.c., and miscellaneous items 6.8 p.c. The two last mentioned groups have kept the wartime rise in

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

TABLE I—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.

The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—Monthly, Prices and Price Indexes (Canada); annually, Prices and Price Indexes (Canada and Other Countries).

* Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

the general cost-of-living index to a much lower percentage than it otherwise would have been. Rents and miscellaneous items accounted for 42 per cent of the total pre-war family living budget. The miscellaneous group is more important than the name implies, since it represents health costs, items for personal care, transportation, recreation, and life insurance.

In compliance with Order in Council P.C. 6219, as amended, the prices of cigarettes and tobacco used in calculating the index do not include the tax imposed on June 24, 1942, under the special War Revenue Act.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G. 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, except under the regulations of the Wartime Prices and Trade Board. In each issue of the LABOUR GAZETTE

the activities of the Board in the operation of the price control policy are summarized.

The index number of the cost of living was constructed on the basis of a survey of expenditure of 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. The figures at

certain dates since August, 1939, are: August, 1939, 100·0; September, 100·0; October, 103·8; November, 104·3; December, 104·3; January, 1940, 104·2; February, 104·3; March, 105·5; April, 105·5; May, 105·3; June, 105·3; July, 106·4; August, 106·8; September, 107·9; October, 108·4; November, 109·7; December, 110·0; January, 1941, 110·4; February, 110·1; March, 110·2; April, 110·7; May, 110·9; June, 112·7; July, 114·9; August, 117·7; September, 119·4; October, 120·1; November, 121·4; December, 120·6; January, 1942, 119·9; February, 120·3; March, 120·6; April, 120·6; May, 120·9; June, 121·8; July, 123·9; August, 132·5; September, 123·0; October, 123·7; November, 125·0; December, 125·2; January, 1943, 122·5; February, 122·2; March, 122·7; April, 123·2; May, 124·0; June, 124·5; July, 125·1.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Wholesale Prices

The July wholesale price index of the Dominion Bureau of Statistics passed the 1926 level of 100·0 for the first time since 1926. The July index of 100·1 was 0·6 points above the June level, continuing a gradual rise which has received no substantial check since the summer of 1940 when the defence of France collapsed. The principal price increases between June and July were in the animal and vegetable product groups. Grains, livestock, and eggs recorded advances which outweighed declines for potatoes, hay, hides and skins (*See Table IV*).

Only three of the eight component groups in the wholesale index in July remained below corresponding 1926 averages. They were vegetable products at 92·5, textile products at 91·9, and non-ferrous metals at 79·7. Those about 1926 levels were animal products 107·6 wood products 107·8, iron and its products 115·7, non-metallic minerals 100·5, and chemical products also 100·5.

Price Movements in Canada and Other Countries

ALTHOUGH wholesale price levels have continued to rise by approximately the same amounts in Canada and the United States during the first six months of 1943, United States indexes of living costs have shown considerably larger gains than have been recorded for Canada. From December, 1942 to June, 1943, the Dominion Bureau of Statistics wholesale price index advanced 2·5 points to 99·5, while the United States Bureau of Labor Statistics index rose 2·8 points to 103·8 (1926=100 for both series). In the same interval the United States Bureau of Labor cost-of-living index mounted 4·4 points to 124·8, while the Canadian cost-of-living index was 0·3 points lower at 118·5 for June than for the preceding December (1935-39=100 for

both series). Consumer subsidies on milk, tea, coffee, oranges, and butter account for most of the drop in the Canadian index; this came in January and February. From February to June the Canadian index advanced 1·6 points as compared with 3·9 points for the United States index.

The new wartime cost-of-living index for New Zealand was 1011 for March, 1943 (December 1942=1000).

During the first five months of 1943 the Ministry of Labour cost-of-living index for the United Kingdom dropped 2 points to 198 (July 1914=100), while the Board of Trade wholesale index advanced 1·8 points to 163·1 (1930=100).

TABLE V—INDEX NUMBERS OF WHOLESALE PRICES AND COST OF LIVING IN CANADA AND OTHER COUNTRIES
(Base figure 100 except where noted)

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at June 30, 1943

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at June 30, 1943. (The text of the Old Age Pensions Act was given in the *LABOUR GAZETTE* for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288.)

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$365 a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization

of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (*LABOUR GAZETTE*, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is \$240 per annum. If however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$120. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$200.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

Fatal Industrial Accidents in Canada during the Second Quarter of 1943

DURING the second quarter of 1943 there were 344 fatal industrial accidents, including deaths from industrial diseases reported by workmen's compensation boards, etc. This compares with 322 fatal accidents in the second quarter of 1942. Of the 344 fatalities in the period under review, 108 occurred in April, 113 in May and 123 in June. Fatal accidents during each year are recorded by quarterly periods in the issues of the *LABOUR GAZETTE* for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contains 69 fatalities for the first quarter of 1943 and 16 fatalities for 1942.

In this series of reports, it is customary to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, as well as from the correspondents of the *LABOUR GAZETTE* and newspaper reports.

Classified by groups of industries, the fatalities occurring during the second quarter of 1943 were as follows: Agriculture, 29; logging, 42; Fishing and Trapping, 28; Mining, Non-ferrous Smelting and Quarrying, 49; Manufacturing, 78; Construction, 32; Electricity, Gas, and Water Production and Supply, 3; Transportation and Public Utilities, 55; Trade, 11; Service, 17.

Of the mining accidents, 24 were in "metalliferous mining," 20 in "coal mining," four in "non-metallic mineral mining and quarrying, n.e.s." and one in "structural materials."

Of the accidents in manufacturing, four were in "vegetable foods, drink and tobacco," two in "animal foods," two in "textiles and clothing," 12 in "saw and planing mill products," two in "wood products," five in "pulp, paper and paper products," 13 in "iron, steel and products," five in "non-ferrous metal products," four in "non-metallic mineral products," 12 in "chemical and allied products," 15 in "shipbuilding," and two in "miscellaneous products."

In construction there were 16 fatalities in "buildings and structures," one in "railway," eight in "highway and bridge," and seven in "miscellaneous."

In transportation and public utilities, there were 32 fatalities in "steam railways," one in "street and electric railways," 13 in "water transportation," three in "air transportation," and six in "local and highway transportation."

In trade there was one fatality in "wholesale" and 10 in "retail" trade.

Of the fatalities in service, five were in "public administration," three in "recreational," two in "laundering, dyeing and cleaning," three in "custom and repair," and four in "personal, domestic and business."

There was one serious disaster during the period under review which occurred off Halifax, N.S., on April 21, when a fishing schooner sank following a collision with a freighter in darkness, and 21 members of the schooner's crew were drowned. Seven other members of the crew escaped in dories and survived.

On June 23, nine loggers were drowned in La Lievre river, near Chambord, Quebec, after a motorboat overturned when the occupants became panicky after the craft caught fire.

Other accidents involving the loss of two or more lives were as follows:

Five explosives plant workers lost their lives when burned in an explosion on a cordite range in the kneader section of the plant, at Nobel, Ontario, on June 29.

In a collision of two trains, near Campbellton, N.B., on May 29, an engineer, two firemen and a brakeman were killed.

Three fishermen lost their lives in an explosion on a tug, on April 30, near Port Burwell, Ontario.

Two farmers died when overcome by gas in a well, in Legal district, Alberta, on May 30. When struck by a sapling, at Comox, B.C., two loggers were killed on May 4.

Two coal miners were drowned in a colliery, at Gardiner Mines, N.S., on May 22, when water from an abandoned slope broke through a safety barrier. Another two coal miners died when gas fumes seeped into a pit from a fire in adjacent workings on May 26, at New Waterford, N.S.

On June 4, two shipyard workers were killed, near Levis, Quebec, when a mechanical crane overturned. Two labourers engaged on repairing a dock at Sault Ste. Marie, Ontario, were killed when struck by a falling wooden pile when a chain broke, on May 14.

An engineer and a fireman died from steam scalds when a boiler pipe burst, at Kingston, Ontario, on June 1. When a train struck a truck, near Beaverton, Ontario, on May 13, a trucker and his helper were killed.

Two stenographers were killed when a train struck an auto in which they were riding to work, at Parry Sound, Ontario, on April 9. When a can of distillate exploded at Sundown, Manitoba, on June 1, a blacksmith and his helper died of burns. A dry cleaning plant manager and his partner lost their lives following an explosion of cleaning liquid and fire in the plant, at Dauphin, Man., on April 7.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first quarter of 1943 has been compiled which contains 69 fatalities of which 12 were in logging, five in mining, non-ferrous

smelting and quarrying, nine in manufacturing, 10 in construction, 24 in transportation and public utilities, three in trade, and six in service. Five of these accidents occurred in January, 20 in February and 44 in March.

A further supplementary list of accidents occurring in 1942 has been made. This includes 16 fatalities of which one was in agriculture, two in logging, one in mining, non-ferrous smelting and quarrying, five in manufacturing, five in transportation and public utilities, one in trade, and one in service. Two of these accidents occurred in June, four in July, two in October, six in November and two in December.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1943 BY GROUPS OF INDUSTRIES AND CAUSES

Workmen's Compensation in Nova Scotia, New Brunswick, Manitoba and Saskatchewan

THE Annual Reports for the year 1942 of the Workmen's Compensation Boards of Nova Scotia, New Brunswick, Manitoba

and Saskatchewan have recently been issued. A brief summary of each of these Reports appears below.

Nova Scotia

Rising industrial activity during the war years was paralleled by a steady increase in the number of industrial accidents in Nova Scotia, according to the report of the Workmen's Compensation Board of that province for the calendar year 1942.

The total number of accidents for each of the past four years was as follows: 1939,

12,500; 1940, 14,699; 1941, 16,819; 1942, 19,714. The number of accidents in 1942 was approximately 58 per cent more than in 1939. The total expenditure actually incurred and estimated for 1942 amounted to \$2,895,058.27, an amount which exceeded the actual and estimated income for the year by \$436,357.48. This reduced the gross provisional surplus

brought forward from former years to \$968,870.23.

The report shows that in 26 years, the period during which the Workmen's Compensation Act has been in force, \$24,371,097.52 has been paid by way of compensation and medical aid. A further sum of \$11,909,113.35 has been set aside to provide continued payments or pensions for permanent disabilities, for the support of widows, children and other dependents and for future payments on continuing cases not yet transferred to pension.

Of the 19,714 accident cases in 1942, compensation was paid to 18,554 which included 53 fatal accidents for which dependency had been established and 21 fatal accidents where no dependents were involved and burial expenses only were paid. The number of widows drawing pensions under the Act at the end of 1942 was 740, an increase of 29 over the previous year and the number of disabled workmen had risen from 1,820 in 1941 to 2,005 in 1942.

Assessment rates for the various groups in all classes of industries vary as the accumulated experience for each of the seven industrial classes assessed changes. The average rate for all years since the Act was passed stood at \$2.13 per hundred dollars of payroll. The average rate for 1941 was \$2.60 and for 1942 it was \$2.

The seven classes of industries from which assessments were derived, together with the amounts contributed by each in 1942, were as follows:—

Mining	\$1,130,123 76
Transportation	556,644 14
Building and construction....	475,459 50
Lumbering and woodworking.	334,023 02
Iron and steel.....	330,034 44
Public utilities.....	165,564 52
Manufacturing and operating not otherwise specified....	142,440 19
Total	\$3,134,289 57

New Brunswick

Covering the calendar year 1942 the twenty-fourth annual report of the Workmen's Compensation Board of New Brunswick shows that the total estimated income for 1942 was \$1,425,218.47 and the estimated expenditure \$1,114,698.28, leaving an estimated credit balance of \$310,520.19. When this credit balance is added to the cumulative credit balance of \$1,037,541.67 carried forward from 1941 an estimated surplus of \$1,348,061.86 is shown.

Complete statistics for 1941 are given in the report. The cost of compensation in 1941 was \$868,107.05, when a total of 11,295 accidents were reported to the Board. Of these accidents 37 were fatal, one resulted in permanent total disability, 274 in permanent partial disability, 7,257 temporary total disability, while 3,386 required medical aid only. (Accident statistics for 1942 were not given.)

Causes of accidents in 1941 which were reported to the Board were classified as follows: Prime movers, 217; working machines, 610; hoisting apparatus, 334; dangerous substances, 337; stepping on or striking objects, 1,365; falling objects, 2,038; handling objects, 1,379; tools, 1,806; runaways and animals, 75.

Factory Inspection: As in former years, the report of the New Brunswick Factory Inspector for the year ending December 31, 1942 is also included in the report of the Board. During 1942, the Inspector issued 1,165 renewal licences and 187 new licences to engineers and boilermen.

Commenting on his work during the year, the Inspector states: "All plants in the province have had a busy year; all machine shops, woodworking factories, woollen and cotton mills have been running to capacity. The saw mills had a busy year, though the scarcity of labour was felt by all employers."

Manitoba

A total of 16,228 accidents including 45 fatalities were reported during 1942 to the Manitoba Workmen's Compensation Board, according to its report covering the operations of the Board during the last calendar year. Accidents in 1941 numbered 15,812 including 42 fatalities. Details of the accidents as reported by the various groups for the last two years are as follows:—

GROUP	1941	1942
Steam railways	1,772	1,888
Province of Manitoba	341	254
City of Winnipeg	357	346
General body of employers.	11,799	12,673
Winnipeg Electric Co.	181	192
Dominion Government	1,362	875
Total	15,812	16,228

The report also shows, that on December 31, 1942, the Board had on its books as in receipt of pension 540 dependents of workmen killed in industry during the period March 1, 1917, to December 31, 1942.

The total actual payroll for all classes for 1941 was \$90,088,841.52. The largest group was that of the general body of employers with a total of \$53,338,098, while the Canadian Pacific and the Canadian National railways had payrolls of \$9,543,112.69 and \$9,813,182.38 respectively.

During 1942 the actual cash disbursed by the Board (less investments) amounted to

\$1,205,278.81 as compared with \$1,163,876.04 disbursed in 1941.

The report also contains a detailed analysis of compensable accident claims for 1941. The accident claims were classified by causes as follows: Prime movers, 131; working machines, 467; hoisting apparatus, 86; dangerous substances, 296; stepping on or striking against objects, 627; falling objects, 788; handling objects, 1,417; tools, 384; runaways and animals, 80; moving trains, vehicles, etc., 225, falls of persons, 1,111; all other causes, 472.

Saskatchewan

The thirteenth annual report of the Saskatchewan Workmen's Compensation Board covers the financial statement for the calendar year 1941 and the provisional financial statement for the calendar year 1942.

During 1942, a total of 7,637 claims were reported to the Board compared with 7,700 in 1941. On account of the 1941 claims, a total of \$639,211.92 was paid in compensation, made up of \$271,414.99 on account of compensation, \$288,833.70 in pension awards and \$138,958.23 in hospital and medical aid.

Total receipts of the Board during 1942 were \$601,134.93 while the total expenditure, including an estimate for outstanding claims was \$598,080.64 leaving an estimated surplus of \$3,054.29.

The average assessment rate of the Board in 1942 was \$1.36 per \$100 of payroll as compared with the rate of \$1.25 established in 1941.

The number of accidents reported during 1942 on which some payment had been made was 6,253, of which 24 were fatal, compared with 6,823 in 1941 of which 21 were fatal.

The amount of payroll reported during 1942, exclusive of Dominion and Saskatchewan Governments, which are not required to estimate their payrolls totalled \$45,592,585, an increase of \$5,388,428 over 1941.

The report gives detailed statistics concerning accidents for which compensation was awarded in 1941, classified by causes as fol-

lows: Prime movers, 141; working machines, 246; hoisting apparatus, 11; dangerous substances, 346; stepping on or striking against objects, 875; falling objects, 946; handling objects, 971; tools, 361; runaway animals, 46; moving trains and vehicles, 166; falls of persons, 1,012; and all other causes, 1,702.

Commenting on the year's operations the Board's report states:

"The year 1942 witnessed but little change in the volume and character of the business of the Board; the number of employers who reported to the Board in 1942 was 4,898 as compared with 5,238 in 1941, this being a decrease of 340. The investments of the Board amount to \$2,272,605.52, book value; an increase of \$130,577.18 as compared with the previous year. The amount standing to the credit of the Pension Reserve Fund was \$1,555,119.75. During the year 1942, the Board awarded pensions amounting to \$229,643.58, this being the sum set aside to meet future payments for permanent disability and death claims and was capitalized on the basis of four per cent annually, interest rate compounded half yearly. The number of pensions established as of December 31, 1942, was 466 as compared with 415 a year earlier. There were 66 pensions awarded during the year and 15 expired or were commuted. The administration expenses of the Board in 1942 amounted to \$62,272.88, which represents 9.01 per cent of the benefits paid."

Notes of Current Interest

Labour Day message of Minister of Labour

The following statement was issued by the Honourable Humphrey Mitchell, Minister of Labour, on Labour Day, 1943:—

As we near the end of the fourth year of this great world war, we Canadians can reflect with pride on the part which our country is taking to win victory and a peace that will mean the preservation of everything we hold dear.

The vast industrial contribution to our war effort has deeply impressed our Allies and has been a striking demonstration of the zeal and ingenuity of our working people.

It has been, and continues to be, their task to produce the munitions for our fighting men and for the armed forces of our Allies. The vital importance of the role of the workers in our war effort cannot be over-emphasized. It is magnificent and I am glad of the opportunity of re-stating what I have said many times in the past, that the men and women who toil at home are doing a grand job. Theirs will be a stirring page in the history of Canada in this great war.

But now our major consideration is the same as it was four years ago—to do everything in our power to speed up the end of the war and the smashing of dictatorship. One stone in the edifice of evil which has brought desolation to a large part of the world has crumbled. We must tear down the whole edifice before we can relax.

We may be buoyed up by what has happened in the last few months—but we cannot afford to let down our guards. We must count on further sacrifices, including further months and perhaps years of long hard work, in order that Victory which is the necessary

precedent to a realization of our other aims and ambitions, may be ours.

Canadian workers have earned the right to celebrate on Labour Day, to review the accomplishments of the past and to remember those no longer with us who, in their day, worked so faithfully for the advancement of the interests of labour.

When, because of the stress of war, the Dominion Government found it necessary to reduce the number of public holidays throughout the year, Labour Day remained undisturbed. Even in war the determining considerations weighed in favour of not interrupting this well-established practice of giving over one day to labour itself.

I am confident that Labour Day this year will be marked also by a wholehearted re-dedication of our workers to our common cause. They know how much is at stake.

We must be ready for further sacrifices on the home front. Income taxes and rationing have meant much to the worker—but, generally speaking, he has taken them well. We must endeavour to reduce absenteeism. We must keep up production, for all our sakes, and particularly for the sake of our fine young men and women serving with our forces in many quarters of the globe. Labour must continue to try to secure recognition of the individual's rights by conference, by conciliation, by collective bargaining, by using the machinery established by the Government. Work interruptions should be avoided.

Naturally the thoughts of workers frequently turn to post-war planning. We all hope for a better world after the war. We hope that the problems of the workers may meet with a larger degree of sympathy, of solution, than in the old world. But to accomplish these

things we must now win this fight. I know the determination of the Canadian worker. I know his sterling qualities. I know that the sentiment I have just expressed will find an echo in the hearts of each Canadian man and woman in industrial employment. They will go on to win.

**Labour Day
messages of
Canadian
labour leaders**

Taking note of improvement in the war situation, Canadian labour leaders in their annual Labour Day messages looked ahead to the post-war period and

stressed the need of a progressive reconstruction program.

Warning that "there is still a long and bitter fight ahead with resourceful and bitter enemies who are a long way from beaten," and that "the paramount need is still a one hundred per cent war effort in every direction", Mr. Percy Bengough, President of the Trades and Labour Congress of Canada declared that if after the war "democracy is not made to work for the good of all people, stupendous sacrifices will have been made in vain.

"There is no need for fear and misery in our world," he continued. "Scientific research and technical progress has made it possible, yes, easy, to grow and produce every human need in abundance for a larger and fuller life than one could possibly dream of a few years ago. We have an abundance of materials and plenty of help that can, with the aid of scientific processes and machinery, change them quickly into the required form and shape. Surrounded by plenty, we think in terms of scarcity—full of the dread of unemployment. . ."

Stating the need for public works such as the building of schools, hospitals, roads and decent homes, Mr. Bengough declared: "Money is needed and must be found for creative purposes.

"Everyone knows there is plenty of money for destructive purposes in war time, and rightly so," he said. "They must know also that the money does not get off the earth when peace is declared. . . The artificial bottleneck of money was not allowed to hinder our war effort and money bottlenecks must be removed to make our democracy work in the post-war period, a democracy that guarantees to all able and willing to work, useful employment with a high standard of wages that will assure all people a full and complete life from the cradle to the grave. . ."

"In the best interests of the vast majority of the people our money system needs to be overhauled and brought up to date."

Mr. A. R. Mosher, President of the Canadian Congress of Labour, indicated in his message that he considered that drastic changes would be necessary to bring about a "real re-

construction and an equitable social order", and that he favoured for the post-war period "the maintenance of whatever controls are necessary for the public welfare." He warned of propaganda emanating from "the forces of reaction" and said that every effort to "make the resources of the nation available to the people" would be labelled "communistic".

"If," he declared, "the workers realize the unparalleled opportunity to lay the foundations of economic prosperity which now faces Canada, and can spread that idea among the people to the point where they will insist upon applying it to their every-day lives, there is a chance of success. One would imagine that the financing of the war-effort not only in Canada but in all the other belligerent countries would have proved one thing beyond any question—the one most important thing we all must learn—that 'what is physically possible is financially possible', and that wealth is not money, but manpower.

"The details of post-war reconstruction programs are not a source of difficulty," Mr. Mosher continued. "Canada needs hundreds of thousands of new homes; slums in every city must be torn down and replaced by apartments; almost every farm in the country needs improvements; there are great areas of farm and timber and mining land to be developed, highways to be built, and food and clothing provided for a larger population at a higher standard of living than ever before. Any observant person can point out in any community a dozen ways of employing large numbers of workers in constructive and desirable projects. . ."

"We have fought a war, spending billions of dollars, and if we can do that in wartime, and still maintain a comparatively high standard of living, we can do even better in peacetime."

Mr. Alfred Charpentier, President of the Canadian and Catholic Confederation of Labour, spoke in part as follows:—

"Manual labour in the age of slavery was considered ignoble, the slave himself a beast of burden. Christianity has suppressed slavery, it has re-established the slave in his worthy place as man created in the image of God.

"The labour of the modern worker is honoured. The modern worker no longer has an owner, he is not sold from one master to another; he is an ordinary citizen with all the rights of free and intelligent man.

"But what profit does the modern worker draw from his liberty? None if he is left to himself. His liberty is only a word, his dignity becomes a mockery.

"Labour Day has meaning only for the union worker who by organization gains the use of all his rights in the industrial world. . ."

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

The index of employment at the beginning of July was 183·7, an increase of 1·4 per cent having been recorded as compared with the previous month and 4·6 per cent as compared with July, 1942. The advance at July 1 was in conformity with the

movement indicated in 21 of the last 22 years, but it was less, however, than in any other year since the outbreak of war and was below the general average in the period since 1920. Aggregate weekly payrolls were 1·5 per cent greater at July 1 than at June 1 and about 13 per cent greater than at July 1, 1942. Per capita weekly earnings average \$30.95 at July 1, \$30.93 at June 1, \$28.49 at July 1, 1942, and \$25.49 at July 1, 1941.

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended August 23, 1943.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public.

(7) Figures for four weeks ended August 28, 1943, and corresponding previous periods.

(8) MacLean's Building Review.

The index of the physical volume of business which reflects activity in mining, manufacturing, construction, electric power output and in the distribution of goods was 1.6 per cent higher for July than for June and 16 per cent higher than for June, 1942. The July figure was the highest recorded by the index. Increases in July as compared with the previous month were indicated in mineral production, the output of electric power and in the distribution of goods while somewhat decreased activity was indicated for manufacturing and construction.

For the first seven months of 1943, the index of the physical volume of business averaged 17.6 per cent higher than for the corresponding period in the previous year. The index of mineral production averaged 19.6 per cent higher in the same comparison and manufacturing 24.5 per cent higher. In the latter group flour production recorded an increase of 25 per cent, the number of cigarettes released 16.1 per cent while production of steel was 3.8 per cent lower.

Annual conventions of Canadian labour organizations

During the current month Canadian labour organizations have been holding their annual conventions. Reports of these meetings, including those of the Trades and Labour Congress of Canada, the Canadian Congress of Labour, and the Canadian and Catholic Confederation of Labour, will be presented in the October issue of the LABOUR GAZETTE.

Cost of living index advances

The Dominion Bureau of Statistics cost of living index advanced from 118.8 on July 2 to 119.2 on August 2, 1943. This was the sixth consecutive month in which the index has recorded an increase. The total rise for the period has been 2.3 points, with monthly advances ranging from 0.3 to 0.5 points. The decline of 1.9 points occurring in January and February 1943 has been offset by this advance, with a small margin to spare, and the August 1943 index is 1.3 points above the index for July 1942 upon which the last cost of living bonus was authorized.

Foods accounted for most of the August increase. The food index mounted from 131.8 for July to 133.2 for August. Eggs were sharply higher, and there were small scattered increases for beef, veal, lamb, onions, raisins, and lemons. Clothing and homefurnishings gained fractionally from 120.5 to 120.6 and 117.8 to 117.9 respectively. Other group indexes remained unchanged, fuel and lighting at 113.4, rentals at 111.5, and miscellaneous items at 108.2.

Industrial Disputes Investigation Act

Six applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of August. Six boards submitted their reports; three boards were established and the constitution of two boards was completed during the month. Six disputes were referred to Industrial Disputes Inquiry Commissioners and reports were received from Commissioners in four cases. Settlements were reported in six disputes and six applications were withdrawn.

Appointments relating to labour-management committees

Two appointments recently announced by the Department of Labour relate to the policy of encouraging and sponsoring the formation of labour-management production committees in Canadian industry.

On August 11 Mr. Allan MacDonald of Glace Bay, N.S., was appointed Industrial Relations Officer with specific responsibility for the promotion of labour-management committees in the Maritime Provinces. Mr. MacDonald resigned as General Chairman for the Brotherhood of Locomotive Firemen and Enginemen on the Sydney and Louisburg Railway in order to accept the position with the Department of Labour.

Appointment of Lt.-Col. J. A. W. Labelle of Montreal, as an employers' representative from the Province of Quebec, to the Advisory Committee to the Inter-departmental Committee on Labour-Management Committees, was announced on August 28.

The Advisory Committee, to which Lt.-Col. Labelle is now added, consists of employer and employee representatives, and officers of the Department of Labour.

The main committee consists of H. Carl Goldenberg, of Munitions and Supply, as Chairman; M. M. Maclean, Director of Industrial Relations, Department of Labour; and H. J. Carmichael, Co-ordinator of Production, Munitions and Supply (L.G., March 1942, p. 304).

Ontario Labour Court decisions

The Labour Court of Ontario, which was set up under an amendment to the Judicature Act and which administers the Collective Bargaining Act, 1943 (L.G., May, 1943, p. 701), commenced its hearings in July. It is proposed to summarize significant decisions of this Court periodically in the LABOUR GAZETTE in the article "Recent Legal Decisions Affecting Labour" under the section "Labour Law".

The first group of decisions is dealt with in this issue.

In one of these decisions, the Court held that a grievance committee should consist exclusively of representatives of the certified union, since such a committee is really an agency for carrying on collective bargaining. In a number of cases in which representation votes were ordered, the Court refused to permit workers illegally on strike to vote. In two other cases, in each of which a company recognized one of two rival associations without first taking adequate steps to determine if the association in question actually represented the majority of the workers, the Court held that such recognition did not preclude certification of the other association. In another case, workers who violated the terms of their employment while engaged in union activity were held not to be eligible for reinstatement under the Act.

Formation of Labour Relations Committee in Ontario

The Ontario Minister of Labour, the Honourable Charles Daley, announced recently the formation of a Labour Relations Committee to study existing labour legislation. He said that invitations were being sent out to employers' and employees' organizations to name representatives to the committee, and that the two interests would be equally represented.

"The committee will be asked to report and make recommendations, if it desires to do so, for enactment of new legislation to do with labour relations in industry and commerce," the Minister stated.

New Brunswick Factories Act proclaimed in force

The New Brunswick Factories Act which was passed in 1937 (L.G., 1937, p. 1331) to replace an Act of 1920 has been proclaimed in force from September 15, together with an amendment to the Act which was passed in 1943. The Factories Act of 1920 contained provisions regarding the inspection of steam boilers and the licensing of stationary engineers. These provisions were omitted from the 1937 Act but a special Act respecting Stationary Engineers, Steam Boilers and Pressure Vessels was passed in that year (L.G., 1937, p. 1331). This Act, together with an amendment of 1943, has also been proclaimed in force from September 15.

The new Factories Act as amended establishes for the first time since 1920 a minimum age for the employment of children in factories. As from 1905 to 1920, no child under 14 may now be employed without special

authorization of the Minister of Health and Labour. In addition, the new Act empowers the Minister to prohibit the employment of boys and girls under 18 in dangerous and unwholesome occupations. In the old Act, a similar power was given to the Workmen's Compensation Board with regard to boys under 14 and girls under 18.

The maximum hours permitted for women and boys under 18 has been reduced from 60 to 54 per week and from 10 to 9 per day. The old Act provided that in cases of emergency women and young persons could, with the authorization of the Minister, be employed for 13½ hours per day and 81 per week during 36 days in any 12 months, but it prohibited work before 6 a.m. and after 10.30 p.m. The new Act limits hours in such cases to 12 per day and 68 per week and prohibits work before 7 a.m. or after 9 p.m. Sections of the former Act relating to safety, sanitation, posting of notices and inspection have been incorporated in the new law without material change, but the section of the 1920 Act which forbade women and girls working between the fixed and traversing part of any self-acting machine while the machine was in motion, now applies also to boys under 18.

The Act respecting Stationary Engineers, etc., provides for the appointment of a Board of Examiners of three members, each with at least ten years' experience as stationary engineers, which is to be under the supervision of the Director of Labour. No person without a certificate of competency issued under the Act may operate a steam plant or steam boiler, except under special circumstances with the authority of the Minister. Certificates may be granted to holders of certificates from any other province, state or country which accepts certificates issued under the Act, if so authorized by the Lieutenant-Governor in Council.

Treatment of injured workers in British Columbia

The Workmen's Compensation Board of British Columbia has furnished the following statement concerning the work undertaken by the Board to re-store injured workmen to industry.

Manpower shortages have focussed attention on the problem of re-establishing injured workmen in industry with the least possible delay. The necessity of establishing a physiotherapy clinic became more urgent during the past three or four years as a result of the increased number of workmen employed and injured in hazardous industries. Heretofore, all remedial treatment along physiotherapy lines carried on in the Vancouver district was

given by about thirty-five individuals, groups, institutions, and hospitals. While some useful services were rendered, there were disadvantages due to out-of-date methods and the use of inadequate equipment.

The Board took a lease on St. Mark's Hall in Vancouver, which provided floor-space of 11,570 feet. The building was fitted up with special apparatus and equipment to use the forces of nature such as heat, light, electricity, exercise, air and water to effect a cure or relieve the effects of injuries sustained in industry. A competent staff of highly qualified technicians was secured and the Department was opened on October 1, 1942. The Department is equipped with the latest devices and is now believed to rank with the best institutions of its kind on this continent.

After a study of the subject it was decided that injured workmen should receive physiotherapy from technicians only after a thorough review of the workmen's case was completed by a physician trained in this specialty. The importance of having the medical history of the case before the specialist when prescribing treatment was found to be a prime necessity. In establishing the physiotherapy department in Vancouver this thought was carried out and its merits have been amply proven.

An average of more than 400 patients is treated daily at the Department. The numbers availing themselves of its facilities are steadily increasing. Many types of treatments are used depending on the nature of the injury. Hydrotherapy, diathermy, massage, gymnastic exercises have achieved much for stiff joints, disturbed functions and other physical injuries.

Occupational therapy teaches the value of proper mental and physical occupations during convalescence, encourages and supervises diversional activity and administers prescribed occupational activities. This increases function of joints and muscles, stimulates circulation and assists injured workmen in rehabilitation. Injured workmen go daily to the curative workshop where the tools and equipment are similar to those used in industry. The results from occupational therapy have been most encouraging, particularly in cases of injury to the shoulders, elbows and wrists. With a wholesome interest in the workshop, worry and discontent are mitigated and more speedy recovery is made possible.

The benefits derived from these various treatments have made this fast growing branch of the art of healing popular with injured workmen. The results have been little short of spectacular in many instances and workmen on the whole have welcomed the opportunity to secure scientifically prescribed treat-

ment which hastens their return to full employment. The psychological effect of knowing he is making daily progress towards recovery is not the least of the benefits from the workmen's point of view.

The physicians of the district, now so overworked due to depletion in their ranks, have co-operated in turning over to the Physiotherapy Department their patients at an earlier date than heretofore was the practice. Systematic and centralized treatment under trained supervision now occupies a large place in the industrial life of this Province.

Workmen's compensation in Canada

A new revision of the mimeographed pamphlet, "Workmen's Compensation in Canada" which compares provincial legislation on this subject has been made by the Department of Labour and is available on request. The publication was last revised in July, 1941, and was brought up to date by a supplement in July, 1942. In 1943 several provinces amended their Workmen's Compensation Acts in important respects and Alberta passed a new statute. These changes in provincial law are incorporated in the revised pamphlet. The material is arranged under the same headings as in earlier editions and tables are included showing the scales of compensation and the occupational diseases compensated in the different provinces. The publication deals with such topics as the scope of the laws, the risks covered, medical aid, rehabilitation, accident prevention, workmen's compensation boards, cost of administration and security for payment of compensation.

Minimum wage fixing machinery in British catering industry

The Catering Wages Act, which provides for the regulation of wages and other conditions of work in hotels, restaurants, clubs, boarding houses, canteens and snack bars, became law in Great Britain on June 10, 1943. The bill, which was sponsored by the Minister of Labour and National Service, met with determined opposition from certain members of the House of Commons, but it was finally passed without significant amendment. Unsuccessful attempts had been made both in 1924 and in 1930 to put through similar Bills.

Under the new Act a Catering Wages Commission has been set up. It is empowered to review the existing arrangements for regulating wages and other conditions of work in the industry and to make enquiries into other matters affecting the remuneration, conditions of work, health and welfare of the workers. Its duties are not confined to these matters,

however. It is also to consider means of developing the industry to meet the needs of the public, in particular the needs of visitors from overseas, and of developing the tourist traffic. This point was emphasized during the debates in the House of Commons and the Minister of Labour has already directed the Commission to consider the general problem of the rehabilitation of the industry after the war, having regard to the effect of war conditions.

With regard to the narrower purpose of regulating working conditions, the Act permits employers and workers to do this themselves whenever machinery has been set up by agreement between their respective associations which in the opinion of the Commission is adequate or can be made adequate for the purpose. Where no such machinery exists the Commission may recommend to the Minister that a wages board be set up.

Any wages board may submit to the Minister proposals for fixing remuneration and intervals for meals or rest or for requiring employers to grant holidays to their workers. On receiving a proposal the Minister will, if he does not refer it back to the board, pass an order putting it into effect. An order so made must be submitted to Parliament and either House may, within forty days, require its annulment. The Minister may appoint officers to enforce the orders.

In addition to its power to submit proposals to the Minister, a wages board may consider any matter affecting the remuneration, conditions of work, health or welfare of the workers under its jurisdiction. It may submit a report to the Commission, which will forward the report with its own comments to the government department concerned.

Both the Commission and the wages boards must consist of not more than three independent persons (of whom one must be the chairman) and not more than two representatives each of employers and workers. The members of the Commission have already been appointed and the first meeting was held on July 19. At this meeting, the Commission considered a provisional grouping of the various branches of the industry for the purpose of their enquiry into the existing methods of regulating conditions.

Reconstruction of education services in England

A Bill to recast the education service of England and Wales was announced recently in the House of Commons by the President of the Board of Education as likely to be introduced this fall. The Government's proposals are set out in a White Paper published on July 16. They include the

organization of the system of public education in three progressive stages: (1) primary, for children up to 11 years of age; (2) secondary, for children over 11, to include grammar schools, modern schools giving a general education, both literary and practical, and technical schools; and (3) further education. At the age of 13 or later children will be permitted to transfer from one kind of school to another if the first choice is not suitable.

Other reforms may be briefly summarized as follows: The immediate raising of the school-leaving age to 15 without exemptions and provision for raising it later to 16; the introduction of a system of compulsory part-time education during working hours for young persons up to the age of 18; the provision of adequate and properly co-ordinated facilities for technical adult education; the improvement of facilities for the training of children below compulsory school age by the provision of nursery schools wherever needed; increased emphasis on religious instruction as an essential element of education; the extension of the existing facilities for securing the health and physical well-being of children and young persons; and inspection and registration of all independent schools which cater for children of compulsory school age.

As regards the raising of the school-leaving age to 15 with provision for further extension to 16 at a later date, it is proposed to require the local education authorities to provide such variety of instruction as may be desirable in view of the different ages and aptitudes of the pupils and of the probable length of their school life.

Persons from 15 to 18 years of age will, under the proposed legislation, be required to attend an appropriate centre part-time unless they are in full-time attendance at school or otherwise under suitable instruction. At first it is proposed to limit attendance to one day a week as a minimum. Children of 15 will likely be required to attend in the first year after the Act goes into effect and others up to 18 years in the third year. Thus, part-time school attendance will be brought into effect gradually.

Miners given suspended prison sentences for inciting strikes in United States

In the first such action to be taken under the recently enacted War Labour Disputes Act, a federal grand jury at Pittsburgh indicted 30 union officials and members of locals on charges of conspiring to interfere by strikes and by other interruptions with the operation of certain coal mines in the possession of the United States Government. The indictments followed an investigation by the grand jury of a series

of "wildcat" strikes in southwestern Pennsylvania.

Under the law, the maximum penalty for instigating or encouraging strikes or other interruptions in plants or mines taken over by the government is a fine of \$5,000 or imprisonment for one year, or both (L.G., July, 1943, p. 1037).

Judgment was given on August 30, when 27 of the miners were given six-month suspended prison sentences and put on probation for three years after they had pleaded no defence. The other three miners were unable to appear in court because of injuries sustained in a recent mine accident, but were expected to enter similar pleas later.

In suspending sentence the judge warned the men to refrain from any further acts "impeding or retarding the production of coal during the war."

Enforcement of War Labour Board orders in United States

During the month of August, President Roosevelt set up procedures that might be used to force unions and individual employees, as well as employers to comply with orders issued by the War Labour Board of the United States. In the first instance, the President issued a directive letter to the Chairman of the Board detailing "a program for bringing about compliance in the relatively few cases in which executive action may become necessary". Supplementing the letter was an executive order to the Director of Economic Stabilization authorizing him "to take certain action in connection with the enforcement of" the Board's directives.

The chief features of the program outlined in the letter were: (1) Should an employer fail to comply with the instructions of the Board two courses of action were provided—either the Government might seize his plant and operate it in accordance with the Board's terms and conditions, or Government "sanctions" might be applied in the way of withholding or withdrawing Government contracts and priorities on essential materials or services. (2) In the case of non-compliance by a union the affected plant might be seized and operated by the Government if that proved to be necessary to prevent interference with production. Thereafter, the Board might modify its order so as to withhold from the union by escrow any benefits, privileges or rights accruing under agreements or proposed agreements, until such time as the union demonstrated its willingness and capacity to

abide by the obligations provided in such agreements. (3) In the case of non-complying individuals the Board was empowered not only to call upon the Attorney General to enforce penalties prescribed for interference with production, but also to have sanctions applied by the Selective Service and War Manpower Commission.

The Presidential letter and executive order are the fulfillment of requests made previously by individual members of the Board and make possible immediate action against certain important industries which had failed to comply with the orders of the Board.

U.S. Government urges young workers to return to school

A campaign to encourage as many as possible of the four million young persons employed in the United States during the summer of 1943 to return to school this fall is being jointly sponsored by the Children's Bureau of the United States Department of Labour and the Office of Education. In a leaflet they call on the community, parents and the boys and girls themselves to realize the importance of continued education in wartime. The statement of the War Manpower Commission on the subject is quoted:

The first responsibility and obligation of youth under 18, even in wartime, is to take full advantage of their educational opportunities in order to prepare themselves for war and post-war services and for the duties of citizenship.

A warning is issued regarding the decline in high school attendance, the increase in the illegal employment of children and the relaxing of child labour standards. Community agencies are urged to examine sources of labour supply not fully utilized in order to provide substitutes for young persons filling war jobs and to curtail the demand for child labour. In areas of acute labour shortage, properly supervised schemes for part-time work and part-time schooling should be developed.

In an appeal to high school students to complete their education, the Regional Director of the War Manpower Commission for New York stated that there is no reason for students in New York City to work while so many housewives and men and women in non-essential industry are available:

It is of the greatest importance to these young people and to the whole nation that they keep their perspective in this matter of education. Those who do not continue some form of schooling will be trading immediate satisfaction for later discontent.

**Illegal strikers
in Australia lose
military service
exemption**

Where a lockout, strike or work-stoppage occurs in an essential industry in Australia, workers or employers who thereby violate any law, industrial award, agreement, order, determination, code or custom relating to the industry may lose their exemption from military service or be directed into employment, under new National Security (Supplementary) Regulations passed in May. The Manpower Regulations stipulate that persons employed in "protected undertakings" may not enter the Australian Defence Force without the written permission of the Director-General of Manpower. A "protected undertaking" is any establishment or industry which, in the opinion of the Minister of Labour and National Service, is essential to the defence of the Commonwealth and has been so designated by him.

Under the new regulations, workers in protected undertakings where strikes, lockouts or work-stoppages occur who fail to fulfil their obligations under any law, award, agreement or other order regulating the industry or who act contrary to such orders may cease to be regarded as persons employed in a protected undertaking. Those who are liable for military service may then be called up and those not liable may be directed by the Director-General of Manpower into essential industry as provided in the Manpower Regulations. Similarly, employers in protected undertakings who do not fulfil their legal obligations may lose any exemption from military service which they have obtained by virtue of their occupation and may then be called up or directed into employment.

**Suggestion
systems in
Australia**

The introduction of suggestion-box schemes into Australia's war factories has brought forth thousands of suggestions from employees of which hundreds have been adopted, according to the Melbourne *Argus*.

The plan has been adopted in Government factories in most of the Australian states. Rewards for suggestions range from a minimum of £1 to a maximum of £50. In one war factory near Melbourne 1,080 suggestions were made by workers during the first six months of the scheme. Of these, 175 were adopted, and awards totalling £622 were paid. The awards were based on 10 per cent of the net annual savings produced as a result of the suggestions.

**New Zealand
labour endorses
wages stabilization
policy**

At its sixth annual conference held in April, 1943, the New Zealand Federation of Labour, after a day's discussion, unanimously endorsed the Government's policy for the stabilization of wages, salaries, prices and rent. The policy was put into effect on December 15, 1942, by the Economic Stabilization Emergency Regulations (L.G., May, 1943, p. 592). Under it, all wage rates including overtime rates, salaries, commissions, travelling expenses and directors' fees are stabilized at the level of November 15, 1942. Rents and most prices are also frozen.

The Regulations provide for the adjustment of wages according to movements in the price level in a manner which is essentially the same as that in effect in Canada. Rates of pay are to be increased or decreased proportionately if at the end of any quarter the "wartime prices index" has risen or fallen by 5 per cent or more, but the variation in rates applies only to the first £6 earned each week by the worker.

At the annual conference of the Federation, both the president, who is also a member of the Stabilization Commission, and the Minister of Finance urged the adoption of the policy as the safe course for the workers during wartime. Some of the delegates felt that the policy deprived the trade unions of the right of collective bargaining and that there should be more adequate guarantees of a minimum wage. There was general agreement, however, that, in the words of one delegate, "although a policy of wage increases might be more popular, the workers would be worse off without stabilization".

**New Zealand
to raise
school-leaving
age to 15**

The intention of the New Zealand Government to raise the school-leaving age to 15 by the beginning of 1944 was announced by the Minister of Education in his latest annual report. The Government has had power to do this by Order in Council since the Education Amendment Act was passed in 1920 but has hesitated to take the step due to constant shortages of teachers and accommodation. It was the Minister's opinion, however, that "if we waited till every building and teacher were ready, we should wait forever." He regarded the measure as one of great importance for child welfare, particularly in view of a rising juvenile delinquency rate.

A scheme providing for "visiting teachers" was also announced. They would have no teaching responsibilities but would devote their time to maintaining contact between the school and the home and dealing with cases of children who find it difficult to adjust to

normal school life. Special training courses for "visiting teachers" would be established.

Other measures promised in the report included the establishment of a committee on health education and a detailed review of the whole primary curriculum.

Apprenticeship commission to be appointed in Tasmania

A five-man Apprenticeship Commission equally representing employers and workers with a president appointed by the Government is to be set up under the Apprentices Act passed by Tasmania last October. The Commission will have jurisdiction over apprenticeship in all trades designated by the Governor on the recommendation of the Commission. Prospective apprentices in these trades must secure a certificate of qualification from the Commission and become indentured in accordance with the provisions of the Act. The Commission has power to determine the maximum number of apprentices to be admitted to each trade, exercise supervision over practical and theoretical training and issue final certificates of efficiency. It may also recommend the remission of any apprentice's school fees and will co-operate with the Department of Education on apprenticeship problems.

Wherever practicable, the Commission is to appoint trade committees for each trade or group of trades and may delegate any of its powers to these committees which will also be equally representative of employers and employees. The President of the Commission will act as chairman of each trade committee. Advisory committees may be appointed for any trade covered by the Act.

Other important provisions in the Apprentices Act guarantee sick pay and holiday benefits to apprentices and secure their rights when an employer sells his business.

Merchant seamen and the war

A bulletin entitled *Merchant Seamen and the War* has recently been issued by the International Labour Office (Studies and Reports, Series P (Seamen) No. 5). It is a record of the twelfth session of the Joint Maritime Commission held at London on June 26-30, 1942. Attention was given to the work of this conference in the LABOUR GAZETTE of June and August, 1942 (pp. 659, 882), the resolutions adopted having been summarized in the latter of these issues. The present bulletin is the authentic record of the proceedings of the conference, and it includes in addition the report of the Director of the I.L.O. on the

work of the Organization in regard to seamen since the previous conference, the full text of the resolutions and a list of the members present.

Employment of prisoners of war in Germany

An article in the September issue of the *International Labour Review* stated that Germany is unquestionably the country in which prisoners of war are employed on the largest scale. The number of prisoners employed has varied considerably from time to time; at the beginning of 1943 the total number was about 1,750,000. Early in the war, by far the greater number were employed in agriculture, but efforts were made subsequently to sort out specialized workers for employment in building construction, the metal industries, forestry, mining and other industries.

According to official data, gross wages payable to prisoners are 60 per cent of those of German workers performing an equal amount of work in the same occupation. However, deductions are made for maintenance, including board and lodging. There is no contract of employment between the employer and the prisoner, but only a contract between the employer and the military camp authorities. Wages are paid by the employer to the camp authorities. Discipline is controlled entirely by the camp authorities and prisoners must, wherever possible, be segregated from all other workers, particularly civilian workers from their own country.

The military authorities retain the ultimate authority over prisoner labour; but the allocation, output and pay of prisoners and in particular their incorporation into the German war economy is settled under the authority of the General Controller of Labour.

Wartime Orders in Council Affecting Labour—June, 1943

The following corrections should be made in the pamphlet issued by the Department of Labour under the above title. On p. 15, five lines from the top "or decreased" should be inserted after "increased". On p. 22, second column, five lines from the top, "manner" should be substituted for "matter". On p. 29, first column, five lines from the bottom, "Morton" should be substituted for "Martin". On p. 76, under *Polymer Corporation*, second last line, "weekly" should be substituted for "daily". On p. 93, the heading "Merchant Seamen" should be numbered VIII instead of VII. On the last page of the Appendix "P.C. 34/4453" should be P.C. 36/4453".

Manpower

Scope of Compulsory Transfer Orders Broadened

All Men Aged 16 to 40 Made Subject to Program—Sixth Transfer Order Consolidates Previous Orders—Other Manpower Regulations

COMPULSORY Employment Transfer Orders have been made to apply to all men between the ages of 16 and 40. Previously the application of these orders was restricted to two classes of men, those designated for the military call-up and those aged 16, 17 and 18. Existing and future orders will now apply to all men in the newly authorized age group who are employed in industries and occupations named in the various orders.

This broadening of the scope of the compulsory employment transfer program was authorized by an order in council (P.C. 6433, August 13), which revokes Subsection (1) of Section 210 of National Selective Service Civilian Regulations, and substitutes the following:

"210 (1) The Minister may, by order, forbid any employer or group or class of employers to retain in employment after a specified date any male person (or group or class of male persons) who has attained or who later attains his sixteenth birthday and who has not attained his forty-first birthday, unless such person has presented to the employer a permit in prescribed form issued by a Selective Service Officer; or may require any employer, or group or class of employers to terminate, at such time and in such manner as he may specify, the employment of any such person or group or class of such persons."

The sixth compulsory transfer order which was announced on August 25, includes men in the new age 16 to 40 grouping but designates no new occupations. It serves as a consolidation of all occupations listed in the previous orders.

In commenting upon the amendment to the regulations, the Minister of Labour, Honourable Humphrey Mitchell, stated: "It is the intention to go carefully into the circumstances surrounding the employment of all men from 16 to 40, both ages inclusive, in a large number of occupations and industries...The process of moving men up to occupations of high priority involves a very great deal of careful and painstaking administration, so that the job must be done progressively. However, the project will be

moved along as rapidly as is possible, as a substantial number of men are still required to fill vacancies in high priority jobs."

The Minister also stated that, for the time being at least, while ex-servicemen and men with domestic responsibilities will be required to register under compulsory employment transfer orders, in the case of ex-servicemen persuasion will be used rather than compulsion, in order to have them transfer to more essential occupations; while in the case of men with domestic responsibilities, changes of residence will not be required which will involve domestic hardship, although these men will be available for transfer within industry in areas in which they reside.

Mr. Arthur MacNamara, Director of National Selective Service, declared, "Progressively, Selective Service will examine the present employment of practically all of the men in the age groups mentioned now working in industry, with a view to increasing the usefulness of the individual by moving him to higher priority work wherever that is practical."

Under the sixth order it was made illegal for any employer to continue to employ any man covered by the new compulsory order after September 8 except under special National Selective Service permit. Employees affected were required to register with the nearest Employment and Selective Service Office not later than September 8, and be available for transfer to higher priority work.

Occupations Covered by Order

The list of occupations in which male employees from 16 to 40 years of age (both ages inclusive) are now covered by the sixth transfer order, consolidating previous orders, is as follows:—

A. Any occupation in or associated with the manufacturing of:

- (1) Candy; confectionery; soft drinks; flavouring extracts and syrups; fruit juices for soda fountain use or for the manufacture of soft drinks; colours for bakers' and confectioners' use;

- (2) Cigars; cigarettes; chewing and smoking tobacco; snuff; tobacco pipes; cigarette holders; cigar holders;
 - (3) Curtains; draperies (from fabric not produced in the same establishment);
 - (4) Fur garments; fur accessories; fur trimmings (excluding the manufacture of sheep-lined clothing);
 - (5) Handbags (women's); women's purses; small leather articles such as billfolds; card, cigarette and key cases, coin purses and cheque book covers;
 - (6) Hats; hat bodies; hatter's fur for use as material in the production of fur felt hat bodies; caps; cap findings such as cap visors, sweat bands and trimmings; tip printing and stamping of hats and caps; artificial leather; padding; upholstery filling;
 - (7) Household furniture (except mattresses and bedsprings); metal office furniture; metal restaurant furniture;
 - (8) Frames for mirrors, pictures, photographs or medallions; picture frame mouldings;
 - (9) Monuments; tombstones; cut-stone; stone products; slate products; ornamental metal work such as ornamental metal doors and sash, window and door frames, store fronts, moulding and trim; signs, advertising displays; advertising novelties;
 - (10) Neckties; scarfs; neckwear (other than knitted); bath robes; lounging robes; dressing gowns;
 - (11) Pens; mechanical pencils; pen points; penholders; parts of mechanical pens and pencils; artist's materials; drafting materials;
 - (12) Jewellery; jewellery cases; fancy boxes and trays for jewellery, instruments, cutlery, eyeglasses, combs, cigarettes, pipes, toilet sets; cigar boxes (wood); fancy boxes (wood);
 - (13) Perfumes; cosmetics; toilet preparations; beauty shop equipment; barber shop equipment;
 - (14) Pianos; organs, accessories, attachments or materials for organs or pianos; musical instruments; parts and materials for musical instruments; phonograph records; games; toys; dolls; doll parts; doll clothing; children's vehicles;
 - (15) Furniture for public buildings such as schools (including wooden blackboards), theatres, assembly halls, churches and libraries; seats for public conveyances; office fixtures; store fixtures; prefabricated partitions; shelving; cabinets, show and display cases; fabricated woodwork such as bar fixtures, telephone booths, butchers' fixtures, lockers, statuary wooden pedestals, display racks and stands and store or lunchroom window backs; prefabricated wooden store fronts; window shades; window shade rollers and fittings; curtain rods, poles and fixtures; Venetian blinds; porch shades; wallpaper; rubber tile and sheet flooring; wainscoting; lamp shades;
 - (16) Rattan wares; willow wares (except fruit and vegetable baskets);
 - (17) Soda fountains; ice cream parlour equipment; beer dispensing equipment; tanks; siphons, parts and accessories for soda fountains, ice cream parlour and beer-dispensing equipment; vending, amusement or other coin-operated machines; store machines and devices; household machines; service industry machines; electric vacuum cleaners;
 - (18) Feathers; plumes; artificial flowers; chewing gum; wine; lace goods; greeting cards; factory production of statuary and art goods; wigs; toupees; braids, switches, transformations and related articles made largely from human hair.
- B. Any occupation in wholesale activities, except that occupations in the following branches of wholesaling are not included:—
- (1) Books; papers; magazines; sheet music;
 - (2) Electrical equipment for industrial use;
 - (3) Farm products (excluding tobacco); farm supplies;
 - (4) Food products;
 - (5) Fuel; ice;
 - (6) Gasoline; oil; grease;
 - (7) Hardware; lumber; building materials;
 - (8) Leather; leather goods;
 - (9) Machinery; machinery equipment;
 - (10) Metals; minerals; chemicals;
 - (11) Paper; paper products;
 - (12) Plumbing supplies; heating supplies; ventilating supplies;
 - (13) Scrap metal; junk; waste;
 - (14) Watches; clocks; timing instruments.
- C. Any of the following occupations in any industry:—
- Bus boy; charman; cleaner; custom furrier; dancing teacher; dish washer; domestic servant; doorman; starter, elevator operator; greens keeper; grounds keeper; hotel bell boy; porter and waiter (other than in railway train service); private chauffeur; taxi driver.
- D. Any occupation in or associated with the following activities:—
- (1) Art; authors; art galleries; museums; commercial art services; library operations; framing pictures; portrait photography; photography for advertising agencies, publishers and other industrial users; film developing and print processing of films; lapidary work (except for diamond dies and industrial diamonds);
 - (2) Dyeing, cleaning and pressing; baths, guide service; shoe shining; operation of ice cream parlours and soda fountains; barber shops; beauty parlours; gasoline-filling service stations;
 - (3) Distilling alcohol for beverage; brewing; breweries;
 - (4) Entertainment including but not restricted to theatres, film agencies, motion

picture companies, amusement parks, bands, orchestras; billiard and pool rooms, bowling alleys, recreational clubs and recreational services (excepting radio broadcasting stations);

- (5) Florists; flower growing; horticultural services (except tree surgery);
- (6) Raising of special livestock, such as race horses, dogs, cats and other pets;
- (7) Leather currying, finishing, embossing and japanning;
- (8) Costume renting; fur dressing and dyeing; fur storage;
- (9) Distilling and refining natural essential oils and witch hazel extract.

E. Any occupation in or associated with the following retail activities:—

- (1) All retail stores; restaurants, lunch rooms; taverns; retail liquor, wine and beer stores;
- (2) Retail sale of candy, confectionery, tobacco, tobacco products, books, stationery, magazines, or newspapers; magazine subscription agencies; office and school supplies; retail news agents;
- (3) Retail sale of motor vehicles; motor vehicle accessories; sporting goods; musical instruments.

Other Manpower Orders

Soldiers on Farm Duty.—The plan for the assignment of soldiers to farm duty was described in the August LABOUR GAZETTE (p. 1075). An order in council of August 13 (P.C. 6434) makes provision for the carrying out of the arrangements planned. The order deals with transportation and other expenses under the program, Dominion-provincial arrangements, conditions under which soldiers are to be assigned to any particular farm including specifications as to payment and welfare, and other matters.

Movement of Harvesting Equipment.—In order to encourage the efficient movement of harvesting equipment from one district to another within the Prairie Provinces to ensure harvesting of the 1943 crop, arrangements have been made for the payment of one-way transportation costs of equipment moved under the direction of provincial authorities. An order in council (P.C. 6549, August 17) authorizes the sharing of costs so incurred between the Dominion and the provinces concerned.

Employment on Flue-Cured Tobacco Farms.—National Selective Service Civilian Regulations have been amended in respect of the employment of persons on flue-cured tobacco farms. Under Order in Council P.C. 5819, August 6, a new section, 205A, is added to the Regulations, which provides that no male person between the ages of 16 and 65 may (a) apply for, accept, or enter employment on a flue-cured tobacco farm, or (b) remain in

employment on such a farm, between July 15 and October 15 of any year, without a permit from a Selective Service Officer. Similarly no employer may hire or retain in employment such a person unless the person presents to him a permit in prescribed form.

Camps for Fuel Workers.—To help meet the wood fuel shortage an Order in Council (P.C. 6180, August 3) has been passed authorizing the establishment of camps for the housing of prisoners of war and other labour available for producing wood fuel. Such arrangements are definitely planned in the Riding Mountains in Manitoba, and camps will be established elsewhere if it is found expedient. The Wood Fuel Controller of the Department of Munitions and Supply is in charge of the plan and is authorized to supply and maintain for the camps the necessary facilities and equipment for the production of wood fuel and for its transportation to railway and other marketing outlets; and dispose of the wood fuel produced in such manner as he may deem expedient.

Employment of Members of Armed Forces on Leave.—Order No. 8, issued August 20 under National Selective Service Civilian Regulations, revokes a certain order of December 24, 1942. This earlier order excluded employment of any member of the Naval, Military or Air Forces on leave, from the section of Selective Service Regulations (1942) dealing with notices of separation and permits to seek employment.

Employment of Longshoremen.—Action was taken in June to ensure prompt loading and unloading of ships at Eastern Canadian ports by stabilizing the employment of longshoremen (L.G., July, 1943, p. 901). An order in council passed at that time (P.C. 5160) applied to the port of Halifax and "such other ports in Nova Scotia or New Brunswick as the Minister of Labour may prescribe" as ports in which longshoremen are frozen in their jobs and to which persons subject to Mobilization Regulations, but unfit for training or conscientious objectors, might be directed for employment on the docks.

The port of Saint John, New Brunswick is now also specifically prescribed, by Order No. 9, dated August 26, under Selective Service Regulations. Furthermore the Order designates Mr. Alexander Gray, Port Manager, National Harbour Board, Saint John, as the

person who, for the purposes of the National Selective Service Civilian Regulations shall be deemed to be the employer of any person employed or engaged in the occupation of longshoring in the Port of Saint John since April 30, 1943.

Reorganization of National Selective Service

THE Honourable Humphrey Mitchell, Minister of Labour, announced on August 10 that the Government had approved of a recommendation made by the Director of National Selective Service, Mr. Arthur MacNamara. The report of Mr. MacNamara, containing a seven-point program for reorganization of National Selective Service, is as follows:

I recommend approval that the administration of National Selective Service be strengthened, broadened and as far as practical, decentralized. The administrative requirements increase as the various new plans are put into operation.

There is no necessity of reporting to you in detail how the service is growing in importance.

The expansion plan recommended is outlined herein, viz:

1. That there be an Administration Board of full time personnel consisting of:

- Director of National Selective Service.
- Associate Director (Mobilization—military)
- Associate Director (General civilian—a Judge to be selected)
- Associate Director (French speaking)
- Associate Director (Essential civilian services)
- Associate Director (Public relations and staff training)
- Associate Director (War industries)
- Associate Director (Labour relations)
- Associate Director (Legal interpretations)
- Associate Director (Women employment)
- Director Employment Service
- Secretary—(The Secretary of National Selective Service Board and Director of Planning).

The Director shall be chairman of the Board and the Judge selected will be vice chairman.

2. That the members of the Administration Board who are not already on the National Selective Service Advisory Board shall become members thereof.

3. That there be Assistant Associate Directors at head office for:—

- 1. Mobilization
- 2. Fuel, mining and lumbering and logging
- 3. Farm labour
- 4. Priorities (chairman of committee)
- 5. Fishing and canning industries
- 6. War industries
- 7. Essential civilian services
- 8. Women employment.

4. That there be appointed a Director of Planning who will:—

- (a) Act as Secretary to the Advisory Board as well as the Administration Board.
- (b) Act as Liaison Officer between Associate Directors and Regional Directors.
- (c) Act as Co-ordinator (under instructions of the Judge selected as Associate Director (General)) of the activities of the Associate and Assistant Directors.

5. That there be created for each Employment Region the position of Provincial Director, for the following:

- Maritimes—Head office at Moncton
- Quebec—Head office at Montreal
- Ontario—Head office at Toronto
- Prairies—Head office at Winnipeg
- Pacific—Head office at Vancouver.

The duties of the Provincial Directors, as far as practicable, shall be to deal with matters within their region which otherwise would be referred to Ottawa. To confer with, *but not direct*, Regional Superintendents of Employment Service, to receive reports of emergent labour shortages and suggest remedies. To act as chairman of regional selective service boards. They will provide at the regional level a liaison between mobilization and civilian employment.

6. That there be created for each Employment Region a Regional Selective Service Advisory Board consisting of:

- (a) Regional Director, N.S.S.—Chairman
- (b) The Chairman or Registrar of Mobilization Board
- (c) Regional Superintendent—Employment Service
- (d) One Representative of Labour
- (e) One Representative of Munitions and Supply Department
- (f) One Representative of Wartime Prices and Trade Board
- (g) The Chairman of Employment Service Committee.

These Boards shall act in an advisory capacity in a similar manner as does the National Selective Service Advisory Board. In respect to many matters they will become a board of clearance and adjustment at the regional point. Having on the board a representative of Munitions and Supply and Wartime Prices and Trade Board will be of great assistance in co-ordinating activities of the field staffs of the three departments.

7. That the Director of Employment Service and the Unemployment Insurance Commission be instructed to increase the number

of Employment Offices, and add to the staffs. In order to expedite the compulsory transfer procedure, (that they may be cleared with more efficiency and rapidity than has been possible up to date) I recommend that this be done as quickly as can be executed. This recommendation is made in appreciation of the fact that the work imposed on these offices will increase rather than decrease.

The success of selective service *which must be attained* depends upon the effectiveness of the work done in the employment offices.

Summary of Plan

The Minister of Labour summarized the plan as being one which contemplates:—

- (a) The creation of an Administration Board at Headquarters.
- (b) The selection of a Judge to act as Deputy Head on the civilian side.
- (c) Division of the work on an industrial classification basis.
- (d) Creation of Regional Directors and Regional Advisory Boards so that many matters can be adjusted in the regions rather than at Ottawa.

At Head Office there will be an Associate Director in charge of the various divisions including one for war industries and one for essential civilian services and these two men will keep in close touch with the requirements of the Department of Munitions and Supply and the Wartime Prices and Trade Board.

By having representatives of the Mobilization Boards and the Department of Munitions and Supply and one from the Wartime Prices and Trade Board on the Regional Advisory Boards a very much closer linked activity can be carried out which will produce better co-ordination and greater use of joint staffs of the four Departments mainly concerned with men and women for the Armed Forces, Manpower for War Industries and Manpower for essential civilian services.

Appointments Made

The Minister further stated that a number of selections for the various posts had already been made. In this respect he outlined the duties of the various incumbents as follows:—

Honourable Mr. Justice W. J. Major of the Manitoba Court of King's Bench, has been asked to act as Associate Director (General

Civilian), and Vice Chairman of the new Administration Board.

Major General Riley will continue on the Military Mobilization side.

Mr. Paul Goulet, now Associate Director in respect to French Canadian matters will have his choice of continuing at Ottawa or moving to Montreal to become Regional Director, in which case, a new appointment of Associate Director at Ottawa will be made.

Mr. C. F. Needham will continue as expert on railway matters and farm labour.

To give attention to Essential Civilian Services, Mr. C. W. Foster, now with Dominion Stores, is joining the organization.

Mrs. Rex Eaton of Vancouver, who has been on loan to the Dominion Government from the British Columbia Government for some months, becomes Associate Director for Women Employment under the new set up.

Mr. Allan Mitchell, as Director of Employment Services, will be a member of the Administration Board.

Mr. Harry Hereford becomes Director of Planning and Secretary of the Administration and Advisory Board.

Some weeks ago Mr. J. G. Clark, Superintendent of the Robert Simpson Company, agreed to accept an appointment as Associate Director to assist in Public Relations and Staff Training and his appointment has already been made. He becomes a part time member of the Administration Board. His assistant, Mr. Edgar V. David, is joining the department on a full time basis, his services having been loaned by the Company.

Mr. V. C. MacDonald, formerly Dean of Dalhousie Law School, now Assistant Deputy Minister of Labour, becomes Associate Director of Legal Interpretations.

Other appointments, the Minister stated, would be announced very rapidly and in reference to the recommendation that the field offices and staffs be strengthened and increased, this request had already been made to the Director of Employment Offices and to the Unemployment Insurance Commission because the Minister too, was convinced that the success which must be attained depended upon the effectiveness of the work done in the Employment Offices.

Order in Council P.C. 6387, August 10, approves the plan and authorizes the Minister of Labour to take necessary steps to put it into effect.

New Classes Called to the Armed Forces

A PROCLAMATION was issued in August extending the application of National Selective Service Mobilization Regulations to married men aged 27 to 30 and to men of 18. As in previous calls, those in the classes mentioned are required to present themselves for examination, and, if found fit and accepted, to train and serve in the Armed Forces in Canada and her territorial waters.

The call covers all men not heretofore designated or already under arms, and whatever their marital status, who were born in any of the years 1916, 1915, 1914 and 1913. Similarly the call is to men born in 1925, save that none of these will be served with "Orders—Medical" until he reaches the age of eighteen years and six months.

Transfer of Harvesters from Ontario to the West

SOME thousands of selected farmers and experienced farm workers were transferred by the Dominion Government from Ontario points to Manitoba, Saskatchewan and Alberta, for the Western harvest. The movement of the men was on a voluntary basis, and the men left Ontario as soon as possible after the decline of harvesting operations in that province.

Except for a nominal sum for the return journey, the men were moved without cost to themselves in so far as rail transportation was concerned. While in the West, the men were to be paid the rates current for farm work.

Officials of the Ontario Department of Agriculture co-operated with the Dominion Department of Labour to assist in locating farm workers who might be spared, and to ensure that Ontario farmers would not be encouraged to move while they were still needed for the harvest in their own province.

Word was sent out to individual farmers, asking those who were able to go West to apply to the nearest Employment and Selective Service Office. The transfers were conducted on much the same basis as in 1942, when over 5,000 farmers and university students were moved West.

Women of Canada and the War

IN a recent radio address, Mr. Arthur MacNamara, Director of National Selective Service and Deputy Minister of Labour, described some of the accomplishments of Canadian women in the war effort.

Describing the wartime entry into industrial employment of hundreds of thousands of Canadian women, Mr. MacNamara stated that in 1939 there were 144,000 women employed in factory and industrial work only, and that today there were 419,000 women so employed.

In war industry a rise in female employment had taken place from 96,000 in January, 1942 to 255,000 in June, 1943.

Variety of Jobs Performed by Women

Mr. MacNamara noted some of the war jobs women are doing as follows:

"Women perform 70 per cent of the operations in the manufacture of machine guns. They inspect, test and assemble.

"Women comprise more than 80 per cent of those employed in Canadian instrument factories. They are employed almost exclusively in the manufacture of medical supplies

and over 27 per cent of the 86,000 workers in aircraft industries are women. It is also interesting to note that one of the leading designers of airplanes in Canada is a woman. They are working at building ships on both the east and west coasts. At Pictou, Nova Scotia, a third of the 1,000 shipyard workers are women.

"They work on tanks and heavy assembly jobs, rivetting, welding, soldering, electrical work, spray painting and a host of occupations in the iron and steel industry which were always regarded as the preserve of men.

"The age of these women working in industry varies from 17 to 60 years of age and frequently over. But I like to think with special appreciation of the 287 grandmothers working in one Ontario plant. In a small plant making airplane supplies the best producer on any of the machines is a 62 year old grandmother. This entire plant was organized, financed and is run by one woman."

He referred also to the importance of other essential work in which women were doing their part, including such services as hospitals, restaurants, hotels, laundries, dry cleaning

establishments, without which, he declared the population would be at loss to carry on.

Two professions at which women excel, he pointed out, are teaching and nursing. Women with training and experience in these professions could not be spared from their important national service.

Health and Welfare

Mr. MacNamara stated that extensive measures had been taken to endeavour to protect the welfare of women in industry. The Women's Division of National Selective Service, headed by Mrs. Rex Eaton, was in constant touch with the provinces—who enact and administer the legislation covering the employment of women—to see to it that in so far as is possible any risks there may be

involved in the employment of women are overcome.

"Figures of the Ontario Workmen's Compensation Board show," he declared, "that women are involved in only 3 per cent of the recorded industrial accidents; considering the number of women in relation to the number of men, this is a very good showing indeed.

"Encouragement has been given for the appointment of personnel and welfare officers in the larger war plants, and training courses for such officers have been given by Government."

He referred also to the establishment of day nurseries for the children of working mothers, and said that a start had been made at provision for recreational facilities in the districts where war industries are located.

Part-time Employment of Women in Great Britain

AN article on "Part-time Labour in Munitions Work" appears in the July issue of *Occupational Psychology* which is published by the National Institute of Industrial Psychology in Great Britain. The author, J. Harvie Mitchell, was formerly a member of the Institute's staff and is now an official of the Ministry of Labour and National Service.

It has been found by experience, the author points out, that output is often greater from two women working part-time than from one woman working full-time. This is particularly true in work involving physical strain, in very fine work requiring close attention and in dull repetitive work with little inherent interest. Moreover, absenteeism is less among part-time than full-time women workers, because with the latter there is always a certain amount of unavoidable absence from work if their domestic responsibilities are to be fulfilled. In addition, part-time workers are usually more quickly trained than full-time workers, and this quicker rate of learning helps to offset the objection that almost twice as many persons have to be trained when part-time workers are put on jobs requiring training.

It has also been found that, from the technical point of view, there are few occupations in which it is not practicable to employ part-time workers. The Technical Committee set up within the Ministry of Labour and National Service to consider the question has agreed that it is difficult to employ women part-time on delicate and accurate work on machines which require separate setting up for each worker, on complicated jobs in the

machine shop or assembly work, on process work where careful watching is needed until the process is completed or on work which involves a long period of training. Otherwise, however, the Committee reported that there were no technical considerations limiting the employment of women in part-time work.

The main problems, therefore, are administrative rather than technical. One of the most difficult problems is that connected with night-shift work. Many part-time women workers cannot undertake night-work but in many plants it has been found possible to operate certain departments on day-shifts only and to employ part-time workers there. Where night-shift work is unavoidable, the problem has been solved in a variety of ways. There is also the problem of adjusting the hours of those who work in the day-time. The most usual arrangement is for part-time workers to come in with the regular shift, go off at the mid-day meal hour, and be replaced by a new shift in the afternoon. Different arrangements are frequently made, however, to suit the convenience of the workers.

The point which is emphasized is that:

The absorption of part-time labour into productive work is essentially a job which has to be planned. When a firm decides to employ part-time labour, it has in fact decided to modify the organization of the factory to suit the convenience of the workers who have domestic responsibilities. The management must recognize that if part-time employment is to be successful the approach to any problem which arises should be as far as possible to adapt the organization to suit the worker, not to try to get the worker to "fit-in" to an organization designed for full-time workers.

United States Manpower Program

New Ruling Places Occupation Before Dependency Status as Cause for Draft Deferment—Control of Job Transfers

UNITED States manpower policy has been aimed at (1) supplying the needs of the armed forces, and (2) mobilizing the nation's labour supply as efficiently as possible for essential industry.¹ Under the terms of an executive order issued last December, the War Manpower Commission is assigned the responsibility of furnishing each month the number of men required for the army and navy.

A new program was recently announced by the Chairman of the Commission, Mr. Paul V. McNutt. The program is based on the principle that men of military age who have vital skills needed for war industry and essential civilian activities are not to be drafted into the armed forces, providing they are using their skills in appropriate work. Men possessing these skills who are not in essential industry must either transfer to war work or be drafted into the forces.

Skills which are considered vital were covered by a list of 149 occupations described as "critical" by the War Manpower Commission. It was explained that men in these occupations would not be absolutely "draft-proof", but would have first priority on deferments. In order to ensure the channeling of workers with vital skills into the most urgent jobs such workers may now be hired only upon referral by, or with the consent of, the United States Employment Service.

In regard to men possessing other skills somewhat less vital a similar principle in regard to draft deferments will apply. Local draft boards have been instructed to give special consideration to replaceability of men in vital industry in determining occupational draft deferments, taking into account (a) the shortage of the registrant's skill in the total labour force, (b) the availability of replacements, even for unskilled workers, and (c) current local shortages of both skilled and unskilled workers.

As previously, men between the ages of 18 and 37, are not allowed to enlist voluntarily in the armed forces, but must await call-up through the Selective Service System.

The Commission also issued a list of non-deferable occupations. (A smaller such list

had previously been issued.) Draft registrants engaged in these activities have been instructed to transfer into essential employment or be placed first on the list for induction into the armed forces by local draft boards.

The "status of idleness", it was announced, is to be treated as a non-deferable activity.

Drafting of Fathers

Earlier in the month the Commission announced that fathers in the age 18 to 37 group would become liable for induction to the armed forces. The plan applied to men who were fathers prior to September 15, 1942, other fathers being already liable for induction.

Occupations have now replaced dependency status and other factors through which draft registrants have previously been deferred from induction since the Selective Service law was enacted.

Control of Job Transfers

As part of the program, new regulations providing uniform control over job transfers are to be written into all employment stabilization plants by October 15, and to be observed thereafter by all employers and employees. At present the job stabilization programs in effect in the various regions and areas show certain disparities, having been prepared separately by the various management-labour War Manpower Commission Committees.

The following basic standards under which job transfers will be allowed are to be incorporated into all local plans by the date mentioned, following their consideration by the local committees:

An individual whose last employment is or was in an essential or locally needed activity shall receive a statement of availability from his employer under these conditions:

(1) If he has been discharged, or his employment has been otherwise terminated by his employer, or

(2) If he has been laid off for an indefinite period, or for a period of seven or more days, or

¹ L.G., Dec., 1942, p. 1415.

(3) If continuance of his employment would involve undue personal hardship, or

(4) If such employment is or was not at a wage or salary or under working conditions below standards established by State or Federal law or regulation, or

(5) If such employment is or was at a wage or salary below a level established or approved by the National War Labour Board (or other agency authorized to adjust wages or approve adjustments thereof) as warranting adjustment, and the employer has failed to adjust the wage in accordance with such level or to apply for permission to do so.

Workers in any of the 149 "critical" occupations may not be hired merely on the presentation of a statement of availability. Referral by or with the consent of the United States Employment Service is also required. Employment Service referral will be necessary also in the case of workers desiring to work in a new locality and in the case of a

worker desiring to leave agricultural employment.

Commenting on the regulations Mr. McNutt said that between August 1943 and July 1944, "a rock-bottom minimum of 2,600,000 persons must transfer from less essential jobs to munitions production or to jobs in services necessary to community health." On the basis of existing needs, he estimated that 2,100,000 persons must make transfers during the remaining months of this year, and that 500,000 must shift jobs during the first six months of 1944.

Mr. McNutt said there were already fifty-five areas of acute labour shortage and 111 areas of insufficient labour supply in which a shortage might be expected within six months. These two groups, which include more than twenty of the country's largest cities, at present had a population of about 52,000,000 as compared with a peacetime population of about 48,000,000.

Prison Labour for War Work in the United States

STEPS are being taken in the United States to make use of the manpower available in prisons. War contracts have been placed in State prisons for the manufacture of essential goods ranging from mattress covers to army patrol boats. Prisons located near army camps often provide laundry, shoe-repair and other services to the camps. Groups of prisoners are helping on farms under supervision. The United States Employment Service is being urged by the War Manpower Commission to make arrangements with prison authorities for the vocational training and placement in war industry of the 80,000 prisoners released each year in the United States. It is pointed out that such a scheme would not only help to relieve the shortage of men but would be of value in the rehabilitation of released prisoners.

In North Carolina the Prison Department of the State government has for many years had an arrangement with the Federal Employment Service in the State for the placement of prisoners on release in jobs which their particular skills fit. Recently the State has used this arrangement to direct released

prisoners into war industry and has developed a scheme to make the services of other prisoners available for war work. The Educational Director of the Prison Department is conducting a survey of the State prisons to locate skilled and semi-skilled men. If the records of such prisoners are satisfactory a parole is recommended, and if it is granted the names of the prisoners are sent to the Employment Service which classifies them according to skill preparatory to placing them. Prospective employers are fully informed in regard to the worker's prison record and the recommendation of the prison officials and may visit the prison to interview applicants.

In addition, special training classes for war work have been established in the State prisons. Only prisoners with satisfactory records are permitted to attend and they are promised release on completion of the course and placement in a war job. Courses usually last seven weeks and consist of 280 hours of training. Employers have reported satisfaction with workers trained under the scheme and are requesting more.

Industrial Welfare

Report on Youth Registration in Britain

THE British Government has recently issued a White Paper reporting on the results of the registration and interviewing of young persons during 1942.* The report not only provides a picture of the leisure-time activities of boys and girls but also throws much light on their conditions of employment. A list of measures which the government proposes to take to remedy some of the matters brought to its attention through the registration is contained in Part II of the report.

The Registration of Boys and Girls Order of December 22, 1941 (L.G., 1942, p.259) applied to young persons from 16 to 18 years of age. It was designed to provide local education authorities with the necessary information to enable them to guide boys and girls of this age-group into worthwhile leisure-time activities. After registration, young persons not fully occupied in education or already members of an approved youth organization were interviewed and were urged to join some youth organization unless their conditions of work or home circumstances made this impracticable. Attendance at interviews was not compulsory nor was it necessary to follow the advice of the interviewers. English and Scottish education authorities conducted the interviews by means of panels of interested citizens and their reports to the Minister of Labour, who supervised the registration scheme, form the basis of the White Paper.

It was found that from 41 to 48 per cent of the boys and from 61 to 77 per cent of the girls did not belong to any youth organization, the percentage rising with the age of the young persons. Approximately 75 per cent of those called for interview responded. Indifference, parental opposition, travelling difficulties and inconvenient hours kept the others away. In England and Wales from 25 to 30 per cent of those interviewed were considered unable to take on additional activities because their hours were too long or inconvenient, their home duties were heavy or they were occupied in part-time work during leisure hours. In Scotland the proportion was 19 per cent. It was estimated that the number of young persons in youth organizations or activities or continued education rose by 15 to 20 per cent

as a result of the registration. Activities which offered a definite course of practical training such as the pre-service organizations or nursing, first-aid and agricultural classes were chosen by a large number and youth centres and clubs also attracted many.

Hours of Work

The hours of work reported by many young persons employed in factories, shipbuilding, transport, the building trades and hotels and boarding houses aroused considerable comment among education authorities. For example, one stated:

The Committee are impressed by the evidence from almost all Interviewing Panels of the strain upon young people from the long hours of work so many are now undertaking. The conclusion that the hours in many cases are unreasonably long is inescapable . . . It is the more serious in a country area, because so much time is usually taken up in travelling to and from work.

Few cases of actual violation of the legal limits on young persons' hours of work were discovered. However, the interviewing panels "have been no less concerned at the signs of strain and tiredness among many young people whose hours of work may not have exceeded legal sanction, and perhaps especially among those in employments where hours are not regulated by law." The conclusion was general that the hours being worked by many boys and girls rendered them too tired for youth organizations and thereby hindered their personal development and well-being. One education authority reported that

Conditions of physical tiredness, while very evident in some cases, did not prove as prevalent as might have been expected. They were more evident with girls than with boys. The more alarming symptom was that of mental lassitude in those who were unable to get adequate time for relaxation and recreative activity and whose life seemed to consist only of working, hurried meals and sleep.

Other Limitations on Leisure

The leisure of many young persons was further limited by domestic duties and farm chores at home and overtime and part-time work undertaken to earn extra money. Many boys and girls obtained evening employment in cinemas and eating places. Such employment, in the words of the report "inevitably

*"Youth Registration in 1942", Board of Education and Scottish Education Department, London, 1943.

deprives the young people concerned of their leisure and involves an expenditure of physical and nervous energy which they can ill afford." Existing laws controlling dual employment of young persons fail to cover cases where one or both of the occupations are unregulated. It was noted that more office and shop workers belonged to youth organizations than industrial or agricultural workers, and those employed in cinemas apparently had the least time or energy for youth activities.

Inconvenient and changing shift hours and lack of leaders, accommodation and equipment were other factors limiting participation in youth activities. Training courses for leaders and pooling of facilities had been undertaken in some areas to overcome these difficulties. One of the great obstacles was the indifference of many young persons, and it was noted that this increased the further the boy or girl was from school days. "For large numbers, interest in education and training had been lost during the two or three years' interval since leaving school; and it was not easy to revive." It was generally agreed that young persons should be informed of the facilities offered by youth organizations when they leave school and encouraged to join an organization then, but that education into the years of adolescence was necessary to enable boys and girls to make a wise choice of leisure-time occupations. As one education authority commented:

"Boys and girls who had left school at 15 or 16 stood out at once from those who had left at 14, and the leisure activities of the former presented a far more hopeful picture."

Choice of Leisure-time Occupation

While deploring the fact that the chief leisure-time occupations of those interviewed appeared to be the cinema, the dance hall, the billiard saloon and the company of the opposite sex, the interviewers did not condemn the young people, but commented on their desire and willingness to render some form of service. The blame attached to those who had failed to provide more profitable and attractive leisure-time pursuits for young people. In the words of one report:

The general impression gained by interviewers was that since billiard rooms, dance halls, skating rinks and cinemas provide at cheap rates warmth, colour, companionship and entertainment, young people choose to attend these places automatically as the only alternative to spending their leisure time in the street or in drab surroundings.

The small number of young persons who listed reading among their leisure-time activities was noted and it was suggested that public libraries might adopt less conventional methods in bringing books and potential young readers together. Another recommendation favoured extension of the school medical service to all

young people, as cases were discovered of boys and girls requiring medical attention.

Action Proposed by Government

The Government departments concerned with the welfare of young workers considered the reports of the education authorities and propose to take certain steps to relieve the strain on young persons in war work and to increase their leisure time. These steps are outlined in Part II of the White Paper.

After making enquiries, the Government reports no evidence that young persons are working illegal hours, that their health has been affected generally or that they are complaining about their hours. A special investigation conducted by the Ministry of Labour in January, 1943, showed that in all factories in ten sample areas, 48 per cent of the boys and 55 per cent of the girls between 16 and 18 were working 48 hours a week or less and 93 and 96.5 per cent respectively were employed 55 hours or less. The Factories Act limits hours for this age-group to 48 a week but permits a limited amount of overtime, and emergency orders may be issued under the Act and the Defence Regulations relaxing these standards.

However, the Government was well aware that in spite of what seemed reasonable hours of work at the factory, many boys and girls were suffering from fatigue because of war-time difficulties of transport, feeding and housing. The Government proposes, therefore, to review immediately, in consultation with workers' and employers' organizations, all cases where limits on hours have been relaxed in order to ensure that young persons under 16 do not work more than 44 hours a week and those from 16 to 18 not more than 48 hours a week except in cases of absolute necessity. Travel difficulties are to be reduced by staggering hours of employment and transferring young people from jobs which entail more than one hour's travelling each way. The whole problem of double employment of young persons is to be studied with a view to regulating it more strictly. The arrangements for the feeding of young people in commercial and industrial establishments will be reviewed, the Canteens Order strengthened if necessary, and employers urged to educate boys and girls as to the necessity for taking adequate meals in the canteens. The importance of sufficient rest and sleep must be brought home to the young people and interviewing panels must be careful not to encourage participation in activities which will entail sacrifice of sleep.

The Government also referred to its post-war plans for vocational guidance of young people, a comprehensive health service and an adjustment of hours which would permit young persons to combine work and continued education.

Manual of Industrial Hygiene

THE Division of Industrial Hygiene of the United States Public Health Service has recently prepared a comprehensive Manual of Industrial Hygiene and Medical Service in War Industries.* The book was issued under the auspices of the Committee on Industrial Medicine of the United States National Research Council. In the foreword, the Chairman of the Committee states that this book is "intended not only as a source of information for industrial physicians who must meet the changed conditions in industries converted to war purposes, but as a guide for those who patriotically volunteer to take the places of industrial physicians who have gone into the service".

The book opens with a chapter discussing the new problems in industrial hygiene arising out of wartime conditions such as community

overcrowding, shortages of medical staff, the use of new substances, longer hours and the increased employment of women and handicapped persons. A number of chapters deal with the organization and operation of plant medical facilities. The prevention and control of disease in industry is discussed in a section which includes special chapters on occupational dermatoses, industrial psychiatry, fatigue, air contamination and other subjects. The problems of women in industry and irregular attendance are also dealt with.

The list of contributors to the book includes experts in industrial medicine, sanitary engineers, a specialist in health education, a company physician, a dental surgeon, and a consultant in Public Health Nursing. Many are prominent members of the staff of the United States Public Health Service.

Labour Problems in Bolivia

A BOOKLET entitled *Labour Problems in Bolivia* was recently published by the International Labour Office. It is the report of a Commission, consisting of Bolivian and United States representatives, which was set up by the Bolivian Government to investigate "living and working conditions in the different areas and various branches of activity in the country." The United States members of the Commission were appointed by their own Government at the request of the Bolivian Government. Bolivia is an important source of raw materials, particularly tin, for the United States and other allied nations, and co-operative steps have frequently been taken by the two countries in commercial, financial and technical matters. The appointment of the present Commission represented the extension of this co-operation into the field of labour and social welfare. At the request of both the Bolivian and United States Governments, the International Labour Office appointed a member of its staff to assist the Commission.

The Acting Director of the I.L.O. stated in his forward to the Report that

The appointment of the Joint Bolivian-United States Labour Commission and the recommendations embodied in its report, are among the most striking manifestations of a new social consciousness, transcending front-

iers. Here is a great industrial country, justly proud of its high standards of life and labour, giving concrete evidence of its willingness to co-operate with a country smaller in size and population and with less developed resources from which it is purchasing raw materials, in order to improve the social conditions under which those materials are produced.

The Commission visited various mining, agricultural, rubber and factory areas in Bolivia. It found that in general wages were low, there was wide-spread insufficiency of medical, dental, hospital and nursing care, and there was an acute shortage of adequate housing. It points out that there can be no simple solution to these problems and that considerable effort will have to be made in a large number of different fields if the standard of living of the workers is to be raised. In particular, it believes that education must be greatly improved. The improvement in education will be important from every point of view but it will be especially important in meeting the great need for skilled workers. The prosperity of the country depends on the development of its resources, and this is possible only through the use of skilled workers. The Commission also expressed the view that

The best assurance that the workers will receive a fair deal is a well-organized labour movement under responsible leadership. In general, trade union development in Bolivia is at a primitive stage. A slow process of education here is indispensable.

* William M. Gafaer, ed.—*Manual of Industrial Hygiene and Medical Service in War Industries*, W. B. Saunders Company, Philadelphia, 1943.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published month by month in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1942 appeared in the *LABOUR GAZETTE* for July, 1943.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Recent Proceedings Under the Industrial Disputes Investigation Act

IN the month of August six Boards of Conciliation and Investigation submitted their reports in connection with the following disputes:

(1) Between the Canadian Pacific Railway Company, Montreal, P.Q., and its dining-car employees, members of the Brotherhood of Railroad Trainmen.

(2) Between the Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 2982, United Steelworkers of America, and its employees, members of Circo Employees Association.

(3) Between Morrow Screw and Nut Company, Limited, and Ingersoll Machine and Tool Company, Limited, Ingersoll, Ont., and employees, members of Local 2918, United Steelworkers of America.

(4) Between Canada Paper Company, Limited, Windsor Mills, P.Q., and its employees, members of the International Brotherhood of Paper Makers and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

(5) Between Massey - Harris Company, Limited, Weston, Ont., and its employees,

members of the United Automobile Workers of America (C.I.O.).

(6) Between the Canadian National Railways (Work Equipment Department) Winnipeg, Man., and employees, members of Divisions 142 and 226, Canadian Brotherhood of Railway Employees and Other Transport Workers.

The text of the reports of the Boards will be found at the conclusion of this statement.

Applications

During the month of August six applications* for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour as follows:—

(1) From employees of the Sydney Foundry and Machine Works, Limited, Sydney, N.S., members of Local 1, Industrial Union of Foundry and Machine Workers (C.C.L.). The dispute which concerns union recognition and the negotiation of a collective labour agreement, was said to affect 106 employees. On August 24, Mr. H. R. Pettigrove, Industrial Relations Officer, Dominion Department of Labour, Fredericton, N.B., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(2) From employees of the Anglo-American Telegraph Company, Montreal, P.Q., members of Local 11, American Communications Association (C.I.O.). The dispute, which was said by the applicants to affect 14 employees directly and 34 indirectly, concerns union recognition and the negotiation and signing of a collective labour agreement. On August 28, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(3) From employees of the Torrington Company, Limited, Bedford, P.Q., members of the National Union of Needleworkers (C.C.L.). The dispute concerns union recognition, seniority rights, clarification of employees classifications, recognition of the grievance committee and a closed shop, and was said by applicants to affect 550 employees. Mr. Bernard Rose, K.C., was authorized on August 27, as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

(4) From employees of the United Shipyards, Limited, Montreal, P.Q., members of Local 12, Boilermakers' and Iron Shipbuilders' Union of Canada (C.C.L.). The dispute, which was said by the applicants to affect 7,500 employees, concerns union recognition and the negotiation of a closed shop agreement. On August 28, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

(5) From employees of Atlantic Sugar Refineries, Limited, Saint John, N.B., members of Local 20, Refinery Workers' Union (T. & L.C.). The dispute, which concerns the negotiation of a new agreement, was said by the applicants to affect 490 employees.

(6) From employees of the Consolidated Plate Glass of Canada, Limited; Hobbs Glass Limited; J. P. O'Shea Company, Limited; Pilkington Bros. (Canada), Limited; and Star Glass Company, all of Montreal, P.Q., members of Local 1135, Brotherhood of Painters, Decorators and Paperhangers of America. One hundred and forty-six employees were said by the applicants to be involved in the dispute, which developed out of a request for union recognition and the negotiation of a collective labour agreement. A strike of the employees of the five glass companies occurred on July 29 over the request for wage adjustments, a week's holiday with pay and cost-of-living bonus. The provincial authorities, who were handling the situation, requested the Federal Department of Labour to deal with the dispute, in view of the war work involved. Pursuant to Section 8 of P.C. 4020, Mr. Bernard Rose was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, on the understanding that work would be resumed. The employees returned to work and submitted an application for the establishment of a Board of Conciliation and Investigation to deal with the dispute. In view of the fact that a satisfactory settlement of the matters in dispute could not be reached, a Board was established on August 30, and Mr. I. Ballon, K.C., was appointed a member on the nomination of the employees. At the end of the month the Department was awaiting the company's nominee for appointment to the Board.

Boards Established

On August 11, a Board of Conciliation and Investigation was established to deal with a dispute between Montreal Cottons, Limited, Valleyfield, P.Q., and its employees, members of Local 100, United Textile Workers of America (L.G., April, 1943, p. 472). The establishment of the Board followed an

*By P.C. 5963, the National and Regional War Labour Boards are specially charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which rates are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

investigation made by Mr. Bernard Rose, K.C., as Industrial Disputes Inquiry Commissioner. The Commissioner recommended that the Board be established as he was unable to bring about a mutually satisfactory settlement of the dispute. At the end of the month, Messrs. Edouard Larose and D. A. Paterson, both of Montreal, P.Q., had been appointed members of the Board on the nomination of the employees and employer respectively, and had been requested to confer with a view to making a joint recommendation of a person to be appointed third member and chairman of the Board.

A Board of Conciliation and Investigation was established on August 26, to deal with a dispute between the Paton Manufacturing Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 101, Textile Workers Organizing Committee (C.I.O.). (L.G. Aug., 1943, p. 1089). Following the receipt of the application for the establishment of a Board, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to make an investigation. The Commissioner reported that the circumstances warranted the establishment of a Board and recommended accordingly. On August 26, Mr. Guy M. Desaulniers, Montreal, P.Q., was appointed employees' representative on the Board and at the end of the month the Department was awaiting the company's nominee for appointment to the Board.

Other Boards Fully Constituted

The Board of Conciliation and Investigation established on July 17, to deal with a dispute between Central Aircraft, Limited, London, Ont., and its employees, members of Central Aircraft Workers Association, Unit 2 of Canadian Aircraft Workers' Association (L.G. Aug., 1943, p. 1090) was fully constituted on August 11. The personnel of the Board was as follows: The Honourable Mr. Justice J. G. Gillanders, Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Col. E. E. Reilly, London, Ont., and Mr. Bora Laskin, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The constitution of the Board of Conciliation and Investigation established on July 31, to deal with a dispute between the Goodyear Tire and Rubber Company of Canada, Limited, New Toronto, Ont., and its employees, members of Local 232, United Rubber Workers of America (L.G., Aug., 1943, p. 1090) was completed on August 30. The personnel of the Board is as follows: His Honour Mr. Justice Roach, Osgoode Hall, Toronto, Ont., chairman, appointed on the joint recom-

mendation of the other two members; Messrs. J. J. Robinette, and F. Andrew Brewin, both of Toronto, Ont., appointed on the nomination of the employer and employees, respectively.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

An application for the establishment of a Board of Conciliation and Investigation was received on July 30, from employees of the Dominion Rubber Company, Limited, Montreal, P.Q., members of the Distillery, Rectifying, Brewery and Wine Workers International Union (L.G. Aug. 1943, p. 1090). On August 17, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

Other Reports of Industrial Disputes Inquiry Commissioners

On July 14, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between the North American Cyanamid, Limited, Niagara Falls, Ont., and its employees, members of Local 175, United Gas, Coke and Chemical Workers of America (L.G. Aug. 1943, p. 1091). The Commissioner reported on August 7, that the applicant union requested that the application for a Board of Conciliation and Investigation be withdrawn as the members desired to place the question of union recognition before the Ontario Labour Court. The interested parties were subsequently advised that the application for a Board had been withdrawn.

In a dispute between the Canadian Kellogg Company, Limited, Sarnia, Ont., and its employees, members of the International Brotherhood of Electrical Workers (L.G. Aug. 1943, p. 1089), a report was received from Mr. H. Perkins, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., who had been appointed an Industrial Disputes Inquiry Commissioner to investigate. The Commissioner recommended the establishment of a Board as he had been unable to effect a satisfactory settlement.

Settlements

On August 24, the Department was advised that an agreement had been signed by Brantford Coach and Body, Limited, Brantford, Ont., and its employees, members of Local 397, United Automobile Workers of America (L.G. Dec. 1942, p. 1383). Following the report of the Board of Conciliation and Investigation, the applicant union informed the Department that it had rejected the majority report of the Board and requested that a strike

vote be taken under the provisions of Order in Council P.C. 7307. After considerable negotiation, the union agreed to withdraw its request for a strike vote, providing a representation vote was taken, and the company would agree to recognize the bargaining agency chosen. The vote was held on May 26 under the supervision of Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., and resulted in a substantial majority for Local 397, United Automobile Workers of America.

During the month of August, the Department was advised that a collective labour agreement had been concluded between the Ontario Steel Products Company, Limited, Chatham, Ont., and its employees, members of Local 127, United Automobile Workers of America (L.G. Feb. 1943, p. 198). The agreement between the company and the union, which is based on the recommendations of the Board of Conciliation and Investigation established to deal with the dispute, is summarized in the article entitled "Recent Collective Agreements", appearing elsewhere in this issue.

The Department was also advised during the month of August that an agreement had been signed between the Robin Hood Flour Mills, Limited, Moose Jaw, Sask., and its employees, members of Local 201, United Packinghouse Workers of America (L.G. Feb. 1943, p. 196). Mr. H. S. Johnstone, Industrial Relations Officer, Dominion Department of Labour, Winnipeg, Man., who was authorized as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute following the receipt of the application for a Board, reported that he had arranged for the taking of a representation vote of the employees, to determine their choice of a bargaining agency. The vote resulted in favour of Local 201, United Packinghouse Workers of America. An agreement having been reached, the application for the establishment of a board has now been

withdrawn. The agreement between the company and the union is summarized in the article entitled "Recent Collective Agreements", appearing elsewhere in this issue.

On August 27, the Department was informed that a collective labour agreement had been concluded between the York Township Hydro System and its employees, members of Branch 1, Canadian Electrical Trades Union (L.G. Aug. 1943, p. 1090). In view of the settlement reached between the company and the union, the latter requested that the application for a Board be withdrawn.

On August 19, at the request of the applicant union, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between Knitters, Limited, Marieville, P.Q., and its employees, members of Local 7, United Textile Workers of Canada (T.L.C.) (L.G. Aug. 1943, p. 1089) was withdrawn, an agreement having been signed by the parties settling the matters in dispute.

The application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Dominion Oilcloth and Linoleum Company, Limited, Montreal, P.Q., and its employees, members of Aircraft Lodge 712, International Association of Machinists (L.G., May 1943, p. 595) was withdrawn at the request of the applicant union, an agreement between the company and the union having been signed.

Other Application Withdrawn

On August 23, at the request of the applicant employees, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the H. E. Mott Company, Limited, Brantford, Ont., and its employees, members of Local 397, United Automobile Workers of America (L.G. Dec. 1942, p. 1374), was withdrawn.

Report of Board in Dispute between the Canadian Pacific Railway Company, Montreal, P.Q., and Its Dining-Car Employees

On August 7 the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Pacific Railway Company, Montreal, P.Q., and its dining-car employees, members of the Brotherhood of Railroad Trainmen (L.G., July, 1943, p. 922.)

The personnel of the Board was as follows: Honourable Mr. Justice J. G. Gillanders, Osgoode Hall, Toronto, Ont., chairman, appointed on the joint recommendation of Messrs. W. A. Sinclair, K.C., and George B. Bagwell, both of Toronto, Ont., respectively,

the employer's and employees' nominees on the Board.

The report of the Board follows:

Report of Board

To the Honourable Humphrey Mitchell, Minister of Labour, Ottawa, Ontario.

Re: Industrial Disputes Investigation Act and re dispute between the Canadian Pacific Railway Company and its Dining-Car Employees, members of the Brotherhood of Railroad Trainmen.

The Board of Conciliation and Investigation constituted by you in connection with this matter begs to report as follows:—

The Board met in Toronto and heard representations on behalf of the Brotherhood of Railroad Trainmen, the Dining-Car Mutual Benefit Association of Canadian Pacific Railway Company and the Canadian Pacific Railway Company. The Brotherhood of Railroad Trainmen, on whose application the Board was constituted, sought to be recognized as the sole collective bargaining agency on behalf of the Dining-Car employees of the Canadian Pacific Railway Company. The right to this recognition was disputed by the Dining-Car Mutual Benefit Association, an organization which has been in existence for some time and which claimed to have been the organization which has in fact negotiated collective bargaining agreements with the company on behalf of the employees concerned, and to be still entitled to such recognition.

After hearing the representations from all parties the Board decided that under the circumstances it was desirable to ascertain the wishes of the employees concerned by secret ballot, and directed a request to the Director of Industrial Relations and Registrar that such a vote be taken. Such vote was taken and in due course the Director of Industrial Relations and Registrar, by letter to the Chairman, reported as follows:—

“Mr. Bernard Rose, K.C., Montreal, P.Q., who supervised the taking of a representation vote of the Dining-Car employees of the Canadian Pacific Railway as recommended by a Board of Conciliation and Investigation, under your chairmanship, reported the result of the vote which was concluded on August 2, 1943.

Report of Board in Dispute between Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., and Its Employees

On August 7 the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., and its employees, members of Local 2982, United Steelworkers of America, and its employees, members of Circo Employees' Association (L.G. July, 1943, p. 922).

The personnel of the Board was as follows: Honourable Mr. Oscar L. Boulanger, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. Guy M. Desaulniers and D. A. Paterson, both of Montreal, P.Q., appointed on the nomination of the employees and employer respectively.

The ballot read as follows:—

‘Are you in favour of bargaining with your employer through representatives of the Brotherhood of Railroad Trainmen, or are you in favour of bargaining with your employer through Committee or Employees as heretofore?’

The ballot resulted as follows:—

Number of eligible voters.....	1116
Number of votes cast.....	980
Number voting in favour of the Brotherhood of Railroad Train- men.....	918
Number voting in favour of the Mutual Benefit Association....	56
Spoiled ballots.....	6

(8 ballots sent out from Montreal Division not returned.)”

In view of the result of the vote as reported the Board unanimously recommends that the Brotherhood of Railroad Trainmen be recognized as the sole collective bargaining agency for the Dining-Car employees of the Canadian Pacific Railway.

The Board desires to express its appreciation of the co-operative spirit shown by all parties to the dispute in the negotiations and in the taking of the vote desired by the Board.

Dated at Toronto this Sixth day of August, 1943.

(Sgd.) J. G. GILLANDERS, *Chairman.*

(Sgd.) G. B. BAGWELL, *Member.*

(Sgd.) V. A. SINCLAIR, *Member.*

The report of the Board follows:

Report of Board

In the matter of the Industrial Disputes Investigation Act and of a dispute between Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., Employer, and Employees, Members of Local 2982 United Steelworkers of America, Employees.

To the Honourable the Minister of Labour of Canada.

The undersigned having been duly appointed by the Minister, under the provisions of the Act, members of a Board of Conciliation and Investigation, and having taken the oath prescribed by the Act, met at Sherbrooke, on Friday, the 30th of July, 1943, at 10 o'clock

a.m., investigated the above stated matter and now beg to report as follows:

THE DISPUTE

The grievances of the employees are stated in their application for the establishment of a Board (which was dated May 3, 1943, and sworn to on May 13, 1943), as follows:—

"Company postpones negotiating a wages and working conditions agreement with the United Steelworkers of America, Local 2982, yet tries to make such an agreement with the Association of Employees of the CIRCO.

1. We want the Government to hold a vote in the plant to determine which Union is to represent the Foundry employees.
2. That in the case of a vote favourable to the United Steelworkers of America, said Union be recognized the sole representative or agent of the Company's employees at the Sherbrooke foundry.
3. A collective agreement covering wages and other working conditions should be negotiated and concluded between Local 2982 of the United Steelworkers of America, for the employees, and the Company, with regard to the foundry employees."

In support of their demand the Employees allege the following facts:

"On April 16, a request for opening of negotiations was addressed by Mr. R. J. Lamoureux to Mr. G. M. Young (Copy of letter hereto attached). On April 20, reply was sent to Mr. Lamoureux (Copy attached). On April 22, following appointment by telephone, Messrs. Lamoureux and Boisvert met Mr. Young in his office. The latter admitted that he had been approached by the Employees' Association of the CIRCO and by the USA-CIO, and that he had no objection to signing an agreement with the organization really representative of a majority of the employees. On April 27, we again wrote to Mr. Young informing him of the methods adopted by the Employees' Association of the CIRCO to displace us. On May 7, we received a letter from Mr. Young about a new meeting. On May 13, Mr. Boisvert met Mr. Young. As no decision is possible on the question of an agreement, they agreed that a vote should decide which organization was to represent the employees. Since both the representative of the Company and that of the Union were agreed that only a vote should settle the matter, the meeting ended on such a proposal."

In their application the employees further appoint their representatives, make a recommendation of a person as member of the Board and declare that by a vote they have decided to strike to enforce their requests, unless the matter is referred to a Board for adjudication.

To the application of the employees the Company made the following answer:

"DEPARTMENT OF LABOUR

INDUSTRIAL DISPUTES INVESTIGATION ACT R.S.C. 1927, CHAPTER 112

Statement in reply to application for establishment of a Board of Conciliation and Investigation.

Montreal, May 27th, 1943.

To the Registrar, Boards of Conciliation and Investigation, Department of Labour, Ottawa.

The undersigned hereby makes reply to the application of United Steelworkers of America, Local 2982, for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, R.S.C. 1927, Chapter 112.

STATEMENT

1. The company denies that it has refused to negotiate with United Steelworkers of America, Local 2982.

2. The company is prepared to negotiate and bargain collectively with any agent shown as a result of a Government supervised vote to represent a substantial majority of the hourly rated employees on its payroll for the plant at Sherbrooke, P.Q.

3. The company will not deal with any agent purporting to represent only employees in any single department of its said plant.

This statement in reply is made in behalf of the Canadian Ingersoll-Rand Company Limited.
CANADIAN INGERSOLL-RAND COMPANY LTD.
by (Sgd.) S. M. YOUNG, Works Manager."

THE EVIDENCE

The Company, through its representative, Mr. H. G. Lafleur, submitted a brief to the Board (annexed hereto as D) in which it starts by declaring that it is its policy to negotiate and bargain collectively with any agent representing a substantial majority of its hourly rated employees. Then the Company states that a Shop Committee of its employees, which apparently had been in existence for some time, approached the Company, at the beginning of April last, for the purpose of negotiating a collective agreement on behalf of all the employees of the plant; the Company declined to deal with the Shop Committee for the moment on the ground that they were not a recognized union; the Shop Committee then had itself incorporated as an association under the Quebec Professional Syndicates Act (R.S.Q. 1941, ch. 162) on April 14 last and informed the company of the fact on April 16. In the meantime, the United Steelworkers of America had also been organizing the employees of the company in the Foundry Department and had made requests for the negotiation of a collective agreement. At the beginning of May, the United Steelworkers of America made their application for this Board and, for that reason, the company suspended all negotiations with either the Association or the Local of the United Steelworkers of America. The company

further claims that the foundry employees themselves, apparently discouraged or dissatisfied by the slowness of the proceedings instituted to settle the difficulty, on July 1, 1943), stopped work momentarily and presented to their manager a statement (annexed hereto as E) signed by 115 of them out of a possible 230, repudiating both the Association and the Local of the United Steelworkers of America. Therefore, the company takes the position that there is nothing left for the Board to investigate and to report upon, since the foundry employees who, as members of Local 2982 of United Steelworkers of America made the application for this Board, seem to have withdrawn from said Local.

Two of the signers of the above mentioned document were heard under oath by the Board, namely: Arthur Giguere, moulder, aged 47 and for 24 years employed in the Foundry Department of the Company's plant, and Jean Gosselin, moulder, 57 years of age and for 28 years in the employ of the Company. Both have never been members of Local 2982 United Steelworkers of America; both claim that the idea of signing a document repudiating all unions of any kind originated with the employees themselves without any outside suggestion, pressure or prompting of any kind and that no direct or indirect promises of any kind were made to induce them to sign it. Mr. Giguere passed the document around for signature but, curiously enough, he could not tell us who drafted it and who handed it to him to have it signed. According to him, only two of the employees then in the foundry refused to sign. Both he and Mr. Gosselin think that the foundry employees are still of the opinion they are supposed to have expressed in that document of July 1 last. Asked if he personally would be in favour of a vote in the plant to decide which union shall represent the employees, Mr. Gosselin states that he would not be much in favour of it (*pas beaucoup en faveur*).

Georges-Henri Boisvert, 27 years of age, representative in Sherbrooke of the United Steelworkers of America, states that when the application for this Board was made, Local 2982 of USA had 166 regular members in good standing from among the 220 or 230 foundry employees of the Company. They had paid an initiation fee of \$1 and signed a card accepting the USA as agent to negotiate a collective agreement with the Company. The collection of the regular monthly dues of \$1 per member is suspended until an agreement has been signed by the Company and the Union. Mr. Boisvert claims Local 2982 still has its 166 original members, with the possible exception of one who resigned. He has not received any other resignation and has not been informed that

members of Local 2982 have repudiated the Union. In March and April last he tried to organize all the employees of the Company's plant who number 1,000, in round figures, excluding the office employees, but he finally confined his efforts to the Foundry Department.

The President of the CIRCO Association (i.e. the Association incorporated under the Quebec Professional Syndicates Act to replace the former Shop Committee), Albert Banks, 36 years of age, inspector in the machine department, states that his Union has also made an application for a Board and also asked that a vote be taken in the plant to decide which Union is going to represent the employees in the negotiations with the Company for a collective agreement concerning wages and labour conditions. Such an agreement has been prepared and submitted by his Association to the Company which gave as a reason for suspending all dealings the previous Application of Local 2982 USA for this Board. Mr. Banks is decidedly in favour of a vote in the plant to settle the question of representation. He claims that his Association has the majority, but he wants a vote to make sure of it. He even claims his Association has the majority in the Foundry Department where it enlisted 145 members. He has heard about the Document of Repudiation signed by the foundry workers on July 1, but he has not received any resignations since then. He is strongly in favour of a vote under Government supervision as soon as possible.

Mr. Banks is corroborated by the Vice-President of the Association, Joseph-Telephore Fournier, 40 years old, core maker. His Association has asked for a vote and that is what they want. Mr. Fournier is a foundry worker. He did not sign the document of July 1, because he was absent, but had he been present he would have refused to sign it, as he is in favour of unionism.

CONCILIATION

The evidence clearly showed the Board that the employees of the Company, with the possible exception of those foundry workers who signed the declaration of independence on July 1, wanted a Union to represent them in negotiating with the Company for a collective agreement concerning wages, working conditions, etc., and that, further, they wanted a vote to decide the question as to which Union shall so represent them. The Board could not help, therefore, suggesting that the whole matter could easily be settled amicably and urged upon all interested parties to agree to a vote, pointing out at the same time that such a vote should be taken in the entire plant, as it would be

against common sense to place the Company in a position in which perhaps it would have to deal with a different union in each different department of its plant. Mr. R. J. Lamoureux, representing the United Steelworkers of America before the Board, accepted the suggestion and declared himself favourable to a vote in the whole plant to settle the question in the democratic way, promising on behalf of his constituents to abide by the wish of the majority. The Company which already had accepted the idea of a vote in its reply to the application for this Board, consented, as also did the representatives of the CIRCO Association.

RECOMMENDATION

The Board, therefore, respectfully recommend:—

1. That a vote by secret ballot be held among the employees (excluding office employees) of the Sherbrooke plant of the Company under the supervision of the Department of Labour of Canada and of representatives of the interested parties, in order to determine which Union, if any, shall

represent the employees to negotiate and bargain collectively with the Company.

2. That the ballot form to be used shall be devised in such a manner as to allow the voters to manifest their choice in three alternative ways: i.e. either for Local 2982 of the United Steelworkers of America, or for the CIRCO Association or for no union at all.

3. That the vote be taken within the shortest possible time, as the affair has dragged already too long, causing unrest and dissatisfaction in the plant and a consequent slowing down of the war supplies orders which are executed there.

4. That the conciliation agreement herein sanctioned and homologated by the Board be loyally adhered to and carried out by all concerned.

Respectfully submitted and signed at Quebec and Montreal the 2nd and 3rd August, 1943.

(Sgd.) O. L. BOULANGER.

(Sgd.) GUY MERRILL DESAULNIERS.

(Sgd.) D. A. PATERSON.

Report of Board in Dispute between the Morrow Screw and Nut Company, Limited, and Ingersoll Machine and Tool Company, Limited, Ingersoll, Ontario, and their employees

On August 13, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Morrow Screw and Nut Company Limited and the Ingersoll Machine and Tool Company, Limited and their employees, members of Local 2918, United Steelworkers of America (L.G., July, 1943, p. 923).

The personnel of the Board was as follows: His Honour Judge Ian M. Macdonell, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members; Messrs. J. J. Robinette, Toronto, Ont., and John J. Sullivan, Hamilton, Ont., appointed on the nomination of the employer and employees respectively.

The report of the Board follows:

Report of Board

To:

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ont.

Re: *Industrial Disputes Investigation Act, and re dispute between Morrow Screw and Nut Company, Ltd., and Ingersoll Machine and Tool Company, Ltd., Ingersoll, Ontario, and employees, members of Local 2918 United Steelworkers of America.*

Sir:

The Board of Conciliation and Investigation appointed by you has concluded its sittings, and now has the honour to submit its report.

The application for the Board of Conciliation and Investigation was made by a Local of the United Steelworkers of America, who asked a collective bargaining agreement as representative of the employees in both the Morrow Screw and Nut Company, Ltd., and the Ingersoll Machine and Tool Company, Ltd. It is admitted that both these companies are under the same management and are controlled by Mr. E. A. Wilson, who appeared before the Board. The Union was represented by Mr. E. Dalrymple.

At the commencement of the first sitting, the representative for the Union stated that the Ontario Labour Court had been instituted since the application for the Board of Conciliation, and suggested that as the only point in dispute was the question of union recognition, the Board suspend its sittings pending an application to the Labour Court. It was then pointed out by members of the Board that a representation vote could be conducted under the auspices of the Department of Labour, and they suggested that this would be the most expeditious manner of disposing of the dispute. Mr. Wilson at once stated he was in favour of

such a vote. This was subsequently agreed to by Mr. Dalrymple, and both parties agreed to abide by the result of the vote. A vote was expeditiously arranged by the Department of Labour with the following result:

	<i>Morrow Screw and Nut Co.</i>	<i>Ingersoll Machine and Tool</i>
No. of eligible voters.....	570	443
No. of votes cast.....	514	421
No. voting for (Question 1)	270	185
No. voting for (Question 2)	239	227
No. of spoiled ballots....	5	9

Question 1 was as follows:

"I wish to be represented in collective bargaining negotiations with the management by the Shop Committee."

Question 2 was:

"I wish to be represented in collective bargaining negotiations with the management by the United Steelworkers of America."

From the above it will be seen that there was a majority of votes in the Morrow Screw and Nut Company, Ltd., of 31 for the Shop Committee, and in the Ingersoll Machine and Tool Company, Ltd., which is slightly the

smaller concern, there was a majority of 42 votes for the United Steelworkers of America.

It is much to be regretted that the result was not more conclusive. The Board feels, however, that effect should be given to it as far as possible. While it is true that there is a small over all majority in favour of the United Steelworkers of America of eleven votes, we do not consider that we can overlook the majority of thirty-one for the Shop Committee in the plant of the Morrow Screw and Nut Company, Ltd.

The Board therefore recommends that management recognize the United Steelworkers of America as the bargaining agent of its employees in the Ingersoll Machine and Tool Company plant, and proceed with the negotiation of a collective bargaining agreement with that Union.

All of which is respectfully submitted.

Dated this 10th day of August, 1943.

(Sgd.) I. M. MACDONELL, *Chairman.*

(Sgd.) JOHN J. SULLIVAN,

Employees' Nominee.

(Sgd.) J. J. ROBINETTE,

Company's Nominee.

Report of Board in Dispute between the Canada Paper Company, Limited, Windsor Mills, P.Q., and its Employees

On August 14, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Canada Paper Company, Limited, Windsor Mills, P.Q., and its employees, members of the International Brotherhood of Paper Makers and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (L.G. May 1943, p. 596).

The personnel of the Board was as follows: Honourable Mr. Justice Lucien Cannon, Superior Court of Quebec, Quebec, P.Q., chairman, appointed on the joint recommendation of the other two members of the Board; Messrs. E. M. Moisan and J. E. Beaudoin, both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

The report of the Board follows:

Report of Board

MONTREAL, August 13, 1943.

HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR,
OTTAWA, ONT.

Re: Dispute between Canada Paper Company, Limited, Windsor Mills, and its Employees, Members of the International Brotherhood of Paper Makers and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Dear Sir:

In accordance with the suggestion contained in our interim report of May 26th, the Company and the representatives of the International Brotherhood of Paper Makers, the International Brotherhood of Pulp, Sulphite and Paper Mill Workers and Les Syndicats Catholiques met and negotiated but they could not reach a definite agreement.

Negotiations were resumed in the presence of and with the co-operation of the Board during the course of several lengthy sittings held in Montreal from August 3rd to August 6th. As a result of the facts disclosed during these negotiations, the Board has been able to reach a unanimous decision.

FACTS

An elaborate recital of the past labour troubles at Windsor Mills would not in the opinion of the Board serve any good purpose, a clear and concise summary of the material facts will suffice.

1. The Company is willing to recognize the existing labour unions in its plant and is eager to negotiate with its employees.

2. There is no real dispute between the Company and its employees, this is rather a jurisdictional dispute between the American Federation of Labour and Les Syndicats Catholiques over exclusive bargaining rights.

3. The unsatisfactory situation which has existed at Windsor Mills for some time arises out of the competitive activities of these two labour groups with a view to increase their membership and to expand their authority.

4. No adequate solution of the problem can ignore the existence of either group as both groups have a substantial membership among the employees.

5. The exact proportion of employees belonging to either group has not been ascertained by this Board, yet it seems that the majority of the skilled workers belong to the American Federation of Labor, while the majority of the unskilled labour are affiliated with Les Syndicats Catholiques.

6. This Board feels very strongly that a ballot to determine the issue would be both harmful and useless and would create noxious agitation and endless friction, moreover, the result would not bring about the end of the present difficulties.

7. The best interests of management and labour demand the immediate setting up of a collective bargaining agency.

8. Neither the American Federation of Labor nor Les Syndicats Catholiques ought to be given the exclusive bargaining rights, such an arrangement would not be acceptable to either party and would not be feasible on account of the exceptional conditions which prevail at Windsor Mills and also generally in the pulp and paper industry in the Province of Quebec.

9. Realizing this very important fact, the Company, the representatives of the American Federation of Labor and of Les Syndicats Catholiques have expressed their willingness to accept as an experiment a plant committee, although some divergent views were expressed in relation to the relative representation in the personnel of this committee. This constructive and progressive attitude on the part of the labour unions is very significant and shows a full realization of their responsibilities. The Board considers this scheme as satisfactory and as promising fruitful results to industry and labour and hopes that the Government agencies both Provincial and Federal, will co-operate with the interested parties in putting into effect this badly needed arrangement, in order to stabilize labour conditions at Windsor Mills and increase the efficiency of production, particularly during the war period.

RECOMMENDATION

In view of these material facts, the Board unanimously recommends the immediate constitution of a committee of employees chosen by the labour unions, which will fully and fairly represent all the interested parties and which will act as the collective bargaining agency with the Company on behalf of its employees.

The whole respectfully submitted,

(Sgd.) LUCIEN CANNON, *Chairman.*

(Sgd.) ELPHEGE BEAUDOIN, *Member.*

(Sgd.) C. N. MOISAN, *Member.*

Report of the Board in Dispute Between the Massey-Harris Company, Limited, Weston, Ont., and Its Employees

During the month the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Massey-Harris Company, Limited, Weston, Ont., and its employees, members of the United Automobile Workers of America (L.G., June, 1943, p. 763).

The personnel of the Board was as follows: His Honour Judge Ian M. Macdonell, Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Senator J. J. Bench, St. Catharines, Ont., appointed on the nomination of the employer and Mr. Drummond Wren, Toronto, Ont., appointed on the nomination of the employees.

The report of the Board was signed by the chairman and Senator Bench. Mr. Wren submitted a minority report.

The texts of the report of the Board and the minority report follow:

Report of Board

TO THE HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR,
Ottawa, Ont.

In the matter of a dispute between the Massey-Harris Company, Limited (Weston Plant), Employer, and its employees, members of the United Automobile, Aircraft, and Agricultural Implement Workers of America, Employees.

The Board of Conciliation and Investigation established by you in the matter of the above-mentioned dispute begs leave to submit its report.

The Weston Plant of the Massey-Harris Company, Limited, after being closed for some

years, was reopened shortly after the commencement of the present war, and is wholly engaged in the manufacture of munitions and supplies of war. The plant presently employs approximately 2700 persons.

In Canada, the Massey-Harris Company operates five manufacturing establishments. During the period of some twenty-four years past there has been in operation in these plants a system of Industrial or Works Councils through which medium the company and its employees have dealt with matters affecting their relationship with each other. The Board was informed that during this twenty-four year period this plan of employee representation has been a complete success; that, at least until very recently when there was some minor disturbance in one plant, there has never been a strike nor even the necessity of a reference to arbitration, as provided by the Constitutions of the Councils, any unsettled dispute between the management and the employees.

In or about the month of May, 1942, the Industrial Council was re-established in the Weston Plant and a Constitution for the same was adopted which we understand to be generally similar in terms to the Constitution of the Councils in other factories of the employer. Provision is made for equal representation of employees and employer, those persons representing the employees being elected by secret ballot. Machinery is provided for the discussion and settlement of disputes and for the independent arbitration of differences not disposed of between the agents of management and employees.

It is desirable to draw particular attention to the provision in its Constitution for termination of the Industrial Council plan which reads as follows:

This plan may be terminated at any works after six months' notice, by a majority of the employees of that works or by the Board of Directors of the Company.

Regarding the election to the Council of employee representatives, the Constitution provides that, after the first election of the employee representatives on the Council, one-half of their number should retire at the expiration of six months, at which time their successors should then be elected, the remaining one-half to continue in office for a further six months, when their successors should be similarly elected, the general purpose of the plan in this respect being that, after the first six months, one-half of the employee membership on the Council should retire semi-annually and their successors be elected. The elections are conducted by the employees independently of the Company.

Late in 1942, the Company having entered into formal collective bargaining agreements with its employees at certain of its other plants, through the medium of their representation on the Industrial Councils, the decision was made to enter into such an agreement at the Weston Plant covering matters relating to wages, hours of work, working conditions and other related subjects. Accordingly, the employer and employee representatives on the Council at the Weston Plant negotiated the terms of such an agreement. These negotiations continued over a period of some four or five days and, satisfactory terms having been agreed upon, the arrangement was reduced to writing and signed on the 9th day of January, 1943. The Company contends that the employee representatives on the Council who executed the document on behalf of their constituents reported that its terms had been discussed with their electors and found to be agreeable except on two points which were adjusted to the satisfaction of the people in the Plant. The Union says that at the time the agreement was entered into it was in the process of organizing the plant and that the employees were given no opportunity to consider the terms of the proposed agreement and that, in fact, it was not expressly approved by them at any meeting called for that purpose. In reply to the Union's challenge of the agreement, the Company's position is that under the Constitution of the Industrial Council the employees' representatives are authorized to negotiate wages, hours of work, working conditions, etc., on behalf of the employees; that the agreement is fair and liberal to the employees in its terms, and that it has been acted upon by the employees who have expressed no dissatisfaction with it.

Possibly the firmest ground supporting the Company's contention with reference to the agreement is to be found in the result of the semi-annual election which took place on January 14, 1943. It appears that the Union was in the process of attempting to organize the employees of the plant both at the time of the execution of the agreement and of the January election and that the union was familiar with the terms of the agreement and the circumstances surrounding its completion. The application for the establishment of this Board of Conciliation and Investigation contains the representation on the part of the Union that it was, at that date at least, "the trade union representing the employees in question." The application further sets forth that the request for the establishment of the Board was authorized "at meeting of the employees held on January 13, 1943." The election of four members of the Industrial

Council took place the next day, (i.e. January 14, 1943), and we regard it as a matter of some major significance that out of 1205 employees who were eligible to vote on that occasion 1104 cast their ballots for one or other of the persons nominated as employee representatives on the Council. It seems to us that this exceptionally large vote not only is an indication of the employees' satisfaction with the Council form of representation at that time, but also lends substantial support to the Company's submission to us that the employees were not dissatisfied with the agreement which had been signed on their behalf by the employee representatives. In this last-mentioned connection we do not think that the circumstances can be overlooked that the Union was at that time active in the Plant and that it was aware of the existence of the agreement. If a majority of the employees were then members of the Union which was unsympathetic to the Industrial Council form of representation, and if the employees were then also dissatisfied with the agreement, one would not expect to find such a large vote in the election of January 14 favouring the selection of several representatives to sit on the Council and administer the agreement on behalf of the employees.

In resisting the Union's request for recognition as the bargaining agency, the Company stands on the circumstance that there is already in existence in the Plant effective machinery for this purpose as represented by the Industrial Council; that a fair collective bargaining agreement between it and its employees has been negotiated between the Company and is in existence, according to its terms, "until the cessation of hostilities between Canada and Germany, Italy and Japan" and thereafter until thirty days' notice shall be given by either party to the agreement. It says that this agreement having been entered into with it by the employees through their freely-chosen representatives, it will insist upon the agreement being observed according to its terms. On the other hand, the Union asserts that the Plant Council is not a proper collective bargaining agency capable of independently representing the employees; that the employee representatives thereon are subject to the domination of the Company, and finally, that the agreement of January 9 was neither authorized by the employees nor subsequently properly ratified by them.

Regarding the Union's contention that the employees' representatives on the Industrial Council were and are dominated by the Company, it is of some value to refer to certain happenings which occurred in the course of the

Board's sittings. All of these were held at the City of Toronto, the first meeting taking place on the morning of June 3, 1943, with representatives of the employer and of the Union present. During the discussions which took place at that time, enquiry was made of the Union representatives by the Board as to how many, if any, members of the Union were presently acting as employee representatives on the Industrial Council. Mr. John Eldon, one of the persons representing the Union, advised us that it was not known whether any such employee representatives were members of the United Automobile, Aircraft and Agricultural Implement Workers of America. At 12 o'clock noon of that day the Board adjourned. On resuming at its next sitting on June 21, the Board was informed that, very shortly after the adjournment of June 3, that is about 2 p.m. of that day, six of the employee representatives on the Industrial Council had tendered their resignations. There was further produced to us a copy of the Union newspaper, published on June 11, 1943, which reported that these persons had resigned at the request of the Union membership and in which it was also made clear that all six were members of the applicant organization. In our view, this circumstance does not support the contention that the employees' section of the Council could be said to be dominated by the Company. Apart from this feature, however, it is to be noted that these six persons, all Union members, had held office in the Employees' Council since at least January of 1943; that they controlled the unit vote of the employees' representatives on the Council, and that they had been administering the agreement of January 9, 1943, for several months, all of which rather serves to weaken the Union's attacks upon the constitution of the Council and upon the agreement itself.

During the interval which obtained between the sitting of the Board which took place on June 3 and that which took place on June 21, it became necessary, under the Constitution of the Industrial Council, to hold the semi-annual election of one-half of the employee representatives who would have retired at that time. By reason of the aforementioned resignations it actually was necessary to elect seven new representatives instead of the four normally required. Nominations were held on Monday, June 14, 1943, and the election took place on June 17, 1943, as the result of which the seven vacancies on the Council were filled. The Board had before it the certified report of the returning officer who acted in respect of both the nominations and the election and which disclosed the distribution

of the balloting. The Union contended that the proper interpretation of the figures both of the nominations and election indicated that the employees had repudiated the Industrial Council for collective bargaining purposes. Because of the election system provided by the Constitution, it is difficult for the Board to apply the results of the voting as supporting a view either that the employees had accepted or rejected the Industrial Council plan. Nevertheless it perhaps should be stated in this connection that of a total of 1234 ballots cast there were 673, a majority, marked for the choice of candidates. However, the Board considers that no particular significance either one way or the other should be attached to this vote and, in the view which we take of the matter in the result, it does not become necessary to do so.

Having regard to the position taken by the Company that it stands upon the agreement of January 9, 1943, it might have been required of this Board to make some report and recommendation regarding the binding effect of that document on the employees. Had such a course been necessary, and if we had reached the conclusion that the agreement was entered into in good faith by the Company with representatives of the employees duly elected for such purpose, we would have felt obliged to submit a recommendation that the existing arrangement should continue in effect according to its terms which would have had the probable result of denying all possibility of recognition to the Union at least for the duration of the war. However, as a result of certain conciliatory efforts made by the Board hereinafter described, we do not regard it as necessary or in the best interests of the employees who are members of the Union to pass upon the question of the binding character of the agreement.

At the sitting of the Board held on June 28, 1943, it was suggested to the Company that it might agree to some opportunity being afforded to the employees to express their views as to whether or not they desire to continue to be represented through the medium of the Industrial Council and before the termination of the present hostilities. In reply to this suggestion the Company pointed out that the Constitution of the Council affords to the employees an opportunity of expressing their desire in this regard at any time after the expiration of six months' notice. However, the representatives of the Company also took the position that, even if the Industrial Council plan were repudiated by the employees on any such ballot, it nevertheless would regard the agreement as continuing in

full force and effect and binding upon the employees according to its terms. Subsequently, however, the Company indicated that, subject to the approval of the employee representatives on the Industrial Council, it would consider taking a plebiscite of the employees in December of 1943 to determine whether or not they then should desire to continue the Industrial Council form of representation, and that in the event that the opinion then expressed should be in the negative, it would be prepared to regard the agreement of January 9, 1943, as terminating on January 9, 1944; that should the vote of the employees be in the affirmative, the Company would then continue to deal collectively with them through their representatives on the Industrial Council, but that it would then also be prepared to amend the agreement to provide that it should be in force only from year to year.

The Union declined to accept this proposal and requested that the Board should recommend the taking forthwith of a vote to determine whether the employees now desired to be represented through the medium of the Industrial Council or by the United Automobile, Aircraft and Agricultural Implement Workers of America.

Under date of July 6, 1943, by letter addressed to Chairman of the Board, the Company advised of its willingness to accept the conciliatory proposal which had been made at the sitting of June 28. Enclosed with the letter of the Company was a photostatic copy of a communication addressed to the Works Manager of the Company by the employee representatives on the Council expressing their concurrence in the Company's acceptance of the Board's suggestion. Both the letter of the Company and the written concurrence of the Plant Council are made conditional upon the Board recommending that such a course should be followed, the Company advising that in the alternative it would revert to its stand that the agreement of January 9, 1943, remains binding upon the employees. The letter of the employee representatives on the Industrial Council addressed to the Works Manager is also designed to serve as a notice conditionally requesting the taking of the plebiscite.

Under all of the circumstances, the Board considers that the best method of disposing of this dispute, in the interests of all parties, is to recommend the plebiscite in December. Machinery already exists under the Constitution for the taking of this vote and it appears to us best in the interests of the orderly administration of employer-employee relations in this Plant that this course be followed rather

than the holding of a representation vote which, even if resulting in favour of the Union, leaves unsolved the problem arising out of the existing agreement. We think it is proper to say that we consider the Company's conciliatory attitude to be commendable and we trust that those employees who are members of the Union will consider it to be to their advantage to accept this suggested means of disposition of the matters presently in dispute.

We therefore recommend:

- (a) That on the second Monday of December, 1943, a vote should be taken of the affected employees in the Weston Plant of the Massey-Harris Company Limited for the purpose of determining whether these employees desire to continue in operation the Industrial Council. The vote should be taken under the auspices of the Dominion Department of Labour and the affected employees entitled to vote should be determined according to the payroll last immediately preceding the date of the vote;
- (b) That if the vote results in an expression by the employees that they do not wish to continue the Industrial Council, the agreement of January 9th, 1943, should then be regarded as terminated as of January 9th, 1944, in accordance with the undertaking of the Company;
- (c) That if the vote results in an expression by the employees of their desire to continue the Industrial Council, the agreement of January 9th, 1943, should be considered as remaining in effect subject to the term of its duration being amended, if then required by the employees' representatives on the Industrial Council, to provide that it should operate thereafter from year to year only, the first annual period to terminate on January 9th, 1945;
- (d) That pending the holding of the plebiscite as above recommended, this Board should not be dissolved, and that should the vote result in the employees rejecting the Industrial Council plan of representation, the Board should then be reconvened.

We only desire further to report that sittings of the Board were held on June 3rd, 21st and 28th and on July 29th, 1943.

We wish also to express our thanks to the representatives of both the employees and the Company for their helpful assistance in the course of the hearings.

All of which is respectfully submitted.

Dated at the City of Toronto this 29th day of July, 1943.

(Sgd.) I. M. MACDONNELL, *Chairman.*

(Sgd.) J. J. BENCH,

Representative of the Employer.

Minority Report

The Honourable HUMPHREY MITCHELL,
Minister of Labour, Ottawa.

In the Matter of the Industrial Disputes Investigation Act and dispute between Massey-Harris Company, Limited, Aircraft Division, Weston, Ontario, and employees who are members of the United Automobile, Aircraft and Agricultural Implement Workers of America, Local 382.

SIR,—The Board of Conciliation and Investigation appointed by you in the matter has held sittings in Toronto when both parties were ably represented, made their submissions, and fully discussed the matter of the dispute.

The question at issue is whether or not the applicant Union should now, under the existing circumstances, be recognized as the collective bargaining agent, through which the Company should now negotiate an agreement with its employees in its Weston Plant.

The Union maintains that a majority of the employees have designated it as their bargaining agent, and it has undoubtedly substantiated that claim. When the Industrial Disputes Inquiry Commissioner dealt with this matter, union membership cards were checked against the pay-roll and he was evidently satisfied that the Union represented a majority of the employees. The results of the balloting for nominations and elections pertaining to the Industrial Council are further proof, if any is needed, of the dissatisfaction of the employees with the Industrial Council as their representative, and of their desire for representation through the Union.

In the Industrial Council elections held January 14, 1943, 91 per cent of the employees participated, electing a majority of union members. In the June, 1943, elections only a minority of the employees participated, the Union having intimated to its members that it would be advisable for them to either refrain from voting, to mark their ballots C.I.O., or to deposit blank ballots.

In the seven departments in which nominations were held, 55 per cent of the employees participating nominated persons, many of whom were union members, 35 per cent marked their ballots C.I.O. or left them blank, and an additional 10 per cent were spoiled.

In four of the seven groups or departments certain persons were declared elected by acclamation and the manner of their selection is open to question. Approximately 50 per cent of the employees in these groups deposited nominations, 27 per cent nominated various candidates (301 nominations), 25 per cent

marked their ballots C.I.O. or left them blank (271 ballots) and 61 per cent were spoiled (69 ballots).

In these four groups, no less than 156 individuals were nominated. The four persons declared elected by acclamation secured together a total vote of only 62. I would assume that an acclamation cannot be valid unless every individual nominated had an opportunity to accept or decline. Apparently no such opportunity was given and certain individuals, including the present president of the Industrial Council, were declared elected by acclamation.

Further, this election was conducted after the board had begun its sittings and no notice of its intention to conduct such elections was given to the board by the company.

One can only conclude from the above facts that the Industrial Council is being imposed on the employees by the employer contrary to the letter and spirit of Order in Council P.C. 2685. I would recommend that an immediate vote be taken in the plant to determine whether or not the employees wish to be represented by the U.A.W.C.I.O. beyond all doubt.

THE INDUSTRIAL COUNCIL AGREEMENT

Replying to the Union's demands for recognition as the bargaining agent and the conclusion of a collective agreement, the company states that it has already entered into contractual relations with its employees through the Industrial Council.

A contract between the council and the company was entered into on January 9. There seems to be no doubt that the employees had no knowledge whatever of such a contract being either contemplated or concluded. It seems to have been secretly entered into five days before the elections in January. It is most significant that no matters pertaining to a contract were discussed at any meeting of the Industrial Council, and no such item appears anywhere in the minutes of the council meetings.

In addition to the usual and proper stand taken by labour against such contracts which I need not reiterate here, an exactly parallel case was dealt with recently in the Ontario Labour Court when Mr. Justice Gillanders took the view that the question to be decided was whether or not the employees' association had the proper authority to negotiate. He ordered a vote to be taken in the plant concerned to determine the choice of the employees of a bargaining agent because the employees had not had an opportunity "to approve of a draft agreement before its execution, or ratify it after execution."

The contract in the Massey-Harris case was signed on behalf of the employees by six

employer-representative members of the Industrial Council and five employee-representatives and by the proper agents on behalf of the employer.

If my understanding of the situation is correct, the provisions of the Ontario Collective Bargaining Act must also be taken into consideration in determining the policy to be pursued by boards of conciliation. Section "E" of the Ontario Act states that "Employees shall mean any person in the employment of an employer as defined in this Act except (i) an officer or official of an employer, and (ii) the person acting on behalf of an employer in a supervisory or confidential capacity or having authority to employ, discharge or discipline employees."

Undoubtedly those officers or supervisors who signed the agreement on behalf of the Industrial Council are not employees within the definition of the Act and are therefore not capable of concluding a collective agreement on behalf of the employees. The Ontario Act further provides that a collective bargaining agency "shall not include any such union or association the administration, management or policy of which is dominated, coerced or improperly influenced by the employer in any manner whether by financial aid or otherwise."

The company admitted that the Industrial Council had been initiated by it and that such financial aid as required from time to time was provided by the company. A reading of the minutes of the Industrial Council makes it sufficiently clear that its management and administration is dominated by the employer through his agents.

Applying in addition the provisions of Order in Council P.C. 2685 which provides for the bargaining agent to be the free choice of the employees, I am compelled to conclude that the Industrial Council for the various reasons set forth above, cannot be deemed to be a proper bargaining agency representing the free choice of the employees. I maintain that any agreement entered into with this council is not a valid collective bargaining agreement, and is not a bar to immediate recognition of the union.

THE MAJORITY RECOMMENDATION

My colleagues on the board have, I gather, submitted a recommendation to which the employer has agreed. In their opinion, having obtained this agreement from the employer, the dispute can be amicably settled. The recommendation agreed upon was briefly to the effect that on the second Monday in December, 1943, a vote would be taken in the plant under the supervision of the Department of Labour to determine whether the employees

wished to continue bargaining through the Industrial Council or whether they preferred the union as their bargaining agent. The employer agreed that should the union be chosen by the employees, the present contract would be terminated and the Plant Council and its constitution dissolved.

At first glance this would appear to be an excellent solution of the problem and I must confess that, as it carries with it the approval of the employer, it is indeed a measure of conciliation. As was pointed out at the meetings of the board, any recommendation that the board might make that was not acceptable to the employer, and one might add to the union, would be futile. This of course results from there being no provision in Order in Council P.C. 2685, or any subsequent orders dealing with collective bargaining in privately owned industries, for compulsory collective bargaining.

My main difference therefore, in a practical sense, with the majority recommendation (I am not overlooking my earlier objections to the Plant Council being considered a proper bargaining agency) is that it defers appropriate action for a period of approximately five months. During this intervening period, dis-

criminatory actions on the part of misguided Plant Council members can only lead to further discontent in the Weston plant. Some evidence of such acts was brought to the attention of the board at its last sitting. Since then I have been informed of further such acts which one can only suspect will aggravate the situation.

Some safeguards of the union's interest, its officers and members, are essential under these circumstances. Under similar conditions at the DeHavilland aircraft plant last winter, the union and the company worked out an arrangement by which the union was enabled to protect its members during the intervening period. I feel quite sure that were the company to carry out in good faith the proposals that it has agreed to and were the union given the necessary safeguards in the interim, there could be mutual agreement by the two parties to this dispute on the recommendation of the majority of the board, which would lead to harmonious relations between the employer and the employees.

Respectfully submitted,

DRUMMOND WREN,

Employees' Representative.

August 13, 1943.

Report of Board in Dispute between the Canadian National Railways (Work Equipment Department), Winnipeg, Man., and Employees

On August 24, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian National Railways (Work Equipment Department), Winnipeg, Man., and employees, members of Divisions 142 and 226, Canadian Brotherhood of Railway Employees and Other Transport Workers (L.G., July 1943, p. 921).

The personnel of the Board was as follows: His Honour Mr. Justice Alfred Savard, Montreal, P.Q., chairman, appointed on the joint recommendation of Messrs. Frederick T. Collins, Montreal, P.Q., and John E. L. Graham, Winnipeg, Man., the employer's and employees' nominees on the Board.

The report of the Board follows:

Report of Board

In the matter of the Industrial Disputes Investigation Act and of the dispute between The Canadian National Railways and Steam Shovel Engineers, Dragline Ditcherman, Oilers and Firemen, Lidgerwood and Jordan Spreader Operators, etc., employees of the Canadian National Railways Western Region, Members of Divisions 142 and 226, Canadian Brother-

hood of Railway Employees and Other Transport Workers.

To the Honourable the Minister of Labour,
Ottawa, Ontario.

Sir:—

The Board of Conciliation and Investigation which was appointed by you to enquire into the above mentioned dispute has the honour to report and recommend as follows:—

The first session of the board was held at the Court House at Montreal, Quebec, on Monday, August 9th, 1943, and subsequent sessions were held on August 10th, August 17th, August 18th, August 20th and August 21st.

The employees were represented by Mr. T. McGregor, General Chairman of the Western Region, General Adjustment Committee of the Canadian Brotherhood of Railway Employees and Other Transport Workers, and the Canadian National Railways was represented by F. W. Edge, Director of Labour Relations.

The board also summoned to appear before them Mr. W. Aspinall, General Chairman of the Brotherhood of Maintenance of Way Employees, and he appeared on August 17th.

The employees concerned in the dispute are all employees of the Canadian National

Railways Western Region, engaged in the operation of various excavating machines and the number affected according to the application for a board is 61.

In 1925 a Committee of the employees in question negotiated an agreement covering rules, working conditions and rates of pay with the Canadian National Railways which was signed on behalf of the railway company by Mr. A. E. Warren, General Manager, and by Mr. J. E. Sims for the employees.

In December 1939 a number of the said employees covered by the agreement of 1925 became members of the Canadian Brotherhood of Railway Employees and Other Transport Workers and signed an authorization in writing to the following effect:—

"To the management of the Canadian National Railways, and to all others whom it may concern:

"Of my own free will and accord, I do hereby declare that the Local, General and System Committees of the Canadian Brotherhood of Railway Employees are authorized to represent me in all matters pertaining to the negotiation of schedules or working agreements covering my wages and working conditions, or in the revision of any such schedules, and in the handling of any grievances which may arise thereunder."

and 49 out of the 61 employees involved in the branch of the service in question signed an authorization to the foregoing effect.

Mr. T. McGregor, above mentioned, then communicated with Mr. W. R. Devenish, General Manager of the Canadian National Railways at Winnipeg, by letter on March 6th, 1940, to request an appointment for the purpose of conducting negotiations. Arrangements were finally completed for such negotiations in January 1941, and signed authorizations, signed by 49 employees of the group of 61 involved, were presented to the Canadian National Railways. As a result of the negotiations, an agreement was arrived at, which was referred to the Canadian National Railways' Department of Personnel at Montreal for ratification.

In the meantime, before the agreement was ratified at Montreal by the Superintendent of Personnel, representations were made by Mr. W. Aspinall, General Chairman of the Brotherhood of Maintenance of Way Employees, to Mr. W. R. Devenish, protesting against any agreement being made affecting the employees concerned with any organization other than the Brotherhood of Maintenance of Way Employees, and subsequently on the 29th October, 1941, by letter addressed to Mr. N. B. Walton, Vice-President, Canadian National Railways, the Joint Protective Board of the Brotherhood of Maintenance of Way

Employees, Canadian National Railways, Western Lines, made further protest and authorized their system federation officers to negotiate with the railway company with a view to having all the employees concerned brought within the provision of Wage Agreement No. 9. As a result, Mr. McGregor was advised by letter written on the 25th November, 1941, to him by the general manager of the railway company that it had been decided that, in view of the protest received, the agreement would not be proceeded with.

As a result, a meeting of the employees concerned was held on the 2nd of March, 1943, and authority was granted to Mr. T. McGregor and to Mr. J. S. McNabb, General Secretary of the Western Region, General Adjustment Committee of the Canadian Brotherhood of Railway Employees and Other Transport Workers to apply for a Board of Conciliation and Investigation, as a result of which a board was duly appointed.

At the hearings before the Board the railway company declared that if and when it was definitely established what group had the right to represent the said employees, the railway company was ready and willing to negotiate an agreement covering rates of pay and rules governing working conditions with the authorized representative of the proper group. It was declared at the meeting that the employees concerned had been since 1940 or 1941 receiving the rates of pay and were subject to the working conditions set out in the unsigned agreement which had been negotiated in 1941 above mentioned. The company declared that it did not wish to become involved in a jurisdictional dispute between two labour organizations.

The sole task of the board therefore was to establish which of the two organizations, that is the Canadian Brotherhood of Railway Employees and Other Transport Workers, or the Brotherhood of Maintenance of Way Employees, was the authorized representative of the employees in question.

The contention of the Canadian Brotherhood of Railway Employees and Other Transport Workers was set out in their brief as follows:—

"Inasmuch as a very substantial majority of the employees in the Work Equipment Department are members of the Canadian Brotherhood of Railway Employees and Other Transport Workers and have expressed their desire to be represented by the Brotherhood's Committees in all matters affecting their wages and working conditions, and as it is apparent that the Railway Management will not complete this already agreed to schedule until such time as the right of representation has been disposed of by your Board,

"We therefore contend that, in view of these circumstances the Canadian National Railways should be instructed to complete the negotiations with the Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of the employees of the Work Equipment Dept."

Mr. McGregor also filed with the board 49 signed authorization forms in support of his contentions, all of which were exactly similar to the one quoted above in this report.

Mr. Aspinall on behalf of the Brotherhood of Maintenance of Way Employees contended that the employees in question came within the provisions of a Wage Agreement known as "Wage Agreement No. 9" concerning rates of pay and rules governing the services of Maintenance of Way Employees, and contended that under the provisions of section 1, section 15 and section 19 of this agreement, the employees in question were covered.

These sections read as follows:—

SECTION 1

Definition of Maintenance of Way Employees "By Maintenance of Way Employees is meant employees working in the Track and Bridge and Building departments, for whom rates of pay are provided in this schedule, who have been in the service for three months within the preceding twenty-four months, or who can show evidence of six months' experience in similar work on any railway mentioned in the preamble of this agreement. Labourers in extra gangs, unless those engaged practically all the year round, shall not be considered as coming under this schedule."

SECTION 15

Performance of maintenance of temporary way work by employees outside of department "Except in cases of emergency or temporary urgency, employees outside of the maintenance of way service shall not be assigned to do work which properly belongs to the Maintenance of Way Department, nor will maintenance of way employees be required to do any work except such as pertains to the division or department of maintenance of way service."

SECTION 19

Compensation for additional positions or classifications. "When additional positions or classifications are created compensation shall be fixed in conformity with agreed rates for similar positions, or by agreement between General Chairman and officers of the railway."

Mr. Aspinall admitted that the classifications of employees set out in the unsigned draft agreement agreed to between the Railway Company and the Canadian Brotherhood of Railway Employees and Other Transport Workers were not specifically included in

Wage Agreement No. 9. A comparison between the occupations set out in Wage Agreement No. 9 and in the application for a board shows that none of the occupations set out in the application for a board or in the draft unsigned agreement above referred to is referred to in Wage Agreement No. 9, except lidgerwood engineers. In Wage Agreement No. 9 a rate of pay is provided for lidgerwood engineers "when Maintenance of Way Dept. employees required to perform service", which would indicate that there was a distinction between the lidgerwood operator referred to in the draft unsigned agreement and lidgerwood engineers referred to in Wage Agreement No. 9.

It is clear from a reading of Section 1 of Wage Agreement No. 9 that the Maintenance of Way Employees covered by that agreement are only those employees working in the Track and Bridge and Building Departments, *for whom rates of pay are provided in this schedule*, and none of the employees referred to in this dispute is so covered. Mr. Aspinall stated that when the agreement which was made on the 15th June, 1925, between the Railway Company and the International Association of Steam Shovel and Dredgemen ceased to become operative, an attempt was made by the Central Committee of his Brotherhood in the year 1937 to include under Wage Agreement No. 9 all steam shovel and ditcher engineers and firemen and operators of all other equipment in the Maintenance of Way Service, but the Wage Subcommittee of the Railway Association at that time would not agree to naming all of these classifications specifically in the agreement, and as a result Section 15 and Section 19 of Wage Agreement No. 9 were agreed upon.

An examination of Section 15 has led the Board to the conclusion that it has no application to the matters at issue, because the work done by the employees in question does not properly belong to the Maintenance of Way Department of the Western Region of the Canadian National Railways. An examination of Section 19 has also led the board to the conclusion that that section has no application. It refers to additional positions and classifications to be created subsequently to the date of its enactment, which was April 1st, 1938, and all the positions mentioned in the draft unsigned agreement above referred to were in existence prior to that date. In brief, the Brotherhood of Maintenance of Way Employees endeavoured to have the employees in question included under Wage Agreement No. 9 from as early as August 8th, 1938, but they were not successful in their efforts to do so.

The negotiations which took place between the Brotherhood of Maintenance of Way Employees and the Railway Company after August 8th, 1938, resulted in a special agreement being made covering certain classifications such as mowing and discing machine operators, adzing machine operators, etc., but none of the employees involved with this dispute was mentioned.

RECOMMENDATIONS

After careful consideration of the agreements made by the different parties and the documents and evidence submitted, the board finds and recommends as follows:—

1. Wage Agreement No. 9 above referred to does not apply to, or cover, the employees referred to in the application in question.

2. The Canadian Brotherhood of Railway Employees and Other Transport Workers have been authorized in writing by at least 49 out of the 61 employees involved to repre-

sent them in all matters pertaining to the negotiations of schedules or working agreements governing their wages and working conditions and in the revision of any such schedules and in the handling of any grievances which may arise thereunder.

3. It is the unanimous opinion of this Board that the Canadian Brotherhood of Railway Employees and Other Transport Workers is the duly authorized representative of the majority of the employees involved.

4. The Canadian National Railways should under the circumstances complete their negotiations with the Canadian Brotherhood of Railway Employees and Other Transport Workers affecting the employees in question.

The whole respectfully submitted.

Montreal, 21st August, 1943.

(Sgd.) ALFRED SAVARD, *Chairman.*

(Sgd.) FREDERICK T. COLLINS, *Member.*

(Sgd.) JOHN K. L. GRAHAM, *Member.*

Conciliation Work of the Department of Labour During August, 1943

DURING August 84 new industrial disputes came to the attention of the Industrial Relations Branch, while 34 others which were already known to the Department received further attention. These disputes were dealt with under the Conciliation and Labour Act and were distinct from those handled under the Industrial Disputes Investigation Act, which are described elsewhere in this issue.

The disputes were dealt with by Industrial Relations Officers or, in Ontario, by the additional services of the Provincial Conciliation Officers. Those of chief interest or importance are summarized in the statement below.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal and Fredericton. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and North Western Ontario; four officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Sydney, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

METAL WORKERS, BRANTFORD, ONT.—About 340 employees in the manifold department of the Cockshutt Plow Company Limited, Brantford, Ont., went on strike on August 4 when 4 persons were dismissed for refusing to comply with instructions that no one was to stop work before actual quitting time. The workers involved claimed that a 5-minute period had been allowed them previously for washing up, but the company denied that permission had ever been granted for such purposes. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, investigated the dispute and persuaded the employees to resume work on August 6 on the understanding that they could apply to the Regional War Labour Board. The separation notices given to the 4 employees were cancelled, with it being understood that the workers would observe company regulations in future.

CIVIC EMPLOYEES, EDMUNDSTON, N.B.—On July 31 employees of the town of Edmundston, N.B., members of the Edmundston Civic Employees Federal Union No. 60, (T.L.C.C.) including employees of the police and fire departments, water works and the hydro-electric system, threatened to go on strike August 31 unless salary and wage rates were increased by from 5 per cent to 20 per cent. The situation was jointly investigated by Mr. H. R. Pettigrove, Industrial Relations Officer,

Fredericton, N.B. and Mr. N. D. Cochrane, Director of Labour for the Province of New Brunswick. Following conferences with the parties it was agreed that the case would be heard by a 3-man Conciliation Committee, comprised of Messrs. Pettigrove and Cochrane and Mr. C. J. A. Hughes, Vice-Chairman and Executive Officer of the Regional War Labour Board for New Brunswick. It was also understood that the salary and wage rates of the town of Campbellton, N.B., which has a union agreement with its employees, would be used for purposes of comparison. In the meantime the union agreed to recommend to its members that work should be continued without interruption.

SHIPYARD WORKERS, OJIBWAY, ONT.—Certain plumbers and pipe-fitters employed at the shipyard of the Canadian Bridge Engineering Company, Limited, Ojibway, Ontario, protested during August, by refusing to work overtime, against the failure of the company to re-employ certain members of Local 552, United Association of Journeymen, Plumbers and Steamfitters, who had been temporarily laid off for lack of material. A joint conference with representatives of the company and the employees' Yard Committee was arranged by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto. It was agreed that, subject to Selective Service regulations, 5 employees temporarily employed elsewhere would be notified to return to work by September 7 and would be given 10 days in which to accept the offer, after which they would be considered as having left the service of the company. Overtime work was to be resumed by the protesting employees, whenever necessary, as from August 23.

GLASS FACTORY WORKERS, MONTREAL, P.Q.—On July 28 a strike occurred among 150 employees of 5 glass manufacturing companies, The Consolidated Plate Glass Company of Canada Limited, Hobbs Glass Limited, J. P. O'Shea Company Limited, Pilkington Brothers (Canada) Limited and Starr Glass Company, all of Montreal, P.Q. The strikers, who were members of the Glass Workers Local 1135, of the Brotherhood of Painters, Decorators and Paperhangers of America, demanded the consummation by the companies of a union agreement relating to wage rates, working conditions, and other matters. The firms were all engaged in war work. However, as the companies took the position that they would enter into negotiations with the union upon a resumption of work if the employees agreed in writing to arbitrate under a provincial ordinance, the matter was first referred to Mr. Cyprien Miron, Chief Conciliation Officer of the Quebec Department of Labour.

No settlement was reached in spite of numerous attempts. On August 11 the Federal Minister of Labour authorized an investigation by Mr. B. Rose, K.C. of Montreal, as Industrial Disputes Inquiry Commissioner, under Order in Council P.C. 4020, on condition that the employees should first resume work. The strike continued, however, until August 27 when the union filed an application for the establishment of a Board of Conciliation and Investigation, as recorded above under "Recent Proceedings under the Industrial Disputes Investigation Act".

SHIPYARD WORKERS, LAUZON, P.Q.—In the August issue of the *LABOUR GAZETTE* it was reported that, following a brief strike on July 24 by 900 employees of the Davie Shipbuilding and Repair Company Limited, Lauzon, P.Q., the Department appointed Mr. Bernard Devlin, K.C. of Quebec, P.Q., as an Industrial Disputes Inquiry Commissioner to investigate the dismissal of an employee belonging to Local 3, Boilermakers and Iron Shipbuilders of America. The Commissioner held an inquiry early in August and reported that the management of the company had been justified in its action. Both parties accepted the Commissioner's award.

COAL MINERS, BLAIRMORE, ALTA.—Under a clause in the signed agreement between Western Canada Bituminous Coal Operators' Association and District 18, United Mine Workers of America, providing that the parties will refer disputes to arbitration by an Independent Chairman and accept his award as final and binding, the Minister of Labour, on a joint request, appointed Mr. R. K. Henderson, Western Fuel Consultant of National Selective Service, to deal with a dispute between the union and Western Canadian Collieries Limited, Blairmore, Alberta. The dispute concerned payment for the removal of sheet iron from pillar work in the company's Bellevue Mine. A hearing took place at Calgary on August 23. The Independent Chairman found that there was not sufficient evidence to substantiate the claim that payment had ever been made for this type of work under the Agreement which had been in effect since December, 1938, and that the intention of the Agreement was that the tonnage rates set for pillar work would take care of lifting the sheet iron in pillar extraction. Subsequently officials of District 18, U.M.W.A., gave notice that the union would accept the decision of the chairman in respect of work already performed but would advise the mine employees, that, if the company desired work to be performed which is not written into the contract, they should refuse to do it until assured that the time employed

would be recorded and "paid for according to the Agreement".

TEXTILE WORKERS, TORONTO, ONT.—On July 28 the Department received a request from an officer of the International Ladies' Garment Workers' Union, Toronto, for the appointment of an Industrial Disputes Inquiry Commissioner under Order in Council P.C. 4020 to investigate the dismissal of two union members by the Military Clothing Company, Toronto, on the grounds that they had been discharged because of their union membership. A preliminary investigation was made by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, upon whose recommendation, the Minister of Labour, on August 17, appointed His Honour Judge W. T. Robb, Orangeville, Ont., as a Commissioner in the case. When the hearing took place in the City Hall, Toronto, on August 24, one case was dropped by the union. In the remaining case, the Commissioner concluded that the worker in question had not been dismissed because of union membership or activity.

COAL MINERS, LUSCAR, ALTA.—On July 31 the Department received word that 7 men employed in the power house of Luscar Coal Mines, Limited, Luscar, Alta., had given 7 days' notice of separation in order to secure wage increases of \$2.00 per day. Mr. F. E. Harrison, Western Representative of the Department, Vancouver, conferred in Calgary with officials of District 18, U.M.W.A., and a union organizer was sent to Luscar to endeavour to adjust the matter. Subsequently the employees decided to remain on the job.

LONGSHOREMEN, THREE RIVERS, P.Q.—Eight ocean-going vessels destined to carry important war materials were held up at Three Rivers, P.Q., on August 2, when 350 unorganized longshoremen, stevedores, teamsters and general labourers employed by J. C. Malone and Company went on strike in connection with demands for increases in wage rates, time and one-half pay for overtime work in excess of 10 hours per day, and double time for work on Sundays and holidays. Mr. L. Pepin, Industrial Relations Officer, Montreal, immediately proceeded to Three Rivers and explained to the employees the proper procedure for submitting their demands to the National War Labour Board. Work was resumed on August 5. On August 30 the employees again resorted to strike action in protest against what they considered to be delay on the part of the National War Labour Board, although no brief from the workers had been presented to the Board. Three vessels were affected by this action. The situation was promptly investigated by Mr. R.

Trepanier, Industrial Relations Officer, in company with representatives of the United Kingdom Ministry of War Transport and the Timber Controller of the United Kingdom Ministry of Supply. On receiving an assurance that the National War Labour Board would give prompt attention to a submission from the company for approval of wage increases of 5 cents or 6 cents per hour, the employees resumed work on September 1.

COAL MINERS, CANMORE, ALTA.—On August 4 about 249 employees of the Canmore Coal Company, Limited, Canmore, Alta., went on strike because of the suspension of a boy employed as a tippie helper. The company claimed that the boy had used abusive language to a foreman and had refused to work overtime. The employees claimed that the worker in question had been treated roughly by the foreman. Mr. F. E. Harrison, Western Representative, Department of Labour, discussed the matter with officers of District 18, United Mine Workers of America, and the Coal Operators' Association. After the employees agreed to resume work on the morning of August 9, it was arranged that the tippie helper would be re-instated and given employment under a different foreman in another part of the mine.

SHIPYARD WORKERS, MONTREAL, P.Q.—In the August issue of the *LABOUR GAZETTE* (pp. 1122-23) reference was made to a strike of employees of the shipyard division of the Canadian Vickers Limited. Following the strike, an organizer for the Boilermakers' and Iron Shipbuilders' Union of Canada, (C.C.L.) was charged in court with inciting the employees to go and to remain on strike. Particulars regarding this case will be found elsewhere in this issue under "Labour Law—Recent Legal Decisions Affecting Labour".

STEVEDORES, HALIFAX, N.S.—About 115 stevedores employed on the Halifax waterfront quit work on August 25 claiming that the presence of 35 armed police guards during the unloading of a cargo of liquor was an affront to the men employed on the job. Officers of the Industrial Relations Branch discussed the situation with authorities of the Port of Halifax and the R.C.M.P. The uniformed guards were withdrawn and operations were resumed.

COAL MINERS, FLORENCE, N.S.—On August 11 a group of brushers employed on No. 1 wall of Florence Colliery, operated by Old Sydney Collieries Limited, went on strike in an effort to secure wage adjustments in connection with moving and replacing pans. The action directly affected a group of 35 brushers, loaders, machine runners, etc., and caused about 300 miners to be idle. Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., investigated the dispute and after several con-

ferences with officers of District 26, United Mine Workers of America, and the Committee of Florence Local 4544, persuaded the men to resume work and refer the dispute to the Board of Adjustment under the signed agreement between the parties. The brushers resumed work on August 17 and operations were completely restored by August 19. The Board of Adjustment decided that brushers should be paid for the removal and replacing of pans when necessary, commencing August 21.

SHIPYARD WELDERS AND BURNERS, VANCOUVER, B.C.—A group of 200 men and 15 women employed in the South Yard of the Burrard (Vancouver) Drydock Company, Limited, Vancouver, B.C., as electric and acetylene welders and burners went on strike August 4 when 3 of their number were discharged for refusing to perform certain work when ordered to do so. The strikers were members of the Boilermakers' and Iron Shipbuilders' Union of Canada. The incident occurred in connection with negotiations for the installation of ventilating equipment or for premium payments for work performed in confined spaces where fumes accumulate. Agreement had previously been reached on all points under negotiation, but delays beyond control of the company had occurred in the delivery of new ventilating apparatus. A compromise was reached after Mr. G. R. Currie, Industrial Relations Officer, Vancouver, persuaded the parties to agree to a proposal that the question of premium payments for work in confined areas should be referred to the Dobson Committee on shipbuilding practices. It was agreed in advance that the ruling of the Committee would be accepted by the union and by all Vancouver Shipbuilding Companies. The welders and burners resumed work on the 3rd shift of August 4.

COAL MINERS, GLACE BAY, N.S.—Some 1,720 miners employed by the Dominion Coal Company, Limited, in 3 collieries at Glace Bay and Caledonia, N.S., went on strike on August 2, when a medical doctor was called up for army service. The doctor in question was being paid by miners of the area through a check-off and it was alleged that because of the scarcity of doctors in the vicinity, these men would be left without medical services in the event of occupational accidents. Industrial Relations Officer, Allan MacDonald, Sydney, N.S., canvassed the situation locally and an investigation was conducted from Ottawa through the Canadian Medical Procurement and Assignment Board. It was ascertained that the doctor had voluntarily applied for a commission in the R.C.A.F. shortly prior to his call-up by the army mobilization authorities. However, he was given leave by the

military authorities and returned to his practice. The miners resumed work on August 5 and 6.

COAL MINERS, STELLARTON, N.S.—About 1,100 employees of the Acadia Coal Company, Limited, walked out on strike on August 26, 1943. No dispute existed between the company and its employees, and the action of the men represented a protest against a special levy of 50 cents per week imposed for a period of 4 weeks on members of the United Mine Workers of America by the union itself in order to liquidate a deficit of the Glace Bay "Gazette", which newspaper is published by the miners' organization. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., endeavoured to secure the termination of the strike through the officials of the United Mine Workers of America, District 26. However, the employees refused to resume work until members of the District Executive visited the local union and explained the situation. Work was resumed on September 1.

COAL MINERS, SPRINGHILL, N.S.—On August 25 about 1,600 employees of the Cumberland Railway and Coal Company Limited, Springhill, N.S., went on strike because the management had docked the wages of 41 men for leaving their work before the end of a shift. Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., conferred with the union representatives and urged the men to resume work at once. At a special mass meeting, held the same day, the employees agreed to return to work pending negotiations between the company and officers of District 26, United Mine Workers of America.

AIRCRAFT WORKERS, MONTREAL, P.Q.—In consequence of the inability of Lodge 712, International Association of Machinists, to obtain an acceptable disposition of their request on behalf of employees of 3 aircraft plants in Montreal, namely Fairchild Aircraft Limited, Canadian Vickers Limited and the Noorduyn Aviation Limited, for retroactive payment of full cost-of-living bonus to July, 1942, the employees concerned went on strike on August 3, 1943. About 21,100 employees were affected. At the time the strike occurred conversations were being held in Ottawa, between officials of Lodge 712 and representatives of the National War Labour Board, the Department of Munitions and Supply and the Department of Labour. In consequence of this action an announcement was made by the Minister of Munitions and Supply and the Minister of Labour stating that the plants would be closed until the striking workers agreed to return to work without fulfilment of their demands that a cost-of-living bonus be made retroactive. The National War Labour

Board took the position that it had no authority to permit the payment of the full cost-of-living bonus requested for the period prior to March 23, 1943. A full cost-of-living bonus had been awarded with effect from the latter date. As a result of further discussion between the President of the Montreal Trades and Labour Council and the Chairman of the National War Labour Board arrangements were made for the men to return to work with the understanding that consideration would be given to their request on the basis of the Wage Control Order as it existed prior to March 23, 1943, and that a new application to the National War Labour Board would be made. It was clearly understood that neither the National War Labour Board nor the Government would put into effect or give any assurance of putting into effect retroactive cost-of-living bonus as claimed by the men when they went on strike. The sole question to be determined is the amount of bonus to which the employees were entitled prior to March 23. Partial operations were resumed on August 13 and full restoration of work in all the plants was effective on August 16.

Union Representation Votes

FOUNDRY WORKERS, TORONTO, ONTARIO.—Following joint conferences during August, a representation vote was conducted on September 1 among employees of the Dominion Wheel and Foundry Company, Limited, Toronto, under the supervision of Mr. H. Perkins, Industrial Relations Officer, Toronto. Out of a total of 77 votes cast, 65 were in favour of bargaining through the agency of the United Steelworkers of America, Local 1089, while 8 voted in favour of the Dominion Wheel Employees' Association, and 4 voted against any union.

ELECTRIC BATTERY WORKERS, TORONTO, ONTARIO.—By joint consent of the parties a vote was conducted on August 17 by Mr. H.

Perkins, Industrial Relations Officer, Toronto, to determine whether employees of General Dry Batteries of Canada Limited, Toronto, Ontario, wished to bargain collectively with their employer through Local 512, United Electrical, Radio and Machine Workers of America. There were 101 employees eligible to vote, of whom 87 cast ballots. A total of 74 voted in favour of the union, while 10 voted against and there were 3 spoiled ballots.

SHIPYARD EMPLOYEES, PICTOU, N.S.—A union representation vote was conducted on August 19 and 20 under the supervision of Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., among employees of Foundation Maritimes, Limited, Pictou, N.S. The vote followed a joint conference on July 21 between representatives of the Department, the management and the three unions having membership in the shipyards. At that time all present agreed that a vote should be taken on the basis of eligibility for union membership in the 3 unions and subsequently representatives of the parties mutually agreed upon the details of the ballot. The results of the vote, as conducted in the 3 separate divisions of employees, were as follows. Poll No. 1:—Voters eligible, 388; votes cast, 265; votes in favour of United Brotherhood of Carpenters and Joiners, 132; votes in favour of Local 2, Industrial Union of Marine and Shipbuilding Workers of Canada, 131; spoiled ballots, 2. Poll No. 2:—Voters eligible, 1,846; votes cast, 989; votes in favour of the International Brotherhood of Boilermakers, 241; votes in favour of Local 2, Industrial Union of Marine and Shipbuilding Workers of Canada, 736; spoiled ballots, 12. Poll No. 3:—Voters eligible, 652; votes cast, 379; votes in favour of Local 2, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.), 365; votes against the union, 12; spoiled ballots, 2.

Strikes and Lockouts in Canada during August, 1943

THE number of strikes and lockouts recorded for the month of August showed an increase of eight as compared with the previous month, while the number of workers involved and the time loss in man working days increased sharply. During August there were 50 strikes recorded, involving 35,201 workers, with a time loss of 236,948 man working days, as compared with 42 strikes in July, with 15,984 workers involved and a time loss of 66,971 days. During August, 1942, there were 59 strikes, involving 21,434 workers and showing a time loss of 49,951 days.

In August, the month under review, the great number of workers involved and the exceptionally large time loss in man working days was due, for the most part, to one strike of aircraft workers at three plants in Montreal. This strike accounted for more than 60 per cent of the workers and 85 per cent of the time loss during the month.

Seven strikes, involving 376 workers, were carried over from July and 43 commenced during August. Of these 50 strikes, 47 were terminated during the month. Ten resulted in favour of the workers, seven in favour of

the employers, four were compromise settlement, one was partially successful and 25 were indefinite in result, work being resumed pending final settlement of each strike. At the end of the month, therefore, there were three strikes recorded as unterminated, namely: clothing factory workers at Quebec, P.Q., and laundry and dry cleaning plant workers at Kitchener and Waterloo, Ont.

The record does not include minor strikes such as are defined in another paragraph, nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Such strikes are listed in this paragraph for a period up to one year after their removal from the table of current strikes.

The following table gives information for August and July, 1943, and August, 1942:—

Date	Number of strikes	Number of workers involved	Time loss in man working days
*August, 1943.....	50	35,201	236,948
*July, 1943.....	42	15,984	66,971
August, 1942.....	59	21,434	49,951

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1943*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		

Strikes and Lockouts in Progress Prior to August 1943

MANUFACTURING—				
<i>Fur and Leather Products—</i>				
Fur factory workers, Toronto, Ont.	1	20	300	Commenced April 19, 1943; against agreement signed with another union; employment conditions no longer affected by August 31; in favour of employer.
Fur factory workers, Quebec, P.Q.	1	33	450	Commenced May 12, 1943; for union recognition and agreement with increased wages and against dismissal of two workers; employment conditions no longer affected by August 31; in favour of employer.
Fur factory workers, Pointe-aux-Trembles, P.Q.	1	20	300	Commenced May 13, 1943; against agreement signed with another union; employment conditions no longer affected by August 31; in favour of employer.
<i>Textiles, Clothing, etc.—</i>				
Clothing factory workers, Farnham, P.Q.	1	18	300	Commenced July 21, 1943; against dismissal of two union workers; terminated August 23; conciliation (federal); in favour of employer.
<i>Metal Products—</i>				
Metal factory workers, Galt, Ont.	4	100	500	Commenced May 21, 1943; for union recognition; terminated August 17 (employment conditions no longer affected); conciliation (federal) and reference to the Ontario Labour Court; partially successful.
<i>Non-metallic Minerals—</i>				
Chemical plant workers, Quebec, P.Q.	1	35	105	Commenced July 28, 1943; against decision of RWLB re increased wages; terminated August 4; conciliation (provincial) and further reference to RWLB; compromise.
Glass factory workers, Montreal, P.Q.	5	150	3,000	Commenced July 28, 1943; for union agreement with increased wages; terminated August 27; conciliation (federal) and reference to an IDI Board; indefinite.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the July issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1942". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of dis-

putes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in June was 123 and 14 were still in progress from the previous month, making a total of 137 disputes in progress during the month; 39,800 workers were involved in the disputes in progress during the month and the time loss was 112,000 working days.

Of the 123 disputes beginning in June, 27 arose out of demands for increased wages and 37 over other wage questions; 3 on questions as to hours; 17 over questions as to employment of particular classes or persons; 28 over other questions as to working arrangements; four on questions of trade union principle; 7 were sympathetic stoppages. Final settlements were reached in 104 disputes, of which 17 were settled in favour of the workers, 65 in favour of employers and 22 resulted in compromises; in 18 other disputes, work was resumed pending negotiations.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in separate articles following this.

Manufacturing: Vegetable Foods

MOOSE JAW, SASK.—ROBIN HOOD FLOUR MILLS LTD. AND UNITED PACKINGHOUSE WORKERS OF AMERICA, LOCAL 201 (CANADIAN CONGRESS OF LABOUR).

Agreement reached following application for a board under the Industrial Disputes Investigation Act, and conciliation by an Industrial Disputes Inquiry Commissioner (see p. 1226 of this issue). Agreement to be in effect from August 5, 1943, to August 4, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the sole collective bargaining agency for all hourly paid employees of the plant. No discrimination or coercion by the company or the union in regard to membership in any lawful society.

Hours: normal working day is: 8 hours per day in the power plant, flour mill, flour packing department, warehouse labour and flour trucking department; 8 to 10 hours per day in machine shop and maintenance department, grain elevator, oat mill, oat mill packing and packaging. Overtime and all work on Sundays and holidays is payable at time and one half. A rest period of 10 minutes during any work period exceeding 4½ hours. Wage rates per hour for certain classes: power plant—fireman 62 cents, machinist 45 to 70 cents, roll corrugator 45 to 60 cents; electricians 45 to 65 cents, tinsmith 65 cents, utility man 50 to 55 cents; flour mill and oat mill—trick millers 68 cents, machine tenders 55 cents, smutters 52 cents, oilers 50 to 52 cents, sweepers 35 to 46 cents; elevator workers 50 and 52 cents; warehouse and oat mill—flour, feed and oat feed packers 55 cents, truckers 45 to 50 cents, container packers 45 to 50 cents; sweeper 46 cents. Cost of living adjustments or bonuses to be made and paid from time to time as fixed by Dominion Government regulations. Vacation: one week with pay annually for employees with one year and less than three years' service;

two weeks' annually after three years' service. Seniority rights and grievance procedure are provided for.

Manufacturing: Fur and Leather Products

MONTREAL, P.Q.—A MANUFACTURER OF HANDBAGS AND INTERNATIONAL LADIES HANDBAG, LUGGAGE, BELT AND NOVELTY WORKERS' UNION, LOCAL 9.

Agreement reached following strike reported on page 1248 of this issue. Agreement to be in effect from August 13, 1943, to August 1, 1944. The employer agrees to maintain a union shop and that any new employees hired will be union members, if such are available. No discrimination against anyone because of union activity or otherwise. The employer will deduct union dues from wages and hand same to the union.

Hours: 8½ per day Monday to Friday, a 42½ hour week, subject to the approval of the Regional War Labour Board. Overtime is payable at time and one half. Wages: the question of wages to be submitted to an impartial chairman and later to the Regional War Labour Board. Provision is made for the settlement of grievances and for the equal division of available work amongst regular employees.

Manufacturing: Pulp, Paper and Paper Products

CHANDLER, QUEBEC.—THE GASPESTIA SULPHITE CO. LTD. AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 455).

Agreement to be in effect from April 8, 1943, to June 30, 1944, and thereafter from year to year subject to notice. The company recognizes the union. Any employee who is now a member or who after this date becomes a member shall maintain such membership. Preference in employment to be given to union members. New employees must join the union.

Hours: for day workers, 8 per day, 48 per week; for tour workers, 8 hour shifts, a 48 hour week. Overtime for day workers, time and one half; for day and tour workers, time and one half for all work on Sundays and holidays. Hourly wage rates: yard labourers 45 cents, head locomotive engineers 65 cents, locomotive engineers and crane operators 60 cents; wood handling 45 cents; digesters and acid plant—cooks 84 cents, helpers 47 and 54 cents, acid makers 60 cents; stock preparation—blowpit men 47 cents, wet machine operators 47 cents; dryers and storage—machine tenders 90 cents, back tenders 63 cents, third hands 53 cents, beatermen 45 cents; shift electricians 68 cents, electrician's helper 50 cents; pulp testers 48 cents; millwright 58 cents, machinists 58 and 68 cents, welders 60 and 68 cents, painters 47 and 53 cents, casual labourers 40 cents. A cost of living bonus to be paid in accordance with federal legislation. Arrangement is made for the settlement of grievances.

Manufacturing: Metal Products

MONTREAL, P.Q.—NATIONAL RAILWAYS MUNITIONS LTD. AND CANADIAN NATIONAL RAILWAYS SYSTEM FEDERATION No. 11 (MUNITION PLANT WORKERS).

Agreement to be in effect from March 1, 1943, subject to 30 days' notice. No discrimination against any employee who as committeeman represents other employees.

Hours: 8 per day, 48 per week. Overtime is payable at time and one half; work on Sundays and holidays also at time and one half. Hourly wage rates: tool and die makers—leading hands \$1.10, bench hands \$1, machine hands 90 cents, electricians, pipefitters, welders and plate workers 85 cents, painters 75 cents, heat treating and toolsmiths 85 cents, inspectors 65 to 85 cents, examiners 55 cents, production workers 65 to 75 cents, learners 50 to 60 cents, beginners 35 to 45 cents, helpers in all trades 60 cents, maintenance millwrights, carpenters, electricians, pipefitters 85 cents, labourers 50 cents, tool room attendants 40 to 60 cents. Provision is made for the settlement of disputes.

TORONTO, ONTARIO.—CHARLES P. WAYMAN Co. LTD. AND UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 514.

Agreement to be in effect from June 14, 1943, to December 31, 1943, and thereafter from year to year subject to notice. The company recognizes the union as the exclusive bargaining agency for all hourly paid employees as long as the union represents a majority of employees, and will not discriminate against any employee on account of his union membership. All employees who are members of the union and those who may thereafter become members must maintain their membership, but the Company may hire union or non-union men. Upon written authority, the Company to deduct union dues from an employee's wages and pay same over to the union.

Hours: 8½ hours Monday to Friday, 4½ hours on Saturday, a 46-hour week is the standard week, but the scheduled hours are 9½ per day, 4½ on Saturday, a 52-hour week. Two ten-minute rest periods in each shift. Overtime: all time over the standard hours (8½ per day, 4½ on Saturday) is payable at time and one-half subject to the approval of the Regional War Labour Board; work on Sundays and holidays at time and one-half. Hourly wage rates: fully qualified men (able to set up and run any machine) 90 cents, improvers 65 to 85 cents, beginners 55 and 60 cents; drill hands—operators 65 cents, beginners 50 cents; radial drill—65 to 75 cents; general maintenance men 55 to 75 cents; fitters and erectors 90 cents, helpers 60 to 85 cents. For night shift, 5 cents per hour extra.

Application to be made to the Regional War Labour Board for permission to pay a \$4.25 per week cost-of-living bonus. Provision is made for seniority rights and for the settlement of grievances.

CHATHAM, ONTARIO.—ONTARIO STEEL PRODUCTS Co. LTD. AND THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 127.

Agreement reached following report of a Board under the Industrial Disputes Investigation Act (see page 1226 of this issue). Agreement

to be in effect from March 8, 1943, until changed or terminated by 60 days' notice. The company recognizes the union as the bargaining agency for employees, members of the union. Employees are free to join or not to join any union or association. No discrimination or coercion to be shown on the part of the company or the union against any employee because of his union membership or non-membership.

Two ten-minute rest periods, one in the forenoon and one in the afternoon are allowed. Provision is made for seniority rights and for the settlement of grievances.

Manufacturing: Shipbuilding

QUEBEC, P.Q.—ANGLO CANADIAN PULP AND PAPER MILLS LTD., SHIPBUILDING DIVISION, AND EMPLOYEES, MEMBERS OF INTERNATIONAL BROTHERHOOD OF PULP SULPHITE AND PAPER MILL WORKERS LOCAL 137, UNITED ASSOCIATION OF JOURNEYMEN PLUMBERS LOCAL 511 AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 1118.

Agreement to be in effect from June 21, 1943, to July 1, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the collective bargaining agency for their members and the company will not recognize any other bargaining agency while this agreement is in effect.

Hours: 10 per day for day work, 12 per day for night work. Vacation: one week with pay to employees with at least one year's service. Wage rates, overtime rates and cost-of-living bonus will be those approved from time to time by the National War Labour Board. Consideration to be given to seniority rights. Provision is made for the settlement of grievances.

VANCOUVER, B.C.—BURRARD DRY DOCK Co. LTD. AND AMALGAMATED BUILDING WORKERS OF CANADA, BUILDING TRADES STORE CLERKS AND WAREHOUSEMEN'S LOCAL No. 10.

Agreement to be in effect from August 31, 1943, for the duration of the war and wartime contracts. Only union members to be employed, if available.

Hours: 8 per day, 44 per week for day shift; 7½ per shift for second shift, for which 8 hours' pay allowed; 7½ per shift for third shift, for which 9 hours' pay allowed; a 40-hour week for second and third shifts. Overtime is payable at time and one half for first four hours and double time thereafter; double time for work on Sundays and holidays. Hourly wage rates: storeman 50, 56 and 62½ cents; leading storeman 69, 75, 80, 90 cents. A cost-of-living bonus to be paid as specified by Orders in Council.

A supplementary agreement, effective from September 1, 1943, makes the same provisions for the arrangement of hours for the operation of the shipyard on a 7-day week basis, as in the supplementary agreements noted in the LABOUR GAZETTE, June, 1943, p. 808.

VICTORIA, B.C.—YARROWS LTD. AND VICTORIA MACHINERY DEPOT Co. LTD. AND INTERNATIONAL ASSOCIATION OF BRIDGE, STRUCTURAL AND ORNAMENTAL IRON WORKERS, LOCAL 643, SHIPYARD RIGGERS, BENCHMEN AND HELPERS.

Agreement to be in effect from May 11, 1943 for the duration of the war and wartime contracts. No discrimination against any member of the union.

Hours: 8 per day, 4 on Saturdays, a 44-hour week for day work; for second shift, $7\frac{1}{2}$ per shift with pay for 8 hours; for third shift, 7 hours per shift with pay for 8 hours; 40 hours to constitute a week's work for second and third shifts except in case of a second shift employed on emergent war work when they may work 44 hours. Overtime is payable at time and one half for first four hours and double time thereafter; double time for work on Sundays and holidays. Time and one quarter will be allowed for dirty work and for work in confined places with gaseous conditions caused by rivet fires,

torches, etc. Wage rates: rigger 90 cents per hour, \$7.20 per day; rigger's helper 67 cents per hour, \$5.36 per day. A cost-of-living bonus to be paid in accordance with government Orders in Council.

A supplementary agreement, also effective May 11, 1943, makes the same provisions for the arrangement of hours for the operation of the shipyard on a 7-day week basis as in the supplementary agreements in Vancouver shipyards noted in the *LABOUR GAZETTE*, June, 1943, p. 808.

Collective Agreement Act, Quebec

Recent Proceedings under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, page 86. Proceedings under the Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the amendment of three agreements, as noted below. A request for the extension of a new agreement for municipal employees at Jonquière was published in the *Quebec Official Gazette*, August 21; of a new agreement for printing trades at Quebec, in the issue of August 28. Requests for the amendment of the agreements for barbers and hairdressers at St. Hyacinthe, the shoe industry throughout the province and the dairy industry at Quebec were published in the issue of August 14; for the amendment of the agreement for firefighters at Quebec, in the issue of August 21; for the amendment of the agreement for

barbers at Montreal and fur workers (retail trade) at Montreal, in the issue of August 28.

In addition, Orders in Council were published in the *Quebec Official Gazette* during August, approving or amending the constitution and by-laws of certain parity committees, the levy of assessments by certain other parity committees or amendments to previous orders in Council in this connection.

Manufacturing: Vegetable Foods

BAKERS, QUEBEC CITY.

An Order in Council, dated August 19, and gazetted August 28 amends the previous Order in Council for this trade (L.G., June, 1941, p. 703). Weekly hours are reduced by 2 a week and now are 60 per week in zone I, 70 in zone II for bread bakeries and 60 in both zones for cake bakeries. Weekly wage rates are increased by \$1.

Manufacturing: Fur Products

FUR INDUSTRY EMPLOYEES, QUEBEC CITY.

An Order in Council, dated August 2, and gazetted August 7, amends the previous Order in Council (L.G., November, 1940, p. 1201; Sept., 1938, p. 1042; Oct., 1939, p. 1065; Dec., 1941, p. 1572; May, 1942, p. 630), by providing that four holidays be observed for which employees are to be paid; if required to work on such days, double time to be paid in addition to the regular wages.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, ST. HYACINTHE.

An Order in Council, dated August 2, and gazetted August 7, amends the previous Order in Council (L.G., Oct., 1941, p. 1426; Sept., 1942, p. 1098; April, 1943, p. 490, May, p. 639) by reducing hours for barbers in zone II by 4 a week, with no work on Mondays.

Decisions of National War Labour Board

THE National War Labour Board has in recent months issued decisions in the following cases:

In the matter of the Royal York Hotel (Canadian Pacific Railway Company) and in the matter of an application for increase of wage rates paid to bellboys.

In re Grand River Railway Company, Lake Erie and Northern Railway Company and Canadian Pacific Transport Company (Galt-Preston Division).

In re Montreal and Southern Counties Railway (C.N.R.) Electric Lines.

In re Port Arthur Shipbuilding Company Limited—application for increase in wages of labourers.

In re United Mine Workers of America, District 18—application for increase in basic rates and for overtime payments in domestic coal fields of Alberta and British Columbia.

In re Canadian Navigators Federation Incorporated and National Association Marine Engineers of Canada Incorporated—Application for increases in wages paid by various Canadian Lake steamship companies to certified officers employed on their vessels.

In re British Columbia Electric Railway Company Limited—Appeal by the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 101 from finding and direction of Regional War Labour Board for British

Columbia in respect of retroactive date for cost-of-living bonus payment.

In re Alberta Meat Company Limited, Canada Packers Limited, Swift's Canadian Company Limited—Application for leave to appeal from finding and direction of Regional War Labour Board for British Columbia directing certain wage increases retroactive to November 3, 1942.

In re Hotel Operators Committee—Appeal from finding and direction of the Regional War Labour Board for Alberta directing certain wage increases, on an application by the Hotel and Restaurant Employees' Local 269.

In the matter of an application of the employees of the Oshawa Railway Company for an increase in basic wage rates.

In the matter of Hull Iron and Steel Foundries Limited, Hull, P.Q., and International Moulders and Foundry Employees' Union of North America, Local 318—Appeal from finding and direction of Regional War Labour Board for Quebec directing payment of cost-of-living bonus of \$3.10 per week.

In the matter of Malagash Salt Company Limited, New Glasgow, N.S., and Malagash Salt Mine Workers' Union of Malagash, Nova Scotia—Application for increase in basic wage rates.

Application for direction of payment at the rate of time and one-half for all work performed on Sundays by freight handlers employed by the Canadian Pacific Railway Company at Port McNicoll, Ont.

In the matter of the Royal York Hotel (Canadian Pacific Railway Company) and in the matter of an application for increase of wage rates paid to bellboys

This application is by Local No. 299 of the Hotel and Club Employees' Union for an increase in the basic monthly wage of the bellboys employed by the Royal York Hotel in Toronto from \$10.00 to \$50.00. The application is opposed by the employer.

The employer is paying a full cost of living bonus, less the \$5.00 per month by which the wage rate was increased in 1941.

Our jurisdiction is confined to the terms of section 25 of the Wartime Wages Control Order (P.C. 5963) and we may direct payment of a fair and reasonable increase only if we find that the wage rate paid to these employees is "low" as compared with the rate paid to the same occupational classification in Toronto or in a comparable locality.

The scope of this Board's powers is thus clearly delimited; we cannot raise wage rates, no matter how inadequate they may appear to us to be, unless they are out of line with the generally prevailing rate for the same job in comparative circumstances.

Bellboys are in a peculiar class of employment. Their "wage allowance" can hardly be termed a wage at all. However, by virtue of their employment they are afforded an opportunity to receive gratuities from the hotel guests to whom they may be called upon to render personal services and it is these gratuities which in reality constitute the compensation for which they work. It is perhaps relevant in this connection to note that, by the definition of section 15 (1) (iv) of the Order, "wages" include "gratuities".

On the basis of comparison with hotels of similar class and size we must find that the wage rate paid to bellboys in the Royal York Hotel is not "low" in the sense of section 25. Further, because the opportunity for the receipt of gratuities afforded to a bellboy employed in this hotel and in others of the same general type is a material circumstance which this Board must take into account, we

must place this hotel in a category different from that of the smaller hotels located in Toronto where it was said a weekly rate of \$11.50 was being paid to bellboys.

The powers of this Board being what they are, we must refuse the application and there will be a finding and direction accordingly.

June 25, 1943.

In re Grand River Railway Company, Lake Erie and Northern Railway Company and Canadian Pacific Transport Company (Galt-Preston Division)

Reasons for Judgment

This is an application by the Brotherhood of Railway Carmen of America (A.F. of L.) for upward revision of rates for certain classifications covering twenty-two employees in all.

The Union has put its case largely on a comparison with similar classifications on The Standard Railway operations although the Railway Company in question, a subsidiary of the C.P.R., is a small electrically operated one. It seems quite clear that the respective wage structures on electrically operated subsidiaries and standard railways have been built up on entirely different bases. The electrically operated railway wage structure appears to have been constructed on local comparisons for similar occupations in a rather general way with the question of ability to pay playing some part in the matter. It does not seem appropriate to us to alter the wage structure by levelling up to Standard Railway rates because that has never been an accepted principle. However, there is sufficient general evidence of an increase in the classifications concerned in local industry. We think there should be some upward revision in most of the classifications.

Accordingly, we are of opinion that for the classification as set up in the Union Brief

(evidence pages 9-10) there should be the following adjustments:

<i>Classification</i>	<i>Existing rates</i>	<i>New rates</i>
Armature winder	75c	75c
Machinists	60c-75c	65c-75c
Blacksmith	60c	65c
Coach Carpenter	68c	70c
Coach Painter	57c	64c
Painters	52c-55c	60c-63c
Carpenters	50c	55c
Car Repairers	55c	62c
Car Inspectors	46c-48c	52c-55c
Mechanics' Helpers ..	41c, 42c, 44c, 45c	50c-52c
Coach Cleaners	35c-40c	48c-50c

It is not altogether clear from the submission whether the above existing rates are inclusive or exclusive of cost-of-living bonus. However, that should be within the knowledge of the parties and should present no difficulty from the point of view of adjustment. The parties might communicate the correct situation to the Secretary of the Board. Increases should be retroactive to January 1, 1943. Approval is also given to the other terms of the agreement tentatively made between the parties.

There should be finding and direction accordingly.

June 25, 1943.

In re Montreal and Southern Counties Railway (C.N.R.) Electric Lines

Reasons for Judgment

This is an application by C.N.R. System Federation No. 11, Railway Employees Department, A.F. of L., for certain increases in wage rates and changes in working conditions.

As far as the rates of pay are concerned we apply the same reasoning on the comparative basis as was done in re Grand River Railway Company et al., the reasons for judgment in which are being released concurrently.

Accordingly, we are of opinion that for the classification as set up in the Union Brief

(evidence page 5) there should be the following adjustments:

<i>Classification</i>	<i>Existing rates</i> per m.	<i>New rates</i> per m.
Night Shopman— Granby	\$135 00	\$150 00
Night Shopman— St. Lambert ..	160 00	175 00
	cents per hr.	cents per hr.
Armature Winder	60	65
Blacksmith	60	65
Car Equipment		
Inspector	59	63

			June 25, 1943		

In re Port Arthur Shipbuilding Company Limited—Application for increase in wages of labourers

Reasons for Judgment¹

This matter was argued before the Board on the 12th day May, 1943, when the applicants requested, on behalf of the labourers employed in the above yards, that the wages be increased from the existing level of 45 cents to 58 cents per hour. The applicants at the same time asked, on behalf of all employees of the yards, that the existing cost-of-living bonus of \$2.70 per week be increased to the full bonus of \$4.25 per week, for an increase in the wage rates of machinists, plumbers and steamfitters and for vacations with pay.

When the matter was argued before the Board P.C. 629 was in force, enacted on the 26th of January, 1942, which fixed the basic scales of wage rates and the amount of cost-of-living bonus payable by the Port Arthur Shipbuilding Company, and in our Reasons issued on the 21st day of May, 1943, we indicated that in view of that Order in Council we were precluded from dealing with the application.

Subsequent to the hearing and to our Reasons of the 21st day of May, 1943, a new Order in Council was passed, namely, P.C. 4566, enacted on the 4th day of June, 1943, to the effect that "nothing contained in Order in Council 629 . . . shall be deemed in any way to limit or restrict . . . any of the powers conferred by the Wartime Wages Control of the National War Labour Board."

In view of this subsequent Order in Council we have been asked to dispose of the application as argued before us on the 12th day of May, 1943, as above indicated.

The Board is having a general survey made of wage rates, existing cost-of-living bonuses and relevant conditions in the various shipyards in the Dominion and in view of this we refrain for the time being from dealing with the application as to cost-of-living bonus, basic wage rates of the machinists, plumbers and steamfitters and vacation with pay. We will deal with these matters on the basis of the general survey which the Board expects will be shortly completed.

We feel, however, that we should deal at once with the question of the wage rate of the labourers, at least by way of an interim Finding and direction. In respect to that phase of the application, subject to any general conclusion which we may subsequently arrive at with respect to shipyards in general, or any section of them, it is our opinion that the wage rates at the Port Arthur Shipyards should in the meantime be at once increased to a basic minimum of 50 cents per hour retroactive to the first payroll subsequent to the 19th day of March, 1943, being the date of the application to this Board.

Finding and direction will be issued accordingly on the matter of the labourers' rate, reserving the rights of the parties with respect to the matters still to be dealt with.

June 25, 1943.

¹ Further reference to shipyard cases appeared in the LABOUR GAZETTE, June, 1943, pp. 747, 754; August, 1943, p. 1137.

**In re United Mine Workers of America, District 18—Application for
increase in basic rates and for overtime payments in domestic
coal fields of Alberta and British Columbia**

Reasons for Judgment

The present base rate in the bituminous mines for underground miners is \$5.78 per day. In the domestic coal mines in the Drumheller, Lethbridge, Lakeside, Saunders Creek, and Coalspur areas the comparable rate is \$5.51 per day. In the Edmonton area it is \$4.41 per day, and at Carbon it is \$4.20 per day. In each of the areas there is being paid in addition a full cost-of-living bonus.

These rates are all provided for in an agreement originally entered into in 1938, subsequently confirmed and ratified by agreements in 1940 and 1941. Furthermore, it was agreed by the Union that the contract was to extend for the duration of the war. The present application is to have the rates levelled up to \$5.78, the rate applying in the bituminous coal mines.

We do not think that we lose jurisdiction under P.C. 5963 to adjust rates merely because the agreement was made for the duration. However, when a Union has made such a contract any adjustment must be scrutinized with particular care. Otherwise, agreements arrived at by collective bargaining where the duration of the contract may have been a very important factor could be treated with abandon and regarded by the bargainer as meaningless.

The question for us to determine is whether, in the light of present conditions, adjustments are justified within the principle laid down in section 25 of P.C. 5963. The parties do not seem to have appreciated the principle involved sufficiently. The greater part of the evidence of the Union was directed to establishing that prior to 1924 the rate in the whole area had been uniform. Operators relied chiefly on the sanctity of the contract and the prospective results of upward revision in the post-war period. Neither contention has direct relevance to the problem presented by section 25. We should have received much more help if evidence had been developed as to comparative conditions as they exist now.

However, we do think, on the evidence, casual as it is, that we are justified in con-

cluding that the base rates, \$4.41 in the Edmonton area, and \$4.20 at Carbon, are too low. Accordingly, we are of opinion that an interim rate presently should be set at \$5 per day as of the next pay day. As to adjustments of rates below the present base of \$4.41 and \$4.20, no doubt the parties will be able to agree.

As to any further adjustments either in the Edmonton area or in the other domestic areas, we propose to appoint a referee to investigate the whole situation at the mines. The parties will have every opportunity to present their contentions before him on the spot. On receipt of his report we shall proceed to deal with the matter further. The individual contract rate adjustments sought will be dealt with in the same way.

The Union has also applied for a change in working conditions with respect to overtime work. For outside workers they ask time and one-half for overtime including Sundays and legal holidays. For all other fatal workers they ask for time and one-half for Sundays and legal holidays, and for those working on contract they also ask rate and one-half for Sundays and legal holidays. The reason for the application being put in this way is because certain Alberta legislation already requires time and a half under certain conditions to be paid underground workers for overtime work regardless of the terms of the contract. The contract in existence contemplated little or no overtime requirements. In fact the operators covenanted to avoid overtime as far as possible. To-day the conditions are different. More and more coal is required and manpower has decreased. There is special need for overtime work in the conditions that exist to-day. In view of the fact that a premium is provided for in Alberta legislation in certain conditions to underground workers, we think it appropriate to extend it under the principle of 5963. Accordingly, it will be granted in the terms of the application as herein described.

There should be findings and directions accordingly.

July 5, 1943.

In re Canadian Navigators Federation Incorporated and National Association Marine Engineers of Canada Incorporated—Application for increases in wages paid by various Canadian Lake steamship companies to certified officers employed on their vessels

Reasons for Judgment

This is an application by the organizations above mentioned on behalf of the certified personnel employed on the vessels of various steamship companies listed at the time of the application.

The first question that arises is whether, as to Captains and Chief Engineers, the National War Labour Board has any jurisdiction. The applicants appear to base their claim before this Board, as to Captains and Chief Engineers, on the ground that these certified officers are members of the respective organizations as well as the certified personnel below the rank of Captain and Chief Engineer, and that for that reason the question of wage rates payable to Captains and Chief Engineers should be determined by us.

The mere fact that various classes of the certified personnel employed on the vessels involved are members of one organization does not in any way confer any jurisdiction on this Board. The provisions of the relevant Orders in Council, P.C. 1549, Section 1 (b) and P.C. 5963, Sections 12 and 13, preclude the National War Labour Board from dealing with questions of remuneration to any employee above

the rank of foreman, and there can be little doubt that both as to Captains and Chief Engineers their status, generally, is clearly above that rank, and consequently beyond our jurisdiction. Whether this result in the specific instance of these applicants is convenient or practicable or not is a matter for the authorities and not for us.

The second branch of the application is for standardization of the wages of certified personnel below the ranks of Captains and Chief Engineers with the request that the rates be fixed for each classification at the highest rate now prevailing in Great Lakes Shipping. The Board understands that the parties are now in negotiation on that subject and that there is every likelihood of an agreement being reached and a joint application being filed. In view of this we defer any finding on that branch of the case but will deal with any application promptly on its being filed and believe that we should indicate now that any adjustment or increase arrived at should be made retroactive to the opening of the 1943 navigation season.

There should be finding and direction accordingly.

July 20, 1943.

In re British Columbia Electric Railway Company Limited—Appeal by the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 101 from finding and direction of Regional War Labour Board for British Columbia in respect of retroactive date for cost-of-living bonus payment

Reasons for Judgment

I think we can dispose of this matter now. We have heard sufficient of the argument, and are reasonably apprized of the situation.

This is not an application for leave to appeal. As a matter of fact we are hearing the appeal, leave having been granted on May 21, 1943.

On March 1, 1941, an agreement appears to have been entered into between the union and the company following the sittings of a Provincial Arbitration Board under the Industrial Conciliation and Arbitration Act of British Columbia. Section 134 provided an indemnity against the rising cost of living, in very similar language to P.C. 7440. As we view the matter that particular section followed from the majority award of the Arbitration Board under the provincial act, and

merely adopted similar language to P.C. 7440 in dealing with the matter of a cost-of-living bonus in principle. After Order in Council P.C. 8253 was passed the question of adjustment of the cost-of-living bonus and the rectification of the agreement to make it conform with P.C. 8253 became an issue, and the matter was before the Regional Board in British Columbia, which Board, as we understand it, made more than one finding and direction. The final one is dated 17th December, 1942. It contains the express direction that from February 15, 1942, the cost-of-living bonus was to be increased to cover the rise in the cost-of-living index of 1.8 points, as outlined in Section 48 (3a) of the Wartime Wages Control Order, P.C. 5963.

The contention before us is that any adjustment which was required should have been carried back to October, 1941, instead of February 15, 1942. We feel that there is no necessity for going into any extensive analysis of what P.C. 8253 provides beyond saying that it does appear to us that the direction dealt with the matter as if the cost-of-living bonus being paid under the agreement of March 1, 1941, was not pursuant to P.C. 7440.

But it seems to us the Union is faced with a rather serious difficulty in putting its case forward, on account of the fact that an agreement was made between the parties on December 18, 1942, the day following the direction and finding being issued. The direction and finding does not contain any direction to the parties to revise any agreement, or anything of that character. It is true that it does give a direction, which I have referred to before, that the cost-of-living bonus is to be increased effective as from February 15, 1942. Under those circumstances we feel we must take it for granted that the agreement of December 18, 1942, was a voluntary act, and that there was no compulsion of any kind in connection with it. The natural result of an agreement of that character, we think, is to

indicate as far as one can judge from a document in writing, and we do not feel it is safe to go outside the document, what the intention of the parties was. At that date, December 18, 1942, they were voluntarily entering into an agreement which gave effect to the direction and finding. If there had been any reservations of any kind at that time, in order to give effect to them, we would have to find them in the document itself.

It is unfortunate, perhaps, that this particular document was not forthcoming from the files of the company at the earlier stages of this matter. It apparently only came into the record at the actual hearing to-day, and while it is not a matter of surprise or anything of that kind, it does place those who are arguing on behalf of the union's contention in a somewhat difficult position. It is perhaps regrettable that the matter, more or less, turns upon that particular point.

Under all the circumstances we feel that with a document of such a character, which definitely and solemnly in writing adopted the direction and finding appealed from, we must dismiss the appeal.

July 28, 1943.

In re Alberta Meat Company Limited, Canada Packers Limited, Swift's Canadian Company Limited—Application for leave to appeal from finding and direction of Regional War Labour Board for British Columbia directing certain wage increases retroactive to November 3, 1942

Reasons for Judgment

We feel that it will be unnecessary for us to reserve our decision in this matter. The situation is plain enough that we can dispose of it now.

When by an amendment to the by-laws of this Board, right to appeal was given, the condition was imposed that the party seeking to appeal had to obtain leave, either from the Regional Board concerned, or from this Board. The basic principle back of that was that there had to be some reasonably important principle involved before an appeal would lie.

In this particular case the only real question involved is that of retroactivity.

It appears that the application was made on 3rd November, 1942, and that the finding and direction of the British Columbia Regional War Labour Board was given on 7th April, 1943.

Under the circumstances here the action of the British Columbia Board appears to be quite the normal procedure, and we do not see

any sufficiently important principle involved which would justify us in granting the leave to appeal.

There is one clause in the finding and direction of the British Columbia Regional Board which is, perhaps, somewhat confusing. We will not make any formal order in connection with it at this time because we think there should be no difficulty between the parties. We suggest, for the benefit of the parties concerned, that as far as restriction (1) reading "Employees above the rank of a foreman or comparable rank" that it would be in the interest of the best understanding if that were interpreted to mean foremen, and employees above the rank of foreman or comparable rank, so that foremen would be excluded from the finding and direction, and its effect.

We all feel in this case that there is no proper case made out for the granting of leave to appeal, and accordingly we have no alternative but to refuse the application.

July 28, 1943.

In re Hotel Operators Committee—Appeal from finding and direction of the Regional War Labour Board for Alberta directing certain wage increases, on an application by the Hotel and Restaurant Employees' Local 269

Reasons for Judgment

This is an appeal from a decision of the Regional War Labour Board of Alberta of the 30th of April, 1943, in connection with which the same Regional Board gave the necessary leave to appeal, notifying the appellant of that decision on May 29, 1943.

We are all of the opinion that the whole matter is in an unsatisfactory position so far as our dealing with it is concerned, but there are certain facts which are of a good deal of importance in enabling us to form the conclusions that we have.

It appears that there was a negotiation being carried on between the unions and the Hotel Association in connection with which a conciliator was appointed under the Alberta act, which is appropriate to such situations, and that as a result of his efforts an agreement was entered into as of the first of March, 1943, and that that agreement covered working conditions and other matters generally other than the question of wages. The question of wages was dealt with under clause 4 (e) of the agreement, which provides as follows:—

It is agreed that the classifications and single rates or range of rates for such classifications as approved by the Regional War Labour Board for Alberta shall be an appendix to and form part of this agreement and shall be effective from the date of this agreement and so remain in force during the term of this agreement.

Following on that an application was made to the Regional Board by the union. Its demands were presented, and on April 12, 1943, the Hotel Association was invited by the Regional Board to file whatever material it considered advisable as representing its views. It appears that on a couple of occasions representatives of the union and representatives of the Hotel Association appeared before the Board, at least on one occasion a representative of the union and a representative of the Hotel Association together.

Now of course it is a fundamental proposition in connection with the adjustment of wages under P.C. 5963 that the basis is one of comparison, and we think in the absence of reasonable proof to the contrary we must, sitting in an appellate position, assume that

the Regional War Labour Board did pay attention to this principle. The operators contend that the wage scale approved by the Regional Board is not in accord with those of the Macdonald Hotel in Edmonton, which is a first-class hotel and probably in a different category in size and so on from the hotels concerned here. We have before us the rates of a great many of the classifications of the Macdonald Hotel, and it appears that there are certain benefits which go to employees there, including a full cost of living bonus, and meals which do not prevail in the case of the appellants.

However, in deciding upon what is to be done in connection with the appeal we feel that we are obliged to pay heed to the conduct of the parties after the decision of the Regional War Labour Board was given and before the appeal was heard. Eighteen hotels appear to be members of the Association, and of those, six evidently have adopted the finding and direction of the Regional War Labour Board and have fully implemented it in accordance with the terms of the agreement of March 1. Those six are evidently in the position of having adopted it and given full effect to it, so that they can hardly be placed in the position of appellants. If relief were given to the remaining twelve and denied to them it would only have the practical effect of setting up undesirable differentials from the point of view of everyone concerned.

It perhaps is regrettable that the material that is before us, and perhaps what was before the Regional War Labour Board as well, was not as complete as it should have been in the light of the requirements of P.C. 5963; but we feel that we cannot make the gratuitous assumption that the Regional Board proceeded on a wrong basis. We feel that we are bound, in an appellate position, to assume that they have acted on a proper basis. In other words the onus in an appeal is quite heavily on the appellant to show that the Regional Board proceeded on a wrong principle, and the material that has been presented to us is far from satisfying that onus. For these reasons we feel that we have no alternative in this case but to dismiss the appeal.

July 29, 1943.

In the matter of an application of the employees of the Oshawa Railway Company for an increase in basic wage rates

Reasons for Judgment

This is an application by the Amalgamated Association of Street Electric Railway and Motor Coach Employees of America, Division 1255, for an increase in basic hourly rates of pay to the bus operators of the Oshawa Railway Company.

In addition to the agreed rates now paid under a schedule effective since July 16, 1941, the employees are being paid the \$4.25 weekly cost of living bonus.

Although the application was for an increase to all classifications, at the hearing the case was developed in respect of the 48-55 cents range of rates paid to the bus operators.

Undoubtedly, with the present increased traffic, bus drivers are doing important work under sometimes difficult conditions. Bus driving at all times requires a degree of skill and constant attention; it entails a heavy responsibility: the safety of passengers. However, the power laid down for us in P.C. 5963 does not permit the raising of wages on these grounds. We must first find that these rates are low when compared with the rates gen-

erally prevailing for bus operators in localities comparable to Oshawa. It is only when we find that they are low that we can direct increases.

We find on examining the rates prevailing for this classification in several of what we think are comparable localities that the comparison does not bring the 15 cent increase asked for within the limits of our jurisdiction. This is particularly so, when we bear in mind that these employees receive a full cost of living bonus. Having regard to all the circumstances and the nature of our jurisdiction as we have described it we feel that we can grant an increase to the bus operators of 4c per hour.

Since the case of the bus operators only was argued before us we make no finding with regard to the other classifications referred to in the application.

There will be a finding and direction in accordance with the above and the increase will be effective from March 15, 1943.

Ottawa, July 30, 1943.

In the matter of Hull Iron and Steel Foundries Limited, Hull, P.Q., and International Moulders and Foundry Employees' Union of North America, Local 318—Appeal from finding and direction of Regional War Labour Board for Quebec directing payment of cost-of-living bonus of \$3.10 per week

Reasons for Judgment

We think we can dispose of this matter here, without reserving it for consideration.

The power which we get to revise a cost-of-living bonus was given by a special Order in Council, P.C. 2370, dated March 23, 1943. It, in substance, provides that we have the discretion to increase a cost of living bonus within an industry.

It appears that an application was made to the Quebec Regional War Labour Board, at which time there were variable cost-of-living bonuses paid in this particular plant. Sixty cents per week to some employees, \$1.25 to others and \$3.10 to others, and the effect of the decision of the Quebec Regional Board was to level off the cost-of-living bonus at \$3.10 per week.

The decision did not give effect to the application of the union to have the cost-of-living bonus increased to \$4.25 per week, although it undoubtedly did give some relief to some employees who were on the lower scale of living bonus, which prevailed in the plant.

From the evidence before us, which is not altogether satisfactory, we have reached the conclusion that consideration of the geographical area where this foundry is located, in respect to other foundries notably in Montreal and Three Rivers, and from our general knowledge of the rates that are being paid in the foundry business, we are of the opinion that the appeal should be allowed, and the cost-of-living bonus to the employees of this company be increased from \$3.10 per week to \$4.25 per week, retroactive to the date of the Regional Board decision.

August 19, 1943.

**In the matter of Malagash Salt Company Limited, New Glasgow, N.S., and
Malagash Salt Mine Workers' Union of Malagash, Nova Scotia—
Application for increase in basic wage rates**

Reasons for Judgment

We feel that we can dispose of this case now, without reserving judgment on it.

It is quite evident that the interests of the union and of the management of the industry are pretty much at one, and the real problem gets down to one of ability to pay, which at the present time is affected, of course, by the fixing of prices. There can be no question that under a normal economy where competition is a matter of great importance, ability to pay is a very important factor in connection with wages.

Under a war economy, however, where the entire output of an industry is essential for the promotion, directly or indirectly, of the war effort, ability to pay assumes a somewhat different aspect, and perhaps a less important one.

It is quite evident to us that through no fault of the company the wage rates here may be described as substandard. We find it difficult to reconcile the proposition that under National Selective Service the men are frozen to the jobs, and in comparison with others in more or less the same locality can be consigned with any degree of permanency to a situation of that kind. That seems hardly consistent with the price that is being paid for salt when imported, particularly salt from the West Indies.

Now it appears that the product of this company as to a considerable portion is frozen as to price, while another portion is under a going price which as contrasted with the price of the imported product for the same use in the fisheries is rather low. We recognize from what was said by the representatives of the union that they appreciate the difficulty

in which the company finds itself under the present situation, and it would appear to us that any advance in wages will have to be recouped by the company by some means of subsidization through government agencies. Now, that being the case, we feel that a matter of this kind cannot be left in a position of impasse, and that somebody has to take the lead in connection with solving the situation whereby plainly substandard wages have to be rectified, especially when the comparative principle is fairly evident, namely a comparison with the operation of the subsidiary of the Dominion Coal Company at Springhill, Nova Scotia.

We are not prepared to give full effect to the application of the union at this time because the problem of the industry recouping itself is perhaps somewhat uncertain.

Under the circumstances we feel that a general over-all increase—by over-all we mean including all of the classifications, both underground and surface—should be given to the extent of ten cents an hour. That at this time will meet the situation, having in mind the position in which, the company finds itself. Consequently that will be the order or direction—an increase of ten cents an hour.

Usually we make these increases retroactive at least to the date of the application, but we feel in this case, where quite evidently there is an understanding of the problem between the officers of the company and the union, and on account of the fact that the company is going to have to find recoupment in some way, that we will not make this increase retroactive. We think the union understands very well our reasons. The increase will be effective as from to-day.

August 20, 1943.

**Application for direction of payment at the rate of time and one-half for
all work performed on Sundays by freight handlers employed by
the Canadian Pacific Railway Company at Port McNicoll, Ont.**

Reasons for Judgment

This application is made by the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of the employees of the Canadian Pacific Railway Company engaged in freight handling operations at Port McNicoll, Ontario. Its object has been a matter of controversy since 1938 and the parties have not yet come to agreement upon it. The em-

ployees insist upon a punitive rate for all Sunday work; the company refuses to accede.

The situation has been dealt with once before by this Board, differently constituted, and an application in similar terms was refused by a finding and direction dated July 14, 1942. The applicant's case was then put on the same basis as it was before us; no new facts have occurred to alter the situation, except possibly that since the opening of the 1943 navigation

season the freight handlers have refused to work on Sundays. The applicant contends that the Sunday punitive rate should prevail at Port McNicoll just as it prevails at Windsor, Sarnia, Hamilton, Fort William and other lake ports. The company asserts, on the other hand, that in the ports mentioned freight handling is operated by steamship companies while the Port McNicoll operation is by contrast a strictly railway operation comparable to that carried out at Depot Harbour and Britt. The respective positions were examined by the National Board last year and the punitive rate was refused unless it were taken under the usual "seventh assigned day" railway practice.

Decisions of this Board are administrative decisions and do not carry the mantle of judgments. They can be reviewed by the Board and replaced by other decisions. *Res judicata* is a doctrine of the courts, not of bodies charged with the administration of a branch of executive government. That is not to say, however, that in reviewing a previous decision the deciding body can be arbitrary and oblivious of what has been previously decided. The least that can be said is that the applicant seeking a different decision from a Board who has rendered one with which he is dissatisfied, must discharge an unusual onus; for example, he must surely indicate that the previous decision was based upon something akin to an error of principle, a misconstruction of fact or made in ignorance of a material element; or he must rely upon new circumstances and make a new case. The applicant did state that the C.N.R. operations at Depot Harbour had since been discontinued and that coal only and no package freight was handled at Britt. However, the fact does remain that Port McNicoll and Depot Harbour, when they do operate, are in essence through-transfer-points within a railway's operation of a rail-lake transportation service. The ports referred to by the applicant for purposes of comparison could perhaps be termed terminal points in the sense that the steamship companies either take their freight parcels from or turn them over to a different agency of transportation for further delivery from that point. The freight handlers at Port McNicoll are railway workers engaged in railway operations. Port McNicoll is in fact what is commonly termed a "railway town." That was the situation in 1942 and it is the situation to-day. We do not think the Board's previous decision should be altered.

It may be useful, however, to review some of the principles involved in the merits of the application. Time and one-half for Sunday work is a normal and widely observed condition of work; it is in the nature of a penalty

designed to discourage employers from requesting employees to forego the weekly day of rest. However, with the railways a special situation prevails. The service of some employees is necessary to continuous operation. The practice is to assign such employees a regular seventh day off duty each week, Sunday if possible. The punitive rate is then paid for work done on the assigned day. The company's submission is that the character of its operations at Port McNicoll justifies the seventh assigned day rule for these employees.

The question of fundamental significance here is whether or not Sunday freight handling can be avoided at Port McNicoll because, if it can be avoided, there is justification for the punitive Sunday rule rather than for the ordinary railway rule. The evidence establishes that Sunday work cannot be avoided at Port McNicoll because these freight handling operations are an integral part of the railway system and involve continuous operation. This is supported by the fact that every other C.P.R. employee at Port McNicoll is on the seventh assigned day.

The fact that the freight handlers have done no Sunday work since the opening of the 1943 navigation season does not establish that Sunday work can be avoided.

There will therefore be a finding and direction affirming the Board's decision of July 14, 1942.

August 21, 1943.

National War Labour Board

Ottawa, August 20, 1943.

MEMORANDUM: The Chairman.

From: J. L. Cohen, *Member*.

Re: *Port McNicoll Case—Application for time and a half overtime rate on Sunday.*

So that there can be no misunderstanding about the matter I should make clear again, as I indicated orally to you and Mr. Lalande two or three weeks ago, that I am not in agreement either with the Reasons or conclusions of your proposed judgment in this case. I do not however deem it necessary to write any separate Reasons and there is no reason why the judgment cannot be issued at once.

I should be obliged, however, if you would incorporate the statement that I dissent from the Judgment or instead, as you wish, a note at the bottom of your own Judgment as follows:

"I do not agree either with the Reasons or conclusions above set forth, but do not, under the circumstances, propose to write separate Reasons."

(Sgd.) J. L. Cohen.

War Emergency Training

Summary of Program—Progress of Enrolment during July— Additional Plant Schools Approved

THE War Emergency Training Program provides various types of industrial training designed to equip Canadian men and women to make an improved contribution to the war effort. Established in the early summer of 1940, the Program evolved from the Youth Training Plan set up in 1937 as a relief measure with the object of fitting young people for employment. Since its inception the Program has greatly expanded, over a quarter of a million persons having taken advantage of its facilities in its three years of operation.

The Program provides the following types of training:

(1) Pre-employment classes in vocational schools for men and women about to enter war industry;

(2) Part-time classes, principally for the up-grading of persons already employed;

(3) Training in plant schools;

(4) Special classes for foremen and supervisors;

(5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.

(6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health.

(7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

War Emergency Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the costs of machinery and equipment purchased. All other costs are paid by the Dominion with funds from the War Appropriation.

From the beginning of the program up to June 30, 1943, gross enrolment has been as follows:

	Enrolment
Industrial Training (all types) ..	164,986
Army	32,278
Navy	5,181
R.C.A.F.	46,893
Rehabilitation (discharged persons)	1,496
University Students	2,906
Total	253,740

The accompanying tables give detailed statistics showing the progress of the various branches of the Program. Table I records the training given in vocational schools to men and women taking pre-employment classes; table 2 shows the number enrolled in vocational schools from the Armed Forces; and table 3 gives the figures for those engaged in plant schools and part-time classes in industry.

The gross enrolment figures given above (not taking into account duplications of enrolment in more than one type of class) show that some phase of War Emergency Training has been participated in by one person out of every 23 of Canada's population over 16 years of age excluding the agricultural population and unemployables.

Progress of Enrolment During July

The enrolment in full-time pre-employment classes in July showed a fair increase for the first time since the fall of 1942. The number of those placed in employment during the month also showed a slight increase. The seasonal decline in attendance at part-time classes continued owing to the summer vacation season, when the enrolment in this type of evening class always declines.

Training in Industry

Approval was given to 7 additional plant schools during the month, making a total of 101 approved up to July 31. These are distributed as follows:

Nova Scotia	3
New Brunswick	2
Quebec	11
Ontario	69
Manitoba	10
Alberta	1
British Columbia	5

(1) Trainees in Part-time Classes consist largely of employed persons who are being given training at the request of employers in war production who wish to up-grade their employees.

(2) Includes those graduates who, though actually placed prior to July 1, 1943, were not so reported until after July 1, 1943.

Of the schools approved, seven either never started at all or were cancelled for failure to adhere to the conditions. Thirty-three others have trained the required number of individuals and have suspended operations.

During the period April 1 to July 31, over 10,000 foremen, charge hands, supervisors have received certificates for attendance at one of the Foremanship Training classes. The activities in this feature of the program have also slackened off during the vacation season. Many statements have been received from companies pointing to concrete benefits and results from participating in Foremanship Training.

The plan to train secondary school students during the summer holidays for farm work in Alberta and Saskatchewan has not worked out very successfully. In Saskatchewan, less than 150 had enrolled by the end of July, and in Alberta, the plan was cancelled altogether, as

requests for this type of assistance were received from only a few dozen farmers; and as the number of applicants was only slightly over 100 students, most of whom having already worked on a farm were not considered to need additional training.

Training in Armed Forces

An interesting development in the Army classes was the establishment of classes to study the Japanese language in British Columbia. This was provided to meet the requests from local Army officers.

The classes for Air Force tradesmen showed a large increase owing to the inauguration of special emergency summer classes for pre-aircrew personnel. Thirteen special schools were opened for this purpose in addition to the ten regular schools in most of which the enrolment had increased.

Recent Amendments to the Unemployment Insurance Act, 1940

Coverage of Act Extended—Changes in Regard to Benefit—Enforcement—New Contribution Regulations

BILL 136 passed by the House of Commons on July 17, and later approved by the Governor in Council, amends and improves the Unemployment Insurance Act of 1940. The amendments which became effective on September 1, 1943, and now have the force of law, do not involve any change in the fundamental principles of the original Act.

The Unemployment Insurance Act, 1940, was formulated on the basis of the experience of other countries in unemployment insurance and, for this reason, the Canadian Act was by no means a new experiment. The recent changes which were made were deemed necessary only because of minor administrative problems and new industrial conditions brought about by the war.

The main features of the recent amendments are summarized below.

Coverage of the Act

1. Employment in Canada by a Foreign Government.—It is now clearly stipulated that employment in Canada by a Foreign Government may be insured with the concurrence of the government concerned and the Commission. This amendment will remove doubts which have arisen as to the application of the Act to employees in Canada of the United Kingdom, Commonwealth Governments and Foreign Governments.

2. Employment by a Hospital or a Charitable Institution.—Any group or class of employees in hospitals or charitable institutions not carried on for purposes of gain may now be insured with the consent of the Commission. Previously, employees of charitable institutions were not insurable, but in view of the fact that their remuneration was comparatively low, many had requested that they be afforded the protection of the Act.

3. Employment by Municipal, Provincial and Federal Governments.—Persons in such employment may be excepted from the Act if they have been certified as being in permanent employment. Under this amendment the exception previously granted to Federal Civil Servants appointed under the Civil Service Act has been repealed and the insurability now depends on whether or not they have been certified as being in permanent employment. This change places employees of Municipal, Provincial and Federal Governments on the same footing.

4. Employment by a Public Utility.—Employees of any public utility are now insurable, (except waterworks which have not been affected by this amendment). Previously, employees of a public utility operated in connection with a municipality could be excepted if they were certified as being in permanent employment. This amendment will remove the

anomaly which existed in that these municipal bodies operate in direct competition with the private companies which were thus placed at a disadvantage.

5. Change in \$2,000 Ceiling.—All employees are now insurable regardless of the amount of their earnings, unless their contractual rate of pay is on a semi-monthly, monthly or commission basis, in which case they are excepted if their annual earnings exceed \$2,400. In determining whether annual earnings exceed this figure, payments of cost-of-living bonus will be included but not earnings in respect of overtime. The change in the ceiling was recommended by the Advisory Committee because many industrial employees were earning in excess of \$2,000 due to war conditions and were not therefore protected by the Act, except as provided by Order in Council P.C. 10156 which has now been repealed.

6. Employment in Remote Areas.—A new section which has been added to the Act gives the Commission power to pass regulations excepting employment in any specified area in which there is inconsiderable insurable employment. There are many administrative difficulties in arranging payment of contributions and conducting inspections in the distant northerly areas of Canada.

Determination of Coverage

A new amendment provides that where any question arises as to whether a person was or was not employed in an excepted employment, that question shall be decided by the Commission. This amendment is intended to clear up any possible ambiguity as to the proper body to decide a question of coverage.

Persons to be Treated as Employers in Certain Cases

In any case or class of cases where employed persons work under the general control of some person other than their actual employer, the Commission may by special order provide that such other person shall, for the purpose of payment of Unemployment Insurance contributions, be deemed to be the employer. The person deemed to be the employer for contribution purposes may recover employer contributions from the actual employer.

Benefit

Establishment of Benefit Year.—A "benefit year" is the period of twelve months beginning on the date on which an applicant for benefit proves (a) that he has paid contributions for at least 180 days within the two years immediately preceding the date of his

application; (b) that since the commencement of his last benefit year contributions have been paid in respect of him for at least sixty days. Of course, for the establishment of the first benefit year, subsection (b) does not apply. Previously, an applicant could not establish his second or subsequent benefit year unless he had paid contributions for at least sixty days *subsequent to the last day on which he drew benefit in his previous benefit year.*

The previous wording of subsection (b) led to some results which were not contemplated when it was originally enacted.

The amendment cuts down the requirement of sixty additional daily contributions to the extent that they need only be made since the commencement of the previous benefit year.

Payment of Benefit to Non-Residents of Canada.—A new amendment gives the Commission authority to make regulations permitting, under certain conditions, the payment of benefit to persons who are non-residents of Canada; for example, a resident of Detroit employed in Windsor.

Inspection and Enforcement

Designated Officers May Administer Oaths.—Any officer or clerk appointed under the Unemployment Insurance Act who is designated by the Minister for the purpose may, in the course of his employment, administer oaths and take and receive affidavits, declarations and affirmations for the purpose of or incidental to the administration or enforcement of the Act or regulations made thereunder and every such officer or clerk shall have all powers of a commissioner for taking affidavits.

Prosecution Against a Delinquent Employer.—A new amendment provides that for purposes of prosecution against a delinquent employer, any number of offences for failure to pay contributions may be included in one information or charge.

Under this amendment, it is no longer necessary to have one information laid for each employee for each pay period. One information may include a series of similar offences.

Another amendment provides that, in addition to the fine or penalty imposed on an employer convicted of the offence of failing to pay contributions, a further penalty, equal to the amount of contributions he has failed to pay, shall be imposed and applied in payment of such contributions in arrears. Previously, although the payment of the additional penalty was credited to the Insurance Fund, it was not credited towards payment of contributions in arrears. The amendment thus

relieves the convicted employer of the double payment of contributions.

Employers Required to Keep Records and Make Returns.—The Commission may now require any person to keep such books, records and accounts that the Commission may direct and may require any person to make written returns of information deemed by the Commission to be necessary for the purposes of the Act. Failure to comply with any such direction or requirement of the Commission shall be an offence.

Determination of Amount of Contributions Payable, Where no Records Kept.—Where, in the opinion of the Commission, an employer has failed to keep such adequate books, records and accounts as would enable an Inspector of the Commission to determine the contributions payable by the employer in respect of each of his insured employees, the amount of contributions payable may be determined on the basis of 3 per centum of the total remuneration which has been paid

or which has become payable by the employer to his employees.

Determination of Earnings.—Where an employed person's remuneration is not pecuniary or is only partly pecuniary and the whole or part of such non-pecuniary remuneration consists of room and board or living quarters or any other consideration, the value of which has not been decided by mutual agreement between the employer and the employed person, the Commission may determine the value of such remuneration.

New Contribution Regulations

In view of the amendments to the Act and the many changes involved in the Regulations dealing with Contributions, the Commission has thought it advisable to revoke the regulations in effect prior to September 1 and to re-enact a new set of Contribution Regulations which were published in an extra edition of the Canada Gazette, dated September 3, 1943.

Recent Activities of the Unemployment Insurance Commission

Development of Staff Training—Insurance Registration—Claims for Benefit—Unemployment Insurance Fund

FIELD surveys undertaken by the Regional staff training advisers of the Unemployment Insurance Commission have been fairly well completed and much information has been compiled which will be of great value in carrying out the staff training program which was inaugurated by the Commission in May (L.G., June, 1943, p. 820; L.G. August, 1943, p. 1146). Staff training has become definitely an integral part of the operations of the local Employment and Selective Service offices across Canada. The following are typical examples of training programs already instituted:

In the Pacific Region "Enforcement Procedure Conferences" were held at several points. These Conferences were attended by Managers of the Local Offices in the area and instruction was given in the enforcement procedure for the carrying out of National Selective Service Regulations.

In the Prairie Region instruction was also given in enforcement procedure, in which Mr. Walsh and Mr. McLean of Head Office, participated.

Following the successful three-day zone School held in Ottawa, attended by Managers of ten Local Offices in the district, similar Schools are being held throughout the Province of Ontario to embrace all Managers of Local Offices. The delegates gained a new vision of Staff Training responsibilities and possibilities and the whole work of Local Office operation received an impetus.

A vigorous program was planned for a three-day Training course for the Women Supervisors of the Toronto Local Office. This Supervisor of the Women's Division of this School was conducted by Miss M. Eadie, Local Office, assisted by Mr. R. Stevenson, Staff Training Adviser; Mr. J. W. Temple, Manager of the Office, and women holding executive positions in business.

Special attention is just now being given to a course for the staff of the Women's Division of the Montreal Local Office, where the tremendous volume of work demands a highly trained staff. Daily "on-the-job" training is given by Mr. A. J. Trudelle, Regional Staff Training Adviser, and Mr. L. M. Bergevin, loaned from the Travelling Supervisors staff, and group conferences are held each day from 4 to 5.30 o'clock, for the purpose of training the entire staff.

In the Maritimes, Staff Training Committees have been set up in most of the larger offices at least, including Moncton, Halifax and Saint John. A Training School was held for the purpose of clarifying procedure in connection with compulsory employment orders, which was attended by Local Office employees and the Regional Enforcement Officer and members of his staff. Mr. L. J. Curry, Staff Training Adviser for the Maritimes, was assisted at this School by other Regional Officials.

An induction training course has been prepared and sent to the Regional Staff Training Advisers for distribution to Local Office Managers for their use in training new employees.

Visits to industrial plants by Interviewing and Placement Officers of Local Offices have continued to be fruitful. New placement opportunities are discovered and the interest of the Local Office officials is stimulated.

Insurance Registration

Reports received from local offices of the Unemployment Insurance Commission showed that at September 1, 132,088 employers with insured employees were registered, and 2,636,826 employees had been issued with insurance books.

The breakdown of employers and employees according to regions in which registration took place is shown in the following table:—

TABLE I

PROGRESS OF REGISTRATION AT SEPTEMBER 1, 1943

Region	Employers' Establishments Registered	Insured Persons Registered
Maritimes	10,658	190,418
Quebec	35,171	862,532
Ontario	48,453	1,014,384

Claims for Benefit

The amount paid in claims for unemployment insurance benefit during the period from April 1, 1943 to July 31, 1943 was \$379,501.37. In this period 10,021 claims were received at the five regional and four district offices of the commission, of which 7,610 were allowed, 2,137 not allowed with 274 claims pending. (See Table II).

An analysis of the 2,137 claims not allowed by insurance officers revealed the following reasons for non-allowance: 598 claims under Section 28(i) in which the claimants had insufficient contributions; 116 claims under Section 28(ii) in which 76 claims were not made in the prescribed manner and 40 of the claimants were not employed; 49 claims under Section 28(iii) in which 38 were not capable of work and 11 were not available for work; 60 claims under Section 43 (a) for loss of work due to labour dispute; 26 claims under Section 43 (b) (i) for refusal of offer of work; 9 claims under Section 43 (b) (ii) for neglect of opportunity to work; 1 claim under Section 43 (b) (iii) for failure to carry out written instructions; 1,256 under Section 43 (c) of which 134 were discharged because of their own misconduct and 1,122 for voluntarily leaving without just cause; 1 claim under Section 43 (d) for being under 16 years of age; and 21 under Section 43 (f) in which 15 were in class 0 contributions and 6 for other reasons.

Appeals and References

During the period April 1, 1943, to July 31, 1943, there were 305 references and 46 appeals

Appeals to Umpire

Eight claimants have sought permission from the Chairmen of the Courts of Referees to appeal to the Umpire under Section 58 (c) (ii). Permission was not granted in any of these cases. Three appeals were made by claimants or by associations representing the claimant and 1 by an insurance officer.

Staff Changes Employment and Selective Service Branch, Department of Labour

Changes were made early in September in the administrative staff of the Employment

and Selective Service Branch of the Department of Labour as follows:—

H. F. Caloren, who has been Chief Administrative Officer for the Department, was made Assistant Director and Chief Executive Officer of the Employment Service and Unemployment Insurance Branch. In this capacity, Mr. Caloren will be a general adviser to the Director of the Branch, Mr. Allan M. Mitchell.

R. G. Barclay became Assistant Director—Insurance.

W. K. Rutherford was promoted to Assistant Director—Employment.

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of July, as reported by employers.—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

The report this month indicated a marked expansion in industrial employment, according to data submitted by 13,766 establishments employing a total of 1,845,284 persons at the beginning of July, as compared with 1,819,239 at the beginning of June. A considerable proportion of the gain in employment at the date under review took place in manufacturing, in which the co-operating establishments increased their staffs by 11,924. Employment in most of the non-manufacturing divisions showed seasonal advances; except in transportation, these were generally below-average in extent. There were moderate gains in the mining of non-metallic minerals (other than coal), and in communications, services and trade, together with larger increases in transportation and construction.

The index number of employment (based on the average for the calendar year as 100) was 183.8 per cent, as compared with 181.2 revised from 181.1 in the preceding month, and 175.7 at July 1, 1942.

Each month the co-operating firms furnish information concerning payrolls which is incorporated in this article. The per capita average weekly wage in the industries submitting returns rose from \$30.93 at June 1,

to \$30.95 at the beginning of July, as compared with \$28.49 at July 1, 1942.

Employment conditions at the end of August as reported by Employment and Selective Service Offices.—Reports from the Employment and Selective Service Offices of the Unemployment Insurance Commission give a brief survey of the employment situation in various industries at the end of July. These reports describe employment conditions in the Maritimes, Quebec, Ontario, the Prairie Provinces, and British Columbia.

Applications for employment; vacancies, and placements, July, 1943.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

These reports for the four-week period July 2 to July 29, 1943, showed an increase of 2.4 per cent in the average daily placements as compared with those of the five-week period May 28 to July 1, 1943, and a gain of 253 per cent in comparison with the month of July, 1942. Vacancies during the four weeks numbered 255,597, applications 226,622 and placements in regular and casual employment 176,311.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of August, 1943, the percentage of unemployment among trade union members was .4, as compared with percentages of .6 in July and 1.8 in August, 1942. The August percentage was based on returns compiled from 2,349 labour organizations with a total membership of 464,961 persons.

The Employment Situation at the Beginning of July, 1943 as Reported by Employers

IN conformity with the movement indicated in 21 of the last 22 years, there was considerable expansion in industrial employment at the beginning of July, when the 13,766 firms furnishing data to the Dominion Bureau of Statistics reported a staff of 1,845,284, as compared with 1,819,239 at the beginning of June. The increase of 26,045 persons, or 1·4 per cent, (which was accompanied by a rise of 1·5 per cent in the indicated payrolls) was considerably smaller than that at July 1 in any other year since the outbreak of war, being also below the general average in the period from

1920. Nevertheless, the index, at 183·8 per cent of the 1926 average, was exceeded only by that of 186·5 at December 1 of last year; the June 1, 1943, figure was 181·2 (revised from 181·1), and that at July 1, 1942, was 175·7. Since the latest advance was rather less than usual for the time of year, the seasonally-adjusted index showed a decline, falling from 181·2 at June 1, to 180·2 at the date under review; this is the third successive reduction in the seasonally-corrected index.

A considerable proportion of the gain in employment at the date under review as com-

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

pared with June 1 took place in manufacturing, in which the co-operating establishments increased their staffs by 11,924. These additions were much smaller than at July 1 in either 1942 or 1941, but exceeded the average at that date in the experience of past years. In accordance with recent trends, most of the latest increase took place in plants turning out durable goods, in which the co-operating manufacturers reported an additional 9,400 employees; this was decidedly smaller than the gain at July 1, 1942. The largest advances were in non-ferrous metal and lumber plants. In the non-durable goods classes, animal and vegetable food, pulp and paper, beverage, petroleum and miscellaneous manufacturing groups showed considerably greater activity, but tobacco, textile and chemical works released employees.

Employment in most of the non-manufacturing divisions showed seasonal advances; except in transportation, these were generally rather below-average in extent. There were moderate gains in the mining of non-metallic minerals (other than coal), and in communications, services and trade, together with larger increases in transportation and construction. The expansion in the latter was unusually small for the season, being less than at July 1 in any other year since 1920, with the exception of 1921 and 1932.

Payrolls

The payrolls disbursed by the co-operating firms at the beginning of July amounted to \$57,119,522, exceeding by 1.5 per cent the sum of \$56,265,170 reported by the same establishments at June 1. The existence of industrial disputes in some areas and industries, the widespread observance of the St. Jean Baptiste holiday in the province of Quebec, and the more general loss of working time due to vacations, affected the latest aggregate, and consequently, the average per employee. The latter, however, showed a slight advance, standing at \$30.95, as compared with \$30.93 at June 1. The average at July 1, 1942, had been \$28.49, and at July 1, 1941, \$25.49. The latest figure is the highest in the record of 26 months, with the exception of the April 1, 1943, average of \$31.14; the number in recorded employment had then been smaller.

In the period from June 1, 1941, the average weekly earnings of the typical employee of the co-operating establishments have risen by 22.6 per cent. In this period, the cost-of-living index has advanced by 7½ per cent, while increases in taxation and other expenses have also tended to offset a considerable part of the gain in the weekly pay envelope of the average wage-earner. Nevertheless, the employment of additional members of many families has resulted in a considerable im-

provement in the financial position of a large proportion of the total population.

From July 1, 1942, the general index of employment has risen by 4.6 per cent, that of payrolls, by 12.5 per cent, while the per capita average earnings have shown a gain of 8.6 per cent.

If the statistics of employment and payrolls for financial institutions are added to those given above for the eight leading industries, the latest survey depicts the situation reported by firms employing a total personnel of 1,908,607, as compared with 1,882,564 at the begin-

ning of June. The aggregate weekly payroll in the nine leading industries (viz. manufacturing, logging, mining, communications, transportation, construction and maintenance, services, trade and finance), was \$59,112,149, as compared with \$58,232,686 at June 1. The per capita average in the nine industries was \$30.97, a figure slightly higher than that of \$30.93 at June 1. The average at the beginning of July, 1942, was \$28.55.

Table I summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic

¹ This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, with the exception of electric light and power.

areas, and the eight leading industrial cities, and gives comparisons as at June 1, 1943, and July 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The report indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 20.1 per cent, while the aggregate weekly payrolls of those workers are higher by 45.7 per cent. Including finance, the gain in employment from June 1, 1941, to July 1, 1943, amounted to 19.6 per cent, and that in payrolls, to 44.5 per cent. The explanation previously given for the much greater rise in the salaries and wages than in the numbers employed may again be stated:—(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the payment of a cost-of-living bonus to the majority of workers; the rates at which

this allowance has been calculated have been increased on more than one occasion since its institution, and (3) the progressive up-grading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been granted.

The influence of the war has resulted in particularly marked expansion in employment and payrolls in factories, in which the rate of acceleration in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 34.8 per cent from June 1, 1941, to July 1, 1943, and that of payrolls has advanced by 65.1 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

Employment and payrolls in the production of durable goods in the period of observation have shown especially marked expansion, there being an increase of 56 per cent in the index of employment and of 94.2 per cent in the salaries and wages distributed by the co-operating employers from June 1, 1941, to July 1, 1943. Although there has more recently

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

* Revised.

been a slackening in some of the non-durable industries, the index number of employment in this group at the date under review was higher by 15.8 per cent than that indicated at June 1, 1941, since when there has been an increase of 34.6 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

* Largely as a result of industrial classifications, a number of the indexes here shown for June 1, 1943, have been revised.

age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Employment and Payrolls by Industries

Manufacturing.—There was further expansion in manufacturing at the beginning of July, when the gain was decidedly above-normal for the time of year, although it was substantially less than that indicated at July 1 in either 1942 or 1941. Data were compiled from 7,704 factories with 1,182,859 employees, as compared with 1,170,935 at June 1. This increase of 11,924, or one per cent, raised the index from 224.2 at June 1 to a new maximum of 226.5 at the date under review, when it was 8.1 per cent higher than the July 1, 1942, index of 209.5. Reflecting the greater-than-average improvement recorded in the latest survey, the seasonally-adjusted index advanced, rising from 219.8 at June 1, to 221.9 at July 1. This is the first increase since January 1 in the seasonally-corrected index for manufacturing.

As was pointed out in the June 1 report on employment and payrolls, the upward movement in manufacturing in the months of 1943 for which data were available at the time of writing, provided employment for a much smaller number of additional workers than was absorbed in factory operations in the same period of either 1942 or 1941; the general gain from January 1 was, indeed, below-average in the experience of pre-war years. Thus, the increase in the index from January 1 to July 1, 1943, has amounted to 6.9 points, or 3.1 per cent, as compared with an average advance of 10 points, or 10.9 per cent, between those two dates in the period, 1921-1939. In the years, 1940-1942, the rise averaged 14.3 per cent. The slackening in the rate of acceleration shown in more recent months has largely resulted from the following main factors: (1) the further absorption of the younger workers in the armed forces (2) changes in production requirements which have developed as the war progresses, and (3) increasing shortages of materials and labour for civilian production.

Continued and greater gains were reported at the beginning of July in the durable goods division; in this, 9,400 additional men and women were employed by the co-operating firms. Most of the expansion took place in the non-ferrous metal, iron and steel, electrical apparatus and lumber divisions, that in the first-named being particularly marked. The

index in the durable goods group, at 283.9, established a new all-time maximum. The latest figure was 15.9 per cent higher than that of 244.9 at July 1, 1942. Among the non-durable classes, animal and vegetable food, pulp and paper, beverage, petroleum and miscellaneous product factories showed the most noteworthy improvement. On the other hand, textile, tobacco and chemical plants released considerable numbers of employees. The losses in textiles were seasonal in character, but rather exceeded the average at July 1 in the experience of earlier years of the record. The index of employment in the light manufacturing industries as a whole, at 181.7, was fractionally lower than at the same date in 1942, the third month in succession in which the comparison over the 12 months has been unfavourable.

The sum of \$37,391,532 was expended at July 1 by the co-operating manufacturers in payment of services rendered in the week preceding; this figure exceeded by one per cent that of \$37,027,356 indicated at June 1. The average per employee showed little change, being \$31.62 at June 1, and \$31.61 at July 1, as compared with \$29.16 at the beginning of July, 1942. The latest figure was affected by the widespread observance of a religious holiday in Quebec, together with a fairly general loss of working time resulting from vacations.

The index of payrolls, based on the disbursements at June 1, 1941, as 100, was 165.1; this was slightly higher than the June 1 figure of 163.5, and 15.4 per cent higher than that of 141.7 at July 1 of last year. The latter increase has accompanied that of 8.1 per cent in the index of employment. The reasons for the disparity in the rates of gain have already been given. In the manufacturing industries, the upgrading of employees as they acquire experience is of especial and increasing importance, tending to offset the effect of the large scale dilution of labour resulting from the shortage of workers which has become acute with the development of the war effort. The changing industrial distribution of the wage-earners in recorded employment has also contributed materially to the relatively greater gain in payrolls, there being a rising proportion of workers in the more highly-paid heavy industries. At July 1, 1943, such industries provided work for 56.9 per cent of all those engaged in manufacturing, exclusive of electric light and power, while at the same date in 1942, the proportion was 53.1 per cent. The importance of this growing concentration in the durable goods group is emphasized by the fact that the July 1, 1943, average, at \$34.79, was \$6.76 higher than at June 1, 1941, while in the light manufacturing classes, the latest

average, standing at \$27.25, has risen by only \$3.88 in the 26 months.

From the institution of the payroll statistics early in 1941, there have been extremely marked advances in salaries and wages distributed to persons employed in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured product, electrical apparatus and tobacco industries. The advances in those industries have been accompanied by noteworthy, though relatively smaller gains in employment. In practically every case, and notably in the industries just mentioned, the per capita average earnings in the various branches of manufacturing were considerably higher at the date under review than at July 1, 1942.

Many factors contribute to the differences found in the average weekly earnings in the various industries. Prominent among these is the sex distribution of workers in the various industries, a factor which is associated with that of age, the women workers, in general, tending to belong in the younger age groups, where earnings normally are less than among more experienced employees. The presence or absence of overtime work also substantially affects the per capita average earnings.

Logging.—There was a further but smaller increase in employment in logging; this was contra-seasonal in character. Returns were received from 498 firms having 44,403 employees, as compared with 43,970 at June 1. The amount paid in weekly earnings at July 1 aggregated \$1,154,581, considerably exceeding that of \$1,080,649 reported at June 1. The average per employee at the date under review was \$26, as compared with \$24.58 at June 1, and \$21.67 at July 1, 1942. As stated in previous press letters, the figures of aggregate and per capita earnings in logging do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings; these differ greatly in various parts of the country, the average in British Columbia being decidedly higher than in any other province.

The July 1 index of employment stood at 148.3; as compared with 169.8 at July 1, 1942, there was a falling-off of 12.7 per cent, accompanied by a gain of 0.6 per cent in the index of payrolls in the same comparison.

Mining.—A slight seasonal advance was indicated in mining at July 1. This took place in quarrying and the mining of various non-metallic minerals, other than coal; the extraction of coal showed a further small reduction,

and there was also a falling-off in employment in metallic ore mines. The general increase of 144 workers was below-average, being also less than that at July 1, 1942, when the index of employment in mining was higher by 11.2 per cent. Information was tabulated from 466 operators, with a staff of 73,200 at the date under review. The weekly payrolls disbursed aggregated \$2,670,983, exceeding by 0.6 per cent the June 1 total of \$2,655,254. The average per employee at the beginning of July was \$36.49, as compared with \$36.35 in the preceding period of observation, and \$33.20 at July 1, 1942. Since then the index of payrolls has fallen by 2.5 per cent, a decline which was considerably less than that of 11.2 per cent in the number of employees.

Communications.—Further moderate improvement was noted in telegraphs and telephones at July 1, when there was, however, a decrease in the indicated payrolls; 59 employers reported 27,997 employees and a weekly payroll of \$808,736, as compared with 27,677 workers and the sum of \$812,821 paid in salaries and wages at June 1. The per capita average was reduced from \$29.37 at that date, to \$28.89 at the first of July, as compared with \$27.82 at the same date last year. The latest index of employment, at 104.8, was fractionally lower than that of 105.7 at July 1, 1942, but the index of aggregate payrolls has risen by three per cent in the year.

Transportation.—Continued expansion was indicated in transportation at July 1, there being greater employment on steam railways, in local transportation and shipping and stevedoring. The general improvement rather exceeded the average for the time of year. Data were received from 589 companies and branches with a staff of 147,992 persons, as compared with 145,005 at the beginning of June. This advance of 2,987, or 2.1 per cent, raised the index to 117.2, as compared with 114.8 at June 1, and 108.1 at July 1, 1942; in the latter comparison, there was an increase of 8.4 per cent, accompanied by that of 12.2 per cent in the index of payrolls in the 12 months. The weekly salaries and wages reported at the date under review aggregated \$5,277,391, exceeding by \$48,675 the total of \$5,228,716 indicated in the last report. The per capita average fell from \$36.06 at June 1, to \$35.66 at July 1, as compared with \$34.40 at the same date in 1942.

Construction and Maintenance.—Employment in construction and maintenance was brisker, but the additions to the working forces were extremely small for the time of year; only at July 1 of 1921 and 1932 were the gains lower than those at the date under

review. Building, highway and railway construction and maintenance work showed moderate improvement. Information was furnished by 1,537 employers, with a working force of 168,665 persons, as compared with 159,494 at June 1. The salaries and wages disbursed totalled \$5,011,825, as compared with \$4,711,380 in the preceding report. The per capita average advanced from \$29.54 at June 1, to \$29.71 at the beginning of July, as compared with \$25.99 at July 1, 1942. The index of employment, at 133.6, was three per cent lower than at the same date of last year; the index of payrolls, however, has risen by 7.6 per cent in the 12 months.

Services.—Following unusually large increases in employment at June 1, there was a relatively slight gain at July 1, when 638 co-operating establishments indicated a staff of 43,115 persons, 222 more than at June 1. The advance was reported largely in laundries and dry cleaning plants, while hotels and restaurants released some workers. An aggregate of \$803,579 was disbursed in weekly payrolls at the beginning of July, as compared with \$794,976 at June 1. The index of employment, at 193.0, was 4.4 per cent higher than that of 184.8 at the first of July of last year; in this period, the index of payrolls showed a rise of 12.4 per cent. The per capita average advanced from \$18.53 in the preceding report, to \$18.64 at the date under review, as compared with \$17.27 at July 1, 1942. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed received board and lodging as

part of their remuneration; the former division constituted some 62 per cent of the total personnel reported in the service division as a whole at the date under review. Part-time work is also an important factor in the service group, particularly under wartime conditions.

Trade.—There was a seasonal increase of slightly less than normal proportions in trade at the beginning of July, when the 2,275 establishments making returns increased their staffs by 844 men and women, to 157,053. The weekly salaries and wages distributed by the co-operating firms totalled \$4,000,895, an average of \$25.47 per employee; at June 1, the reported payrolls aggregated \$3,954,018, a per capita average of \$25.31. The July 1, 1942, figure had been \$24.32. Since then, the index of employment has fallen by practically one per cent, but the payrolls have gained almost three per cent.

Financial Institutions.—A combined working force of 63,323 men and women was employed by the 753 co-operating financial institutions; this showed little change from the staffs at June 1. The weekly payrolls disbursed at the date under review amounted to \$1,992,627, as compared with \$1,967,516, paid on or about June 1. The per capita average rose from \$31.07 at June 1, to \$31.47 at July 1, as compared with \$30.11 at July 1, 1942. The index of employment in financial institutions, at 122.6, was practically the same as that of 122.4 at the same date of last year, since when the index number of payrolls has advanced by 4.7 per cent.

Employment Conditions at the End of August as Reported by Employment and Selective Service Offices

THE following abstract of regional summaries of reports from Local Employment and Selective Service Offices of the Unemployment Insurance Commission indicates that employment conditions across Canada at the end of August were as follows:—

Maritime Region

The men procured from the Armed Services were of very considerable help to the farmers. Wet weather had delayed haying in some areas, where the crop was still standing, some of this would be lost.

Fishing operations continued at high peak; it gave promise of remaining very active for some weeks; catches and prices were good. The fish processing plants were operating at capacity.

It was reported from one area that a large lumber company was requested by the

Dominion Government to supply 2,000 cords of fuel wood in the next forty days. An order was placed for fifty woodsmen and every effort was being made to procure the men.

Fire broke out in No. 12 colliery, Inverness, and mining was stopped. The men released were quickly absorbed at other coal mines. A strike involving a large number of men was reported from another mining area, but the men returned to work pending a decision which was expected in a few days.

Special attention was directed toward replacing men by women at all possible points in manufacturing industries and considerable progress was made. Paper products output was maintained at high level. Some paper mills were doing war work in the machine shops.

There was a general shortage of carpenters for construction work. One large construction firm placed an order for twelve women to do

stencilling, nailing, gluing and spray and brush painting. A course of instruction would be given and the women allocated to the work they were best qualified to do. If this experiment proves successful, many more women will be employed by this firm.

The railroads reported a shortage of men for section crews and other maintenance work.

Quebec Region

Harvesting was generally late; this condition left some farmers available for temporary work. At a few points there were requests for farm labourers. Several canneries stated that the vegetable crops in their districts were poor in quantity and quality.

Over 7,000 bushmen were requested on large orders; not all of these were needed for fuelwood contracts but vacancies for fuelwood cutters were mounting. The only men available for this work seemed to be farmers after harvesting finished.

The gold mines were still losing miners; the base metal mines around Rouyn needed 600 men. The chrome and asbestos mines were operating smoothly on a 24-hour schedule.

Food processing plants at Hull reported conditions good, but Montreal's food warehouses, flour mills and packing plants continued to have a high labour turnover and shortage. At Port Alfred, unskilled labour continued to drift away and the pulp and paper output was dropping. Textile mills were very busy. At Drummondville a growing reluctance was noted for work on the late shift (6 p.m. to 4.40 a.m.) and efforts were made to change the hours to suit both women workers and employers.

Welders, machinists and toolmakers were needed at Montreal's aircraft plants and shipyards. In Quebec the shipyards received many trained assistants from the Youth Training Plan but Levis faced the loss of more than 200 students. Search for potmen for aluminum plants continued with improved results. Lay-offs in construction at St. Hyacinthe and L'Île Maligne resulted in a quick transfer of workers. In Montreal only high priority was filled.

Railway traffic was heavy, repair gangs were working in most districts.

There was an improvement in the supply of waitresses and kitchen help for hotels in Montreal and Quebec, but hospitals and laundries remained very short-handed.

Ontario Region

Many farmers desired to go to the Prairies to help with the harvest, an ample number was assured. At St. Catharines the peach picking began, a fair crop was looked for.

Offices in Northern Ontario reported an acute shortage of bushmen, loggers and pulp cutters. Sawmills were operating with reduced crews.

Sudbury required many underground workmen, miners were also needed at Perth. Hamilton transferred several coal miners to Western Canada coal fields.

Employees laid off by one of the departments of the Massey-Harris plant at Woodstock were placed on similar work with other firms. The D.I.L. at Oshawa needed 600 women. National Fertilizers at Ingersoll applied for 20 Japanese labourers. Unfavourable weather prevented a steady flow of fruit and vegetables to the canneries, only a small part of the tomato crop had ripened. Airplane plants were generally short-handed. At most offices orders increased sharply, due to students returning to school.

At Kapuskasing surfacing on the Trans-Canada highway was hampered by wet weather. Labourers were still required at Decew Falls, and for highway work near Ingersoll. Windsor needed 30 bricklayers. Barrie had orders for labourers, roofers and carpenters for military construction. B.A. Oil required 150 labourers for new plant construction at New Toronto. Kingston shipyards were extending their plant and required both labourers and mechanics skilled in various shipbuilding trades.

Truck drivers for heavy hauling and coal delivery were in demand at most offices. Stratford had orders for the railway Bridge and Building department. Sault Ste. Marie required firemen and deckhands for lake boats.

Prairie Region

In Manitoba many soldiers were placed on farms for the harvest season, but many vacancies remained unfilled. The harvest was generally well advanced with threshing in full swing. Saskatchewan reported the harvesting well under way, with a great demand for experienced stookers; some experienced women were referred to this work. Where conditions permitted combines were used. Weather conditions were generally good and many Ontario harvesters would be needed. Alberta's crops were filling out nicely but it would be at least ten days before harvesting would commence.

Fuelwood cutters were very scarce, the demand being only partially met. Woods operators feared a big shortage of men for autumn operations. Prop cutters were needed to keep the mines supplied.

The mining industry in Northwestern Ontario reported an acute shortage of help with no improvement in sight. Steep Rock

Iron Mines required underground and surface drillers for tunnelling. Estevan required unskilled mine labourers. Alberta needed qualified coal miners. Coal production increased but poor housing accommodation was the bottleneck.

Flour mills operated three shifts, but more husky men for the shipping departments were needed to permit full output. The Canadian Car and Foundry, Fort William, took on workers steadily. Pulp and paper mills required unskilled workers. The packing plants were still short of husky labourers, and men for the skilled trades. Sheet metal workers and turret lathe hands were required for industrial plants. Canning factories were in full operation.

From transportation companies many orders were anticipated since many students would be leaving Lakehead vessels and returning to school. Railways urgently needed labourers for track and maintenance work. Locomotive firemen were also needed. The introduction of women as street car operators in Winnipeg met with success, and they will be placed in garages and maintenance departments.

Building was active at Steep Rock, common labourers were in demand. In Saskatchewan skilled tradesmen and labourers were required for military projects. Contractors engaged on the new Edmonton airport had 1,200 men at work and needed more carpenters and labourers.

Waitresses and kitchen help were badly needed. Clerical help was asked for by the grain industry. There was a steady demand from banks, insurance and trust companies for experienced bookkeeping machine operators. Six women were placed as porters with an express company as an experimental group. A number of girls were transferred to Small Arms Limited, Toronto.

Pacific Region

With the assistance of students, Emergency Farm Labour Service, and casual help from local army units, agriculture had no immediate problem except for permanent farm help.

Fruit and vegetable harvesting had gone smoothly. The canneries were busy but the peak of fruit picking was a week away.

The acute shortage of loggers continued except in one or two interior districts where Japanese labour was being used effectively. Many camps without a reserve of logs faced a curtailment of milling operations. The main shortage of men was fellers and buckers. In Prince George area the shortage was very acute, but it seemed likely that some operators there would be successful in securing Japanese labour in the near future.

A few more men were employed in the coal mines on Vancouver Island, but in other fields little progress was made in securing additional coal miners. Base metal mines required skilled miners and some unskilled labourers. The C.M. & S. Company's mercury mine at Pinchi Lake was still short of men and Bralorne's mercury mine at Takla Landing had not come into production. Fifty students were soon to leave Kimberley mine.

The demand for large numbers of journeymen tradesmen continued from engineering plants and foundries in Vancouver and New Westminster. Marine electricians were sought by Vancouver and Victoria shipyards. The vacancies for skilled and semi-skilled workers were very numerous at the shipyards of Victoria and Prince Rupert. The aircraft industry required many workers but concentrated upon the recruitment of women. Plywood manufacturers increased orders for unskilled workers to replace students and teachers about to leave their temporary employment. Carpenters and building tradesmen were badly needed on high priority work at Vancouver and Prince Rupert. Construction labourers were required for wartime housing and airport construction in Prince Rupert and Prince George.

Railway companies sought section men and extra gang maintenance men. In Victoria some firms were training women bus drivers.

Restaurant workers were in heavy demand, and Vancouver, Victoria and Prince Rupert reported vacancies for competent stenographers and women clerks.

Applications for Employment; Vacancies and Placements; July, 1943

BUSINESS transacted by Employment and Selective Service Offices of the Unemployment Insurance Commission during the four-week period July 2, to July 29, 1943, as indicated by the average daily placements effected, showed an increase of 2.4 per cent over the previous five-week period May 28 to July 1, 1943, and a gain of 253.3 per cent over the month of July, 1942.

The accompanying chart shows the trend of employment since January, 1941, as represented by the ratios of vacancies notified and of placements effected for each one hundred applications for work, registered at Employment and Selective Service Offices throughout Canada. In viewing the graph it will be seen that the trend of the curve of vacancies in relation to applications took a slight down-

ward course, while that of placements followed an upward trend. The ratio of vacancies to each one hundred applications was 112.8 during the four weeks ending July 29, 1943, in contrast with 114.6 in the previous five weeks, May 28 to July 1, 1943, and 83.3 during July of the previous year and the ratio of placements to each one hundred applications was 77.8 as compared with 70.9 in the previous period and 48.6 for July, 1942.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the four-week period July 2 to July 29, 1943, was 10,650, as compared with 11,600 during the previous five weeks and with 3,567 in July last year.

During the period July 2 to July 29, 1943, the offices of the Commission referred 222,958 persons to vacancies and effected a total of 176,311 placements. Of these, the placements in regular employment were 172,508, of which 112,521 were of males and 59,987 of females, while placements in casual work totalled 3,803. The number of vacancies reported by employers was 166,547 for men and 89,050 for women, a total of 255,597, and applications for work numbered 226,622, of which 139,735 were from men and 86,887 from women. Reports for the four weeks May 28 to July 1, 1943 showed 336,388 positions available, 293,597 applications made and 208,032 placements effected, while in July, 1942, there were recorded 92,719 vacancies, 111,269 applications made and

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o

The average number of applications for employment received daily by the offices during the period under review was 9,443 in comparison with 10,124 during the previous period and 4,280 during July a year ago.

54,049 placements in regular and casual employment.

The following table gives the placements effected by employment offices, each year, from January, 1933, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943 (30 weeks).....	1,107,427	34,841	1,142,268

The average number of placements made daily by the offices during the four weeks ending July 29, 1943, was 7,346, of which 7,188 were in regular employment and 158 in work of one week's duration or less, as compared with a total daily average of 7,174 during the previous five weeks ending July 1, 1943. Placements in July, 1942, averaged 2,079 daily, consisting of 1,819 placements in regular and 260 in casual employment.

Unemployment in Trade Unions at the Close of July, 1943

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons, who are unemployed because of sickness, or who are engaged at work outside their own trades are not counted as unemployed, while reports from unions making returns vary from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only, to the organizations reporting.

Returns were tabulated at the end of July for 2,349 labour organizations, in which the total membership was 464,961 persons. Of

employment levels, as these percentages declined from $\cdot 3$ to $\cdot 2$ and from $\cdot 6$ to $\cdot 4$, respectively; little or no change took place in the other groups.

In table 1 the unemployment percentages are shown by provinces. At the close of July, these figures ranged from $\cdot 1$ per cent in Nova Scotia to $\cdot 7$ per cent in Quebec. As will be observed in the table, employment in Quebec, New Brunswick and Alberta showed noteworthy increases over the previous month, while in Nova Scotia, Ontario, Manitoba and Saskatchewan there were gains of lesser degree; the unemployment percentage of $\cdot 1$, as indicated in British Columbia, remained

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

these, 1,821, or a percentage of $\cdot 4$ were unemployed, to a large extent temporarily, in comparison with percentages of $\cdot 6$ in June and $1\cdot 8$ in July, a year ago. The Dominion unemployment percentage of $\cdot 4$ was the lowest attained in any month in the trade union records since these reports were placed on a monthly basis, as from January, 1919, and was identical with the previous low, which was recorded at the close of the second quarter, in 1918. The moderately higher employment level shown in July resulted largely from improved conditions for union members in the building and construction trades, as the percentage of unemployment in this group declined from $2\cdot 8$ to $1\cdot 4$. In addition to this expansion union members in the manufacturing and transportation industries reflected slightly higher

unchanged. As compared with the situation in July, a year ago, conditions were very much better for union members in Nova Scotia, Quebec, Ontario, Manitoba and Alberta, while in New Brunswick, Saskatchewan and British Columbia, there were fair employment increases.

A separate compilation is made each month of unemployment among trade unions in the largest city in each province, with the exception of Prince Edward Island. At the close of July, these percentages ranged from $\cdot 1$ in Halifax, Saint John, Regina and Vancouver to $\cdot 7$ in Montreal. Although not many members were involved in the changes, employment levels were substantially higher than in June in Saint John and Edmonton, as the percentages of members without work in these

cities stood at .1 and .2 in comparison with percentages of .7 and 1.3, respectively. The percentages of unemployed members in Montreal and Winnipeg were slightly lower at .7 and .6, thus reflecting minor employment expansions. The percentage of those without work in Halifax, Regina and Vancouver was .1 in each case, while in Toronto it was .3; the employment levels for these cities remained unchanged. In comparison with the situation in July, of the previous year, impressive employment expansion was indicated in Montreal, where the percentage declined from 5.0 to .7. Noteworthy increases in available work were observed, likewise, in Halifax, Toronto, Winnipeg and Edmonton, while minor improvements were reflected in reports received from unions in Saint John, Regina and Vancouver.

The accompanying chart shows the trend of unemployment from January, 1933 to date. The curve in July continued to move in a downward direction, reaching a new low and thus reflecting the highest employment level of the year to date. In comparison with July, a year ago, the point of the curve was much lower, thus indicating substantial employment expansion since that period.

For the manufacturing industries 854 reports were tabulated, having a combined membership of 267,514 persons, of whom, 553, or a percentage of .2 were without work in comparison with percentages of .3 in June and 2.1 in July, a year ago. As compared with the preceding month, unions of papermakers, union members in the printing and publishing trades, woodworkers and members in the garment trades, attained slightly higher employment levels; very little unemployment was apparent in any of these occupations. Leather, chemical, soft drink and unclassified manufacturing workers, registered minor increases in activity. The percentage of those without work among union members in the iron and steel trades, metal polishers, etc. and hat, cap and glove workers which, in each case stood at .1, remained unchanged; less than .1 per cent was indicated as unemployed for bakers and confectioners; this was identical also with that shown in June. Among those unions, in which the members were fully engaged at both dates were cigar and tobacco, textile and carpet workers, butchers, meat and fish packers, fur, rubber, jewellery, clay, glass and stone and mineral products workers. Among electric current employees, etc. a very slight employment contraction was indicated. In comparison with conditions in July, a year ago, garment workers, which group includes both men's and women's clothing workers, were much better employed, as the unemployment percentage for these members was down

from 10.5 to .1. The employment levels for union members in the iron and steel and printing and publishing trades were considerably higher also, as the percentages of those without work declined from .5 to .1 and from 1.6 to .2, respectively. Among unclassified manufacturing workers and leather workers, noteworthy advances in available work were noted, as the percentages of those without employment were down from 9.6 to 3.0 and from 9.7 to 5.0, respectively. Among those union members reported as fully engaged at both dates were soft drink, cigar and tobacco, textile and carpet workers, butchers, meat and fish packers, rubber, jewellery, aluminum and mineral products workers.

Returns were received from 59 unions of coal miners having a total membership of 20,182 persons, all of whom were reported as working in comparison with an unemployment percentage of .3 in June; no unemployment was indicated in July, 1942. As in June, union members in New Brunswick and British Columbia were reported as fully employed, while in Nova Scotia and Alberta the slight

advances in available work were sufficient to attain full employment.

For the metallic ores group, reports were tabulated from 4 unions, having a combined membership of 10,109 persons. Of these, 28, or a percentage of .3 were reported as without work. This percentage was identical with that of June; no unemployment was shown in July, a year ago.

Returns were received from 9 unions of non-metallic mineral workers, with an aggregate membership of 3,813 persons, of whom, 126, or a percentage of 3.3 were unemployed, in comparison with percentages of 2.8 in June and 2.9 in July, a year ago.

Unions in the building and construction trades returned 209 reports, showing a total membership of 35,096 persons. Of these, 493, or a percentage of 1.4 were unemployed in comparison with percentages of 2.8 in June and 4.2 in July, 1942. In comparison with the previous month, noteworthy employment expansion was in evidence among carpenters and joiners, as the percentage of those without work in this trade was down from 2.8 to 1.8, while plumbers and steamfitters and hod carriers and unclassified building workers indicated improved conditions, also; very little unemployment prevailed in these latter groups. For the comparatively small membership of granite and stonecutters, the percentage of unemployment declined sharply, thus reflecting a much better situation. The percentages as shown for steam shovel men, bridge and structural iron workers and electrical workers were respectively, 1.2, .3, and 0, or full employment; these were slightly lower than in June, thus denoting minor gains in activity. Wood, wire and metal lathers did not record any unemployment at either date, while for painters, decorators and paperhangers, the percentage of those without work remained unchanged at .1. Bricklayers, masons and plasterers indicated that 3.9 per cent of their membership was unemployed; this was slightly higher, thus reflecting a minor contraction in work. In comparison with returns tabulated in July, a year ago, pronounced betterment was observed for bricklayers, masons and plasterers and hod carriers and unclassified building workers as the unemployment percentages dropped to 3.9 and .2 respectively. Noteworthy expansion in work available was indicated likewise for carpenters and joiners, painters, decorators and paperhangers and plumbers and steamfitters. The percentages of unemployed members among steam shovel men, bridge and structural iron workers and granite and stonecutters showed marked declines, thus reflecting pronounced employment advances; but, as these memberships are

comparatively small, the changes did not influence the situation in the building trades to any great extent. Among electrical workers and wood, wire and metal lathers, there were minor gains in activity, which were sufficient to attain full employment for both groups.

In the transportation industries 883 reports were tabulated, having a combined membership of 83,348 persons, of whom, 334, or a percentage of .4 were without work, in comparison with percentages of .6 in June and 1.1 in July, 1942. Steam railway employees, whose returns constituted over 79 per cent of the entire group membership, indicated slightly better conditions, as the percentage of those without work, declined from .6 to .5. Among the smaller memberships, such as navigation workers and teamsters and chauffeurs, etc., minor increases in available work were recorded, while among street and electric railway employees, less than .1 per cent of the membership was without work; this percentage remained unchanged. In comparison with conditions in July, a year ago, much higher employment levels were manifested among navigation workers and steam railway employees. A very minor increase in available work was noted among street and electric railway employees, etc., while teamsters and chauffeurs did not report any unemployment at either date.

For the retail and wholesale trades, returns were received from 12 unions, having a total membership of 2,413 persons, all of whom were employed, as in the previous month and in July, a year ago.

For unions of civic employees 111 returns were tabulated with a total membership of 12,382 persons. As in June and in July of last year the unemployment percentage was negligible.

In the miscellaneous group of occupations reports were tabulated from 145 unions, in which the combined membership was 12,835 persons. Of these 116, or a percentage of .9 were unemployed, as compared with percentages of .8 in June and .7 in July, a year ago. In comparison with the preceding month, the unemployment percentage of .2 for both barbers and stationary engineers and firemen was slightly lower in each case, thus reflecting minor employment advances. Hotel and restaurant employees had an unemployment percentage of 3.1 which was indicative of a minor recession in available work. The percentages of those without employment among theatre and stage employees and unclassified workers were 1.1 and .1, respectively; these were slightly higher, thus manifesting reduced activity on a small scale. In comparison with the situation in July, 1942, theatre and stage employees and stationary engineers and fire-

men reflected appreciable increases in available work, while for barbers the percentage of employed members remained unchanged at .2. Unclassified workers reported a very minor employment contraction, while for hotel and restaurant employees there was a noteworthy recession in activity, as the unemployment percentage was up from .2 to 3.1.

Returns were tabulated from 2 unions of fishermen, in which the total membership was 2,750 persons, of whom, 5, or a percentage of .2 were without work, as compared with full employment in June, and .4 in July, 1942.

Reports were received from 5 unions of lumber workers and loggers, in which the total membership was reported as 4,605, all of whom were fully employed, as in the previous month and in July, a year ago.

Table I shows by provinces, the average percentage of union members who were unemployed each year from 1932 to 1942, inclusive and also, the percentage of unemployment for July of each year from 1932 to 1941, inclusive and from July, 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in table I.

Employment and Unemployment in Great Britain and the United States

Great Britain

The British *Ministry of Labour Gazette*, August, 1943, summarizes the July employment situation in Great Britain as follows:

The number of men and boys registered at Employment Exchanges in Great Britain as wholly unemployed at July 19 (exclusive of 19,349 men who had been classified by interviewing panels as unsuitable for ordinary industrial employment) was 48,521; those registered as on short time or otherwise temporarily suspended from work on the understanding that they were shortly to return to their former employment numbered 742; and those registered as unemployed casual workers (being persons who normally seek their livelihood by jobs of short duration) numbered 973. As compared with April 12, the latest date for which comparable statistics are available, the numbers wholly unemployed showed a decrease of 2,695, those temporarily suspended from work showed a decrease of 11, and unemployed casual workers showed a decrease of 896.

The corresponding figures for women and girls at July 19 were 22,608 wholly unemployed (exclusive of those, numbering 604, who had been classified by interviewing panels as unsuitable for normal full-time employment), 376 temporarily stopped, and 38 unemployed casual workers. Of the 22,608 wholly unemployed, 613 had been classified as unable for good cause to transfer to another area. As compared with April 12, the numbers wholly unemployed showed a decrease of 2,945, those temporarily stopped showed a decrease of 183, and unemployed casual workers showed a decrease of 103.

The number of applicants for unemployment benefit or allowances included in the foregoing totals for July 19 was 47,201, as compared with 55,679 at April 12, and 70,342 at July 13, 1942.

United States

The total number of workers in non-agricultural establishments in June 1943, was

38,328,000, which was 1,663,000 more than a year ago, and about 66,000 more than in May. The gain over the month reflects the addition of almost 100,000 workers to the manufacturing division and 62,000 to the transportation and public-utilities division. The only sizable decline (99,000 employees) was in construction and was brought about by the completion of many Federal construction contracts.

Industrial and Business Employment.—There were 13,778,000 wage earners employed in all manufacturing industries. Nearly 8 million of these, or 58 per cent, were in industries closely associated with the production of munitions—generally the metalworking, chemical, and rubber industries. A year ago, 51 per cent of manufacturing wage earners were in these industries; and in June 1939, the ratio was 36 per cent.
